The term “public authority” means a Federal, State, county, town, or township, Indian tribe, municipal or other local government or instrumentality with authority to finance, build, operate, or maintain toll or toll-free facilities.

The term “public lands highway” means a forest road under the jurisdiction of and maintained by a public authority and open to public travel or any highway through unappropriated or unreserved public lands, nontaxable Indian lands, or other Federal reservations under the jurisdiction of and maintained by a public authority and open to public travel.

The term “operational improvement” means a capital improvement for installation of traffic surveillance and control equipment, computerized signal systems, motorist information systems, integrated traffic control systems, incident management programs, and transportation demand management facilities, strategies, and programs and such other capital improvements to public roads as the Secretary may designate, by regulation; except that such term does not include resurfacing, restoring, or rehabilitating improvements, construction of additional lanes, interchanges, and grade separations, and construction of a new facility on a new location.

The term “urban area” means an urbanized area or, in the case of an urbanized area encompassing more than one State, that part of the urbanized area in each such State, or an urban place as designated by the Bureau of the Census having a population of five thousand or more and not within any urbanized area, within boundaries to be fixed by responsible State and local officials in cooperation with each other, subject to approval by the Secretary. Such boundaries shall, as a minimum, encompass the entire urban place designated by the Bureau of the Census, except in the case of cities in the State of Maine and in the State of New Hampshire.

The term “transportation enhancement activities” means, with respect to any project or the area to be served by the project, provision of facilities for pedestrians and bicycles, acquisition of scenic easements and scenic or historic sites, scenic or historic highway programs, landscaping and other scenic beautification, historic preservation, rehabilitation and operation of historic transportation buildings, structures, or facilities (including historic railroad facilities and canals), preservation of abandoned railway corridors (including the conversion and use thereof for pedestrian or bicycle trails), control and removal of outdoor advertising, archaeological planning and research, and mitigation of water pollution due to highway runoff.

(b) It is hereby declared to be in the national interest to accelerate the construction of the Federal-aid highway systems, including The Dwight D. Eisenhower System of Interstate and Defense Highways, since many of such highways,

or portions thereof, are in fact inadequate to meet the needs of local and interstate commerce, for the national and civil defense.

It is hereby declared that the prompt and early completion of The Dwight D. Eisenhower System of Interstate and Defense Highways, so named because of its primary importance to the national defense and hereafter referred to as the “Interstate System”, is essential to the national interest and is one of the most important objectives of this Act. It is the intent of Congress that the Interstate System be completed as nearly as practicable over the period of availability of the forty years’ appropriations authorized for the purpose of expediting its construction, reconstruction, or improvement, inclusive of necessary tunnels and bridges, through the fiscal year ending September 30, 1996, under section 108(b) of the Federal-Aid Highway Act of 1956 (70 Stat. 374), and that the entire system in all States be brought to simultaneous completion. Insofar as possible in consonance with this objective, existing highways located on an interstate route shall be used to the extent that such use is practicable, suitable, and feasible, it being the intent that local needs, to the extent practicable, suitable, and feasible, shall be given equal consideration with the needs of interstate commerce.

It is further declared that since the Interstate System is now in the final phase of completion it shall be the national policy that increased emphasis be placed on the construction and reconstruction of the other Federal-aid systems in accordance with the first paragraph of this subsection, in order to bring all of the Federal-aid systems up to standards and to increase the safety of these systems to the maximum extent.

(c) It is the sense of Congress that under existing law no part of any sums authorized to be appropriated for expenditure upon any Federal-aid system which has been apportioned pursuant to the provisions of this title shall be impounded or withheld from obligation, for purposes and projects as provided in this title, by any officer or employee in the executive branch of the Federal Government, except such specific sums as may be determined by the Secretary of the Treasury, after consultation with the Secretary of Transportation, are necessary to be withheld from obligation for specific periods of time to assure that sufficient amounts will be available in the Highway Trust Fund to defray the expenditures which will be required to be made from such fund.

(d) No funds authorized to be appropriated from the Highway Trust Fund shall be expended by or on behalf of any Federal department, agency, or instrumentality other than the Federal Highway Administration unless funds for such expenditure are identified and included as a line item in an appropriation Act and are to meet obligations of the United States heretofore or hereafter incurred under this title attributable to the construction of Federal-aid highways or highway planning, research, or development, or as otherwise specifically authorized to be appropriated from the Highway Trust Fund by Federal-aid highway legislation.

(e) It is the national policy that to the maximum extent possible the procedures to be uti-

lized by the Secretary and all other affected heads of Federal departments, agencies, and instrumentalities for carrying out this title and any other provision of law relating to the Federal highway programs shall encourage the substantial minimization of paperwork and inter-agency decision procedures and the best use of available manpower and funds so as to prevent needless duplication and unnecessary delays at all levels of government.

L. 103-331, title III, §335(a), Sept. 30, 1994, 108 Stat. 2494, which is not classified to the Code], for the fiscal year ending September 30, 1996. Nothing in this subsection shall be construed to authorize the appropriation of any sums to carry out sections 131, 136, or 319(b) of title 23, United States Code, or any provision of law relating to highway safety enacted after May 1, 1966. Beginning with funds authorized to be appropriated for fiscal year 1980, no such funds shall be available for projects to expand or clear zones immediately adjacent to the paved roadway of routes designed prior to February, 1967. Effective on and after the date of enactment of this sentence [Dec. 29, 1981], the obligation of funds authorized by this subsection, except for advance construction interstate projects approved before the date of enactment of this sentence, shall be limited to the construction necessary to provide a minimum level of acceptable service on the Interstate System which shall consist of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; (3) essential environmental requirements; (4) a design of not more than six lanes (exclusive of high occupancy vehicle lanes) in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes (exclusive of high occupancy vehicle lanes) in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census; and (5) those high occupancy vehicle lanes (including approaches and all directly related facilities) included in the interstate cost estimate for fiscal year 1981. The obligation of funds authorized by this subsection shall be further limited to the actual costs of only those design concepts, locations, geometrics, and other construction features included in the 1981 interstate cost estimate, except in any case where the Secretary of Transportation determines that a provision of Federal law requires a different design, location, geometric, or other construction feature of a type authorized by this subsection. Notwithstanding any other provision of law, including any other provision of this subsection, where a project is to be constructed (1) to provide parking garage ramps in conjunction with high occupancy vehicle lanes which flow into a distributor system emptying directly into ramps for off-street parking with preferential parking for carpools, vanpools, and buses and the ramps are part of an environmental mitigation effort and are designed to feed into an aerial walkway system, or (2) to provide a parking lot near the terminus of an Interstate System spur route which radiates from an Interstate System beltway which will be used as an intermodal transfer facility for a light rail transit project to be constructed in the median of the spur route and the parking lot is part of an environmental mitigation effort, or (3) to provide a parking garage and associated facilities as part of an intermodal transfer facility with a transit system near or within an Interstate System route right-of-way which will have direct and indirect access to the facility by way of local streets and the parking garage and associated facilities are part of an environmental mitigation effort, or (4) to provide for the comprehensive upgrading of existing high occupancy vehicle lanes, new ramps and parking facilities at mass transit intermodal transfer points on an existing Interstate System route which has temporary high occupancy vehicle lanes in the median and the parking facilities and ramps are part of an environmental mitigation effort, the costs of such parking garage ramps, parking lots, parking garages, associated interchange ramps, high occupancy vehicle lanes, and other associated work eligible under title 23, United States Code, shall be eligible for funds authorized by this subsection as if the costs for these projects were included in the 1981 interstate cost estimate and shall be included as eligible projects in any future interstate cost estimate. For purposes of this subsection, construction necessary

to provide a minimum level of acceptable service on the Interstate System shall include, but not be limited to, any construction on the Interstate System which is required under a court order issued before the date of enactment of this sentence. Notwithstanding the fifth sentence of this subsection, the costs of a project which will upgrade an interstate route and will complete a gap on the Interstate System providing access to an international airport and which was described as the preferred alternative in a final environmental impact statement submitted to the Secretary of Transportation on September 30, 1983, shall be eligible for funds authorized by this subsection as if such costs were included in the 1981 interstate cost estimate and shall be included as eligible costs in any future interstate cost estimate, except that (1) such costs may be further developed in the design and environmental process under normal Federal-aid interstate procedures, and (2) the amount of such costs shall not include the portion of the project between High Street and Causeway Street."

Section 127(b) of Pub. L. 97-424 provided that: "Notwithstanding the provisions of section 108(b) of the Federal-Aid Highway Act of 1956, as amended [set out above], the Secretary of Transportation may approve the expenditure of funds authorized under such section for the construction of a previously approved project which provides for improvements to and reconstruction of ramps and service roads which are being developed as part of a roadway system to relieve a severely congested segment on an Interstate route. Such expenditures shall be limited (1) to work necessary to provide more effective and safe operation of such Interstate route, and (2) to a section of an Interstate route which proceeded to construction contract prior to the date of enactment of such Act and which Interstate route, together with service roads, was constructed without the expenditure of any funds authorized by such section."

DEFINITION OF "SECRETARY"

§ 103. Federal-aid systems

(a) IN GENERAL.—For purposes of this title, the Federal-aid systems are the Interstate System and the National Highway System.

(b) NATIONAL HIGHWAY SYSTEM.—

(1) PURPOSE.—The purpose of the National Highway System is to provide an interconnected system of principal arterial routes which will serve major population centers, international border crossings, ports, airports, public transportation facilities, and other intermodal transportation facilities and other major travel destinations; meet national defense requirements; and serve interstate and interregional travel.

(2) COMPONENTS.—The National Highway System shall consist of the following:

(A) Highways designated as part of the Interstate System under subsection (e) and section 139 of this title.

(B) Other urban and rural principal arterials and highways (including toll facilities) which provide motor vehicle access between such an arterial and a major port, airport, public transportation facility, or other intermodal transportation facility. The States, in cooperation with local and regional officials, shall propose to the Secretary arterials and highways for designation to the National Highway System under this paragraph. In urbanized areas, the local officials shall act through the metropolitan planning organizations designated for such areas under section 134 of this title. The routes on the National Highway System, as shown on the map submitted by the Secretary to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate in 1991,

illustrating the National Highway System, shall serve as the basis for the States in proposing arterials and highways for designation to such system. The Secretary may modify or revise such proposals and submit such modified or revised proposals to Congress for approval in accordance with paragraph (3).

(C) A strategic highway network which is a network of highways which are important to the United States strategic defense policy and which provide defense access, continuity, and emergency capabilities for the movement of personnel, materiel, and equipment in both peace time and war time. Such highways may include highways on and off the Interstate System and shall be designated by the Secretary in consultation with appropriate Federal agencies and the States and be subject to approval by Congress in accordance with paragraph (3).

(D) Major strategic highway network connectors which are highways that provide motor vehicle access between major military installations and highways which are part of the strategic highway network. Such highways shall be designated by the Secretary in consultation with appropriate Federal agencies and the States and subject to approval by Congress in accordance with paragraph (3).

(3) APPROVAL OF DESIGNATIONS.—

(A) PROPOSED DESIGNATIONS.—Not later than 2 years after the date of the enactment of this section, the Secretary shall submit for approval to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives a proposed National Highway System with a list and description of highways proposed to be designated to the National Highway System under this subsection and a map showing such proposed designations. In preparing the proposed system, the Secretary shall consult appropriate local officials and shall use the functional reclassification of roads and streets carried out under subsection (c) of section 1006 of the Intermodal Surface Transportation Efficiency Act of 1991.

(B) APPROVAL OF CONGRESS REQUIRED.—After September 30, 1995, no funds made available for carrying out this title may be apportioned for the National Highway System or the Interstate maintenance program under this title unless a law has been approved designating the National Highway System.

(C) MAXIMUM MILEAGE.—The mileage of highways on the National Highway System shall not exceed 155,000 miles; except that the Secretary may increase or decrease such maximum mileage by not to exceed 15 percent.

(D) EQUITABLE ALLOCATIONS OF HIGHWAY MILEAGE.—The Secretary shall provide for equitable allocation of highway mileage on the National Highway System among the States.

(4) INTERIM SYSTEM.—For fiscal years 1992, 1993, 1994, and 1995, highways classified as prin-

cipal arterials by the States shall be treated as being on the National Highway System for purposes of this title.

(5) DESIGNATION OF NHS.—The National Highway System as submitted by the Secretary of Transportation on the map entitled “Official Submission, National Highway System, Federal Highway Administration”, and dated November 13, 1995, is hereby designated within the United States, including the District of Columbia and the Commonwealth of Puerto Rico.

(6) MODIFICATIONS TO NHS.—

(A) IN GENERAL.—Subject to paragraph (7), the Secretary may make modifications to the National Highway System that are proposed by a State or that are proposed by the State and revised by the Secretary if the Secretary determines that each of the modifications—

(i) meets the criteria established for the National Highway System under this title; and

(ii) enhances the national transportation characteristics of the National Highway System.

(B) COOPERATION.—In proposing modifications under this paragraph, a State shall cooperate with local and regional officials. In urbanized areas, the local officials shall act through the metropolitan planning organizations designated for such areas under section 134.

(7) TRANSITIONAL RULES FOR INTERMODAL CONNECTORS.—

(A) REQUIRED SUBMISSION.—Not later than 180 days after the date of the enactment of the National Highway System Designation Act of 1995, the Secretary shall submit for approval to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives modifications to the National Highway System that are proposed by a State or that are proposed by the State and revised by the Secretary and that consist of connectors to major ports, airports, international border crossings, public transportation and transit facilities, interstate bus terminals, and rail and other intermodal transportation facilities.

(B) COOPERATION.—Paragraph (6)(B) shall apply to modifications proposed by a State under this paragraph.

(C) ELIGIBILITY.—

(i) INITIAL APPROVAL BY LAW.—Modifications proposed under subparagraph (A) may take effect only if a law has been enacted approving such modifications.

(ii) INTERIM ELIGIBILITY.—Notwithstanding clause (i), a project to construct a connector to an intermodal transportation facility described in subparagraph (A) shall be eligible for funds apportioned under section 104(b)(1) for the National Highway System if the Secretary finds that the project is consistent with criteria developed by the Secretary for construction of such connectors.

(iii) PERIOD OF ELIGIBILITY.—A project which is eligible under clause (ii) for funds apportioned under section 104(b)(1) shall remain eligible for such funds pursuant to clause (ii) only until the date of the enactment of a law described in clause (i).

(D) MODIFICATIONS AFTER INITIAL APPROVAL.—After the date of the enactment of a law described in subparagraph (C)(i), a modification consisting of a connector to an intermodal transportation facility described in subparagraph (A) may be made in accordance with paragraph (6).

(8) CONGRESSIONAL HIGH PRIORITY CORRIDORS.—Upon the completion of feasibility studies, the Secretary shall add to the National Highway System any congressional high priority corridor or any segment thereof established by section 1105 of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 2031-2037) which was not identified on the National Highway System designated by paragraph (5).

[(c), (d) Repealed. Pub. L. 102-240, title I, § 1006(b)(1), Dec. 18, 1991, 105 Stat. 1925.]

(e) INTERSTATE SYSTEM.—

(1) DESIGNATION; MILEAGE LIMITATION.—The Interstate System shall be designated within the United States, including the District of Columbia, and, except as provided in paragraphs (2) and (3) of this subsection, it shall not exceed forty-one thousand miles in total extent. It shall be so located as to connect by routes, as direct as practicable, the principal metropolitan areas, cities, and industrial centers, to serve the national defense, and to the greatest extent possible, to connect at suitable border points with routes of continental importance in the Dominion of Canada and the Republic of Mexico. The routes of this system, to the greatest extent possible, shall be selected by joint action of the State highway departments of each State and the adjoining States, subject to the approval by the Secretary as provided in subsection (f) of this section. All highways or routes included in the Interstate System as finally approved, if not already coincident with the primary system, shall be added to said system without regard to the mileage limitation set forth in subsection (b) of this section. This system may be located both in rural and urban areas.

(2) MODIFICATIONS.—In addition to the mileage authorized by the first sentence of paragraph (1) of this subsection, there is hereby authorized additional mileage for the Interstate System of five hundred miles, to be used in making modifications or revisions in the Interstate System as provided in this paragraph. Upon the request of a State highway department the Secretary may withdraw his approval of any route or portion thereof on the Interstate System within that State selected and approved in accordance with this title, if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System (including urban routes necessary for metropolitan transportation) and will not be constructed as a part of the Interstate System, and if he re-

ceives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by such route or portion thereof. After the Secretary has withdrawn his approval of any such route or portion thereof the mileage of such route or portion thereof and the additional mileage authorized by the first sentence of this paragraph shall be available for the designation of interstate routes or portions thereof as provided in this subsection. The provisions of this title applicable to the Interstate System shall apply to all mileage designated under the third sentence of this paragraph. The Secretary shall not designate any Interstate route or portion thereof under authority of this paragraph after the date of enactment of the Federal Aid Highway Act of 1978.

(3) ADDITIONAL MILEAGE FOR IMPROVED EFFICIENCY.—In addition to the mileage authorized by paragraphs (1) and (2) of this subsection, there is hereby authorized additional mileage of not to exceed 1,500 miles for the designation of routes in the same manner as set forth in paragraph (1), in order to improve the efficiency and service of the Interstate System to better accomplish the purposes of that System.

(4) INTERSTATE SUBSTITUTE PROGRAM.—

(A) WITHDRAWAL OF APPROVAL.—Upon the joint request of a State Governor and the local governments concerned, the Secretary may withdraw approval of any route or portion thereof on the Interstate System which was selected and approved in accordance with this title, if the Secretary determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System and if the Secretary receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by the route or portion thereof.

(B) SUBSTITUTE PROJECTS.—When the Secretary withdraws approval under this paragraph, a sum equal to the Federal share of the cost to complete the withdrawn route or portion thereof, as that cost is included in the latest Interstate System cost estimate approved by Congress, or up to and including the 1983 interstate cost estimate, whichever is earlier, subject to increase or decrease, as determined by the Secretary based on changes in construction costs of the withdrawn route or portion thereof as of the date of approval of each substitute project under this paragraph, or the date of approval of the 1983 interstate cost estimate, whichever is earlier, shall be available to the Secretary to incur obligations for the Federal share of either public mass transit projects involving the construction of fixed rail facilities or the purchase of passenger equipment including rolling stock, for any mode of mass transit, or both, or highway construction projects on any public road, or both, which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or

the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located. Each project constructed under this paragraph on a Federal-aid system shall be subject to the provisions of this title applicable to such system. Each project constructed under this paragraph not on a Federal-aid system shall be subject to the provisions of this title applicable to projects on the Federal-aid secondary system.

(C) DEADLINE FOR WITHDRAWAL.—The Secretary shall not approve any withdrawal of a route under this paragraph after September 30, 1983—

(i) except that with respect to any route which on November 6, 1978, is under judicial injunction prohibiting its construction the Secretary may approve withdrawals until September 30, 1986, and

(ii) except that with respect to any route which on May 12, 1982, is under judicial injunction prohibiting its construction, the Secretary may approve withdrawals on such route until September 30, 1985.

(D) PROJECT APPROVAL; FEDERAL SHARE.—Approval by the Secretary of the plans, specifications, and estimates for a substitute project shall be deemed to be a contractual obligation of the Federal Government. The Federal share of each substitute project shall not exceed 85 percent of the cost thereof.

(E) AVAILABILITY OF FUNDS FOR SUBSTITUTE PROJECTS.—

(i) TIME PERIOD.—The sums apportioned and the sums allocated under this paragraph for public mass transit projects and for highway construction projects in a State shall remain available for obligation in such State for the fiscal year for which apportioned or allocated, as the case may be, and for the succeeding fiscal year. In the case of funds authorized to be appropriated for substitute transit projects under this paragraph for fiscal year 1993 and for substitute highway projects under this paragraph for fiscal year 1995, such funds shall remain available until expended.

(ii) REAPPORTIONMENT OR REALLOCATION.—Any sums which are apportioned or allocated to a State and are unobligated (other than an amount which, by itself, is insufficient to pay the Federal share of the cost of a substitute project which has been submitted by the State to the Secretary for approval) at the end of the period of availability established by clause (i) shall be apportioned or allocated, as the case may be, among those States which have obligated all sums (other than such an amount) apportioned or allocated, as the case may be, to them. Such reapportionments shall be in accordance with the latest approved or adjusted estimate of the cost of completing substitute projects, and

such reallocations shall be at the discretion of the Secretary.

(F) ADMINISTRATION OF TRANSIT FUNDS.—The sums obligated for mass transit projects under this paragraph shall become part of, and be administered through, the Urban Mass Transportation Fund.

(G) AUTHORIZATION OF APPROPRIATIONS FOR HIGHWAY PROJECTS.—For the fiscal year ending September 30, 1983, \$257,000,000 shall be available out of the Highway Trust Fund for expenditure at the discretion of the Secretary for projects under highway assistance programs. There shall be available, out of the Highway Trust Fund (other than the Mass Transit Account), to the Secretary for expenditure under this paragraph for projects under highway assistance programs \$700,000,000 per fiscal year for each of fiscal years 1984 and 1985, \$693,825,000 for fiscal year 1986, \$740,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991,¹ \$240,000,000 per fiscal year for each of fiscal years 1992, 1993, 1994, and 1995. Such sums may be obligated for transit substitute projects under this paragraph.

(H) DISTRIBUTION OF SUBSTITUTE HIGHWAY FUNDS.—

(i) BETWEEN DISCRETIONARY AND APPORTIONED PROGRAMS.—Subject to section 149(d) of the Federal-Aid Highway Act of 1987, 25 percent of the funds made available by subparagraph (G) for each of fiscal years 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991 for substitute highway projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 75 percent of such funds shall be apportioned in accordance with cost estimates approved by Congress or adjusted by the Secretary. For each of fiscal years 1992, 1993, 1994, and 1995, all funds made available by subparagraph (G) shall be apportioned in accordance with cost estimates adjusted by the Secretary.

(ii) FISCAL YEARS 1985, 1986, AND 1987 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives within 10 days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute highway projects for fiscal years 1985, 1986, and 1987.

(iii) FISCAL YEARS 1988–1995 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute highway projects under this paragraph and transmit the same to the Senate and the House of Representatives as soon as practicable after the date of the enactment of the Federal-Aid Highway Act of 1987. Upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making appor-

tionments for substitute highway projects for fiscal year 1988. If such estimate is not approved by Congress by September 30, 1987, the Secretary shall adjust such estimate in accordance with this clause and use the Federal share of the adjusted estimate in making apportionments for fiscal year 1988. The Secretary shall adjust such estimate annually thereafter in accordance with this clause and shall use the Federal share of such adjusted estimate in making apportionments for substitute highway projects for fiscal years 1989, 1990, 1991, 1992, 1993, 1994, and 1995. The adjustments required by this clause shall reflect previous withdrawals of interstate segments, changes in State estimates in the division of funds between substitute highway and transit projects, amounts made available in prior fiscal years, and the availability and reapportionment of funds under subparagraph (E).

(I) AUTHORIZATION OF APPROPRIATIONS FOR TRANSIT PROJECTS.—There are authorized to be appropriated for liquidation of obligations incurred for substitute transit projects under this paragraph the sums provided in section 4(g)² of the Federal Transit Act.

(J) DISTRIBUTION OF SUBSTITUTE TRANSIT FUNDS.—

(i) BETWEEN DISCRETIONARY AND APPORTIONED PROGRAMS.—Fifty percent of the funds appropriated for each fiscal year beginning after September 30, 1983, and ending before October 1, 1991³ for carrying out substitute transit projects under this paragraph shall be distributed at the discretion of the Secretary. The remaining 50 percent of such funds shall be apportioned in accordance with cost estimates approved by Congress or adjusted by the Secretary. 100 percent of funds appropriated for each of fiscal years 1992 and 1993 shall be apportioned in accordance with cost estimates adjusted by the Secretary.

(ii) FISCAL YEARS 1985, 1986, AND 1987 APPORTIONMENTS.—The Secretary shall make a revised estimate of the cost of completing substitute transit projects under this paragraph and transmit the same to the Senate and the House of Representatives within 10 days subsequent to January 2, 1984, and upon approval by Congress, the Secretary shall use the Federal share of such approved estimate in making apportionments for substitute transit projects for fiscal years 1985, 1986, and 1987.

The Secretary shall adjust such estimate annually thereafter in accordance with this clause and shall use the Federal share of such adjusted estimate in making apportionments for substitute transit projects for fiscal years 1989, 1990, 1991, 1992, and 1993. The adjustments required by this clause shall reflect previous withdrawals of Interstate segments, changes in State estimates in the division of funds between substitute highway and transit projects, amounts made available in prior fiscal years, and the availability and reapportionment of funds under subparagraph (E).

(K) REDUCTION OF INTERSTATE APPORTIONMENT.—

(i) IN GENERAL.—Unobligated apportionments for the Interstate System in any State where a withdrawal is approved under this paragraph shall, on the date of such approval, be reduced in the proportion that the Federal share of the cost of the withdrawn route or portion thereof bears to the Federal share of the total cost of all interstate routes in that State as reflected in the latest cost estimate approved by the Congress.

(ii) EXCEPTION.—In any State where the withdrawal of an interstate route or portion thereof has been approved under this section prior to the date of the enactment of the Federal-Aid Highway Act of 1976, the unobligated apportionments for the Interstate System in that State on such date of enactment shall be reduced in the proportion that the Federal share of the cost to complete such route or portion thereof, as shown in the latest cost estimate approved by Congress prior to such approval of withdrawal, bears to the Federal share of the cost of all interstate routes in that State, as shown in such cost estimate; except that the amount of such proportional reduction shall be credited with the amount of any reduction in such State's Interstate apportionment which was attributable to the Federal share of any substitute project approved under this paragraph before such date of enactment.

(L) APPLICABILITY OF CHAPTER 53 OF TITLE 49.—

(i) SUPPLEMENTARY FUNDS.—Funds available for expenditure to carry out the purposes of this paragraph shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to chapter 53 of title 49.

(i) ENFORCEMENT.—Of sums apportioned or allocated under this paragraph to a State, the Secretary shall not obligate for projects in such State an amount equal to the amount of Federal funds expended to purchase the right-of-way for any withdrawn route or portion thereof if the right-of-way is not first disposed of (or applied to a project in accordance with paragraph (5)(B), (6)(B), or (7)) by the State.

(ii) LIMITATION ON APPLICABILITY.—Clause (i) shall not apply to sums apportioned or allocated under this paragraph to a State for a fiscal year if the projected total amount of funds to be apportioned and allocated under this paragraph to such State in succeeding fiscal years exceeds the amount of Federal funds expended to purchase the right-of-way.

(iii) RELEASE OF FUNDS.—The Secretary may obligate for projects in a State under this paragraph any funds withheld from obligation in such State if the State repays an equivalent amount in accordance with paragraph (5)(B), (6)(B), or (7), as the case may be, or if the Secretary determines that such repayment is not required under such paragraph.

(5) LIMITATION ON REFUNDS FOR WITHDRAWALS BEFORE NOVEMBER 6, 1978.—Notwithstanding any other provision of law, in the case of any withdrawal of approval before November 6, 1978—

(A) upon the withdrawal of approval of any route or portion thereof on the Interstate System under this section, a State, subject to the approval of the Secretary, shall not be required to refund to the Highway Trust Fund any sums paid to the State for intangible costs;

(B) refund will not be required for the costs of construction items, materials, or rights-of-way of the withdrawn route or portion of the Interstate System which will be or have been applied (i) to a transportation project permissible under this title, (ii) to a public conservation or public recreation pur-

pose, or (iii) to such other public purpose as may be determined by the Secretary to be in the public interest on condition that the State shall make assurances satisfactory to the Secretary that such construction items or materials or rights-of-way have been or will be so applied by the State of any political subdivision thereof to a project under clause (i), (ii), or (iii) within 10 years from the date of the withdrawal of approval.

(6) LIMITATION ON REFUNDS FOR WITHDRAWALS ON AND AFTER NOVEMBER 6, 1978.—Notwithstanding any other provision of law—

(A) in the case of any withdrawal of approval on or after November 6, 1978, of a route or portion thereof on the Interstate System, a State, subject to the approval of the Secretary, shall not be required to refund to the Highway Trust Fund any sums paid to the State for intangible costs;

(B) in the case of any withdrawal of approval on or after November 6, 1978, of any route or portion thereof on the Interstate System under this section, a State shall not be required to refund to the Highway Trust Fund the costs of construction items, materials, or rights-of-way of the withdrawn route or portion thereof if such items, materials, and rights-of-way were acquired before November 6, 1978, if by the date of withdrawal of approval the Secretary has not approved the environmental impact statement required by the National Environmental Policy Act of 1969, and if such construction items, materials, or rights-of-way will be or have been applied (i) to a transportation project permissible under this title, (ii) to a public conservation or public recreation purpose, or (iii) to any other public purpose determined by the Secretary to be in the public interest on condition that the State gives assurances satisfactory to the Secretary that such construction items, materials, or rights-of-way have been or will be so applied by the State, or any political subdivision thereof, to a project under clause (i), (ii), or (iii) within ten years from the date of withdrawal of approval.

(7) ADDITIONAL LIMITATION ON REFUNDS.—In any case where a withdrawal of approval of a route or portion thereof on the Interstate System on or after November 6, 1978, does not come within the provisions of paragraph (6)(B) of this subsection, the State shall refund to the Highway Trust Fund the costs of construction items, materials, and rights-of-way of the withdrawn route or portion thereof, except that if the State gives assurances satisfactory to the Secretary that such items, materials, and rights-of-way have been or will be applied to a transportation project permissible under this title within ten years from the date of withdrawal of approval, the amount of such repayment shall be the difference between the amount received for such items, materials, and rights-of-way and the amount which would be received in accordance with the current Federal share applicable to the transportation project to which such items, materials, and rights-of-way were or are to be applied.

(8) PROTECTION OF PROPERTY RIGHTS.—Nothing in this subsection shall in any way alter rights under State law of persons owning property within the right-of-way immediately prior to such property being obtained by the State. The Federal share of the cost of property sold or otherwise transferred to previous owners under State law shall be refunded and credited to the unobligated balance of the State's apportionment for interstate highways.

(9) LIMITATION ON FUNDING OF MODIFIED MILEAGE PROJECTS.—Interstate mileage authorized for any State and withdrawn and transferred under the provisions of paragraph (2) of this subsection after the date of enactment of the Federal-Aid Highway Act of 1976, must be constructed by the State receiving such mileage as part of its Interstate System. Any State receiving such transfer of mileage may not, with respect to that transfer, avail itself of the optional use of Interstate funds under the second sentence of paragraph (4) of this subsection.

(f) The Secretary shall have authority to approve in whole or in part the Interstate System, as and when such systems or portions thereof are designated, or to require modifications or revisions thereof.

(g) The Secretary, on July 1, 1974, shall remove from designation as a part of the Interstate System each segment of such system for which a State has not notified the Secretary that such State intends to construct such segment, and which the Secretary finds is not essential to completion of a unified and connected Interstate System. Any segment of the Interstate System, with respect to which a State has not submitted by July 1, 1975, a schedule for the expenditure of funds for completion of construction of such segment or alternative segment within the period of availability of funds authorized to be appropriated for completion of the Interstate System, and with respect to which the State has not provided the Secretary with assurances satisfactory to him that such schedule will be met, shall be removed from designation as a part of the Interstate System. No segment of the Interstate System removed under the authority of the preceding sentence shall thereafter be designated as a part of the Interstate System except as the Secretary finds necessary in the interest of national defense or for other reasons of national interest. This subsection shall not be applicable to any segment of the Interstate System referred to in section 23(a) of the Federal-Aid Highway Act of 1968.

(h) Notwithstanding subsections (e)(2) and (g) of this section, in any case where a segment of the Interstate System was a designated part of such System on June 1, 1973, and is entirely within the boundaries of an incorporated city and such city enters into an agreement with the Secretary to pay all non-Federal costs of construction of such segment, such segment shall be constructed.

(i) ELIGIBLE PROJECTS FOR NHS.—Subject to project approval by the Secretary, funds apportioned to a State under section 104(b)(1) for the National Highway System may be obligated for any of the following:

(2) Operational improvements for segments of such system.

(3) Construction of, and operational improvements for, a Federal-aid highway not on the National Highway System and construction of a transit project eligible for assistance under chapter 53 of title 49—

(A) if such highway or transit project is in the same corridor as, and in proximity to, a fully access controlled highway designated to the National Highway System;

(B) if the construction or improvements will improve the level of service on the fully access controlled highway and improve regional travel; and

(C) if the construction or improvements are more cost effective than an improvement to the fully access controlled highway that has benefits comparable to the benefits which will be achieved by the construction of, or improvements to, the highway not on the National Highway System.

L. 94-280 [set out in the text] as follows: "Upon the joint request of a State Governor and the local governments concerned, the Secretary may withdraw his approval of any route or portion thereof on the Interstate System within any urbanized area in that State selected and approved in accordance with this title prior to the enactment of this paragraph, if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System or will no longer be essential by reason of the application of this paragraph and will not be constructed as a part of the Interstate System, and if he receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by such route or portion thereof. The mileage of the route or portion thereof of approval of which is withdrawn under this paragraph shall be available for designation on the Interstate System in any other State in accordance with paragraph (1) of this subsection. After the Secretary has withdrawn his approval of any such route or portion thereof, whenever responsible local officials of such urbanized area notify the State highway department that, in lieu of a route or portion thereof approval for which is withdrawn under this paragraph, their needs require a nonhighway public mass transit project involving the construction of fixed rail facilities, or the purchase of passenger equipment, including rolling stock for any mode of mass transit, or both, and the State highway department determines that such public mass transit project is in accordance with the planning process under section 134 of this title and is entitled to priority under such planning process, such public mass transit project shall be submitted for approval to the Secretary. Approval of the plans, specifications, and estimates for such project by the Secretary shall be deemed a contractual obligation of the United States for payment out of the general funds in the Treasury of

its proportional share of the cost of such project in an amount equal to the Federal share which would be paid for such a project under the Urban Mass Transportation Act of 1964 [section 1601 et seq. of Title 49, Transportation], except that the total Federal cost of all such projects under this paragraph with respect to such route or portion thereof approval of which is withdrawn under this paragraph, shall not exceed the Federal share of the cost which would have been paid for such route or portion thereof, as such cost is included in the 1972 Interstate System cost estimate set forth in table 5 of House Public Works Committee Print Numbered 92-29, as revised in House Report Numbered 92-1443, increased or decreased, as the case may be, as determined by the Secretary, based on changes in construction costs of such route or portion thereof as of the date of withdrawal of approval under this paragraph and in accordance with that design of such route or portion thereof which is the basis of such 1972 cost estimate. Funds apportioned to such State for the Interstate System, which apportionment is based upon an Interstate System cost estimate that includes a route or portion thereof approval of which is withdrawn under this paragraph, shall be reduced by an amount equal to the Federal share of such project as such share becomes a contractual obligation of the United States. No general funds shall be obligated under authority of this paragraph after June 30, 1981. No nonhighway public mass transit project shall be approved under this paragraph unless the Secretary has received assurances satisfactory to him from the State that public mass transportation systems will fully utilize the proposed project. The provision of assistance under this paragraph shall not be construed as bringing within the application of chapter 15 of title 5, United States Code [section 1501 et seq. of Title 5, Government Organization and Employees], any nonsupervisory employee of an urban mass transportation system (or of any other agency or entity performing related functions) to whom such chapter is otherwise inapplicable. Funds available for expenditure to carry out the purposes of this paragraph shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964, as amended [section 1601 et seq. of Title 49, Transportation]. The provisions of section 3(e)(4) of the Urban Mass Transportation Act of 1964, as amended, [section 1602 (e)(4) of Title 49], shall apply in carrying out this paragraph."

In making such determination, the Secretary shall take into account the unexpended balance of

any sums deducted for such purposes in prior years. The sum so deducted shall be available for expenditure from the unexpended balance of any appropriation made at any time for expenditure upon the Federal-aid systems, until such sum has been expended.

(b) On October 1, of each fiscal year except as provided in paragraph (5)(A) of this subsection, the Secretary, after making the deduction authorized by subsection (a) of this section and the set asides authorized by subsection (f) of this section and section 307 of this title, shall apportion the remainder of the sums authorized to be appropriated for expenditure on the surface transportation program, the congestion mitigation and air quality improvement program, the National Highway System, and the Interstate System for that fiscal year, among the several States in the following manner:

(1) NATIONAL HIGHWAY SYSTEM.—For the National Highway System 1 percent to the Virgin Islands, Guam, American Samoa, and the Commonwealth of Northern Mariana Islands and the remaining 99 percent apportioned in the same ratio as funds are apportioned under paragraph (3).

(2) CONGESTION MITIGATION AND AIR QUALITY IMPROVEMENT PROGRAM.—For the congestion mitigation and air quality improvement program, in the ratio which the weighted nonattainment area population of each State bears to the total weighted nonattainment area population of all States. The weighted nonattainment area population shall be calculated by multiplying the population of each area within any State that was a nonattainment area (as defined in section 171(2) of the Clean Air Act (42 U.S.C. 7501(2))) for ozone during any part of fiscal year 1994 by a factor of—

(A) 1.0 if the area is classified as a marginal ozone nonattainment area under subpart 2 of part D of title I of the Clean Air Act;

(B) 1.1 if the area is classified as a moderate ozone nonattainment area under such subpart;

(C) 1.2 if the area is classified as a serious ozone nonattainment area under such subpart;

(D) 1.3 if the area is classified as a severe ozone nonattainment area under such subpart;

or

(E) 1.4 if the area is classified as an extreme ozone nonattainment area under such subpart.

If the area was also classified under subpart 3 of part D of title I of such Act as a nonattainment area for carbon monoxide during any part of fiscal year 1994, for purposes of calculating the weighted nonattainment area population, the weighted nonattainment area population of the area, as determined under the preceding provisions of this paragraph, shall be further multiplied by a factor of 1.2. Notwithstanding any provision of this paragraph, in the case of States with a total 1990 census population of 15,000,000 or greater, the amount apportioned under this paragraph in a fiscal year to all of such States in the aggregate, shall be distributed among such States based on their relative populations; except that none of such States shall be distributed more than 42 percent of the aggregate amount so apportioned to all of such States. Notwithstanding any other provision of this paragraph, each State shall receive a minimum

apportionment of $\frac{1}{2}$ of 1 percent of the funds apportioned under this paragraph. The Secretary shall use estimates prepared by the Secretary of Commerce when determining population figures.

(3) SURFACE TRANSPORTATION PROGRAM.—

(A) GENERAL RULE.—For the surface transportation program in a manner so that a State's current percentage share of apportionments is equal to the State's 1987–1991 percentage share of apportionments. For purposes of this paragraph—

(i) a State's current percentage share of apportionments is the State's percentage share of all funds apportioned for a fiscal year under paragraph (1) for the National Highway System, under section 144 for the bridge program, under paragraph (5)(B) for Interstate maintenance, and under this paragraph; and

(ii) a State's 1987–1991 percentage share of apportionments is the State's percentage share of all apportionments and allocations under this title for fiscal years 1987, 1988, 1989, 1990, and 1991 (except apportionments and allocations for Interstate construction under sections 104(b)(5)(A) and 118, Interstate highway substitute under section 103(e)(4), Federal lands highways under section 202, and emergency relief under section 125, all allocations under section 149 of the Surface Transportation and Uniform Relocation Assistance Act of 1987, and the portion of allocations under section 157 (relating to minimum allocation) that would be attributable to apportionments made under Interstate construction and Interstate highway substitute programs under sections 104(b)(5)(A) and 103(e)(4), respectively, for such fiscal years if the minimum allocation percentage for such fiscal years had been 90 percent instead of 85 percent).

(B) CALCULATION RULES.—In calculating a State's percentage share under this paragraph for the purpose of making apportionments for fiscal years 1992, 1993, 1994, 1995, 1996, and 1997, each State shall be treated as having received $\frac{1}{2}$ of 1 percent of all funds apportioned for the Interstate construction program under section 104(b)(5)(A) in fiscal years 1987, 1988, 1989, 1990, and 1991. Notwithstanding any other provision of this paragraph, in any fiscal year no State shall receive a percentage of total apportionments and allocations that is less than 70 percent of its percentage of total apportionments and allocations for fiscal years 1987, 1988, 1989, 1990, and 1991, except for those States that receive an apportionment for Interstate construction under paragraph (5)(A) of more than \$50,000,000 for fiscal year 1992.

(4) For the Interstate System, for the fiscal years ending June 30, 1957, June 30, 1958, and June 30, 1959:

One-half in the ratio which the population of each State bears to the total population of all the States as shown by the latest available Federal census, except that no States shall receive less than three-fourths of 1 per centum of the funds so apportioned; and one-half in the manner provided in paragraph (1) of this subsection. The sums authorized by section

108(b) of the Federal-Aid Highway Act of 1956 for the fiscal years ending June 30, 1958, and June 30, 1959, shall be apportioned on a date not less than six months and not more than twelve months in advance of the beginning of the fiscal year for which authorized.

For the fiscal years 1960 through 1966, in the ratio which the estimated cost of completing the Interstate System in such State, as determined and approved in the manner provided in this paragraph, bears to the sum of the estimated cost of completing the Interstate System in all of the States. For the fiscal years 1967 through 1990, in the ratio which the Federal share of the estimated cost of completing the Interstate System in such State, as determined and approved in the manner provided in this paragraph, bears to the sum of the estimated cost of the Federal share of completing the Interstate System in all of the States. Each apportionment herein authorized for the fiscal years 1960 through 1996, inclusive, shall be made on October 1 of the year preceding the fiscal year for which authorized. As soon as the standards provided for in subsection (b) of section 109 of this title have been adopted, the Secretary, in cooperation with the State highway departments, shall make a detailed estimate of the cost of completing the Interstate System as then designated, after taking into account all previous apportionments made under this section, based upon such standards and in accordance with rules and regulations adopted by him and applied uniformly to all of the States. Whenever the Secretary, pursuant to this subsection, requests and receives estimates of cost from the State highway departments, he shall furnish copies of such estimates at the same time to the Senate and the House of Representatives. The Secretary shall not include in any estimate submitted under this provision after December 31, 1978, any cost of a project to expand or clear zones immediately adjacent to the paved roadway of routes designed prior to February, 1967. Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, including the amendments made by section 4 of the Federal-Aid Highway Act of 1981. As soon as practicable after the date of the enactment of the Intermodal Surface Transportation Efficiency Act of 1991 for fiscal year 1992, and on October 1 of each of fiscal years 1993, 1994, and 1995, the Secretary shall make the apportionment required by this subparagraph for all States (other than Massachusetts) using the Federal share of the last estimate submitted to Congress, adjusted to reflect (i) all previous credits, apportionments of interstate construction funds, and lapses of previous apportionments of interstate construction funds, (ii) previous withdrawals of interstate segments, (iii) previous allocations of interstate discretionary funds, and (iv) transfers of interstate construction funds. Notwithstanding any other provision of this subparagraph or any cost estimate approved or adjusted pursuant to this subparagraph, subject to the deductions under this section, the amounts to be apportioned to the State of Massachusetts pursuant to this subparagraph for fiscal years 1993, 1994, 1995, and 1996 shall be as follows: \$450,000,000 for fiscal year 1993, \$800,000,000 for fiscal year 1994, \$800,000,000 for fiscal year 1995, and \$500,000,000 for fiscal year 1996. If, before apportionment of funds under this subparagraph for any fiscal year, the Secretary and a State highway department agree that a portion of the apportionment to such State is not needed for such fiscal year, the amount of such portion shall be made available under section 118(b)(2)¹ of this title.

(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

55 per centum in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title and routes on the Interstate System designated under section 139(a) of this title before March 9, 1984,² (other than those on toll roads not subject to a Secretarial agreement provided for in sec-

tion 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 45 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title and routes on the Interstate System designated under section 139(a) of this title before March 9, 1984,² (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.

(6) For the Federal-aid urban systems:

In the ratio which the population in urban areas, or parts thereof, in each State bears to the total population in such urban areas, or parts thereof, in all the States as shown by the latest available Federal census. No State shall receive less than one-half of 1 per centum of each year's apportionment.

(c) TRANSFERABILITY OF NHS APPORTIONMENTS.—A State may transfer not to exceed 50 percent of the State's apportionment under subsection (b)(1) to the apportionment of the State under subsection (b)(3). A State may transfer not to exceed 100 percent of the State's apportionment under subsection (b)(1) to the apportionment of the State under subsection (b)(3) if the State requests to make such transfer and the Secretary approves such transfer as being in the public interest, after providing notice and sufficient opportunity for public comment. Section 133(d) shall not apply to funds transferred under this subsection.

(d) OPERATION LIFESAVER AND HIGH SPEED RAIL CORRIDORS.—

(1) OPERATION LIFESAVER.—The Secretary shall expend, from administrative funds deducted under subsection (a), \$300,000 for each fiscal year for carrying out a public information and education program to help prevent and reduce motor vehicle accidents, injuries, and fatalities and to improve driver performance at railway-highway crossings.

(2) RAILWAY-HIGHWAY CROSSING HAZARD ELIMINATION IN HIGH SPEED RAIL CORRIDORS.—
(A) Before making an apportionment of funds under subsection (b)(3) for a fiscal year, the Secretary shall set aside \$5,000,000 of the funds authorized to be appropriated for the surface transportation program for such fiscal year for elimination of hazards of railway-highway crossings in not to exceed 5 railway corridors selected by the Secretary in accordance with the criteria set forth in this paragraph.

(B) A corridor selected by the Secretary under subparagraph (A) must include rail lines where railroad speeds of 90 miles per hour are occurring or can reasonably be expected to occur in the future.

(3) In making the determination required by paragraph (2)(A), the Secretary shall consider projected rail ridership volumes in such corridors, the percentage of the corridor over

which a train will be capable of operating at its maximum cruise speed taking into account such factors as topography and other traffic on the line, projected benefits to nonriders such as congestion relief on other modes of transportation serving the corridors (including congestion in heavily traveled air passenger corridors), the amount of State and local financial support that can reasonably be anticipated for the improvement of the line and related facilities, and the cooperation of the owner of the right-of-way that can reasonably be expected in the operation of high speed rail passenger service in such corridors.

(e) On October 1, of each fiscal year the Secretary shall certify to each of the State highway departments the sums which he has apportioned hereunder (other than under subsection (b)(5) of this section) to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. On October 1 of the year preceding the fiscal year for which authorized, the Secretary shall certify to each of the State highway departments the sums which he has apportioned under subsection (b)(5) of this section to each State for such fiscal year, and also the sums which he has deducted for administration and research pursuant to subsection (a) of this section. To permit the States to develop adequate plans for the utilization of apportioned sums, the Secretary shall advise each State of the amount that will be apportioned each year under this section not later than ninety days before the beginning of the fiscal year for which the sums to be apportioned are authorized, except that in the case of the Interstate System the Secretary shall advise each State ninety days prior to the apportionment of such funds.

(f)(1) On October 1 of each fiscal year, the Secretary, after making the deduction authorized by subsection (a) of this section, shall set aside not to exceed 1 percent of the remaining funds authorized to be appropriated for expenditure upon programs authorized under this title, for the purpose of carrying out the requirements of section 134 of this title, except that the amount from which such set aside is made shall not include funds authorized to be appropriated for the Interstate construction and Interstate substitute programs.

(2) These funds shall be apportioned to the States in the ratio which the population in urbanized areas or parts thereof, in each State bears to the total population in such urbanized areas in all the States as shown by the latest available census, except that no State shall receive less than one-half per centum of the amount apportioned.

(3) The funds apportioned to any State under paragraph (2) of this subsection shall be made available by the State to the metropolitan planning organizations responsible for carrying out the provisions of section 134 of this title, except that States receiving the minimum apportionment under paragraph (2) may, in addition, subject to the approval of the Secretary, use the funds apportioned to finance transportation planning outside of urbanized areas. These funds shall be matched in accordance with section

120(j)³ of this title unless the Secretary determines that the interests of the Federal-aid highway program would be best served without such matching.

(4) The distribution within any State of the planning funds made available to agencies under paragraph (3) of this subsection shall be in accordance with a formula developed by each State and approved by the Secretary which shall consider but not necessarily be limited to, population, status of planning, attainment of air quality standards, metropolitan area transportation needs, and other factors necessary to provide for an appropriate distribution of funds to carry out the requirements of section 134 and other applicable requirements of Federal law.

(5) DETERMINATION OF POPULATION FIGURES.—For the purposes of determining population figures under this subsection, the Secretary shall use the most recent estimate published by the Secretary of Commerce.

(g) Not more than 40 per centum of the amount apportioned in any fiscal year to each State in accordance with sections 130, 144, and 152 of this title may be transferred from the apportionment under one section to the apportionment under any other of such sections if such a transfer is requested by the State highway department and is approved by the Secretary as being in the public interest. The Secretary may approve the transfer of 100 per centum of the apportionment under one such section to the apportionment under any other of such sections if such transfer is requested by the State highway department, and is approved by the Secretary as being in the public interest, if he has received satisfactory assurances from such State highway department that the purposes of the program from which such funds are to be transferred have been met. A State may transfer not to exceed 50 percent of the State's apportionment under section 144 in any fiscal year to the apportionment of such State under subsection (b)(1) or subsection (b)(3) of this section. Any transfer to subsection (b)(3) shall not be subject to section 133(d). Nothing in this subsection authorizes the transfer of any amount apportioned from the Highway Trust Fund to any apportionment of the funds for which were not from the Highway Trust Fund, and nothing in this subsection authorizes the transfer of any amount apportioned from funds not from the Highway Trust Fund to any apportionment of the funds for which were from the Highway Trust Fund.

(h) NATIONAL RECREATIONAL TRAILS FUNDING.—In addition to funds made available from the National Recreational Trails Trust Fund, the Secretary shall obligate, from administrative funds (contract authority) deducted under subsection (a), to carry out section 1302 of the Intermodal Surface Transportation Efficiency Act of 1991 (16 U.S.C. 1261) \$15,000,000 for each of fiscal years 1996 and 1997 and \$7,500,000 for the period of October 1, 1997, through March 31, 1998.

(i) WOODROW WILSON MEMORIAL BRIDGE.—

(1) EXPENDITURE.—From any available administrative funds deducted under subsection (a), the Secretary shall obligate such sums as are necessary for each of fiscal years 1996 and

1997, and for the period of October 1, 1997, through March 31, 1998, for the rehabilitation of the Woodrow Wilson Memorial Bridge and for environmental studies and documentation, planning, preliminary engineering and design, and final engineering for a new crossing of the Potomac River as part of the Project, as defined by section 404 of the Woodrow Wilson Memorial Bridge Authority Act of 1995.

(2) FEDERAL SHARE.—The Federal share of the cost of any project funded with amounts expended under paragraph (1) shall be 100 percent.

(j) The Secretary shall submit to Congress not later than the 20th day of each calendar month which begins after the date of enactment of this subsection a report on (1) the amount of obligation, by State, for Federal-aid highways and the highway safety construction programs during the preceding calendar month, (2) the cumulative amount of obligation, by State, for that fiscal year, (3) the balance as of the last day of such preceding month of the unobligated apportionment of each State by fiscal year, and (4) the balance of unobligated sums available for expenditure at the discretion of the Secretary for such highways and programs for that fiscal year.

§ 106. Plans, specifications, and estimates

(a) Except as provided in this section and section 117 of this title, the State highway department shall submit to the Secretary for his approval, as soon as practicable after program approval, such surveys, plans, specifications, and estimates for each proposed project included in an approved program as the Secretary may require. The Secretary shall act upon such surveys, plans, specifications, and estimates as soon as practicable after the same have been submitted, and his approval of any such project shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto. In taking such action, the Secretary shall be guided by the provisions of section 109 of this title.

(b) SPECIAL RULES.—

(1) 3R PROJECTS ON NHS.—Notwithstanding any other provision of this title, a State highway department may approve, on a project by project basis, plans, specifications, and estimates for projects to resurface, restore, and rehabilitate highways on the National Highway System if the State certifies that all work will meet or exceed the standards approved by the Secretary under section 109(c).

(2) NON-NHS PROJECTS AND LOW-COST NHS PROJECTS.—Any State may request that the Secretary no longer review and approve plans, specifications, and estimates for any project (including any highway project on the National Highway System with an estimated construction cost of less than \$1,000,000 but excluding any other highway project on the National Highway System). After receiving any such notification, the Secretary shall undertake project review only as requested by the State.

(3) SAFETY CONSIDERATIONS.—Safety considerations for projects subject to this subsection may be met by phase construction consistent with an operative safety management system established in accordance with section 303.

(c) LIMITATION ON ESTIMATES FOR CONSTRUCTION ENGINEERING.—Items included in all such estimates for construction engineering for a State for a fiscal year shall not exceed, in the aggregate, 15 percent of the total estimated costs of all projects financed within the boundaries of the State with Federal-aid highway funds in such fiscal year, after excluding from such total estimate costs, the estimated costs of rights-of-way, preliminary engineering, and construction engineering.

(d) In such cases as the Secretary determines advisable, plans, specifications, and estimates for proposed projects on any Federal-aid system shall be accompanied by a value engineering or other cost reduction analysis.

(e) LIFE-CYCLE COST ANALYSIS.—

(1) ESTABLISHMENT.—The Secretary shall establish a program to require States to conduct an analysis of the life-cycle costs of each usable project segment on the National Highway System with a cost of \$25,000,000 or more.

(2) ANALYSIS OF THE LIFE-CYCLE COSTS DEFINED.—In this subsection, the term “analysis of the life-cycle costs” means a process for evaluating the total economic worth of a usable project segment by analyzing initial costs and discounted future costs, such as maintenance, reconstruction, rehabilitation, restoring, and resurfacing costs, over the life of the project segment.

(f) VALUE ENGINEERING FOR NHS.—

(2) VALUE ENGINEERING DEFINED.—In this subsection, the term “value engineering analysis” means a systematic process of review and analysis of a project during its design phase by a multidisciplinary team of persons not involved in the project in order to provide suggestions for reducing the total cost of the project and providing a project of equal or better quality. Such suggestions may include combining or eliminating otherwise inefficient or expensive parts of the original proposed design for the project and total redesign of the proposed project using different technologies, materials, or methods so as to accomplish the original purpose of the project.

§ 107. Acquisition of rights-of-way—Interstate System

(a) In any case in which the Secretary is requested by a State to acquire lands or interests in lands (including within the term “interests in lands”, the control of access thereto from adjoining lands) required by such State for right-of-way or other purposes in connection with the prosecution of any project for the construction, reconstruction, or improvement of any section of the Interstate System, the Secretary is authorized, in the name of the United States and prior to the approval of title by the Attorney General, to acquire, enter upon, and take possession of such lands or interests in lands by purchase, donation, condemnation, or otherwise in accordance with the laws of the United States (including the Act of February 26, 1931, 46 Stat. 1421), if—

(1) the Secretary has determined either that the State is unable to acquire necessary lands or interests in lands, or is unable to acquire such lands or interests in lands with sufficient promptness; and

(2) the State has agreed with the Secretary to pay, at such time as may be specified by the Secretary an amount equal to 10 per centum of the costs incurred by the Secretary, in acquiring such lands or interests in lands, or such lesser percentage which represents the State's pro rata share of project costs as determined in accordance with subsection (c)¹ of section 120 of this title.

The authority granted by this section shall also apply to lands and interests in lands received as grants of land from the United States and owned or held by railroads or other corporations.

(b) The costs incurred by the Secretary in acquiring any such lands or interests in lands may include the cost of examination and abstract of title, certificate of title, advertising, and any fees incidental to such acquisition. All costs incurred by the Secretary in connection with the acquisition of any such lands or interests in lands shall be paid from the funds for construction, reconstruction, or improvement of the Interstate System apportioned to the State upon the request of which such lands or interests in lands are acquired, and any sums paid to the Secretary by such State as its share of the costs of acquisition of such lands or interests in lands shall be deposited in the Treasury to the credit of the appropriation for Federal-aid highways and shall be credited to the amount apportioned to such State as its apportionment of funds for construction, reconstruction, or improvement of the Interstate System, or shall be deducted from other moneys due the State for reimbursement from funds authorized to be appropriated under section 108(b) of the Federal-Aid Highway Act of 1956.

(c) The Secretary is further authorized and directed by proper deed, executed in the name of the United States, to convey any such lands or interests in lands acquired in any State under the provisions of this section, except the outside five feet of any such right-of-way in any State which does not provide control of access, to the State highway department of such State or such political subdivision thereof as its laws may provide, upon such terms and conditions as to such lands or interests in lands as may be agreed upon by the Secretary and the State highway department or political subdivisions to which the conveyance is to be made. Whenever the State makes provision for control of access satisfactory to the Secretary, the outside five feet then shall be conveyed to the State by the Secretary, as herein provided.

(d) Whenever rights-of-way, including control of access, on the Interstate System are required over lands or interests in lands owned by the United States, the Secretary may make such arrangements with the agency having jurisdiction over such lands as may be necessary to give the State or other person constructing the projects

on such lands adequate rights-of-way and control of access thereto from adjoining lands, and any such agency is directed to cooperate with the Secretary in this connection.

State highway department, is authorized to advance funds, without interest, to the State from amounts available in the right-of-way revolving fund, in accordance with rules and regulations prescribed by the Secretary. Funds so advanced may be used to pay the entire costs of projects for the acquisition of rights-of-way, including the net cost to the State of property management, if any, and related moving and relocation payments.

(3) Actual construction of a project on rights-of-way, with respect to which funds are advanced under this subsection, shall be commenced within a period of not less than two years nor more than 20 years following the end of the fiscal year in which the Secretary approves such advance of funds, unless the Secretary, in his discretion, shall provide for an earlier or later termination date. Immediately upon the termination of the period of time within which actual construction must be commenced, in the case of any project where such construction is not commenced before such termination, or upon approval by the Secretary of the plans, specifications, and estimates for such project for the actual construction of a project on rights-of-way with respect to which funds are advanced under this subsection, whichever shall occur first, the right-of-way revolving fund shall be credited with an amount equal to the Federal share of the funds advanced, as provided in section 120 of this title, out of any Federal-aid highway funds apportioned to the State in which such project is located and available for obligation for projects of the type funded and the State shall reimburse the Secretary in an amount equal to the non-Federal share of the funds advanced for deposit in, and credit to, the right-of-way revolving fund.

(d) EARLY ACQUISITION OF RIGHTS-OF-WAY.—

(1) GENERAL RULE.—Subject to paragraph (2), funds apportioned to a State under this title may be used to participate in the payment of—

(A) costs incurred by the State for acquisition of rights-of-way, acquired in advance of any Federal approval or authorization, if the rights-of-way are subsequently incorporated into a project eligible for surface transportation program funds; and

(B) costs incurred by the State for the acquisition of land necessary to preserve environmental and scenic values.

(2) TERMS AND CONDITIONS.—The Federal share payable of the costs described in paragraph (1) shall be eligible for reimbursement out of funds apportioned to a State under this title when the rights-of-way acquired are incorporated into a project eligible for surface transportation program funds, if the State demonstrates to the Secretary and the Secretary finds that—

(A) any land acquired, and relocation assistance provided, complied with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970;

(B) the requirements of title VI of the Civil Rights Act of 1964 have been complied with;

(C) the State has a mandatory comprehensive and coordinated land use, environment,

and transportation planning process under State law and the acquisition is certified by the Governor as consistent with the State plans before the acquisition;

(D) the acquisition is determined in advance by the Governor to be consistent with the State transportation planning process pursuant to section 135 of this title;

(E) the alternative for which the right-of-way is acquired is selected by the State pursuant to regulations to be issued by the Secretary which provide for the consideration of the environmental impacts of various alternatives;

(F) before the time that the cost incurred by a State is approved for Federal participation, environmental compliance pursuant to the National Environmental Policy Act has been completed for the project for which the right-of-way was acquired by the State, and the acquisition has been approved by the Secretary under this Act,¹ and in compliance with section 303 of title 49, section 7 of the Endangered Species Act, and all other applicable environmental laws shall be identified by the Secretary in regulations; and

(G) before the time that the cost incurred by a State is approved for Federal participation, both the Secretary and the Administrator of the Environmental Protection Agency have concurred that the property acquired in advance of Federal approval or authorization did not influence the environmental assessment of the project, the decision relative to the need to construct the project, or the selection of the project design or location.

STUDY OF ADVANCE ACQUISITION OF RIGHTS-OF-WAY

Pub. L. 89-574, §10, Sept. 13, 1966, 80 Stat. 769, as amended by Pub. The Secretary was required to submit a report of results of such study to Congress not later than July 1, 1967, together with his recommendations.

INCREASED LIMITATION PERIOD APPLICABLE TO CERTAIN CONTRACTS

Section 2 of Pub. L. 86-35 provided that agreements entered into before May 29, 1959 by the Secretary of Commerce and a State highway department under authority of section 110(a) of the Federal-Aid Highway Act of 1956, or section 108(a) of title 23 of the United States Code shall be deemed to provide for actual construction of a road on such rights-of-way within a period of seven years following the fiscal year in which such request was made.

§ 109. Standards

(a) IN GENERAL.—The Secretary shall ensure that the plans and specifications for each proposed highway project under this chapter provide for a facility that will—

(1) adequately serve the existing and planned future traffic of the highway in a manner that is conducive to safety, durability, and economy of maintenance; and

(2) be designed and constructed in accordance with criteria best suited to accomplish the objectives described in paragraph (1) and to conform to the particular needs of each locality.

(b) The geometric and construction standards to be adopted for the Interstate System shall be those approved by the Secretary in cooperation with the State highway departments. Such standards, as applied to each actual construction project, shall be adequate to enable such project to accommodate the types and volumes

of traffic anticipated for such project for the twenty-year period commencing on the date of approval by the Secretary, under section 106 of this title, of the plans, specifications, and estimates for actual construction of such project. Such standards shall in all cases provide for at least four lanes of traffic. The right-of-way width of the Interstate System shall be adequate to permit construction of projects on the Interstate System to such standards. The Secretary shall apply such standards uniformly throughout all the States.

(c) DESIGN CRITERIA FOR NATIONAL HIGHWAY SYSTEM.—

(1) IN GENERAL.—A design for new construction, reconstruction, resurfacing (except for maintenance resurfacing), restoration, or rehabilitation of a highway on the National Highway System (other than a highway also on the Interstate System) may take into account, in addition to the criteria described in subsection (a)—

(A) the constructed and natural environment of the area;

(B) the environmental, scenic, aesthetic, historic, community, and preservation impacts of the activity; and

(C) access for other modes of transportation.

(2) DEVELOPMENT OF CRITERIA.—The Secretary, in cooperation with State highway departments, may develop criteria to implement paragraph (1). In developing criteria under this paragraph, the Secretary shall consider the results of the committee process of the American Association of State Highway and Transportation Officials as used in adopting and publishing "A Policy on Geometric Design of Highways and Streets", including comments submitted by interested parties as part of such process.

(d) On any highway project in which Federal funds hereafter participate, or on any such project constructed since December 20, 1944, the location, form and character of informational, regulatory and warning signs, curb and pavement or other markings, and traffic signals installed or placed by any public authority or other agency, shall be subject to the approval of the State highway department with the concurrence of the Secretary, who is directed to concur only in such installations as will promote the safe and efficient utilization of the highways.

(e) No funds shall be approved for expenditure on any Federal-aid highway, or highway affected under chapter 2 of this title, unless proper safety protective devices complying with safety standards determined by the Secretary at that time as being adequate shall be installed or be in operation at any highway and railroad grade crossing or drawbridge on that portion of the highway with respect to which such expenditures are to be made.

(f) The Secretary shall not, as a condition precedent to his approval under section 106 of this title, require any State to acquire title to, or control of, any marginal land along the proposed highway in addition to that reasonably necessary for road surfaces, median strips, bike-ways, gutters, ditches, and side slopes, and of

sufficient width to provide service roads for adjacent property to permit safe access at controlled locations in order to expedite traffic, promote safety, and minimize roadside parking.

(g) The Secretary shall issue within 30 days after the day of enactment of the Federal-Aid Highway Act of 1970 guidelines for minimizing possible soil erosion from highway construction. Such guidelines shall apply to all proposed projects with respect to which plans, specifications, and estimates are approved by the Secretary after the issuance of such guidelines.

(h) Not later than July 1, 1972, the Secretary, after consultation with appropriate Federal and State officials, shall submit to Congress, and not later than 90 days after such submission, promulgate guidelines designed to assure that possible adverse economic, social, and environmental effects relating to any proposed project on any Federal-aid system have been fully considered in developing such project, and that the final decisions on the project are made in the best overall public interest, taking into consideration the need for fast, safe and efficient transportation, public services, and the costs of eliminating or minimizing such adverse effects and the following:

(1) air, noise, and water pollution;

(2) destruction or disruption of man-made and natural resources, aesthetic values, community cohesion and the availability of public facilities and services;

(3) adverse employment effects, and tax and property values losses;

(4) injurious displacement of people, businesses and farms; and

(5) disruption of desirable community and regional growth.

Such guidelines shall apply to all proposed projects with respect to which plans, specifications, and estimates are approved by the Secretary after the issuance of such guidelines.

(i) The Secretary, after consultation with appropriate Federal, State, and local officials, shall develop and promulgate standards for highway noise levels compatible with different land uses and after July 1, 1972, shall not approve plans and specifications for any proposed project on any Federal-aid system for which location approval has not yet been secured unless he determines that such plans and specifications include adequate measures to implement the appropriate noise level standards. The Secretary, after consultation with the Administrator of the Environmental Protection Agency and appropriate Federal, State, and local officials, may promulgate standards for the control of highway noise levels for highways on any Federal-aid system for which project approval has been secured prior to July 1, 1972. The Secretary may approve any project on a Federal-aid system to which noise-level standards are made applicable under the preceding sentence for the purpose of carrying out such standards. Such project may include, but is not limited to, the acquisition of additional rights-of-way, the construction of physical barriers, and landscaping. Sums apportioned for the Federal-aid system on which such project will be located shall be available to finance the Federal share of such project. Such project shall be deemed a highway project for all purposes of this title.

(j) The Secretary, after consultation with the Administrator of the Environmental Protection Agency, shall develop and promulgate guidelines to assure that highways constructed pursuant to this title are consistent with any approved plan for—

(1) the implementation of a national ambient air quality standard for each pollutant for which an area is designated as a nonattainment area under section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)); or

(2) the maintenance of a national ambient air quality standard in an area that was designated as a nonattainment area but that was later redesignated by the Administrator as an attainment area for the standard and that is required to develop a maintenance plan under section 175A of the Clean Air Act (42 U.S.C. 7505a).

(k) The Secretary shall not approve any project involving approaches to a bridge under this title, if such project and bridge will significantly affect the traffic volume and the highway system of a contiguous State without first taking into full consideration the views of that State.

(l)(1) In determining whether any right-of-way on any Federal-aid highway should be used for accommodating any utility facility, the Secretary shall—

(A) first ascertain the effect such use will have on highway and traffic safety, since in no case shall any use be authorized or otherwise permitted, under this or any other provision of law, which would adversely affect safety;

(B) evaluate the direct and indirect environmental and economic effects of any loss of productive agricultural land or any impairment of the productivity of any agricultural land which would result from the disapproval of the use of such right-of-way for the accommodation of such utility facility; and

(C) consider such environmental and economic effects together with any interference with or impairment of the use of the highway in such right-of-way which would result from the use of such right-of-way for the accommodation of such utility facility.

(2) For the purpose of this subsection—

(A) the term “utility facility” means any privately, publicly, or cooperatively owned line, facility, or system for producing, transmitting, or distributing communications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, or any other similar commodity, including any fire or police signal system or street lighting system, which directly or indirectly serves the public; and

(B) the term “right-of-way” means any real property, or interest therein, acquired, dedicated, or reserved for the construction, operation, and maintenance of a highway.

(m) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed. The initial guidelines shall be issued no later than October 1, 1979.

(n) The Secretary shall not approve any project under this title that will result in the severance or destruction of an existing major route for nonmotorized transportation traffic and light motorcycles, unless such project provides a reasonably alternate route or such a route exists.

(o) It is the intent of Congress that any project for resurfacing, restoring, or rehabilitating any highway, other than a highway access to which is fully controlled, in which Federal funds participate shall be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.

(p) COMPLIANCE WITH STATE LAWS FOR NON-NHS PROJECTS.—Projects (other than highway projects on the National Highway System) shall be designed, constructed, operated, and maintained in accordance with State laws, regulations, directives, safety standards, design standards, and construction standards.

(q) SCENIC AND HISTORIC VALUES.—Notwithstanding subsections (b) and (c), the Secretary may approve a project for the National Highway System if the project is designed to—

(1) allow for the preservation of environmental, scenic, or historic values;

(2) ensure safe use of the facility; and

(3) comply with subsection (a).

Procuring agencies shall comply with all applicable guidelines or regulations issued by the Administrator of the Environmental Protection Agency.

“(d) ASPHALT PAVEMENT CONTAINING RECYCLED RUBBER.—

“(1) CRUMB RUBBER MODIFIER RESEARCH.—Not later than 180 days after the date of the enactment of the National Highway System Designation Act of 1995 [Nov. 28, 1995], the Secretary shall develop testing procedures and conduct research to develop performance grade classifications, in accordance with the strategic highway research program carried out under section 307(d) of title 23, United States Code, for crumb rubber modifier binders. The testing procedures and performance grade classifications should be

developed in consultation with representatives of the crumb rubber modifier industry and other interested parties (including the asphalt paving industry) with experience in the development of the procedures and classifications.

“(i) to develop mix designs for crumb rubber modified asphalt pavements;

“(ii) for the placement and evaluation of crumb rubber modified asphalt pavement field tests; and

“(iii) for the expansion of State crumb rubber modifier programs in existence on the date the grant is made available.

“(e) DEFINITIONS.—For purpose of this section—

“(1) the term ‘asphalt pavement containing recycled rubber’ means any mixture of asphalt and crumb rubber derived from whole scrap tires, such that the physical properties of the asphalt are modified through the mixture, for use in pavement maintenance, rehabilitation, or construction applications; and

“(2) the term ‘recycled rubber’ is any crumb rubber derived from processing whole scrap tires or shredded tire material taken from automobiles, trucks, or other equipment owned and operated in the United States.”

SURVEY AND REPORT ON UPGRADING OF DESIGN STANDARDS

Section 1049 of Pub. L. 102-240 directed Secretary to conduct a survey to identify current State standards relating to geometric design, traffic control devices, roadside safety, safety appurtenance design, uniform traffic control devices, and sign legibility and directional clarity for all Federal-aid highways and, not later than 2 years after Dec. 18, 1991, to transmit to Congress a report on the results of the survey and the crashworthiness of traffic lights, traffic signs, guardrails, impact attenuators, concrete barrier treatments, and breakaway utility poles for bridges and roadways currently used by States.

EROSION CONTROL GUIDELINES

Section 1057 of title I of Pub. L. 102-240 provided that:

“(a) INITIATION OF RULEMAKING PROCEEDING.—Not later than 30 days after the date of the enactment of this Act [Dec. 18, 1991], the Secretary shall initiate a rulemaking proceeding to revise the guidelines and establish standards for installation of roadside barriers and other safety appurtenances, including longitudinal barriers, end terminals, and crash cushions. Such rulemaking shall reflect state-of-the-art designs, testing, and evaluation criteria contained in the National Cooperative Highway Research Program Report 230, relating to approval standards which provide an enhanced level of crashworthy performance to accommodate vans, mini-vans, pickup trucks, and 4-wheel drive vehicles.

“(b) FINAL RULE.—Not later than 1 year after the date of the enactment of this Act [Dec. 18, 1991], the Secretary shall complete the rulemaking proceeding initiated under subsection (a), and issue a final rule regarding the implementation of revised guidelines and standards for acceptable roadside barriers and other safety appurtenances, including longitudinal barriers, end terminals, and crash cushions. Such revised guidelines and standards shall accommodate vans, mini-vans, pickup trucks, and 4-wheel drive vehicles and shall be applicable to the refurbishment and replacement of existing roadside barriers and safety appurtenances as well as to the installation of new roadside barriers and safety appurtenances.”

STUDIES RELATING TO ESTABLISHMENT OF STANDARDS FOR RESURFACING, RESTORATION, AND REHABILITATION OF HIGHWAYS AND TO ESTABLISHMENT OF UNIFORM STANDARDS AND CRITERIA FOR TESTING AND INSPECTING HIGHWAYS AND BRIDGES

Section 110(b), (c) of Pub. L. 97-424 provided that:

“(b) The Secretary of Transportation shall enter into appropriate arrangements with the National Academy of Sciences (1) to conduct a study of the safety cost-effectiveness of geometric design criteria of standards currently in effect for construction and reconstruction of highways, other than highways access to which is fully controlled, to determine the most appropriate minimum standards to apply to resurfacing, restoration, and rehabilitation projects on such highways, which study shall include a study of the cost effectiveness of the hot dip galvanizing process for the installation, repair, or replacement of exposed structural and miscellaneous steel, and (2) to propose standards to preserve and extend the service life of such highways and enhance highway safety. The National Academy of Sciences shall conduct such study in cooperation with the National Transportation Safety Board, the Congressional Budget Office, and the American Association of State Highway and Transportation Officials. Upon completion of such study, the National Academy of Sciences shall submit such study and its proposed standards to the Secretary of Transportation for review. § 110. Project agreements

(a) As soon as practicable after the plans, specifications, and estimates for a specific project have been approved, the Secretary shall enter into a formal project agreement with the State highway department concerning the construction and maintenance of such project. Such project agreement shall make provision for State funds required for the State's pro rata share of the cost of construction of such project and for the maintenance thereof after completion of construction.

(b) The Secretary may rely upon representations made by the State highway department with respect to the arrangements or agreements made by the State highway department and appropriate local officials where a part of the project is to be constructed at the expense of, or in cooperation with, local subdivisions of the State.

(Pub. L. 85-767, Aug. 27, 1958, 72 Stat. 894.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 101 of this title.

§ 111. Agreements relating to use of and access to rights-of-way—Interstate System

(a) IN GENERAL.—All agreements between the Secretary and the State highway department for the construction of projects on the Interstate System shall contain a clause providing that the State will not add any points of access to, or exit from, the project in addition to those approved by the Secretary in the plans for such project, without the prior approval of the Secretary. Such agreements shall also contain a clause providing that the State will not permit automotive service stations or other commercial establishments for serving motor vehicle users to be constructed or located on the rights-

of-way of the Interstate System. Such agreements may, however, authorize a State or political subdivision thereof to use or permit the use of the airspace above and below the established grade line of the highway pavement for such purposes as will not impair the full use and safety of the highway, as will not require or permit vehicular access to such space directly from such established grade line of the highway, or otherwise interfere in any way with the free flow of traffic on the Interstate System. Nothing in this section, or in any agreement entered into under this section, shall require the discontinuance, obstruction, or removal of any establishment for serving motor vehicle users on any highway which has been, or is hereafter, designated as a highway or route on the Interstate System (1) if such establishment (A) was in existence before January 1, 1960, (B) is owned by a State, and (C) is operated through concessionaries or otherwise, and (2) if all access to, and exits from, such establishment conform to the standards established for such a highway under this title.

(b) **VENDING MACHINES.**—Notwithstanding subsection (a), any State may permit the placement of vending machines in rest and recreation areas, and in safety rest areas, constructed or located on rights-of-way of the Interstate System in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may only be operated by the State. In permitting the placement of vending machines, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the "Randolph-Sheppard Act" (20 U.S.C. 107a(a)(5)). The costs of installation, operation, and maintenance of vending machines shall not be eligible for Federal assistance under this title.

(c) **MOTORIST CALL BOXES.**—

(1) **IN GENERAL.**—Notwithstanding subsection (a), a State may permit the placement of motorist call boxes on rights-of-way of the National Highway System. Such motorist call boxes may include the identification and sponsorship logos of such call boxes.

(2) **SPONSORSHIP LOGOS.**—

(A) **APPROVAL BY STATE AND LOCAL AGENCIES.**—All call box installations displaying sponsorship logos under this subsection shall be approved by the highway agencies having jurisdiction of the highway on which they are located.

(B) **SIZE ON BOX.**—A sponsorship logo may be placed on the call box in a dimension not to exceed the size of the call box or a total dimension in excess of 12 inches by 18 inches.

(C) **SIZE ON IDENTIFICATION SIGN.**—Sponsorship logos in a dimension not to exceed 12 inches by 30 inches may be displayed on a call box identification sign affixed to the call box post.

(D) **SPACING OF SIGNS.**—Sponsorship logos affixed to an identification sign on a call box post may be located on the rights-of-way at intervals not more frequently than 1 per every 5 miles.

(E) **DISTRIBUTION THROUGHOUT STATE.**—Within a State, at least 20 percent of the call boxes displaying sponsorship logos shall be located on highways outside of urbanized areas with a population greater than 50,000.

(3) **NONSAFETY HAZARDS.**—The call boxes and their location, posts, foundations, and mountings shall be consistent with requirements of the Manual on Uniform Traffic Control Devices or any requirements deemed necessary by the Secretary to assure that the call boxes shall not be a safety hazard to motorists.

AMENDMENTS

1995—Subsec. (c). Pub. L. 104-59 added subsec. (c).

1987—Pub. L. 100-17 designated existing provision as subsec. (a), inserted heading for subsec. (a), and added subsec. (b).

1978—Pub. L. 95-599 inserted provision listing situations which would not require the discontinuance, obstruction, or removal of any establishment for serving motor vehicle users.

1961—Pub. L. 87-61 substituted "to use or permit the use of the airspace above and below the established grade line of the highway pavement for such purposes as will not impair the full use and safety of the highway, as will not require or permit vehicular access to such space directly from such established grade line of the highway, or otherwise interfere" for "to use the airspace above and below the established grade line of the highway pavement for the parking of motor vehicles provided such use does not interfere".

VENDING MACHINES; PLACEMENT IN REST, RECREATION, AND SAFETY REST AREAS; STATE OPERATION OF MACHINES

Pub. L. 97-424, title I, §111, Jan. 6, 1983, 96 Stat. 2106, provided that notwithstanding section 111 of this title before Oct. 1, 1983, any State could permit placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of National System of Interstate and Defense Highways [now Dwight D. Eisenhower System of Interstate and Defense Highways] in such State. Such vending machines could only dispense such food, drink, and other articles as the State highway department determined were appropriate and desirable. Such vending machines could only be operated by the State. In permitting the placement of vending machines under this section, the State had to give priority to vending machines which were operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the Randolph-Sheppard Act (20 U.S.C. 107a(a)(5)).

DEMONSTRATION PROJECT FOR VENDING MACHINES IN REST AND RECREATION AREAS

Section 153 of Pub. L. 95-599 authorized Secretary of Transportation to implement a demonstration project respecting placement of vending machines in rest and recreation areas and to report not later than two years after Nov. 6, 1978, on results of such project.

REVISION OF AGREEMENTS RELATING TO UTILIZATION OF SPACE ON RIGHTS-OF-WAY

Section 104(b) of Pub. L. 87-61 authorized Secretary of Commerce [now Transportation], on application, to revise any agreement made prior to June 29, 1961, to extent that such agreement relates to utilization of space on rights-of-way on National System of Interstate and

Defense Highways [now Dwight D. Eisenhower System of Interstate and Defense Highways] to conform to section 111 of this title as amended by subsection (a).

§ 112. Letting of contracts

(a) In all cases where the construction is to be performed by the State highway department or under its supervision, a request for submission of bids shall be made by advertisement unless some other method is approved by the Secretary. The Secretary shall require such plans and specifications and such methods of bidding as shall be effective in securing competition.

(b) BIDDING REQUIREMENTS.—

(1) IN GENERAL.—Subject to paragraph (2), construction of each project, subject to the provisions of subsection (a) of this section, shall be performed by contract awarded by competitive bidding, unless the State highway department demonstrates, to the satisfaction of the Secretary, that some other method is more cost effective or that an emergency exists. Contracts for the construction of each project shall be awarded only on the basis of the lowest responsive bid submitted by a bidder meeting established criteria of responsibility. No requirement or obligation shall be imposed as a condition precedent to the award of a contract to such bidder for a project, or to the Secretary's concurrence in the award of a contract to such bidder, unless such requirement or obligation is otherwise lawful and is specifically set forth in the advertised specifications.

(2) CONTRACTING FOR ENGINEERING AND DESIGN SERVICES.—

(A) GENERAL RULE.—Each contract for program management, construction management, feasibility studies, preliminary engineering, design, engineering, surveying, mapping, or architectural related services with respect to a project subject to the provisions of subsection (a) of this section shall be awarded in the same manner as a contract for architectural and engineering services is negotiated under title IX of the Federal Property and Administrative Services Act of 1949 or equivalent State qualifications-based requirements.

(B) APPLICABILITY.—

(i) IN A COMPLYING STATE.—If, on the date of the enactment of this paragraph, the services described in subparagraph (A) may be awarded in a State in the manner described in subparagraph (A), subparagraph (A) shall apply in such State beginning on such date of enactment, except to the extent that such State adopts by statute a formal procedure for the procurement of such services.

(ii) IN A NONCOMPLYING STATE.—In the case of any other State, subparagraph (A) shall apply in such State beginning on the earlier of (I) August 1, 1989, or (II) the 10th day following the close of the 1st regular session of the legislature of a State which begins after the date of the enactment of this paragraph, except to the extent that such State adopts or has adopted by statute a formal procedure for the procurement of the services described in subparagraph (A).

(C) PERFORMANCE AND AUDITS.—Any contract or subcontract awarded in accordance with subparagraph (A), whether funded in whole or in part with Federal-aid highway funds, shall be performed and audited in compliance with cost principles contained in the Federal Acquisition Regulations of part 31 of title 48, Code of Federal Regulations.

(D) INDIRECT COST RATES.—Instead of performing its own audits, a recipient of funds under a contract or subcontract awarded in accordance with subparagraph (A) shall accept indirect cost rates established in accordance with the Federal Acquisition Regulations for 1-year applicable accounting periods by a cognizant Federal or State government agency, if such rates are not currently under dispute.

(E) APPLICATION OF RATES.—Once a firm's indirect cost rates are accepted under this paragraph, the recipient of the funds shall apply such rates for the purposes of contract estimation, negotiation, administration, reporting, and contract payment and shall not be limited by administrative or de facto ceilings of any kind.

(F) PRENOTIFICATION; CONFIDENTIALITY OF DATA.—A recipient of funds requesting or using the cost and rate data described in subparagraph (E) shall notify any affected firm before such request or use. Such data shall be confidential and shall not be accessible or provided, in whole or in part, to another firm or to any government agency which is not part of the group of agencies sharing cost data under this paragraph, except by written permission of the audited firm. If prohibited by law, such cost and rate data shall not be disclosed under any circumstances.

(G) STATE OPTION.—Subparagraphs (C), (D), (E), and (F) shall take effect 1 year after the date of the enactment of this subparagraph; except that if a State, during such 1-year period, adopts by statute an alternative process intended to promote engineering and design quality and ensure maximum competition by professional companies of all sizes providing engineering and design services, such subparagraphs shall not apply with respect to the State. If the Secretary determines that the legislature of the State did not convene and adjourn a full regular session during such 1-year period, the Secretary may extend such 1-year period until the adjournment of the next regular session of the legislature.

(c) The Secretary shall require as a condition precedent to his approval of each contract awarded by competitive bidding pursuant to subsection (b) of this section, and subject to the provisions of this section, a sworn statement, executed by, or on behalf of, the person, firm, association, or corporation to whom such contract is to be awarded, certifying that such person, firm, association, or corporation has not, either directly or indirectly, entered into any agreement, participated in any collusion, or otherwise taken any action in restraint of free competitive bidding in connection with such contract.

(d) No contract awarded by competitive bidding pursuant to subsection (b) of this section, and subject to the provisions of this section, shall be entered into by any State highway department or local subdivision of the State without compliance with the provisions of this section, and without the prior concurrence of the Secretary in the award thereof.

(e) STANDARDIZED CONTRACT CLAUSE CONCERNING SITE CONDITIONS.—

(1) GENERAL RULE.—The Secretary shall issue regulations establishing and requiring, for inclusion in each contract entered into with respect to any project approved under section 106 of this title a contract clause, developed in accordance with guidelines established by the Secretary, which equitably addresses each of the following:

(A) Site conditions.

(B) Suspensions of work ordered by the State (other than a suspension of work caused by the fault of the contractor or by weather).

(C) Material changes in the scope of work specified in the contract.

The guidelines established by the Secretary shall not require arbitration.

(2) LIMITATION ON APPLICABILITY.—Paragraph (1) shall apply in a State except to the extent that such State adopts or has adopted by statute a formal procedure for the development of a contract clause described in paragraph (1) or adopts or has adopted a statute which does not permit inclusion of such a contract clause.

(f) The provisions of this section shall not be applicable to contracts for projects on the Federal-aid secondary system in those States where the Secretary has discharged his responsibility pursuant to section 117 of this title, except where employees of a political subdivision of a State are working on a project outside of such political subdivision.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 121 of this title.

§ 115. Advance construction

(a) SUBSTITUTE, CONGESTION MITIGATION AND AIR QUALITY IMPROVEMENT, SURFACE TRANSPORTATION, BRIDGE, PLANNING, AND RESEARCH PROJECTS.—

(1) GENERAL RULE.—Subject to paragraph (2), when a State—

(A)(i) has obligated all funds apportioned or allocated to it under section 103(e)(4)(H), 104(b)(2), 104(b)(3), 104(f), 144, or 307 of this title, or

(ii) has used or demonstrates that it will use all obligation authority allocated to it for Federal-aid highways and highway safety construction, and

(B) proceeds with a project funded under such an apportionment or allocation without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit the State to implementation of projects with the aid of Federal funds previously apportioned or allocated to it or limit a State to implementation of a project with obligation authority previously allocated to it for Federal-aid highways and highway safety construction,

the Secretary, upon approval of an application of the State, is authorized to pay to the State

the Federal share of the cost of the project when additional funds are apportioned or allocated to the State under such section or when additional obligation authority is allocated to it.

(2) PLANS, SPECIFICATIONS, AND APPLICABLE STANDARDS.—The Secretary may only make payments to a State with respect to a project if—

(A) prior to commencement of the project the Secretary approves the project in the same manner as the Secretary approves other projects, and

(B) the project conforms to the applicable standards under this title.

(b) INTERSTATE AND NATIONAL HIGHWAY SYSTEM PROJECTS.—

(1) IN GENERAL.—When a State proceeds to construct any project on the National Highway System or the Interstate System without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit the State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon approval of application of the State, is authorized to pay to the State the Federal share of the cost of construction of the project when additional funds are apportioned to the State under section 104(b)(1) or 104(b)(5), as the case may be, if—

(A) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects, and

(B) the project conforms to the applicable standards under section 109 of this title.

(2) BOND INTEREST FOR PROJECTS UNDER CONSTRUCTION ON JANUARY 1, 1983.—For any project under construction on January 1, 1983, on the Interstate System and converted to a regularly funded project after January 1, 1983, for which the proceeds of bonds issued by the State, county, city, or other political subdivision of the State were used, any interest earned and payable on such bonds by the date of conversion is an eligible cost of construction, to the extent that the proceeds of such bonds have actually been expended in the construction of such projects.

(3) BOND INTEREST.—Subject to the provisions of this paragraph, the cost of construction of a project, the Federal share of which the Secretary is authorized to pay under this subsection, shall include the amount of any interest earned and payable on bonds issued by the State to the extent that the proceeds of such bonds have actually been expended in the construction of such project. In no event shall the amount of interest considered as a cost of construction of a project under the preceding sentence be greater than the excess of (A) the amount which would be the estimated cost of construction of the project if the project were to be constructed at the time the project is converted to a regularly funded project, over (B) the actual cost of construction of such project (not including such interest). The Secretary shall consider changes in construction

cost indices in determining the amount under clause (A) of this paragraph.

(c) COMPLETION OF PROJECTS.—In determining the apportionment for any fiscal year under the provisions of section 103(e)(4), 104, 134, 144,¹ or 307 of this title, any such project constructed by a State without the aid of Federal funds shall not be considered completed until an application under the provisions of this section with respect to such project has been approved by the Secretary.

(d) INCLUSION IN TRANSPORTATION IMPROVEMENT PROGRAM.—The Secretary may approve an application for a project under this section only if the project is included in the transportation improvement program of the State developed under section 135(f).

(C) PERIOD OF AVAILABILITY OF DISCRETIONARY FUNDS.—Sums made available pursuant to this paragraph shall remain available until expended.

(d) In addition to amounts otherwise available to carry out this section, an amount equal to the amount by which the unobligated apportionment for the Interstate System in any State is reduced under section 103(e)(4) of this title on account of the withdrawal of a route or portion thereof on the Interstate System, which withdrawal is approved after the date of enactment of this subsection, shall be available to the Secretary for obligation in accordance with subsection (b)(1) of this section.

(e) The total payments to any State shall not at any time during a current fiscal year exceed the total of all apportionments to such State in accordance with section 104 of this title for such fiscal year and all preceding fiscal years.

EFFECTIVE DATE OF 1991 AMENDMENT

Amendment by Pub. L. 102-240 effective Dec. 18, 1991, and applicable to funds authorized to be appropriated or made available after Sept. 30, 1991, and, with certain exceptions, not applicable to funds appropriated or made available on or before Sept. 30, 1991, see section

1100 of Pub. L. 102-240, set out as a note under section 104 of this title.

EFFECTIVE DATE OF 1979 AMENDMENT

Section 5(b) of Pub. L. 96-106 provided that: "The amendment made by subsection (a) of this section [amending this section] shall apply to all amounts apportioned under section 104(b)(5)(B) of title 23, United States Code, for the fiscal year 1978 and for subsequent fiscal years."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 104, 114, 127, 143, 157, 158, 159 of this title; title 40 section 818; title 40 App. section 201; title 49 section 31314.

§ 119. Interstate maintenance program

(a) The Secretary may approve projects for resurfacing, restoring and rehabilitating routes on the Interstate System designated under sections 103 and 139(c) of this title and routes on the Interstate System designated before the date of enactment of this sentence under section 139(a) and (b) of this title; except that the Secretary may only approve a project pursuant to this subsection on a toll road if such road is subject to a Secretarial agreement provided for in subsection (e). Sums authorized to be appropriated for this section shall be out of the Highway Trust Fund and shall be apportioned in accordance with section 104(b)(5)(B) of this title.

(b) Not later than one year after the date of issuance of initial guidelines under section 109(m) of this title each State shall have a program for the Interstate system¹ in accordance with such guidelines. Each State shall certify on January 1st of each year that it has such a program and the Interstate system¹ is maintained in accordance with that program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate system¹ in accordance with such program then the next apportionment of funds to such State for the Interstate system¹ shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate system¹ in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period the amount so withheld shall be reapportioned to all other eligible States.

(c) ELIGIBLE ACTIVITIES.—Activities authorized in subsection (a) may include the reconstruction of bridges, interchanges, and over crossings along existing Interstate routes, including the acquisition of right-of-way where necessary, but shall not include the construction of new travel lanes other than high occupancy vehicle lanes or auxiliary lanes.

(d) TRANSFER OF INTERSTATE CONSTRUCTION APPORTIONMENTS.—Upon application by a State (other than the State of Massachusetts) and approval by the Secretary, the Secretary may transfer to the apportionments to such State

under section 104(b)(1) or 104(b)(5)(B) any amount of the funds apportioned to such State for any fiscal year under section 104(b)(5)(A) if such amount does not exceed the Federal share of the costs of construction of segments of the Interstate System open to traffic in such State (other than high occupancy vehicle lanes) included in the most recent interstate cost estimate. Upon transfer of such amount, the construction on which such amount is based on open-to-traffic segments of the Interstate System in such State as included in the latest interstate cost estimate shall be ineligible and shall not be included in future interstate cost estimates approved or adjusted under section 104(b)(5)(A).

(e) PREVENTIVE MAINTENANCE.—Preventive maintenance activities shall be eligible under this section when a State can demonstrate, through its pavement management system, that such activities are a cost-effective means of extending Interstate pavement life.

(f) TRANSFER OF FUNDS FOR SURFACE TRANSPORTATION PROGRAM PROJECTS.—

(1) UPON CERTIFICATION ACCEPTANCE.—If a State certifies to the Secretary that any part of the sums apportioned to the State under section 104(b)(5)(B) of this title are in excess of the needs of the State for resurfacing, restoring, or rehabilitating Interstate System routes and the State is adequately maintaining the Interstate System and the Secretary accepts such certification, the State may transfer such excess part to its apportionment under sections 104(b)(1) and 104(b)(3).

(2) UNCONDITIONAL.—Notwithstanding paragraph (1), a State may transfer to its apportionment under sections 104(b)(1) and 104(b)(3) of this title—

(A) in fiscal year 1987, an amount not to exceed 20 percent of the funds apportioned to the State under section 104(b)(5)(B) which are not obligated at the time of the transfer; and

(B) in any fiscal year thereafter, an amount not to exceed 20 percent of the funds apportioned to the State under section 104(b)(5)(B) for such fiscal year.

(g) LIMITATION ON NEW CAPACITY.—Notwithstanding any other provision of this title, the portion of the cost of any project undertaken pursuant to this section that is attributable to the expansion of the capacity of any Interstate highway or bridge, where such new capacity consists of one or more new travel lanes that are not high-occupancy vehicle lanes or auxiliary lanes, shall not be eligible for funding under this section.

EFFECTIVE DATE OF 1991 AMENDMENT

Amendment by Pub. L. 102-240 effective Dec. 18, 1991, and applicable to funds authorized to be appropriated or made available after Sept. 30, 1991, and, with certain exceptions, not applicable to funds appropriated or made available on or before Sept. 30, 1991, see section 1100 of Pub. L. 102-240, set out as a note under section 104 of this title.

GUIDANCE TO STATES

Section 1009(c) of Pub. L. 102-240 provided that: “The Secretary shall develop and make available to the States criteria for determining—

“(1) what share of any project funded under section 119 of title 23, United States Code, is attributable to the expansion of the capacity of an Interstate highway or bridge; and

“(2) what constitutes adequate maintenance of the Interstate System for the purposes of section 119(f)(1) of title 23, United States Code.”

INNOVATIVE TECHNOLOGIES

Section 142 of Pub. L. 97-424 provided that:

“(a) The Congress hereby finds and declares that it is in the national interest to encourage and promote utilization by the States of highway and bridge surfacing, resurfacing, or restoration materials which are produced from recycled materials or which contain asphalt additives to strengthen the materials. Such materials conserve energy and reduce the cost of resurfacing or restoring our highways.

“(b) The Secretary of Transportation is hereby authorized for each of the fiscal years through September 30, 1985, to increase the Federal share as provided in sections 119, 120, and 144 of title 23, United States Code, by 5 per centum of any project submitted by the State highway departments which contains in the plans, specifications, and estimates submitted pursuant to section 106, of title 23, United States Code, the use of the materials described in subsection (a). To be eligible for such supplemental Federal assistance, significant amounts of asphalt additives or recycled materials must be used in each project approved by the Secretary.

“(c) The Secretary shall establish a procedure within ninety days of the date of enactment of this Act [Jan. 6, 1983] for increasing the Federal share under this section.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 118, 129 of this title.

§ 120. Federal share payable

(a) INTERSTATE SYSTEM PROJECTS.—Except as otherwise provided in this chapter, the Federal share payable on account of any project on the Interstate System (including a project to add high occupancy vehicle lanes and a project to add auxiliary lanes but excluding a project to add any other lanes) shall be 90 percent of the total cost thereof, plus a percentage of the remaining 10 percent of such cost in any State containing unappropriated and unreserved public lands and nontaxable Indian lands, individual and tribal, exceeding 5 percent of the total area

of all lands therein, equal to the percentage that the area of such lands in such State is of its total area; except that such Federal share payable on any project in any State shall not exceed 95 percent of the total cost of such project.

(b) OTHER PROJECTS.—Except as otherwise provided in this title, the Federal share payable on account of any project or activity carried out under this title (other than a project subject to subsection (a)) shall be—

(1) 80 percent of the cost thereof, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 percent of the total area of all lands therein, the Federal share, for purposes of this chapter, shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State, is of its total area; or

(2) 80 percent of the cost thereof, except that in the case of any State containing nontaxable Indian lands, individual and tribal, public domain lands (both reserved and unreserved), national forests, and national parks and monuments, the Federal share, for purposes of this chapter, shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area;

except that the Federal share payable on any project in a State shall not exceed 95 percent of the total cost of any such project. In any case where a State elects to have the Federal share provided in paragraph (2) of this subsection, the State must enter into an agreement with the Secretary covering a period of not less than 1 year, requiring such State to use solely for purposes eligible for assistance under this title (other than paying its share of projects approved under this title) during the period covered by such agreement the difference between the State's share as provided in paragraph (2) and what its share would be if it elected to pay the share provided in paragraph (1) for all projects subject to such agreement.

(c) INCREASED FEDERAL SHARE FOR CERTAIN SAFETY PROJECTS.—The Federal share payable on account of any project for traffic control signalization, safety rest areas, pavement marking, commuter carpooling and vanpooling, rail-highway crossing closure, or installation of traffic signs, traffic lights, guardrails, impact attenuators, concrete barrier endtreatments, breakaway utility poles, or priority control systems for emergency vehicles at signalized intersections may amount to 100 percent of the cost of construction of such projects; except that not more than 10 percent of all sums apportioned for all the Federal-aid systems for any fiscal year in accordance with section 104 of this title shall be used under this subsection. In this subsection, the term “safety rest area” means an area where motor vehicle operators can park their vehicles and rest, where food, fuel, and lodging services are not available, and that is located on a segment of highway with respect to which the Secretary determines there is a shortage of public and private areas at which motor vehicle operators can park their vehicles and rest.

(d) The Secretary may rely on a statement from the Secretary of the Interior as to the area of the lands referred to in subsections (a) and (b) of this section. The Secretary of the Interior is authorized and directed to provide such statement annually.

(e) EMERGENCY RELIEF.—The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title on account of any project on a Federal-aid highway system, including the Interstate System, shall not exceed the Federal share payable on a project on such system as provided in subsections (a) and (b) of this section; except that (1) the Federal share payable for eligible emergency repairs to minimize damage, protect facilities, or restore essential traffic accomplished within 180 days after the actual occurrence of the natural disaster or catastrophic failure may amount to 100 percent of the costs thereof; and (2) the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 percent of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, “a comparable facility” shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.

(f) The Secretary is authorized to cooperate with the State highway departments and with the Department of the Interior in the construction of Federal-aid highways within Indian reservations and national parks and monuments under the jurisdiction of the Department of the Interior and to pay the amount assumed therefor from the funds apportioned in accordance with section 104 of this title to the State wherein the reservations and national parks and monuments are located.

(g) At the request of any State, the Secretary may from time to time enter into agreements with such State to reimburse the State for the Federal share of the costs of preliminary and construction engineering at an agreed percentage of actual construction costs for each project, in lieu of the actual engineering costs for such project. The Secretary shall annually review each such agreement to insure that such percentage reasonably represents the engineering costs actually incurred by such State.

(h) Notwithstanding any other provision of this section or of this title, the Federal share payable on account of any project under this title in the Virgin Islands, Guam, American Samoa, or the Commonwealth of the Northern Mariana Islands shall be 100 per centum of the total cost of the project.

(i) INCREASED NON-FEDERAL SHARE.—Notwithstanding any other provision of this title and subject to such criteria as the Secretary may establish, a State may contribute an amount in excess of the non-Federal share of a project under this title so as to decrease the Federal share payable on such project.

If a State receives any advance under this subsection with respect to any toll bridge, tunnel, or approach thereto, then the provisions of section 103(e)(4) of this title shall not apply to such bridge, tunnel, or approach.

§ 126. Diversion

(a) Since it is unfair and unjust to tax motor-vehicle transportation unless the proceeds of such taxation are applied to the construction, improvement, or maintenance of highways, after June 30, 1935, Federal aid for highway construction shall be extended only to those States that use at least the amounts provided by law on June 18, 1934, for such purposes in each State from State motor vehicle registration fees, licenses, gasoline taxes, and other special taxes on motor-vehicle owners and operators of all kinds for the construction, improvement, and maintenance of highways and administrative ex-

penses in connection therewith, including the retirement of bonds for the payment of which such revenues have been pledged, and for no other purposes, under such regulations as the Secretary of Transportation shall promulgate from time to time.

(b) In no case shall the provisions of this section operate to deprive any State of more than one-third of the entire apportionment authorized under this chapter to which that State would be entitled in any fiscal year. The amount of any reduction in a State's apportionment shall be reapportioned in the same manner as any other unexpended balance at the end of the period during which it otherwise would be available in accordance with section 104(b) of this title.

§ 127. Vehicle weight limitations—Interstate System

(a) IN GENERAL.—No funds shall be apportioned in any fiscal year under section 104(b)(1) of this title to any State which does not permit the use of The Dwight D. Eisenhower System of Interstate and Defense Highways within its boundaries by vehicles with a weight of twenty thousand pounds carried on any one axle, including enforcement tolerances, or with a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances, or a gross weight of at least eighty thousand pounds for vehicle combinations of five axles or more. However, the maximum gross weight to be allowed by any State for vehicles using The Dwight D. Eisenhower System of Interstate and Defense Highways shall be twenty thousand pounds carried on one axle, including enforcement tolerances, and a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances and with an overall maximum gross weight, including enforcement tolerances, on a group of two or more consecutive axles produced by application of the following formula:

$$W=500 \left(\frac{LN}{N-1} + 12N+36 \right)$$

where W equals overall gross weight on any group of two or more consecutive axles to the nearest five hundred pounds, L equals distance in feet between the extreme of any group of two or more consecutive axles, and N equals number of axles in group under consideration, except that two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each providing the overall distance between the first and last axles of such consecutive sets of tandem axles (1) is thirty-six feet or more, or (2) in the case of a motor vehicle hauling any tank trailer, dump trailer, or ocean transport container before September 1, 1989, is 30 feet or more: *Provided*, That such overall gross weight may not exceed eighty thousand pounds, including all enforcement tolerances,

except for vehicles using Interstate Route 29 between Sioux City, Iowa, and the border between Iowa and South Dakota or vehicles using Interstate Route 129 between Sioux City, Iowa, and the border between Iowa and Nebraska, and except for those vehicles and loads which cannot be easily dismantled or divided and which have been issued special permits in accordance with applicable State laws, or the corresponding maximum weights permitted for vehicles using the public highways of such State under laws or regulations established by appropriate State authority in effect on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles on any vehicle (other than a vehicle comprised of a motor vehicle hauling any tank trailer, dump trailer, or ocean transport container on or after September 1, 1989), on the date of enactment of the Federal-Aid Highway Amendments of 1974, whichever is the greater. Any amount which is withheld from apportionment to any State pursuant to the foregoing provisions shall lapse if not released and obligated within the availability period specified in section 118(b)(1)¹ of this title. This section shall not be construed to deny apportionment to any State allowing the operation within such State of any vehicles or combinations thereof, other than vehicles or combinations subject to subsection (d) of this section, which the State determines could be lawfully operated within such State on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974. With respect to the State of Hawaii, laws or regulations in effect on February 1, 1960, shall be applicable for the purposes of this section in lieu of those in effect on July 1, 1956. With respect to the State of Michigan, laws or regulations in effect on May 1, 1982, shall be applicable for the purposes of this subsection. With respect to the State of Maryland, laws and regulations in effect on June 1, 1993, shall be applicable for the purposes of this subsection.

(C) WYOMING.—In addition to those vehicles allowed under subparagraph (A), the State of Wyoming may allow the operation of additional vehicle configurations not in actual operation on June 1, 1991, but authorized by State law not later than November 3, 1992, if such vehicle configurations comply with the single axle, tandem axle, and bridge formula limits set forth in subsection (a) and do not exceed 117,000 pounds gross vehicle weight.

(D) OHIO.—In addition to vehicles which the State of Ohio may continue to allow to be operated under subparagraph (A), such State may allow longer combination vehicles with 3 cargo carrying units of 28½ feet each (not including the truck tractor) not in actual operation on June 1, 1991, to be operated within its boundaries on the 1-mile segment of Ohio State Route 7 which begins at and is south of exit 16 of the Ohio Turnpike.

(E) ALASKA.—In addition to vehicles which the State of Alaska may continue to allow to be operated under subparagraph (A), such State may allow the operation of longer combination vehicles which were not in actual operation on June 1, 1991, but which were in actual operation prior to July 5, 1991.

(F) IOWA.—In addition to vehicles that the State of Iowa may continue to allow to be operated under subparagraph (A), the State may allow longer combination vehicles that were not in actual operation on June 1, 1991, to be operated on Interstate Route 29 between Sioux City, Iowa, and the border between Iowa and South Dakota or Interstate Route 129 between Sioux City, Iowa, and the border between Iowa and Nebraska.

(2) ADDITIONAL STATE RESTRICTIONS.—

(A) IN GENERAL.—Nothing in this subsection shall prevent any State from further restricting in any manner or prohibiting the operation of longer combination vehicles otherwise authorized under this subsection; except that such restrictions or prohibitions shall be consistent with the requirements of sections 31111-31114 of title 49.

(B) MINOR ADJUSTMENTS.—Any State further restricting or prohibiting the operations of longer combination vehicles or

The Secretary shall review for accuracy all information submitted by the States pursuant to subparagraph (A) and shall solicit and consider public comment on the accuracy of all such information.

(C) LIMITATION.—No statute or regulation shall be included on the list submitted by a State or published by the Secretary merely on the grounds that it authorized, or could have authorized, by permit or otherwise, the operation of longer combination vehicles, not in actual operation on a regular or periodic basis on or before June 1, 1991.

(D) FINAL LIST.—Except as modified pursuant to paragraph (1)(C) of this subsection, the list shall be published as final in the Federal Register not later than 180 days after the date of the enactment of this subsection. In publishing the final list, the Secretary shall make any revisions necessary to correct inaccuracies identified under subparagraph (B). After publication of the final list, longer combination vehicles may not operate on the Interstate System except as provided in the list.

(E) REVIEW AND CORRECTION PROCEDURE.—The Secretary, on his or her own motion or upon a request by any person (including a State), shall review the list issued by the Secretary pursuant to subparagraph (D). If the Secretary determines there is cause to believe that a mistake was made in the accuracy of the final list, the Secretary shall commence a proceeding to determine whether the list published pursuant to subparagraph (D) should be corrected. If the Secretary determines that there is a mistake in the accuracy of the list the Secretary shall

correct the publication under subparagraph (D) to reflect the determination of the Secretary.

L. 100-17 directed Secretary, within 6 months after Apr. 2, 1987, to enter into appropriate arrangements with the Transportation Research Board of the National Academy of Sciences to conduct a study of the following motor vehicle issues, including an analysis of the impacts of the various positions that have been put forth with respect to each issue and best estimates of effects on pavement, bridges, highway revenue and cost responsibility, and highway safety, and changes in transportation costs and other measures of productivity for various segments of the trucking industry resulting from adoption of each of the positions: (1) elimination of existing, grandfather provisions of 23 U.S.C. 127 which allow higher axle loads and gross vehicle weights than the 20,000-pound single axle load limit, 34,000-pound tandem axle load limit, and 80,000-pound gross vehicle weight limit maximums authorized by Pub. L. 93-643, (2) analysis of alternative methods of determining gross vehicle weight limit and axle loadings for all types of motor carrier vehicles, (3) analysis of the bridge formula contained in 23 U.S.C. 127 in view of current vehicle configurations, pavement and bridge stresses in accord with 1986 design and construction practices, and existing bridges on and off the Interstate System, (4) establishment of nationwide policy regarding the provisions of ‘reasonable access’ to the National Network for combination vehicles established pursuant to Pub. L. 97-424, and (5) recommendation of appropriate treatment for specialized hauling vehicles which do not comply with the existing Federal bridge formula and submit a final report to Secretary and Congress, not later than 30 months after appropriate arrangements were entered into.

STATE-IMPOSED VEHICLE WIDTH LIMITATIONS

Pub. L. 97-369, title III, §321, Dec. 18, 1982, 96 Stat. 1784, related to State-imposed vehicle width limitations, prior to repeal by Pub. L. 98-17, §2, Apr. 5, 1983, 97 Stat. 60. See section 31113 of Title 49, Transportation.

STEERING AXLE STUDY; REPORT TO CONGRESS

Section 210 of Pub. L. 94-280 directed Secretary of Transportation to conduct an investigation into relationship between gross load on front steering axles of truck tractors and safety of operation of vehicle combinations of which such truck tractors are a part, such investigation to be conducted in cooperation with representatives of (A) manufacturers of truck tractors and related equipment, (B) labor, and (C) users of such equipment, and the results of such study to be reported to Congress not later than July 1, 1977.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 141 of this title; title 49 sections 5112, 31112.

§ 128. Public hearings

(a) Any State highway department which submits plans for a Federal-aid highway project involving the by passing of or, going through any city, town, or village, either incorporated or unincorporated, shall certify to the Secretary that

it has had public hearings, or has afforded the opportunity for such hearings, and has considered the economic and social effects of such a location, its impact on the environment, and its consistency with the goals and objectives of such urban planning as has been promulgated by the community. Any State highway department which submits plans for an Interstate System project shall certify to the Secretary that it has had public hearings at a convenient location, or has afforded the opportunity for such hearings for the purpose of enabling persons in rural areas through or contiguous to whose property the highway will pass to express any objections they may have to the proposed locations of such highway. Such certification shall be accompanied by a report which indicates the consideration given to the economic, social, environmental and other effects of the plan or highway location or design and various alternatives which were raised during the hearing or which were otherwise considered.

(b) When hearings have been held under subsection (a), the State highway department shall submit a copy of the transcript of said hearings to the Secretary, together with the certification and report.

§ 129. Toll roads, bridges, tunnels, and ferries

(a) BASIC PROGRAM.—

(1) AUTHORIZATION FOR FEDERAL PARTICIPATION.—Notwithstanding section 301 of this title and subject to the provisions of this section, the Secretary shall permit Federal participation in—

(A) initial construction of a toll highway, bridge, or tunnel (other than a highway, bridge, or tunnel on the Interstate System) or approach thereto;

(B) reconstructing, resurfacing, restoring, and rehabilitating a toll highway, bridge, or tunnel (including a toll highway, bridge, or tunnel subject to an agreement entered into under this section or section 119(e) as in effect on the day before the date of the enactment of the Intermodal Surface Transpor-

tation Efficiency Act of 1991) or approach thereto;

(C) reconstruction or replacement of a toll-free bridge or tunnel and conversion of the bridge or tunnel to a toll facility;

(D) reconstruction of a toll-free Federal-aid highway (other than a highway on the Interstate System) and conversion of the highway to a toll facility; and

(E) preliminary studies to determine the feasibility of a toll facility for which Federal participation is authorized under subparagraph (A), (B), (C), or (D);

on the same basis and in the same manner as in the construction of free highways under this chapter.

(2) OWNERSHIP.—Each highway, bridge, tunnel, or approach thereto constructed under this subsection must—

(A) be publicly owned, or

(B) be privately owned if the public authority having jurisdiction over the highway, bridge, tunnel, or approach has entered into a contract with a private person or persons to design, finance, construct, and operate the facility and the public authority will be responsible for complying with all applicable requirements of this title with respect to the facility.

(3) LIMITATIONS ON USE OF REVENUES.—Before the Secretary may permit Federal participation under this subsection in construction of a highway, bridge, or tunnel located in a State, the public authority (including the State transportation department) having jurisdiction over the highway, bridge, or tunnel must enter into an agreement with the Secretary which provides that all toll revenues received from operation of the toll facility will be used first for debt service, for reasonable return on investment of any private person financing the project, and for the costs necessary for the proper operation and maintenance of the toll facility, including reconstruction, resurfacing, restoration, and rehabilitation. If the State certifies annually that the tolled facility is being adequately maintained, the State may use any toll revenues in excess of amounts required under the preceding sentence for any purpose for which Federal funds may be obligated by a State under this title.

(4) SPECIAL RULE FOR FUNDING.—In the case of a toll highway, bridge, or tunnel under the jurisdiction of a public authority of a State (other than the State transportation department), upon request of the State transportation department and subject to such terms and conditions as such department and public authority may agree, the Secretary shall reimburse such public authority for the Federal share of the costs of construction of the project carried out on the toll facility under this subsection in the same manner and to the same extent as such department would be reimbursed if such project was being carried out by such department. The reimbursement of funds under this paragraph shall be from sums apportioned to the State under this chapter and available for obligations on projects on the Federal-aid system in such State on which the project is being carried out.

(5) LIMITATION ON FEDERAL SHARE.—The Federal share payable for a project described in paragraph (1) shall be a percentage determined by the State but not to exceed 80 percent.

(6) MODIFICATIONS.—If a public authority (including a State transportation department) having jurisdiction over a toll highway, bridge, or tunnel subject to an agreement under this section or section 119(e), as in effect on the day before the effective date of title I of the Intermodal Surface Transportation Efficiency Act of 1991, requests modification of such agreement, the Secretary shall modify such agreement to allow the continuation of tolls in accordance with paragraph (3) without repayment of Federal funds.

(7) LOANS.—

(A) IN GENERAL.—A State may loan to a public or private entity constructing or proposing to construct under this section a toll facility or non-toll facility with a dedicated revenue source an amount equal to all or part of the Federal share of the cost of the project if the project has a revenue source specifically dedicated to it. Dedicated revenue sources for non-toll facilities include excise taxes, sales taxes, motor vehicle use fees, tax on real property, tax increment financing, and such other dedicated revenue sources as the Secretary determines appropriate.

(B) COMPLIANCE WITH FEDERAL LAWS.—As a condition of receiving a loan under this paragraph, the public or private entity that receives the loan shall ensure that the project will be carried out in accordance with this title and any other applicable Federal law, including any applicable provision of a Federal environmental law.

(C) SUBORDINATION OF DEBT.—The amount of any loan received for a project under this paragraph may be subordinated to any other debt financing for the project.

(D) OBLIGATION OF FUNDS LOANED.—Funds loaned under this paragraph may only be obligated for projects under this paragraph.

(E) REPAYMENT.—The repayment of a loan made under this paragraph shall commence not later than 5 years after date on which the facility that is the subject of the loan is open to traffic.

(F) TERM OF LOAN.—The term of a loan made under this paragraph shall not exceed 30 years from the date on which the loan funds are obligated.

(G) INTEREST.—A loan made under this paragraph shall bear interest at or below market interest rates, as determined by the State, to make the project that is the subject of the loan feasible.

(H) REUSE OF FUNDS.—Amounts repaid to a State from a loan made under this paragraph may be obligated—

(i) for any purpose for which the loan funds were available under this title; and

(ii) for the purchase of insurance or for use as a capital reserve for other forms of credit enhancement for project debt in order to improve credit market access or to lower interest rates for projects eligible for assistance under this title.

(I) GUIDELINES.—The Secretary shall establish procedures and guidelines for making loans under this paragraph.

(8) INITIAL CONSTRUCTION DEFINED.—For purposes of this subsection, the term “initial construction” means the construction of a highway, bridge, or tunnel at any time before it is open to traffic and does not include any improvement to a highway, bridge, or tunnel after it is open to traffic.

(b) Notwithstanding the provisions of section 301 of this title, the Secretary may permit Federal participation under this title in the construction of a project constituting an approach to a ferry, whether toll or free, the route of which has been classified as a public road and has not been designated as a route on the Interstate System. Such ferry may be either publicly or privately owned and operated, but the operating authority and the amount of fares charged for passage shall be under the control of a State agency or official, and all revenues derived from publicly owned or operated ferries shall be applied to payment of the cost of construction or acquisition thereof, including debt service, and to actual and necessary costs of operation, maintenance, repair, and replacement.

(c) Notwithstanding section 301 of this title, the Secretary may permit Federal participation under this title in the construction of ferry boats and ferry terminal facilities, whether toll or free, subject to the following conditions:

(1) It is not feasible to build a bridge, tunnel, combination thereof, or other normal highway structure in lieu of the use of such ferry.

(2) The operation of the ferry shall be on a route classified as a public road within the State and which has not been designated as a route on the Interstate System. Projects under this subsection may be eligible for both ferry boats carrying cars and passengers and ferry boats carrying passengers only.

(3) Such ferry boat or ferry terminal facility shall be publicly owned.

(4) The operating authority and the amount of fares charged for passage on such ferry shall be under the control of the State or other public entity, and all revenues derived therefrom shall be applied to actual and necessary costs of operation, maintenance, and¹ repair, debt service, negotiated management fees, and, in the case of a privately operated toll ferry, for a reasonable rate of return.

(5) Such ferry may be operated only within the State (including the islands which comprise the State of Hawaii and the islands which comprise the Commonwealth of Puerto Rico) or between adjoining States or between a point in a State and a point in the Dominion of Canada. Except with respect to operations between the islands which comprise the State of Hawaii, operations between the islands which comprise the Commonwealth of Puerto Rico, operations between a point in a State and a point in the Dominion of Canada, and operations between any two points in Alaska and between Alaska and Washington, including stops at appropriate points in the Domin-

¹ So in original. The word “and” probably should not appear.

ion of Canada, no part of such ferry operation shall be in any foreign or international waters.

(6) No such ferry shall be sold, leased, or otherwise disposed of without the approval of the Secretary. The Federal share of any proceeds from such a disposition shall be credited to the unprogramed balance of Federal-aid highway funds of the same class last apportioned to such State. Any amount so credited shall be in addition to all other funds then apportioned to such State and available for expenditure in accordance with the provisions of this title.

(d) PILOT PROGRAM.—

(1) AUTHORIZATION FOR FEDERAL PARTICIPATION.—Subject to the provisions of this subsection, the Secretary shall establish a pilot program which permits Federal participation in 9 toll facilities on the same basis and in the same manner as in the construction of free highways under this chapter.

(2) LIMITATION ON TYPES OF FACILITIES.—The Secretary may only permit Federal participation under this subsection in the following type of facilities:

(A) The construction of a new toll highway, bridge, or tunnel (other than a highway on the Interstate System).

(B) The reconstruction of an existing highway, bridge, or tunnel to expand its capacity (other than a highway, bridge, or tunnel on the Interstate System).

(3) LIMITATION ON NUMBER OF FACILITIES.—The Secretary may only permit Federal participation under this subsection in 9 facilities. One of such facilities shall be carried out in each of the following: Orange County, California, the State of Texas, the States of Pennsylvania and West Virginia, the State of Florida, States² of Georgia and West Virginia, and the State of South Carolina. The locations of the other 2 facilities shall be at the discretion of the Secretary; except that not more than 2 facilities carried out under this subsection may be located in a State. The Governor of the States of Pennsylvania and West Virginia shall select the facility to be carried out in such State. The toll facility in Orange County, California, may be located in more than 1 highway corridor to relieve congestion on existing interstate routes in such County.

(4) LIMITATION ON FEDERAL SHARE.—Notwithstanding any other provision of law, the Federal share payable for the construction or reconstruction of a toll highway, bridge, or tunnel under this subsection shall not exceed 35 percent.

(5) PUBLIC OWNERSHIP REQUIREMENT.—Each highway, bridge, tunnel, or approach thereto under this subsection must be publicly owned and operated; except that, under this subsection, Federal funds may participate in the approaches to a toll highway, toll bridge, or toll tunnel whether the highway, bridge, or tunnel is to be or has been constructed by a State or other public authority.

(6) LIMITATIONS ON USE OF REVENUES.—Before the Secretary may permit Federal participa-

tion under this subsection in a State, the State highway department (and, in the case of the State of Texas, the Texas Turnpike Authority) must enter into an agreement with the Secretary which provides that all toll revenues received from operation of the tolled facility constructed or reconstructed under this subsection will be used only on the tolled facility, and only for construction or reconstruction costs, or for the costs necessary for the proper operation, maintenance, and debt service of the tolled facility, including resurfacing, reconstruction, rehabilitation, and restoration.

(7) LIMITATION ON FEDERAL PARTICIPATION TO ORIGINAL CONSTRUCTION.—Except for reconstruction to expand capacity, toll facilities may receive Federal participation under this chapter only once for the original construction or reconstruction of the facility.

(8) EFFECT ON APPORTIONMENT.—Toll mileage constructed or reconstructed under this subsection shall not be used to increase a State's apportionment under any apportionment formula.

(9) NEW TOLL HIGHWAY DEFINED.—For purposes of this subsection, the term "new toll highway, bridge, or tunnel" shall mean initial construction of a highway, bridge, or tunnel on a new location at any time before it is open to traffic and shall not include any improvements to a toll highway, bridge, or tunnel after it is open to traffic.

(10) SPECIAL RULE FOR FUNDING OF TEXAS PROJECT.—Upon request of the Texas Department of Highways and Public Transportation and subject to such terms and conditions as such Department and the Texas Turnpike Authority may agree, the Secretary shall reimburse the Texas Turnpike Authority for the Federal share of the costs of construction of the project carried out in the State of Texas under this subsection in the same manner and to the same extent as such Department would be reimbursed if such project was being carried out by such Department. The reimbursement of funds under this paragraph shall be from sums apportioned to the State of Texas under this chapter and available for obligation on projects on the Federal-aid primary system in such State.

For the effective date of title I of the Intermodal Surface Transportation Efficiency Act of 1991, referred to in subsec. (a)(6), see section 1100 of Pub. L. 102-240, set out as an Effective Date of 1991 Amendment note under section 104 of this title.

AMENDMENTS

1995—Subsec. (a)(5). Pub. L. 104-59, §313(a), amended par. (5) generally. Prior to amendment, par. (5) read as follows:

“(5) LIMITATION ON FEDERAL SHARE.—Except as otherwise provided in this paragraph, the Federal share payable for construction of a highway, bridge, tunnel, or approach thereto or conversion of a highway, bridge, or tunnel to a toll facility under this subsection shall be such percentage as the State determines but not to exceed 50 percent. The Federal share payable for construction of a new bridge, tunnel, or approach thereto or for reconstruction or replacement of a bridge, tunnel, or approach thereto shall be such percentage as the Secretary determines but not to exceed 80 percent. In the case of a toll facility subject to an agreement under section 119 or 129, the Federal share payable on any project for resurfacing, restoring, rehabilitating, or reconstructing such facility shall be 80 percent until the scheduled expiration of such agreement (as in effect on the day before the date of the enactment of the Intermodal Surface Transportation Efficiency Act of 1991).”

Subsec. (a)(7). Pub. L. 104-59, §313(b), amended par. (7) generally. Prior to amendment, par. (7) read as follows:

“(7) LOANS.—A State may loan all or part of the Federal share of a toll project under this section to a public or private agency constructing a toll facility. Such loan may be made only after all Federal environmental requirements have been complied with and permits obtained. The amount loaned shall be subordinated to other debt financing for the facility except for loans made by the State or any other public agency to the agency constructing the facility. Funds loaned pursuant to this section may be obligated for projects eligible under this section. The repayment of any such loan shall commence not more than 5 years after the facility has opened to traffic. Any such loan shall bear interest at the average rate the State's pooled investment fund earned in the 52 weeks preceding the start of repayment. The term of any such loan shall not exceed 30 years from the time the loan was obligated. Amounts repaid to a State from any loan made under this section may be obligated for any purpose for which the loaned funds were available. The Secretary shall establish procedures and guidelines for making such loans.”

Subsec. (c)(5). Pub. L. 104-59, §313(c), inserted before period at end of first sentence “or between a point in a State and a point in the Dominion of Canada” and in second sentence substituted “Hawaii,” for “Hawaii and” and inserted “, operations between a point in a State and a point in the Dominion of Canada,” after “Puerto Rico”.

1992—Subsec. (b). Pub. L. 102-388, §410(1), which directed the substitution of “classified as a public road” for “approved under section 103(b) or (b) of this title as a part of one of the Federal-aid systems”, was executed by making the substitution for “approved under section 103(b) or (c) of this title as a part of one of the Federal-aid systems” to reflect the probable intent of Congress.

Subsec. (c)(2). Pub. L. 102-388, §410(2), amended par. (2) generally. Prior to amendment, par. (2) read as follows: “The operation of the ferry shall be on a route which has been approved under section 103(b) or (c) of this title as a part of one of the Federal-aid systems within the State and has not been designated as a route on the Interstate System.”

1991—Subsec. (a). Pub. L. 102-240, §1012(a), amended subsec. (a) generally, substituting present provisions

for provisions authorizing Federal participation in construction or acquisition of toll bridges, tunnels and approaches, provided that facility was publicly owned and operated by State or public authority, and State or authority agreed that all tolls, less those used to offset cost of operation and maintenance, were to be applied to repayment of State or authority for cost of construction or acquisition, that no tolls were to be charged after such repayment, and that facility was to be free of charge thereafter, except in case of bridge connecting United States with foreign country.

Subsec. (b). Pub. L. 102-240, §1012(c)(1), (2), redesignated subsec. (f) as (b) and struck out former subsec. (b) which authorized Secretary to approve toll roads, bridges and tunnels as part of Interstate System, authorized expenditure of Federal-aid highway funds on toll roads after they became toll-free, and required agreements between Secretary and State highway departments on construction of Interstate projects to forbid construction of toll roads, but not toll bridges and tunnels, on interstate highway route without official concurrence of Secretary, after June 30, 1968.

Subsec. (c). Pub. L. 102-240, §1012(c), redesignated subsec. (g) as (c), inserted “and ferry terminal facilities” after “boats” in introductory provisions, added par. (3) and struck out former par. (3) which read as follows: “Such ferry shall be publicly owned and operated.”, in par. (4), inserted “or other public entity” after “State” and “, debt service, negotiated management fees, and, in the case of a privately operated toll ferry, for a reasonable rate of return” before period at end, and struck out former subsec. (c) which made available funds authorized for expenditure on Federal-aid highway systems for projects approaching toll roads, bridges or tunnels up to point where project had use irrespective of use for toll road, bridge or tunnel.

Subsec. (d). Pub. L. 102-240, §1012(c)(1), (2), redesignated subsec. (j) as (d) and struck out former subsec. (d) which made available funds authorized for expenditure on Interstate System for Interstate System projects approaching toll road and having no other use, if agreement was reached that section of toll road would become free to public upon collection of tolls sufficient to liquidate cost of road and outstanding bonds and cost of maintenance, operation and debt service during period of toll collection, and that there was a reasonably satisfactory alternative free route available to bypass toll section.

Subsec. (e). Pub. L. 102-240, §1012(c)(1), struck out subsec. (e) which authorized Secretary to permit Federal participation in reconstruction and improvement of two-lane toll road designated as part of the Interstate System before June 30, 1973, as necessary to bring such road to standards of Interstate System, provided that toll road authority agreed that no new indebtedness to be liquidated by tolls was to be incurred, that all tolls be used for operation and maintenance and to repay outstanding bonds, and that, upon liquidation of such bonds, the road was to become free to public.

Subsecs. (f), (g). Pub. L. 102-240, §1012(c)(2), redesignated subsecs. (f) and (g) as (b) and (c), respectively.

Subsec. (h). Pub. L. 102-240, §1012(c)(1), struck out subsec. (h) which provided that, in case of interstate toll bridge on Federal-aid primary system, except Interstate System, owned by State or political subdivision, that became toll-free by Jan. 1, 1975, because of purchase or construction by State before Jan. 1, 1975, funds would be made available under section 104(b)(1) and (3) of this title to pay Federal share of lesser of value of bridge (after deducting portion of value already attributable to Federal funds) or amount by which principal amount of outstanding unpaid bonds issued for construction or acquisition of bridge exceeded amount accumulated for their amortization, on date bridge became free to public.

Subsec. (i). Pub. L. 102-240, §1012(c)(1), struck out subsec. (i) which authorized Secretary to permit Federal participation, through funds for Federal-aid highway system, other than Interstate System, in engineering and fiscal assessments, traffic analyses, network stud-

ies, etc., to determine whether privately owned toll bridges should be acquired by a State or subdivision.

Subsec. (j). Pub. L. 102-240, §1012(c)(2), redesignated subsec. (j) as (d).

Subsec. (k). Pub. L. 102-240, §1012(c)(1), struck out subsec. (k) which required operators of toll roads, tunnels, ferries and bridges on Federal-aid highway system to biennially certify to Governor of State that facilities were adequately maintained and that operator had ability to fund such facilities that were not adequately maintained without using Federal-aid highway funds, and which required Governor of each State to report biennially to Secretary on facilities required to so certify.

L. 93-643 substituted “operations between the islands which comprise the State of Hawaii and operations between any two points in Alaska and between Alaska and Washington, including stops at appropriate points in the Dominion of Canada” for “operations between the islands which comprise the State of Hawaii and operations between the States of Alaska and Washington, or between any two points within the State of Alaska”.

1973—Subsec. (b). Pub. L. 93-87, §118(a), inserted third sentence providing that when any toll road which the Secretary has approved as a part of the Interstate System is made a toll-free facility, Federal-aid highway funds apportioned under section 104(b)(5) of this title may be expended for the construction, reconstruction, or improvement of that road to meet the standards adopted for the improvement of projects located on the Interstate System.

Subsec. (e). Pub. L. 93-87, §118(b), struck from first sentence “on the date of enactment of this subsection” before “as he may find necessary” and substituted in third sentence “1973” for “1968”.

Subsecs. (f), (g). Pub. L. 93-87, §139, redesignated the second subsec. (f) as (g) and in par. (5) substituted “may be operated” for “shall be operated”, inserted “(including the islands which comprise the State of Hawaii)” after “within the State”, and excepted operations between the islands which comprise the State of Hawaii and operations between the States of Alaska and Washington, or between any two points within the State of Alaska from the prohibition against ferry operations in foreign or international waters.

Subsec. (h). Pub. L. 93-87, §132, added subsec. (h).

1972—Subsec. (a)(3). Pub. L. 92-434 substituted “or” for “and” making text read “maintained or operated”, and required domestic and foreign tolls for international bridges, and that the tolls be limited to amount necessary for maintenance, repair, and operation thereof.

1970—Subsec. (e). Pub. L. 91-605, §133, added subsec. (e). Former subsec. (e), pertaining to ferry approaches, redesignated (f).

Subsec. (f). Pub. L. 91-605, §§133, 139, redesignated subsec. (e), relating to ferry approaches, as (f) and added a second subsec. (f) relating to ferry boats.

1968—Subsec. (b). Pub. L. 90-495 required that, after June 30, 1968, as a condition for the addition of toll highway facilities on the Interstate System, the approval of the Secretary is required, with an affirmative finding that the construction of the road as a toll facility rather than a toll-free facility is in the public interest, but with such limitation on the construction of toll facilities not to extend to toll bridges and tunnels.

1960—Pub. L. 86-657, §5(b), included ferries in section catchline.

Subsec. (c). Pub. L. 86-657, §8(a), struck out “under prior Acts” after “Funds authorized”.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 124, 148, 301 of this title; title 33 section 535f.

§ 130. Railway-highway crossings

(a) Except as provided in subsection (d)¹ of section 120 of this title and subsection (b) of this section, the entire cost of construction of projects for the elimination of hazards of railway-highway crossings, including the separation or protection of grades at crossings, the reconstruction of existing railroad grade crossing structures, and the relocation of highways to eliminate grade crossings, may be paid from sums apportioned in accordance with section 104 of this title. In any case when the elimination of the hazards of a railway-highway crossing can be effected by the relocation of a portion of a railway at a cost estimated by the Secretary to be less than the cost of such elimination by one of the methods mentioned in the first sentence of this section, then the entire cost of such relocation project, except as provided in subsection (d)¹ of section 120 of this title and subsection (b) of this section, may be paid from sums appor-

tioned in accordance with section 104 of this title.

(b) The Secretary may classify the various types of projects involved in the elimination of hazards of railway-highway crossings, and may set for each such classification a percentage of the costs of construction which shall be deemed to represent the net benefit to the railroad or railroads for the purpose of determining the railroad's share of the cost of construction. The percentage so determined shall in no case exceed 10 per centum. The Secretary shall determine the appropriate classification of each project.

(c) Any railroad involved in a project for the elimination of hazards of railway-highway crossings paid for in whole or in part from sums made available for expenditure under this title, or prior Acts, shall be liable to the United States for the net benefit to the railroad determined under the classification of such project made pursuant to subsection (b) of this section. Such liability to the United States may be discharged by direct payment to the State highway department of the State in which the project is located, in which case such payment shall be credited to the cost of the project. Such payment may consist in whole or in part of materials and labor furnished by the railroad in connection with the construction of such project. If any such railroad fails to discharge such liability within a six-month period after completion of the project, it shall be liable to the United States for its share of the cost, and the Secretary shall request the Attorney General to institute proceedings against such railroad for the recovery of the amount for which it is liable under this subsection. The Attorney General is authorized to bring such proceedings on behalf of the United States, in the appropriate district court of the United States, and the United States shall be entitled in such proceedings to recover such sums as it is considered and adjudged by the court that such railroad is liable for in the premises. Any amounts recovered by the United States under this subsection shall be credited to miscellaneous receipts.

(d) SURVEY AND SCHEDULE OF PROJECTS.—Each State shall conduct and systematically maintain a survey of all highways to identify those railroad crossings which may require separation, relocation, or protective devices, and establish and implement a schedule of projects for this purpose. At a minimum, such a schedule shall provide signs for all railway-highway crossings.

(e) FUNDS FOR PROTECTIVE DEVICES.—At least ½ of the funds authorized for and expended under this section shall be available for the installation of protective devices at railway-highway crossings. Sums authorized to be appropriated to carry out this section shall be available for obligation in the same manner as funds apportioned under section 104(b)(1) of this title.

(f) APPORTIONMENT.—Twenty-five percent of the funds authorized to be appropriated to carry out this section shall be apportioned to the States in the same manner as sums are apportioned under section 104(b)(2) of this title, 25 percent of such funds shall be apportioned to the States in the same manner as sums are apportioned under section 104(b)(6) of this title, and 50

¹ See References in Text note below.

percent of such funds shall be apportioned to the States in the ratio that total railway-highway crossings in each State bears to the total of such crossings in all States. The Federal share payable on account of any project financed with funds authorized to be appropriated to carry out this section shall be 90 percent of the cost thereof.

(g) ANNUAL REPORT.—Each State shall report to the Secretary not later than December 30 of each year on the progress being made to implement the railway-highway crossings program authorized by this section and the effectiveness of such improvements. Each State report shall contain an assessment of the costs of the various treatments employed and subsequent accident experience at improved locations. The Secretary shall submit a report to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives not later than April 1 of each year, on the progress being made by the State in implementing projects to improve railway-highway crossings. The report shall include, but not be limited to, the number of projects undertaken, their distribution by cost range, road system, nature of treatment, and subsequent accident experience at improved locations. In addition, the Secretary's report shall analyze and evaluate each State program, identify any State found not to be in compliance with the schedule of improvements required by subsection (d) and include recommendations for future implementation of the railroad highway² crossings program.

(h) USE OF FUNDS FOR MATCHING.—Funds authorized to be appropriated to carry out this section may be used to provide a local government with funds to be used on a matching basis when State funds are available which may only be spent when the local government produces matching funds for the improvement of railway-highway crossings.

(i) INCENTIVE PAYMENTS FOR AT-GRADE CROSSING CLOSURES.—

(1) IN GENERAL.—Notwithstanding any other provision of this section and subject to paragraphs (2) and (3), a State may, from sums available to the State under this section, make incentive payments to local governments in the State upon the permanent closure by such governments of public at-grade railway-highway crossings under the jurisdiction of such governments.

(2) INCENTIVE PAYMENTS BY RAILROADS.—A State may not make an incentive payment under paragraph (1) to a local government with respect to the closure of a crossing unless the railroad owning the tracks on which the crossing is located makes an incentive payment to the government with respect to the closure.

(3) AMOUNT OF STATE PAYMENT.—The amount of the incentive payment payable to a local government by a State under paragraph (1) with respect to a crossing may not exceed the lesser of—

(A) the amount of the incentive payment paid to the government with respect to the

crossing by the railroad concerned under paragraph (2); or

(B) \$7,500.

(4) USE OF STATE PAYMENTS.—A local government receiving an incentive payment from a State under paragraph (1) shall use the amount of the incentive payment for transportation safety improvements.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 104, 121, 133, 307, 409 of this title.

§ 131. Control of outdoor advertising

(a) The Congress hereby finds and declares that the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System and the primary system should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

(b) Federal-aid highway funds apportioned on or after January 1, 1968, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the primary system of outdoor advertising signs, displays, and devices which are within six hundred and sixty feet of the nearest edge of the right-of-way and visible from the main traveled way of the system, and Federal-aid highway funds apportioned on or after January 1, 1975, or after

the expiration of the next regular session of the State legislature, whichever is later, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the primary system of those additional outdoor advertising signs, displays, and devices which are more than six hundred and sixty feet off the nearest edge of the right-of-way, located outside of urban areas, visible from the main traveled way of the system, and erected with the purpose of their message being read from such main traveled way, shall be reduced by amounts equal to 10 per centum of the amounts which would otherwise be apportioned to such State under section 104 of this title, until such time as such State shall provide for such effective control. Any amount which is withheld from apportionment to any State hereunder shall be reapportioned to the other States. Whenever he determines it to be in the public interest, the Secretary may suspend, for such periods as he deems necessary, the application of this subsection to a State.

(c) Effective control means that such signs, displays, or devices after January 1, 1968, if located within six hundred and sixty feet of the right-of-way and, on or after July 1, 1975, or after the expiration of the next regular session of the State legislature, whichever is later, if located beyond six hundred and sixty feet of the right-of-way located outside of urban areas, visible from the main traveled way of the system, and erected with the purpose of their message being read from such main traveled way, shall, pursuant to this section, be limited to (1) directional and official signs and notices, which signs and notices shall include, but not be limited to, signs and notices pertaining to natural wonders, scenic and historical attractions, which are required or authorized by law, which shall conform to national standards hereby authorized to be promulgated by the Secretary hereunder, which standards shall contain provisions concerning lighting, size, number, and spacing of signs, and such other requirements as may be appropriate to implement this section, (2) signs, displays, and devices advertising the sale or lease of property upon which they are located, (3) signs, displays, and devices, including those which may be changed at reasonable intervals by electronic process or by remote control, advertising activities conducted on the property on which they are located, (4) signs lawfully in existence on October 22, 1965, determined by the State subject to the approval of the Secretary, to be landmark signs, including signs on farm structures or natural surfaces, or historic or artistic significance the preservation of which would be consistent with the purposes of this section, and (5) signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Interstate System or the primary system. For the purposes of this subsection, the term "free coffee" shall include coffee for which a donation may be made, but is not required.

(d) In order to promote the reasonable, orderly and effective display of outdoor advertising while remaining consistent with the purposes of this section, signs, displays, and devices whose

size, lighting and spacing, consistent with customary use is to be determined by agreement between the several States and the Secretary, may be erected and maintained within six hundred and sixty feet of the nearest edge of the right-of-way within areas adjacent to the Interstate and primary systems which are zoned industrial or commercial under authority of State law, or in unzoned commercial or industrial areas as may be determined by agreement between the several States and the Secretary. The States shall have full authority under their own zoning laws to zone areas for commercial or industrial purposes, and the actions of the States in this regard will be accepted for the purposes of this Act. Whenever a bona fide State, county, or local zoning authority has made a determination of customary use, such determination will be accepted in lieu of controls by agreement in the zoned commercial and industrial areas within the geographical jurisdiction of such authority. Nothing in this subsection shall apply to signs, displays, and devices referred to in clauses (2) and (3) of subsection (c) of this section.

(e) Any sign, display, or device lawfully in existence along the Interstate System or the Federal-aid primary system on September 1, 1965, which does not conform to this section shall not be required to be removed until July 1, 1970. Any other sign, display, or device lawfully erected which does not conform to this section shall not be required to be removed until the end of the fifth year after it becomes nonconforming.

(f) The Secretary shall, in consultation with the States, provide within the rights-of-way for areas at appropriate distances from interchanges on the Interstate System, on which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. The Secretary may also, in consultation with the States, provide within the rights-of-way of the primary system for areas in which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. Such signs shall conform to national standards to be promulgated by the Secretary.

(g) Just compensation shall be paid upon the removal of any outdoor advertising sign, display, or device lawfully erected under State law and not permitted under subsection (c) of this section, whether or not removed pursuant to or because of this section. The Federal share of such compensation shall be 75 per centum. Such compensation shall be paid for the following:

(A) The taking from the owner of such sign, display, or device of all right, title, leasehold, and interest in such sign, display, or device; and

(B) The taking from the owner of the real property on which the sign, display, or device is located, of the right to erect and maintain such signs, displays, and devices thereon.

(h) All public lands or reservations of the United States which are adjacent to any portion of the Interstate System and the primary system shall be controlled in accordance with the provisions of this section and the national standards promulgated by the Secretary.

(i) In order to provide information in the specific interest of the traveling public, the State

highway departments are authorized to maintain maps and to permit information directories and advertising pamphlets to be made available at safety rest areas. Subject to the approval of the Secretary, a State may also establish information centers at safety rest areas and other travel information systems within the rights-of-way for the purpose of informing the public of places of interest within the State and providing such other information as a State may consider desirable. The Federal share of the cost of establishing such an information center or travel information system shall be that which is provided in section 120 for a highway project on that Federal-aid system to be served by such center or system.

(j) Any State highway department which has, under this section as in effect on June 30, 1965, entered into an agreement with the Secretary to control the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System shall be entitled to receive the bonus payments as set forth in the agreement, but no such State highway department shall be entitled to such payments unless the State maintains the control required under such agreement: *Provided*, That permission by a State to erect and maintain information displays which may be changed at reasonable intervals by electronic process or remote control and which provide public service information or advertise activities conducted on the property on which they are located shall not be considered a breach of such agreement or the control required thereunder. Such payments shall be paid only from appropriations made to carry out this section. The provisions of this subsection shall not be construed to exempt any State from controlling outdoor advertising as otherwise provided in this section.

(k) Subject to compliance with subsection (g) of this section for the payment of just compensation, nothing in this section shall prohibit a State from establishing standards imposing stricter limitations with respect to signs, displays, and devices on the Federal-aid highway systems than those established under this section.

(l) Not less than sixty days before making a final determination to withhold funds from a State under subsection (b) of this section, or to do so under subsection (b) of section 136, or with respect to failing to agree as to the size, lighting, and spacing of signs, displays, and devices or as to unzoned commercial or industrial areas in which signs, displays, and devices may be erected and maintained under subsection (d) of this section, or with respect to failure to approve under subsection (g) of section 136, the Secretary shall give written notice to the State of his proposed determination and a statement of the reasons therefor, and during such period shall give the State an opportunity for a hearing on such determination. Following such hearing the Secretary shall issue a written order setting forth his final determination and shall furnish a copy of such order to the State. Within forty-five days of receipt of such order, the State may appeal such order to any United States district court for such State, and upon the filing of such appeal such order shall be stayed until final

judgment has been entered on such appeal. Summons may be served at any place in the United States. The court shall have jurisdiction to affirm the determination of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the United States court of appeals for the circuit in which the State is located and to the Supreme Court of the United States upon certiorari or certification as provided in title 28, United States Code, section 1254. If any part of an apportionment to a State is withheld by the Secretary under subsection (b) of this section or subsection (b) of section 136, the amount so withheld shall not be reapportioned to the other States as long as a suit brought by such State under this subsection is pending. Such amount shall remain available for apportionment in accordance with the final judgment and this subsection. Funds withheld from apportionment and subsequently apportioned or reapportioned under this section shall be available for expenditure for three full fiscal years after the date of such apportionment or reapportionment as the case may be.

(m) There is authorized to be appropriated to carry out the provisions of this section, out of any money in the Treasury not otherwise appropriated, not to exceed \$20,000,000 for the fiscal year ending June 30, 1966, not to exceed \$20,000,000 for the fiscal year ending June 30, 1967, not to exceed \$2,000,000 for the fiscal year ending June 30, 1970, not to exceed \$27,000,000 for the fiscal year ending June 30, 1971, not to exceed \$20,500,000 for the fiscal year ending June 30, 1972, and not to exceed \$50,000,000 for the fiscal year ending June 30, 1973. The provisions of this chapter relating to the obligation, period of availability and expenditure of Federal-aid primary highway funds shall apply to the funds authorized to be appropriated to carry out this section after June 30, 1967. Subject to approval by the Secretary in accordance with the program of projects approval process of section 105, a State may use any funds apportioned to it under section 104 of this title for removal of any sign, display, or device lawfully erected which does not conform to this section.

(n) No sign, display, or device shall be required to be removed under this section if the Federal share of the just compensation to be paid upon removal of such sign, display, or device is not available to make such payment. Funds apportioned to a State under section 104 of this title shall not be treated for purposes of the preceding sentence as being available to the State for making such a payment except to the extent that the State, in its discretion, expends such funds for such a payment.

(o) The Secretary may approve the request of a State to permit retention in specific areas defined by such State of directional signs, displays, and devices lawfully erected under State law in force at the time of their erection which do not conform to the requirements of subsection (c), where such signs, displays, and devices are in existence on the date of enactment of this subsection and where the State demonstrates that such signs, displays, and devices (1) provide directional information about goods and services in the interest of the traveling pub-

lic, and (2) are such that removal would work a substantial economic hardship in such defined area.

(p) In the case of any sign, display, or device required to be removed under this section prior to the date of enactment of the Federal-Aid Highway Act of 1974, which sign, display, or device was after its removal lawfully relocated and which as a result of the amendments made to this section by such Act is required to be removed, the United States shall pay 100 per centum of the just compensation for such removal (including all relocation costs).

(q)(1) During the implementation of State laws enacted to comply with this section, the Secretary shall encourage and assist the States to develop sign controls and programs which will assure that necessary directional information about facilities providing goods and services in the interest of the traveling public will continue to be available to motorists. To this end the Secretary shall restudy and revise as appropriate existing standards for directional signs authorized under subsections 131(c)(1) and 131(f) to develop signs which are functional and esthetically compatible with their surroundings. He shall employ the resources of other Federal departments and agencies, including the National Endowment for the Arts, and employ maximum participation of private industry in the development of standards and systems of signs developed for those purposes.

(2) Among other things the Secretary shall encourage States to adopt programs to assure that removal of signs providing necessary directional information, which also were providing directional information on June 1, 1972, about facilities in the interest of the traveling public, be deferred until all other nonconforming signs are removed.

(r) REMOVAL OF ILLEGAL SIGNS.—

(1) BY OWNERS.—Any sign, display, or device along the Interstate System or the Federal-aid primary system which was not lawfully erected, shall be removed by the owner of such sign, display, or device not later than the 90th day following the effective date of this subsection.

(2) BY STATES.—If any owner does not remove a sign, display, or device in accordance with paragraph (1), the State within the borders of which the sign, display, or device is located shall remove the sign, display, or device. The owner of the removed sign, display, or device shall be liable to the State for the costs of such removal. Effective control under this section includes compliance with the first sentence of this paragraph.

(s) SCENIC BYWAY PROHIBITION.—If a State has a scenic byway program, the State may not allow the erection along any highway on the Interstate System or Federal-aid primary system which before, on, or after the effective date of this subsection, is designated as a scenic byway under such program of any sign, display, or device which is not in conformance with subsection (c) of this section. Control of any sign, display, or device on such a highway shall be in accordance with this section. In designating a scenic byway for purposes of this section and section 1047 of the Intermodal Surface Transportation Efficiency Act of 1991, a State may ex-

clude from such designation any segment of a highway that is inconsistent with the State's criteria for designating State scenic byways. Nothing in the preceding sentence shall preclude a State from signing any such excluded segment, including such segment on a map, or carrying out similar activities, solely for purposes of system continuity.

(t) PRIMARY SYSTEM DEFINED.—For purposes of this section, the terms "primary system" and "Federal-aid primary system" mean the Federal-aid primary system in existence on June 1, 1991, and any highway which is not on such system but which is on the National Highway System.

(5) APPLICABILITY OF CERTAIN REQUIREMENTS TO THIRD PARTY SELLERS.—

(A) IN GENERAL.—Except as provided in subparagraphs (B) and (C), in the case of a transportation enhancement activity funded from the allocation required under paragraph (2), if real property or an interest in real property is to be acquired from a qualified organization exclusively for conservation purposes (as determined under section 170(h) of the Internal Revenue Code of 1986), the organization shall be considered to be the owner of the property for the purpose of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 et seq.).

(B) FEDERAL APPROVAL PRIOR TO INVOLVEMENT OF QUALIFIED ORGANIZATION.—If Federal approval of the acquisition of the real property or interest predates the involvement of a qualified organization described in subparagraph (A) in the acquisition of the property, the organization shall be considered to be an acquiring agency or person as described in section 24.101(a)(2) of title 49, Code of Federal Regulations, for the purpose of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

(2) CERTIFICATION.—The Governor of each State shall certify before the beginning of each quarter of a fiscal year that the State will meet all the requirements of this section and shall notify the Secretary of the amount of obligations expected to be incurred for surface transportation program projects during such quarter. A State may request adjustment to the obligation amounts later in each of such quarters. Acceptance of the notification and certification shall be deemed a contractual obligation of the United States for the payment of the surface transportation program funds expected to be obligated by the State in such quarter for projects not subject to review by the Secretary under this chapter.

(3) PAYMENTS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the Secretary shall make payments to a State of costs incurred by the State for the surface transportation program in accordance with procedures to be established by the Secretary. § 134. Metropolitan planning

(a) GENERAL REQUIREMENTS.—It is in the national interest to encourage and promote the development of transportation systems embracing various modes of transportation in a manner which will efficiently maximize mobility of people and goods within and through urbanized areas and minimize transportation-related fuel consumption and air pollution. To accomplish this objective, metropolitan planning organizations, in cooperation with the State, shall develop transportation plans and programs for urbanized areas of the State. Such plans and programs shall provide for the development of transportation facilities (including pedestrian walkways and bicycle transportation facilities) which will function as an intermodal transportation system for the State, the metropolitan areas, and the Nation. The process for developing such plans and programs shall provide for consideration of all modes of transportation and shall be continuing, cooperative, and comprehensive to the degree appropriate, based on the complexity of the transportation problems.

(b) DESIGNATION OF METROPOLITAN PLANNING ORGANIZATIONS.—

(1) IN GENERAL.—To carry out the transportation planning process required by this sec-

tion, a metropolitan planning organization shall be designated for each urbanized area of more than 50,000 population by agreement among the Governor and units of general purpose local government which together represent at least 75 percent of the affected population (including the central city or cities as defined by the Bureau of the Census) or in accordance with procedures established by applicable State or local law.

(2) MEMBERSHIP OF CERTAIN MPO'S.—In a metropolitan area designated as a transportation management area, the metropolitan planning organization designated for such area shall include local elected officials, officials of agencies which administer or operate major modes of transportation in the metropolitan area (including all transportation agencies included in the metropolitan planning organization on June 1, 1991) and appropriate State officials. This paragraph shall only apply to a metropolitan planning organization which is redesignated after the date of the enactment of this section.

(3) LIMITATION ON STATUTORY CONSTRUCTION.—Nothing in this subsection shall be construed to interfere with the authority, under any State law in effect on the date of the enactment of this section, of a public agency with multimodal transportation responsibilities to—

(A) develop plans and programs for adoption by a metropolitan planning organization; and

(B) develop long-range capital plans, coordinate transit services and projects, and carry out other activities pursuant to State law.

(4) CONTINUING DESIGNATION.—Designations of metropolitan planning organizations, whether made under this section or other provisions of law, shall remain in effect until redesignated under paragraph (5) or revoked by agreement among the Governor and units of general purpose local government which together represent at least 75 percent of the affected population or as otherwise provided under State or local procedures.

(5) REDESIGNATION.—

(A) PROCEDURES.—A metropolitan planning organization may be redesignated by agreement among the Governor and units of general purpose local government which together represent at least 75 percent of the affected population (including the central city or cities as defined by the Bureau of the Census) as appropriate to carry out this section.

(B) CERTAIN REQUESTS TO REDESIGNATE.—A metropolitan planning organization shall be redesignated upon request of a unit or units of general purpose local government representing at least 25 percent of the affected population (including the central city or cities as defined by the Bureau of the Census) in any urbanized area (i) whose population is more than 5,000,000 but less than 10,000,000, or (ii) which is an extreme nonattainment area for ozone or carbon monoxide as defined under the Clean Air Act. Such redesignation shall be accomplished using procedures established by subparagraph (A).

(6) TREATMENT OF LARGE URBAN AREAS.—More than 1 metropolitan planning organization may be designated within an urbanized area as defined by the Bureau of the Census only if the Governor determines that the size and complexity of the urbanized area make designation of more than 1 metropolitan planning organization for such area appropriate.

(c) METROPOLITAN AREA BOUNDARIES.—For the purposes of this section, the boundaries of a metropolitan area shall be determined by agreement between the metropolitan planning organization and the Governor. Each metropolitan area shall cover at least the existing urbanized area and the contiguous area expected to become urbanized within the 20-year forecast period and may encompass the entire metropolitan statistical area or consolidated metropolitan statistical area, as defined by the Bureau of the Census. For areas designated as nonattainment areas for ozone or carbon monoxide under the Clean Air Act, the boundaries of the metropolitan area shall at least include the boundaries of the nonattainment area, except as otherwise provided by agreement between the metropolitan planning organization and the Governor.

(d) COORDINATION IN MULTISTATE AREAS.—

(1) IN GENERAL.—The Secretary shall establish such requirements as the Secretary considers appropriate to encourage Governors and metropolitan planning organizations with responsibility for a portion of a multi-State metropolitan area to provide coordinated transportation planning for the entire metropolitan area.

(2) COMPACTS.—The consent of Congress is hereby given to any 2 or more States to enter into agreements or compacts, not in conflict with any law of the United States, for cooperative efforts and mutual assistance in support of activities authorized under this section as such activities pertain to interstate areas and localities within such States and to establish such agencies, joint or otherwise, as such States may deem desirable for making such agreements and compacts effective.

(e) COORDINATION OF MPO'S.—If more than 1 metropolitan planning organization has authority within a metropolitan area or an area which is designated as a nonattainment area for ozone or carbon monoxide under the Clean Air Act, each metropolitan planning organization shall consult with the other metropolitan planning organizations designated for such area and the State in the coordination of plans and programs required by this section.

(f) FACTORS TO BE CONSIDERED.—In developing transportation plans and programs pursuant to this section, each metropolitan planning organization shall, at a minimum, consider the following:

(1) Preservation of existing transportation facilities and, where practical, ways to meet transportation needs by using existing transportation facilities more efficiently.

(2) The consistency of transportation planning with applicable Federal, State, and local energy conservation programs, goals, and objectives.

(3) The need to relieve congestion and prevent congestion from occurring where it does not yet occur.

(4) The likely effect of transportation policy decisions on land use and development and the consistency of transportation plans and programs with the provisions of all applicable short- and long-term land use and development plans.

(5) The programming of expenditure on transportation enhancement activities as required in section 133.

(6) The effects of all transportation projects to be undertaken within the metropolitan area, without regard to whether such projects are publicly funded.

(7) International border crossings and access to ports, airports, intermodal transportation facilities, major freight distribution routes, national parks, recreation areas, monuments and historic sites, and military installations.

(8) The need for connectivity of roads within the metropolitan area with roads outside the metropolitan area.

(9) The transportation needs identified through use of the management systems required by section 303 of this title.

(10) Preservation of rights-of-way for construction of future transportation projects, including identification of unused rights-of-way which may be needed for future transportation corridors and identification of those corridors for which action is most needed to prevent destruction or loss.

(11) Methods to enhance the efficient movement of freight.

(12) The use of life-cycle costs in the design and engineering of bridges, tunnels, or pavement.

(13) The overall social, economic, energy, and environmental effects of transportation decisions.

(14) Methods to expand and enhance transit services and to increase the use of such services.

(15) Capital investments that would result in increased security in transit systems.

(16) Recreational travel and tourism.

(g) DEVELOPMENT OF LONG RANGE PLAN.—

(1) IN GENERAL.—Each metropolitan planning organization shall prepare, and update periodically, according to a schedule that the Secretary determines to be appropriate, a long range plan for its metropolitan area in accordance with the requirements of this subsection.

(2) LONG RANGE PLAN.—A long range plan under this section shall be in a form that the Secretary determines to be appropriate and shall, at a minimum:

(A) Identify transportation facilities (including but not necessarily limited to major roadways, transit, and multimodal and intermodal facilities) that should function as an integrated metropolitan transportation system, giving emphasis to those facilities that serve important national and regional transportation functions. In formulating the long range plan, the metropolitan planning organization shall consider factors described in subsection (f) as such factors relate to a 20-year forecast period.

(B) Include a financial plan that demonstrates how the long-range plan can be implemented, indicates resources from public and private sources that are reasonably expected to be made available to carry out the plan, and recommends any innovative financing techniques to finance needed projects and programs, including such techniques as value capture, tolls and congestion pricing.

(C) Assess capital investment and other measures necessary to—

(i) ensure the preservation of the existing metropolitan transportation system, including requirements for operational improvements, resurfacing, restoration, and rehabilitation of existing and future major roadways, as well as operations, maintenance, modernization, and rehabilitation of existing and future transit facilities; and

(ii) make the most efficient use of existing transportation facilities to relieve vehicular congestion and maximize the mobility of people and goods.

(D) Indicate as appropriate proposed transportation enhancement activities.

(3) COORDINATION WITH CLEAN AIR ACT AGENCIES.—In metropolitan areas which are in non-attainment for ozone or carbon monoxide under the Clean Air Act, the metropolitan planning organization shall coordinate the development of a long range plan with the process for development of the transportation control measures of the State implementation plan required by the Clean Air Act.

(4) PARTICIPATION BY INTERESTED PARTIES.—Before approving a long range plan, each metropolitan planning organization shall provide citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, and other interested parties with a reasonable opportunity to comment on the long range plan, in a manner that the Secretary deems appropriate.

(5) PUBLICATION OF LONG RANGE PLAN.—Each long range plan prepared by a metropolitan planning organization shall be—

(i) published or otherwise made readily available for public review; and

(ii) submitted for information purposes to the Governor at such times and in such manner as the Secretary shall establish.

(h) TRANSPORTATION IMPROVEMENT PROGRAM.—

(1) DEVELOPMENT.—The metropolitan planning organization designated for a metropolitan area, in cooperation with the State and affected transit operators, shall develop a transportation improvement program for the area for which such organization is designated. In developing the program, the metropolitan planning organization shall provide citizens, affected public agencies, representatives of transportation agency employees, other affected employee representatives, private providers of transportation, and other interested parties with a reasonable opportunity to comment on the proposed program. The program shall be updated at least once every 2 years and shall be approved by the metropolitan planning organization and the Governor.

(2) PRIORITY OF PROJECTS.—The transportation improvement program shall include the following:

(A) A priority list of projects and project segments to be carried out within each 3-year period after the initial adoption of the transportation improvement program.

(B) A financial plan that demonstrates how the transportation improvement program can be implemented, indicates resources from public and private sources that are reasonably expected to be made available to carry out the plan, and recommends any innovative financing techniques to finance needed projects and programs, including value capture, tolls, and congestion pricing.

(3) SELECTION OF PROJECTS.—Except as otherwise provided in subsection (i)(4), project selection in metropolitan areas for projects involving Federal participation shall be carried out by the State in cooperation with the metropolitan planning organization and shall be in conformance with the transportation improvement program for the area.

(4) MAJOR CAPITAL INVESTMENTS.—Not later than 6 months after the date of the enactment of this section, the Secretary shall initiate a rulemaking proceeding to conform review requirements for transit projects under the National Environmental Policy Act of 1969 to comparable requirements under such Act applicable to highway projects. Nothing in this section shall be construed to affect the applicability of such Act to transit or highway projects.

(5) INCLUDED PROJECTS.—A transportation improvement program for a metropolitan area developed under this subsection shall include projects within the area which are proposed for funding under this title and chapter 53 of title 49 and which are consistent with the long range plan developed under subsection (g) for the area. The program shall include a project, or an identified phase of a project, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project.

(6) NOTICE AND COMMENT.—Before approving a transportation improvement program, a metropolitan planning organization shall provide citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, and other interested parties with reasonable notice of and an opportunity to comment on the proposed program.

(i) TRANSPORTATION MANAGEMENT AREAS.—

(1) DESIGNATION.—The Secretary shall designate as transportation management areas all urbanized areas over 200,000 population. The Secretary shall designate any additional area as a transportation management area upon the request of the Governor and the metropolitan planning organization designated for such area or the affected local officials. Such additional areas shall include upon such a request the Lake Tahoe Basin as defined by Public Law 96-551.

(2) TRANSPORTATION PLANS AND PROGRAMS.—Within a transportation management area, transportation plans and programs shall be based on a continuing and comprehensive transportation planning process carried out by the metropolitan planning organization in cooperation with the State and transit operators.

(3) CONGESTION MANAGEMENT SYSTEM.—Within a transportation management area, the transportation planning process under this section shall include a congestion management system that provides for effective management of new and existing transportation facilities eligible for funding under this title and chapter 53 of title 49 through the use of travel demand reduction and operational management strategies. The Secretary shall establish an appropriate phase-in schedule for compliance with the requirements of this section.

(4) SELECTION OF PROJECTS.—All projects carried out within the boundaries of a transportation management area with Federal participation pursuant to this title (excluding projects undertaken on the National Highway System and pursuant to the bridge and Interstate maintenance programs) or pursuant to chapter 53 of title 49 shall be selected by the metropolitan planning organization designated for such area in consultation with the State and in conformance with the transportation improvement program for such area and priorities established therein. Projects undertaken within the boundaries of a transportation management area on the National Highway System or pursuant to the bridge and Interstate maintenance programs shall be selected by the State in cooperation with the metropolitan planning organization designated for such area and shall be in conformance with the transportation improvement program for such area.

(5) CERTIFICATION.—The Secretary shall assure that each metropolitan planning organization in each transportation management area is carrying out its responsibilities under applicable provisions of Federal law, and shall so certify at least once every 3 years. The Secretary may make such certification only if (1) a metropolitan planning organization is complying with the requirements of this section and other applicable requirements of Federal law, and (2) there is a transportation improvement program for the area that has been approved by the metropolitan planning organization and the Governor. If after September 30, 1993, a metropolitan planning organization is not certified by the Secretary, the Secretary may withhold, in whole or in part, the apportionment under section 104(b)(3) attributed to the relevant metropolitan area pursuant to section 133(d)(3) and capital funds apportioned under the formula program under section 5336 of title 49. If a metropolitan planning organization remains uncertified for more than 2 consecutive years after September 30, 1994, 20 percent of the apportionment attributed to that metropolitan area under section 133(d)(3) and capital funds apportioned under the formula program under section 5336 of title 49 shall be withheld. The withheld apportion-

ments shall be restored to the metropolitan area at such time as the metropolitan planning organization is certified by the Secretary. The Secretary shall not withhold certification under this section based upon the policies and criteria established by a metropolitan planning organization or transit grant recipient for determining the feasibility of private enterprise participation in accordance with section 5306(a) of title 49.

(j) ABBREVIATED PLANS AND PROGRAMS FOR CERTAIN AREAS.—For metropolitan areas not designated as transportation management areas under this section, the Secretary may provide for the development of abbreviated metropolitan transportation plans and programs that the Secretary determines to be appropriate to achieve the purposes of this section, taking into account the complexity of transportation problems, including transportation related air quality problems, in such areas. In no event shall the Secretary provide abbreviated plans or programs for metropolitan areas which are in nonattainment for ozone or carbon monoxide under the Clean Air Act.

(k) TRANSFER OF FUNDS.—Funds made available for a highway project under chapter 53 of title 49 shall be transferred to and administered by the Secretary in accordance with the requirements of this title. Funds made available for a transit project under the Federal-Aid Highway Act of 1991 shall be transferred to and administered by the Secretary in accordance with the requirements of chapter 53 of title 49. The provisions of title 23, United States Code, regarding the non-Federal share shall apply to title 23 funds used for transit projects and the provisions of chapter 53 of title 49 regarding non-Federal share shall apply to chapter 53 funds used for highway projects.

(l) ADDITIONAL REQUIREMENTS FOR CERTAIN NONATTAINMENT AREAS.—Notwithstanding any other provisions of this title or chapter 53 of title 49, for transportation management areas classified as nonattainment for ozone or carbon monoxide pursuant to the Clean Air Act, Federal funds may not be programmed in such area for any highway project that will result in a significant increase in carrying capacity for single-occupant vehicles unless the project is part of an approved congestion management system.

(m) LIMITATION ON STATUTORY CONSTRUCTION.—Nothing in this section shall be construed to confer on a metropolitan planning organization the authority to impose legal requirements on any transportation facility, provider, or project not eligible under this title or chapter 53 of title 49.

(n) REPROGRAMMING OF SET ASIDE FUNDS.—Any funds set aside pursuant to section 104(f) of this title that are not used for the purpose of carrying out this section may be made available by the metropolitan planning organization to the State for the purpose of funding activities under section 135.

(a) The Congress hereby finds and declares that the establishment and use and maintenance of junkyards in areas adjacent to the Interstate System and the primary system should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

(b) Federal-aid highway funds apportioned on or after January 1, 1968, to any State which the Secretary determines has not made provision for effective control of the establishment and maintenance along the Interstate System and the primary system of outdoor junkyards which are within one thousand feet of the nearest edge of the right-of-way and visible from the main traveled way of the system, shall be reduced by amounts equal to 10 per centum of the amounts which would otherwise be apportioned to such State under section 104 of this title, until such time as such State shall provide for such effective control. Any amount which is withheld from apportionment to any State hereunder shall be reapportioned to the other States. Whenever he determines it to be in the public interest, the Secretary may suspend, for such periods as he deems necessary, the application of this subsection to a State.

(h) Notwithstanding any provision of this section, any junkyard in existence on the date of enactment of this section which does not conform to the requirements of this section and which the Secretary finds as a practical matter cannot be screened, shall not be required to be removed until July 1, 1970.

(i) The Federal share of landscaping and screening costs under this section shall be 75 per centum.

(j) Just compensation shall be paid the owner for the relocation, removal, or disposal of junkyards lawfully established under State law. The Federal share of such compensation shall be 75 per centum.

(k) All public lands or reservations of the United States which are adjacent to any portion of the interstate and primary systems shall be effectively controlled in accordance with the provisions of this section.

(l) Nothing in this section shall prohibit a State from establishing standards imposing stricter limitations with respect to outdoor junkyards on the Federal-aid highway systems than those established under this section.

STUDY OF ALTERNATIVE TRANSPORTATION MODES IN NATIONAL PARK SYSTEM

Pub. L. 102-240, title I, §1050, Dec. 18, 1991, 105 Stat. 2000, provided that:

“(a) IN GENERAL.—Not later than 12 months after the date of the enactment of this Act [Dec. 18, 1991], the Secretary, in consultation with the Secretary of the Interior, shall conduct and transmit to Congress a study of alternative transportation modes for use in the National Park System. In conducting such study, the Secretary shall consider (1) the economic and technical feasibility, environmental effects, projected costs and benefits as compared to the costs and benefits of existing transportation systems, and general suitability of transportation modes that would provide efficient and environmentally sound ingress to and egress from National Park lands; and (2) methods to obtain private capital for the construction of such transportation modes and related infrastructure.

“(b) FUNDING.—From sums authorized to be appropriated for park roads and parkways for fiscal year 1992, \$300,000 shall be available to carry out this section.”

§ 139. Additions to Interstate System

(a) Whenever the Secretary determines that a highway on the Federal-aid primary system meets all of the standards of a highway on the Interstate System and that such highway is a logical addition or connection to the Interstate

System, he may, upon the affirmative recommendation of the State or States involved, designate such highway as a part of the Interstate System. The mileage of any highway designated as part of the Interstate System under this section shall not be charged against the limitation established by the first sentence of section 103(e) of this title. The designation of a highway as part of the Interstate System under this subsection shall create no Federal financial responsibility with respect to such highway; except that any State may use funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title for the resurfacing, restoring, rehabilitating, and reconstructing of any highway designated as a route on the Interstate System under this subsection before the date of enactment of this sentence.

(b) Whenever the Secretary determines that a highway on the Federal-aid primary system would be a logical addition or connection to the Interstate System and would qualify for designation as a route on that system in the same manner as set forth in paragraph 1 of subsection (e) of section 103 of this title, he may upon the affirmative recommendation of the State or States involved designate such highway as a future part of the Interstate System. Such designation shall be made only upon the written agreement of the State or States involved that such highway will be constructed to meet all the standards of a highway on the Interstate System within twelve years of the date of the agreement between the Secretary and the State or States involved. The mileage of any highway designated as a future part of the Interstate System under this subsection shall not be charged against the limitations established by the first sentence of section 103(e) of this title. The designation of a highway as part of the Interstate System under this subsection shall create no Federal financial responsibility with respect to such highway; except that any State may use funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title for the resurfacing, restoring, rehabilitating, and reconstructing of any highway designated as a route on the Interstate System under this subsection before the date of enactment of this sentence. In the event that the State or States involved have not substantially completed the construction of any highway designated under this subsection within the time provided for in the agreement between the Secretary and State or States involved, the Secretary shall remove the designation of such highway as a future part of the Interstate System. Removal of such designation as result of failure to comply with the agreement provided for in this subsection shall in no way prohibit the Secretary from designating such route as part of the Interstate System pursuant to subsection (a) of this section or under any other provision of law providing for addition to the Interstate System. No law, rule, regulation, map, document, or other record of the United States, or of any State or political subdivision thereof, shall refer to any highway under this section, nor shall any such highway be signed or marked, as a highway on the Interstate System until such time as such highway is constructed to the geometric and construction standards for

the Interstate System and has been designated as a part of the Interstate System.

(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.

(Added Pub. L. 90-495, §16(a), Aug. 23, 1968, 82 Stat. 823; amended Pub. L. 91-605, title I, §§106(b)(1), 140, Dec. 31, 1970, 84 Stat. 1716, 1736; Pub. § 143. Economic growth center development highways

(a) In order to promote the desirable development of the Nation's natural resources, to revitalize and diversify the economy of rural areas and smaller communities, to enhance and disperse industrial growth, to encourage more balanced population patterns, to check, and, where possible, to reverse current migratory trends from rural areas and smaller communities, and to improve living conditions and the quality of the environment, the Secretary is authorized to make grants to States for projects for the construction, reconstruction, and improvement of development highways on a Federal-aid system (other than the Interstate System) to serve and promote the development of economic growth centers and surrounding areas, encourage the location of business and industry in rural areas, facilitate the mobility of labor in sparsely populated areas, and provide rural citizens with improved highways to such public and private services as health care, recreation, employment, education, and cultural activities, or otherwise encourage the social and economic development of rural communities, and for planning, surveys, and investigations in connection therewith.

(b) Each Governor may transmit to the Secretary his recommendations for (1) the selection of economic growth centers within the State, (2) priorities for the construction of development highways on a Federal-aid system (other than

the Interstate System) to serve such centers, and (3) such other information as may be required by the Secretary, for his consideration in approving the selection of economic growth centers for projects.

(c) Upon the application of the State highway department of any State in which an economic growth center approved by the Secretary as eligible for a project is located, the Secretary is authorized to pay up to 100 per centum of the cost of engineering and economic surveys or other investigations necessary for the planning and design of development highways on a Federal-aid system (other than the Interstate System) needed to provide appropriate access to such growth center, including publicly owned airport facilities and public ports for water transportation which may be established to serve it, in order to carry out the purposes of this section.

(d) Except as otherwise provided in this section, all of the provisions of this title applicable to highways on the Federal-aid system on which such development highway is located except those which the Secretary determines are inconsistent with this section shall apply to development highways and to funds authorized to carry out this section. For the purposes of sections 105, 106, and 118 of this title, funds authorized to carry out this section shall be deemed to be apportioned on January 1 next preceding the commencement of the fiscal year for which authorized. No State shall receive in any fiscal year more than 15 per centum of the funds authorized to carry out this section for such fiscal year.

(e) Except as otherwise provided in subsection (c) of this section, the Federal share of the cost of any project for construction, reconstruction, or improvement of a development highway under this section shall be the same as that provided under this title for any other project on the Federal-aid system on which such development highway is located.

(f)(1) Except in the case of a project subject to paragraph (2) of this subsection, no project shall be approved by the Secretary under this section until he has determined that such project will promote the aims and purposes set forth in subsection (a) of this section and that the economic growth center to be benefited will meet such criteria as he, after consultation with the Secretary of Commerce, deems necessary, including, but not limited to, the following: (1) growth centers shall be geographically and economically capable of contributing significantly to the development of the area, and (2) growth centers shall have a population not in excess of one hundred thousand according to the latest available Federal census. In approving projects the Secretary shall give preference to those areas offering the most potential for future economic growth.

(2) In the case of a project proposed to be conducted within the Appalachian region as defined in section 403 of the Appalachian Regional Development Act of 1965, no project shall be approved by the Secretary under this section until he shall have consulted with the Federal Co-chairman of the Appalachian Regional Commission. In the case of a project proposed to be conducted within an economic development region

as defined in title V of the Public Works and Economic Development Act of 1965, no project shall be approved by the Secretary under this section until he shall have consulted with the Federal Cochairman for such region and the Secretary of Commerce. In consultation with the appropriate official, the Secretary shall establish criteria for the selection of growth centers eligible for assistance under this section such that the aims and purposes set forth in subsection (a) of this section will be promoted. Such criteria shall include, but not be limited to, the following: (1) growth centers shall be geographically and economically capable of contributing significantly to the development of the area, (2) growth centers shall have a population not in excess of one hundred thousand persons according to the latest available Federal census, and (3) the selection of such growth centers within the Appalachian region and the economic development regions shall take into account the purposes of the Appalachian Regional Development Act of 1965 and the Public Works and Economic Development Act of 1965. In approving projects the Secretary shall give preference to those areas offering the most potential for future economic growth and he shall make arrangements for close coordination throughout the development and implementation of the project with the Federal Cochairman of the Appalachian Regional Commission, or with the appropriate Federal Cochairman of an economic development region, and the Secretary of Commerce, as the case may be.

(g) There is authorized to be appropriated out of the Highway Trust Fund not to exceed \$50,000,000 for the fiscal year ending June 30, 1972, and not to exceed \$50,000,000 for the fiscal year ending June 30, 1973.

(Added Pub. L. 91-605, title I, §127(a), Dec. 31, 1970, 84 Stat. 1729; amended Pub. L. 93-87, title I, §122, Aug. 13, 1973, 87 Stat. 261.)

§ 144. Highway bridge replacement and rehabilitation program

(a) Congress hereby finds and declares it to be in the vital interest of the Nation that a highway bridge replacement and rehabilitation program be established to enable the several States to replace or rehabilitate highway bridges over waterways, other topographical barriers, other highways, or railroads when the States and the Secretary finds that a bridge is significantly important and is unsafe because of structural deficiencies, physical deterioration, or functional obsolescence.

(b) The Secretary, in consultation with the States, shall (1) inventory all those highway bridges on any Federal-aid system which are bridges over waterways, other topographical barriers, other highways, and railroads; (2) classify them according to serviceability, safety, and essentiality for public use; (3) based on that classification, assign each a priority for replacement or rehabilitation; and (4) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(c)(1) The Secretary, in consultation with the States, shall (1) inventory all those highway bridges on public roads, other than those on any Federal-aid system, which are bridges over waterways, other topographical barriers, other highways, and railroads, (2) classify them according to serviceability, safety, and essentiality for public use, (3) based on the classification, assign each a priority for replacement or rehabilitation and (4) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(2) The Secretary may, at the request of a State, inventory bridges, on and off the Federal-aid system, for historic significance.

(3) INVENTORY OF INDIAN RESERVATION AND PARK BRIDGES.—As part of the activities carried out under paragraph (1), the Secretary, in consultation with the Secretary of the Interior, shall (A) inventory all those highway bridges on Indian reservation roads and park roads which are bridges over waterways, other topographical barriers, other highways, and railroads, (B) classify them according to serviceability, safety, and essentiality for public use, (C) based on the

classification, assign each a priority for replacement or rehabilitation, and (D) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(d) Whenever any State or States make application to the Secretary for assistance in replacing or rehabilitating a highway bridge which the priority system established under subsection (b) and (c) of this section shows to be eligible, the Secretary may approve Federal participation in replacing such bridge with a comparable facility or in rehabilitating such bridge. Whenever any State makes application to the Secretary for assistance in painting and seismic retrofit, or applying calcium magnesium acetate to, the structure of a highway bridge, the Secretary may approve Federal participation in the painting or seismic retrofit of, or application of such acetate to, such structure. The Secretary shall determine the eligibility of highway bridges for replacement or rehabilitation for each State based upon the unsafe highway bridges in such State, except that a State may carry out a project for seismic retrofit of a bridge under this section without regard to whether the bridge is eligible for replacement or rehabilitation under this section. In approving projects (other than projects for bridge structure painting or seismic retrofit or application of such acetate) under this section, the Secretary shall give consideration to those projects which will remove from service those highway bridges most in danger of failure.

(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized in accordance with this subsection. Each deficient bridge shall be placed into one of the following categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid system bridges eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by the respective unit price on a State-by-State basis, as determined by the Secretary; and the total cost in each State divided by the total cost of the deficient bridges in all States shall determine the apportionment factors. For purposes of the preceding sentence, the total cost of deficient bridges in a State and in all States shall be reduced by the total cost of any highway bridges constructed under subsection (m) in such State, relating to replacement of destroyed bridges and ferryboat services. No State shall receive more than 10 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds apportioned under this section shall be available for expenditure for the same period as funds apportioned for projects on the Federal-aid primary system under this title. Any funds not obligated at the expiration of such period shall be reapportioned by the Secretary to the other States in accordance with this subsection. The use of funds authorized under this section to carry out a project for the seismic retrofit of a bridge shall not affect the apportionment of funds under this section.

(f) The Federal share payable on account of any project under this section shall be 80 per centum of the cost thereof.

(g) SET ASIDES.—

(1) DISCRETIONARY BRIDGE PROGRAM.—Of the amounts authorized for each of fiscal years 1992, 1993, 1994, 1995, 1996, and 1997 by section 103 of the Intermodal Surface Transportation Efficiency Act of 1991, all but \$57,000,000 in the case of fiscal year 1992, \$68,000,000 in the case of fiscal years 1993 and 1994, and \$69,000,000 in the case of fiscal years 1995, 1996, and 1997 shall be apportioned as provided in subsection (e) of this section. \$49,000,000 in the case of fiscal year 1992, \$59,500,000 in the case of fiscal years 1993 and 1994, and \$60,500,000 in the case of fiscal years 1995, 1996, and 1997 of the amount authorized for each of such fiscal years shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date, except that the obligation of \$49,000,000 in the case of fiscal year 1992, \$59,500,000 in the case of fiscal years 1993 and 1994, and \$60,500,000 in the case of fiscal years 1995, 1996, and 1997 shall be at the discretion of the Secretary, and \$8,500,000 per fiscal year (\$8,000,000 in the case of fiscal year 1992) of the amount authorized for each of such fiscal years shall be available in accordance with section 1039 of the Intermodal Surface Transportation Efficiency Act of 1991, relating to highway timber bridges.

(2) ELIGIBLE DISCRETIONARY PROJECTS.—Subject to section 149(d) of the Federal-Aid Highway Act of 1987, amounts made available by paragraph (1) for obligation at the discretion of the Secretary may be obligated only—

(A) for a project for a highway bridge the replacement or rehabilitation cost of which is more than \$10,000,000, and

(B) for a project for a highway bridge the replacement or rehabilitation cost of which is less than \$10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) for the fiscal year in which application is made for a grant for such bridge.

(3) OFF-SYSTEM BRIDGES.—Not less than 15 percent nor more than 35 percent of the amount apportioned to each State in each of fiscal years 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, and 1997, shall be expended for projects to replace, rehabilitate, paint or seismic retrofit, or apply calcium magnesium acetate to highway bridges located on public roads, other than those on a Federal-aid system. The Secretary, after consultation with State and local officials, may, with respect to such State, reduce the requirement for expenditure for bridges not on a Federal-aid system when the Secretary determines that such State has inadequate needs to justify such expenditure.

(4) INDIAN RESERVATION BRIDGES.—Not less than 1 percent of the amount apportioned to each State which has an Indian reservation within its boundaries for each fiscal year shall be expended for projects to replace, rehabilitate, paint, or apply calcium magnesium acetate to highway bridges located on Indian res-

ervation roads. Upon determining a State bridge apportionment and before transferring funds to the States, the Secretary shall transfer the Indian reservation bridge allocation under this paragraph to the Secretary of the Interior for expenditure pursuant to this paragraph. The Secretary, after consultation with State and Indian tribal government officials and with the concurrence of the Secretary of the Interior, may, with respect to such State, reduce the requirement for expenditure for bridges under this paragraph when the Secretary determines that there are inadequate needs to justify such expenditure. The non-Federal share payable on account of such a project may be provided from funds made available for Indian reservation roads under chapter 2 of this title.

(h) Notwithstanding any other provision of law, the General Bridge Act of 1946 (33 U.S.C. 525-533) shall apply to bridges authorized to be replaced, in whole or in part, by this section, except that subsection (b) of section 502 of such Act of 1946 and section 9 of the Act of March 3, 1899 (30 Stat. 1151) shall not apply to any bridge constructed, reconstructed, rehabilitated, or replaced with assistance under this title, if such bridge is over waters (1) which are not used and are not susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce, and (2) which are (a) not tidal, or (b) if tidal, used only by recreational boating, fishing, and other small vessels less than 21 feet in length.

(i) INVENTORIES AND REPORTS.—The Secretary shall—

(1) report to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives on projects approved under this section;

(2) annually revise the current inventories authorized by subsections (b) and (c) of this section;

(3) report to such committees on such inventories; and

(4) report to such committees such recommendations as the Secretary may have for improvements of the program authorized by this section.

Such reports shall be submitted to such committees biennially at the same time as the report required by section 307(f)¹ of this title is submitted to Congress.

(j) Sums apportioned to a State under this section shall be made available for obligation throughout such State on a fair and equitable basis.

(k) Not later than six months after the date of enactment of this subsection, and periodically thereafter, the Secretary shall review the procedure used in approving or disapproving applications submitted under this section to determine what changes, if any, may be made to expedite such procedure. Any such changes shall be implemented by the Secretary as soon as possible. Not later than nine months after the date of enactment of this subsection, the Secretary shall

submit a report to Congress which describes such review and such changes, including any recommendations for legislative changes.

(l) Notwithstanding any other provision of law, any bridge which is owned and operated by an agency (1) which does not have taxing powers, (2) whose functions include operating a federally assisted public transit system subsidized by toll revenues, shall be eligible for assistance under this section but the amount of such assistance shall in no event exceed the cumulative amount which such agency has expended for capital and operating costs to subsidize such transit system. Before authorizing an expenditure of funds under this subsection, the Secretary shall determine that the applicant agency has insufficient reserves, surpluses, and projected revenues (over and above those required for bridge and transit capital and operating costs) to fund the necessary bridge replacement or rehabilitation project. Any non-Federal funds expended for the seismic retrofit of the bridge may be credited toward the non-Federal share required as a condition of receipt of any Federal funds for seismic retrofit of the bridge made available after the date of the expenditure.

(m) REPLACEMENT OF DESTROYED BRIDGES AND FERRYBOAT SERVICE.—

(1) GENERAL RULE.—Notwithstanding any other provision of this section or of any other provision of law, a State may utilize any of the funds provided under this section to construct any bridge which—

(A) replaces any low water crossing (regardless of the length of such low water crossing),

(B) replaces any bridge which was destroyed prior to 1965,

(C) replaces any ferry which was in existence on January 1, 1984, or

(D) replaces any road bridges rendered obsolete as a result of United States Corps of Engineers flood control or channelization projects and not rebuilt with funds from the United States Corps of Engineers.

(2) FEDERAL SHARE.—The Federal share payable on any bridge construction carried out under paragraph (1) shall be 80 percent of the cost of such construction.

(n) OFF-SYSTEM BRIDGE PROGRAM.—Notwithstanding any other provision of law, with respect to any project not on a Federal-aid system for the replacement of a bridge or rehabilitation of a bridge which is wholly funded from State and local sources, is eligible for Federal funds under this section, is noncontroversial, is certified by the State to have been carried out in accordance with all standards applicable to such projects under this section, and is determined by the Secretary upon completion to be no longer a deficient bridge, any amount expended after the date of the enactment of this subsection from State and local sources for such project in excess of 20 percent of the cost of construction thereof may be credited to the non-Federal share of the cost of the projects in such State which are eligible for Federal funds under this section. Such crediting shall be in accordance with such procedures as the Secretary may establish.

¹ See References in Text note below.

(o) HISTORIC BRIDGE PROGRAM.—

(1) COORDINATION.—The Secretary shall, in cooperation with the States, implement the programs described in this section in a manner that encourages the inventory, retention, rehabilitation, adaptive reuse, and future study of historic bridges.

(2) STATE INVENTORY.—The Secretary shall require each State to complete an inventory of all bridges on and off the Federal-aid system to determine their historic significance.

(3) ELIGIBILITY.—Reasonable costs associated with actions to preserve, or reduce the impact of a project under this chapter on, the historic integrity of historic bridges shall be eligible as reimbursable project costs under this title (including this section) if the load capacity and safety features of the bridge are adequate to serve the intended use for the life of the bridge; except that in the case of a bridge which is no longer used for motorized vehicular traffic, the costs eligible as reimbursable project costs pursuant to this subsection shall not exceed the estimated cost of demolition of such bridge.

(4) PRESERVATION.—Any State which proposes to demolish a historic bridge for a replacement project with funds made available to carry out this section shall first make the bridge available for donation to a State, locality, or responsible private entity if such State, locality, or responsible entity enters into an agreement to—

(A) maintain the bridge and the features that give it its historic significance; and

(B) assume all future legal and financial responsibility for the bridge, which may include an agreement to hold the State highway agency harmless in any liability action.

Costs incurred by the State to preserve the historic bridge, including funds made available to the State, locality, or private entity to enable it to accept the bridge, shall be eligible as reimbursable project costs under this chapter up to an amount not to exceed the cost of demolition. Any bridge preserved pursuant to this paragraph shall thereafter not be eligible for any other funds authorized pursuant to this title.

(5) HISTORIC BRIDGE DEFINED.—As used in this subsection, “historic bridge” means any bridge that is listed on, or eligible for listing on, the National Register of Historic Places.

(p) APPLICABILITY OF STATE STANDARDS FOR PROJECTS.—A project not on a Federal-aid highway under this section shall be designed, constructed, operated, and maintained in accordance with State laws, regulations, directives, safety standards, design standards, and construction standards.

(q) As used in this section the term “rehabilitate” in any of its forms means major work necessary to restore the structural integrity of a bridge as well as work necessary to correct a major safety defect.

(b) ELIGIBLE PROJECTS.—Except as provided in subsection (c), a State may obligate funds apportioned to it under section 104(b)(2) for the congestion mitigation and air quality improvement program only for a transportation project or program if the project or program is for an area in the State that was designated as a non-attainment area under section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)) during any part of fiscal year 1994 and—

(1)(A) if the Secretary, after consultation with the Administrator of the Environmental Protection Agency, determines, on the basis of information published by the Environmental Protection Agency pursuant to section 108(f)(1)(A) of the Clean Air Act (other than clauses (xi) and (xvi) of such section), that the project or program is likely to contribute to—

(i) the attainment of a national ambient air quality standard; or

§ 204. Federal Lands Highways Program

(a) Recognizing the need for all Federal roads which are public roads to be treated under the same uniform policies as roads which are on the Federal-aid systems, there is established a coordinated Federal lands highways program which shall consist of the public lands highways, park roads, parkways, and Indian reservation roads as defined in section 101 of this title. The Secretary, in cooperation with the Secretary of the Interior and the Secretary of Agriculture, shall develop appropriate transportation planning procedures and safety, bridge, and pavement management systems for roads funded under the Federal Lands Highway Program. Notwithstanding any other provision of this title, no public lands highway project may be undertaken in any State pursuant to this section unless the State concurs in the selection and planning of the project.

(b) Funds available for public lands highways shall be used by the Secretary to pay for the cost of planning, research, engineering and construction thereof. Funds available for park roads, parkways, and Indian reservation roads shall be used by the Secretary or the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State or civil subdivision thereof or Indian tribe as deemed advisable. In the case of Indian reservation roads, Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior. No ceiling on Federal employment shall be applicable to construction or improvement of Indian reservation roads. Funds available for each class of Federal lands highways shall be available for any kind of transportation project eligible for assistance under this title that is within or adjacent to or provides access to the areas served by

the particular class of Federal lands highways. The Secretary of Interior may reserve funds from the Bureau of Indian Affairs’ administrative funds associated with the Indian reservation roads program to finance the Indian technical centers authorized under section 326.

(c) Before approving as a project on an Indian reservation road any project eligible for funds apportioned under section 104 or section 144 of this title in a State, the Secretary must determine that the obligation of funds for such project is supplementary to and not in lieu of the obligation, for projects on Indian reservation roads, of a fair and equitable share of funds apportioned to such State under section 104 of this title. Notwithstanding any other provision of this title, Indian reservation roads under the jurisdiction of the Bureau of Indian Affairs of the Department of the Interior shall be eligible to expend not more than 15 percent funds¹ apportioned for Indian reservation roads from the Highway Trust Fund for the purpose of road sealing projects. The Bureau of Indian Affairs shall continue to retain responsibility, including annual funding request responsibility, for road maintenance programs on Indian reservations.

(d) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

(e) Construction of each project shall be performed by contract awarded by competitive bidding, unless the Secretary or the Secretary of the Interior shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest. Notwithstanding the foregoing, the provisions of section 23 of the “Buy Indian” Act of June 25, 1910 (36 Stat. 891), and the provisions of section 7(b) of the Indian Self-Determination and Education Assistance Act (88 Stat. 2205) shall apply to all funds administered by the Secretary of the Interior which are appropriated for the construction and improvement of Indian reservation roads.

(f) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

(g) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

(h) ELIGIBLE PROJECTS.—Funds available for each class of Federal lands highways may be available for the following:

(1) Transportation planning for tourism and recreational travel including the National Forest Scenic Byways Program, Bureau of Land Management Back Country Byways Program, National Trail System Program, and other similar Federal programs that benefit recreational development.

¹ So in original. Probably should be “of funds”.

- (2) Adjacent vehicular parking areas.
- (3) Interpretive signage.
- (4) Acquisition of necessary scenic easements and scenic or historic sites.
- (5) Provision for pedestrians and bicycles.
- (6) Construction and reconstruction of roadside rest areas including sanitary and water facilities.
- (7) Other appropriate public road facilities such as visitor centers as determined by the Secretary.

(i) TRANSFERS TO SECRETARY OF THE INTERIOR.—The Secretary shall transfer to the Secretary of the Interior from the appropriation for public land highways amounts as may be needed to cover necessary administrative costs of the Bureau of Land Management in connection with public lands highways.

(j) INDIAN RESERVATION ROADS PLANNING.—Up to 2 percent of funds made available for Indian reservation roads for each fiscal year shall be allocated to those Indian tribal governments applying for transportation planning pursuant to the provisions of the Indian Self-Determination and Education Assistance Act. The Indian tribal government, in cooperation with the Secretary of the Interior, and, as may be appropriate, with a State, local government, or metropolitan planning organization, shall develop a transportation improvement program, that includes all Indian reservation road projects proposed for funding. Projects shall be selected by the Indian tribal government from the transportation improvement program and shall be subject to the approval of the Secretary of the Interior and the Secretary.

Section 209, Pub. L. 85-767, Aug. 27, 1958, 72 Stat. 908; Pub. L. 88-423, § 4(b), Aug. 13, 1964, 78 Stat. 397, provided for use of funds for construction and maintenance of public lands highways, cooperation with State agencies, the application of section 112 of this title to public lands highways, and for use of such funds for adjacent ancillary facilities and services.

§ 210. Defense access roads

(a) The Secretary is authorized, out of the funds appropriated for defense access roads, to provide for the construction and maintenance of defense access roads (including bridges, tubes, and tunnels thereon) to military reservations, to defense industries and defense industry sites, and to the sources of raw material when such roads are certified to the Secretary as important to the national defense by the Secretary of Defense or such other official as the President may designate, and for replacing existing highways and highway connections that are shut off from the general public use by necessary closures or restrictions at military reservations and defense industry sites.

(b) Funds appropriated for the purposes of this section shall be available, without regard to apportionment among the several States, for paying all or any part of the cost of the construction and maintenance of defense access roads.

(c) Funds appropriated for defense maneuvers and exercises, may be used by the Secretary in areas certified to him by the Secretary of De-

fense as maneuver areas for such construction, maintenance, and repair work as may be necessary to keep the highways therein, which have been or may be used for training of the Armed Forces, in suitable condition for such training purposes and for repairing the damage caused to such highways by the operations of men and equipment in such training.

(d) Whenever any project for the construction of a circumferential highway around a city or of a radial intracity route thereto submitted by any State is certified by the Secretary of Defense, or such other official as the President may designate, as being important for civilian or military defense, such project may be constructed out of the funds heretofore or hereafter authorized to be appropriated for defense access roads.

(e) If the Secretary shall determine that the State highway department of any State is unable to obtain possession and the right to enter upon and use the required rights-of-way, lands, or interest in lands, improved or unimproved, required for any project authorized by this section with sufficient promptness, the Secretary is authorized to acquire, enter upon, take possession thereof, and expend funds for projects thereon, prior to approval of title by the Attorney General, in the name of the United States, such rights-of-way, lands, or interest in lands as may be required in such State for such projects by purchase, donation, condemnation, or otherwise in accordance with the laws of the United States (including the Act of February 26, 1931; 46 Stat. 1421). The cost incurred by the Secretary in acquiring any such rights-of-way, lands, or interest in lands may include the cost of examination and abstract of title, certificate of title, advertising, and any fees incidental to such acquisition; and shall be payable out of the funds available for paying the cost or the Federal share of the cost of the project for which such rights-of-way, lands, or interests in lands are acquired. The Secretary is further authorized and directed by proper deed executed in the name of the United States to convey any lands or interests in lands acquired in any State under the provisions of prior Acts or of this section to the State highway department of such State or to such political subdivision thereof as its laws may provide, upon such terms and conditions as may be agreed upon by the Secretary and the State highway department, or political subdivisions to which the conveyance is to be made.

(f) The provisions of section 112 of this title are applicable to defense access roads.

(g) If the Secretary shall determine that it is necessary for the expeditious completion of any defense access road project he may advance to any State out of funds appropriated for defense access roads transferred and available to the Department of Transportation the Federal share of the cost of construction thereof to enable the State highway department to make prompt payments for acquisition of rights-of-way, and for the construction as it progresses. The sums so advanced shall be deposited in a special fund by the State official authorized by State law to receive such funds, to be disbursed solely upon vouchers approved by the State highway department for rights-of-way which have been or are

being acquired and for construction which has been actually performed under this section. Upon determination by the Secretary that funds advanced to any State under the provisions of this subsection are no longer required, the amount of the advance which is determined to be in excess of requirements for the project shall be repaid upon his demand, and such repayments shall be returned to the credit of the appropriation from which the funds were advanced.

(h) Funds appropriated for the purposes of this section shall be available to pay the cost of repairing damage caused to highways by the operation of vehicles and equipment in the construction of classified military installations and facilities for ballistic missiles if the Secretary shall determine that the State highway department of any State is, or has been, unable to prevent such damage by restrictions upon the use of such highways without interference with, or delay in, the completion of a contract for the construction of such military reservations or installations. This subsection shall apply notwithstanding any provision of contract holding a party thereto responsible for such damage, if the Secretary of Defense or his designee shall determine, in fact, that construction estimates and the bid of such party did not include allowance for repairing such damage. This subsection shall apply to damage caused by construction work commenced prior to June 1, 1961, and still in progress on that date and construction work which is commenced or for which a contract is awarded on or after June 1, 1961.

§ 212. Inter-American Highway

(a) Funds appropriated for the Inter-American Highway shall be used to enable the United States to cooperate with the Governments of the American Republics situated in Central Amer-

ica—that is, with the Governments of the Republic of Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama—in the survey and construction of the Inter-American Highway within the borders of the aforesaid Republics, respectively. Not to exceed one-third of the appropriation authorized for each fiscal year may be expended without requiring the country or countries in which such funds may be expended to match any part thereof, if the Secretary of State shall find that the cost of constructing said highway in such country or countries will be beyond their reasonable capacity to bear. The remainder of such authorized appropriations shall be available for expenditure only when matched to the extent required by this section by the country in which such expenditure may be made. Expenditures from the funds available on a matching basis shall not be made for the survey and construction of any portion of said highway within the borders of any country named herein unless such country shall provide and make available for expenditure in conjunction therewith a sum equal to at least one-third of the expenditures that may be incurred by that Government and the United States on such portion of the highway. All expenditures by the United States under the provisions of this section for material, equipment, and supplies shall, whenever practicable, be made for products of the United States or of the country in which such survey or construction work is being carried on. Construction work to be performed under contract shall be advertised for a reasonable period by the Minister of Public Works, or other similar official, of the government concerned in each of the participating countries and contracts shall be awarded pursuant to such advertisements with the approval of the Secretary. No part of the appropriations authorized shall be available for obligation or expenditure for work on said highway in any cooperating country unless the government of said country shall have assented to the provisions of this section; shall have furnished satisfactory assurances that it has an organization adequately qualified to administer the functions required of such country under the provisions hereof; and then only as such country may submit requests, from time to time, for the construction of any portion of the highway to standards adequate to meet present and future traffic needs. No part of said appropriations shall be available for obligation or expenditure in any such country until the government of that country shall have entered into an agreement with the United States which shall provide, in part, that said country—

(1) will provide, without participation of funds authorized, all necessary rights-of-way for the construction of said highway, which rights-of-way shall be of a minimum width where practicable of one hundred meters in rural areas and fifty meters in municipalities and shall forever be held inviolate as a part of the highway for public use;

(2) will not impose any highway toll, or permit any such toll to be charged, for use by vehicles or persons of any portion of said highway constructed under the provisions of this section;

(3) will not levy or assess, directly or indirectly, any fee, tax, or other charge for the use

of said highway by vehicles or persons from the United States that does not apply equally to vehicles or persons of such country;

(4) will continue to grant reciprocal recognition of vehicle registration and drivers' licenses in accordance with the provisions of the Convention for the Regulation of Inter-American Automotive Traffic, which was opened for signature at the Pan American Union in Washington on December 15, 1943, and to which such country and the United States are parties, or of any other treaty or international convention establishing similar reciprocal recognition; and

(5) will provide for the maintenance of said highway after its completion in condition adequately to serve the needs of present and future traffic.

(b) The survey and construction work authorized by this section shall be under the administration of the Secretary, who shall consult with the appropriate officials of the Department of State with respect to matters involving the foreign relations of this Government, and such negotiations with the Governments of the American Republics named in subsection (a) of this section as may be required to carry out the purposes of this section shall be conducted through, or as authorized by, the Department of State.

(c) The provisions of this section shall not create nor authorize the creation of any obligations on the part of the Government of the United States with respect to any expenditures of highway construction or survey heretofore or hereafter undertaken in any of the countries enumerated in subsection (a) of this section, other than the expenditures authorized by the provisions of this section.

(d) Appropriations made pursuant to any authorizations heretofore, or hereafter enacted for the Inter-American Highway shall be considered available for expenditure by the Secretary for necessary administrative and engineering expenses in connection with the Inter-American Highway program.

REPORT TO CONGRESS ON QUALITY IMPROVEMENT

Section 1043 of Pub. L. 102-240 directed Comptroller General to submit within 24 months following Dec. 18, 1991, a report to Congress addressing means for improving quality of highways constructed with Federal assistance and addressing Federal design standards, engineering and design services, and construction of Federal-aid highway projects.

SURFACE TRANSPORTATION RESEARCH AND DEVELOPMENT PLANNING

Section 6009 of title VI of Pub. L. 102-240, as amended by Pub. L. 104-59, title III, §338(c)(1), Nov. 28, 1995, 109 Stat. 604, provided that:

“(a) FINDINGS.—Congress finds that—

“(1) despite an annual expenditure in excess of \$10,000,000,000 on surface transportation and its infrastructure, the Federal Government has not developed a clear vision of—

“(A) how the surface transportation systems of the 21st century will differ from the present;

“(B) how they will interface with each other and with other forms of transportation;

“(C) how such systems will adjust to changing American population patterns and lifestyles; and

“(D) the role of federally funded research and development in ensuring that appropriate transportation systems are developed and implemented;

“(2) the population of the United States is projected to increase by over 30,000,000 people within the next 20 years, mostly in existing major metropolitan areas, which will result in increased traffic congestion within and between urban areas, more accidents, loss of productive time, and increased cost of transportation unless new technologies are developed to improve public transportation within cities and to move people and goods between cities;

“(3) 18,000,000 crashes, 4,000,000 injuries, and 45,000 fatalities each year on the Nation’s highways are intolerable and substantial research is required in order to develop safer technologies in their most useful and economic forms;

“(4) current research and development funding for surface transportation is insufficient to provide the United States with the technologies essential to providing its own advanced transportation systems in the future and, as a result, the United States is becoming increasingly dependent on foreign surface transportation technologies and equipment to meet its expanding surface transportation needs;

“(5) a more active, focused surface transportation research and development program involving cooperation among the Federal Government, United States based industry, and United States universities should be organized on a priority basis;

“(6) intelligent transportation systems represent the best near-term technology for improving surface

transportation for public benefit by providing equipment which can improve traffic flow and provide for enhanced safety;

“(7) research and development programs related to surface transportation are fragmented and dispersed throughout government and need to be strengthened and incorporated in an integrated framework within which a consensus on the goals of a national surface transportation research and development program must be developed;

“(8) the inability of government agencies to cooperate effectively, the difficulty of obtaining public support for new systems and rights-of-way, and the high cost of capital financing discourage private firms from investing in the development of new transportation equipment and systems; therefore, the Federal Government should sponsor and coordinate research and development of new technologies to provide safer, more convenient, and affordable transportation systems for use in the future; and

“(9) an effective high technology applied research and development program should be implemented quickly by strengthening the Department of Transportation research and development staff and by contracting with private industry for specific development projects.

“(b) SURFACE TRANSPORTATION RESEARCH AND DEVELOPMENT PLAN.—

“(1) DEVELOPMENT.—The Secretary shall develop an integrated national surface transportation research and development plan (hereinafter in this subsection referred to as the ‘plan’).

“(2) FOCUS.—The plan shall focus on surface transportation systems needed for urban, suburban, and rural areas in the next decade.

“(3) CONTENTS.—The plan shall include the following:

“(A) Details of the Department’s surface transportation research and development programs, including appropriate funding levels and a schedule with milestones, preliminary cost estimates, appropriate work scopes, personnel requirements, and estimated costs and goals for the next 3 years for each area of research and development.

“(B) A 10-year projection of long-term programs in surface transportation research and development and recommendations for the appropriate source or mechanism for surface transportation research and development funding, taking into account recommendations of the Research and Development Coordinating Council of the Department of Transportation and the plan of the National Council on Surface Transportation Research.

“(C) Recommendations on changes needed to assure that Federal, State, and local contracting procedures encourage the adoption of advanced technologies developed as a consequence of the research programs in this Act [see Short Title of 1991 Amendment note set out under section 101 of Title 49, Transportation].

“(4) OBJECTIVES.—The plan shall provide for the following:

“(A) The development, within the shortest period of time possible, of a range of technologies needed to produce convenient, safe, and affordable modes of surface transportation to be available for public use beginning in the mid-1990’s.

“(B) Maintenance of a long-term advanced research and development program to provide for next generation surface transportation systems.

“(5) COOPERATION WITH INDUSTRY.—A primary component of the plan shall be cooperation with industry in carrying out this part [part A (§§ 6001-6024) of title VI of Pub. L. 102-240, enacting sections 325 and 326 of this title, sections 3711b and 3711c of Title 15, Commerce and Trade, section 111 of Title 49, Transportation, and section 1625 of former Title 49, Transportation, amending this section and sections 204 and 321 of this title, section 5316 of Title 5, Government Organization and Employees, sections 3708 and 3712 to 3715

of Title 15, sections 101 and 301 of Title 49, and sections 1607c and 1608 of former Title 49, enacting provisions set out as notes under this section and sections 101 and 112 of this title and sections 111 and 301 of Title 49, and amending provisions set out as notes under section 1608 of former Title 49] and strengthening the manufacturing capabilities of United States firms in order to produce products for surface transportation systems.

“(6) CONFORMANCE WITH PLAN.—All surface transportation research and development within the Department of Transportation shall be included in the plan and shall be evaluated in accordance with the plan.

“(7) COORDINATION.—In developing the plan and carrying out this part, the Secretary shall consult with and, where appropriate, use the expertise of other Federal agencies and their laboratories.

“(8) TRANSMITTAL.—On or before January 15, 1993, and annually thereafter, the Secretary shall transmit the plan to Congress, together with the Secretary’s comments and recommendations. The Secretary shall review and update the plan before each transmittal under this paragraph.

“(9) RECOMMENDATIONS FOR ALTERNATIVES.—In the event a different technology or alternative program can be identified that would accomplish the same or better results than those described in this part, the Secretary may make recommendations for an alternative, and shall promptly report such alternative recommendations to Congress.”

NATIONAL COUNCIL ON SURFACE TRANSPORTATION RESEARCH

Section 6010 of Pub. L. 102-240 established a National Council on Surface Transportation Research, directed Council to make a complete investigation and study of current surface transportation research and technology developments in the United States and internationally, and to identify gaps and duplication in current surface transportation research efforts, determine research and development areas which may increase efficiency, productivity, safety, and durability in the Nation’s surface transportation systems, and propose a national surface transportation research and development plan for immediate implementation, with Council to transmit to Congress, not later than Sept. 30, 1993, a report on the results of the investigation and study, including recommendations, and with Council to terminate on 180th day after date of transmittal of the report.

A majority of the members of the advisory committee shall be individuals with experience in conducting surface transportation research

and development. The Secretary in appointing the members of the advisory committee shall ensure that representatives of Federal, State, and local governments, other public agencies, colleges and universities, public, private, and nonprofit research organizations, and organizations representing transportation providers, shippers, labor, and the financial community are represented on an equitable basis.

“(d) CHAIRMAN.—The chairman of the advisory committee shall be designated by the Secretary.

§ 320. Bridges on Federal dams

(a) Each executive department, independent establishment, office, board, bureau, commission, authority, administration, corporation wholly owned or controlled by the United States, or other agency of the Government of the United States, hereinafter collectively and individually referred to as "agency", which on or after July 29, 1946, has jurisdiction over and custody of any dam constructed or to be constructed and owned by or for the United States, is authorized, with any funds available to it, to design and construct any such dam in such manner that it will constitute and serve as a suitable and adequate foundation to support a public highway bridge upon and across such dam, and to design and construct upon the foundation thus provided a public highway bridge upon and across such dam. The highway department of the State in which such dam shall be located, jointly with the Secretary, shall first determine and certify to such agency that such bridge is economically desirable and needed as a link in the State or Federal-aid highway systems, and shall request such agency to design and construct such dam so that it will serve as a suitable and adequate foundation for a public highway bridge and to design and construct such public highway bridge upon and across such dam, and shall agree to reimburse such agency pursuant to subsection (d) of this section for any additional costs which it may be required to incur because of the design and construction of such dam so that it will serve as a foundation for a public highway bridge and for expenditures which it may find it necessary to make in designing and constructing such public highway bridge upon and across such dam. In no case shall the design and construction of a bridge upon and across such dam be undertaken hereunder except by the agency having jurisdiction over and custody of the dam, acting directly or through contractors employed by it, and after such agency shall determine that it will be structurally feasible and will not interfere with the proper functioning and operation of the dam.

(b) Construction of any bridge upon and across any dam pursuant to this section shall not be commenced unless and until the State in which such bridge is to be located, or the appropriate subdivision of such State, shall enter into an agreement with such agency and with the Secretary to construct, or cause to be constructed, with or without the aid of Federal funds, the approach roads necessary to connect such bridge with existing public highways and to maintain, or cause to be maintained, such approach roads from and after their completion. Such agreement may also provide for the design and construction of such bridge upon and across the dam by such agency of the United States and for reimbursing such agency the costs incurred by it in the design and construction of the bridge as provided in subsection (d) of this section. Any such agency is hereby authorized to convey to the State, or to the appropriate subdivision

thereof, without costs, such easements and rights-of-way in its custody or over lands of the United States in its custody and control as may be necessary, convenient, or proper for the location, construction, and maintenance of the approach roads referred to in this section including such roadside parks or recreational areas of limited size as may be deemed necessary for the accommodation of the traveling public. Any bridge constructed pursuant to this section upon and across a dam in the custody and jurisdiction of any agency of the United States, including such portion thereof, if any, as may extend beyond the physical limits of the dam, shall constitute and remain a part of said dam and be maintained by the agency. Any such agency may enter into any such contracts and agreements with the State or its subdivisions respecting public use of any bridge so located and constructed as may be deemed appropriate, but no such bridge shall be closed to public use by the agency except in cases of emergency or when deemed necessary in the interest of national security.

(c) All costs and expenses incurred and expenditures made by any agency in the exercise of the powers and authority conferred by this section (but not including any costs, expenses, or expenditures which would have been required in any event to satisfy a legal road or bridge relocation obligation or to meet operating or other agency needs) shall be recorded and kept separate and apart from the other costs, expenses, and expenditures of such agency, and no portion thereof shall be charged or allocated to flood control, navigation, irrigation, fertilizer production, the national defense, the development of power, or other program, purpose, or function of such agency.

(d) Not to exceed \$65,000,000 of any money heretofore or hereafter appropriated for expenditure in accordance with the provisions of this title or prior Acts shall be available for expenditure by the Secretary in accordance with the provisions of this section, as an emergency fund, to reimburse any agency for any additional costs or expenditures which it may be required to incur because of the design and construction of any such dam so that it will constitute and serve as a foundation for a public highway bridge upon and across such dam and to reimburse any such agency for any costs, expenses, or expenditures which it may be required to make in designing and constructing any such bridge upon and across a dam in accordance with the provisions of this section, except such costs, expenses, or expenditures as would have been required of such agency in any event to satisfy a legal obligation to relocate a highway or bridge or to meet operating or other agency needs, and there is authorized to be appropriated any sum or sums necessary to reimburse the funds so expended by the Secretary from time to time under the authority of this section. Of each bridge constructed upon and across a dam under the provisions of this section, there may be financed wholly with Federal funds that portion thereof which is located within the physical limits of the masonry structure, or structures, of the dam, and the Secretary shall in his sole discretion determine what additional portion of the

bridge, if any, may be so financed, such determination to be final and conclusive. The remainder of the bridge, and any necessary related approach roads, shall be financed by the State or its appropriate subdivision with or without the aid of Federal funds; but said portion of the bridge so financed by the State or its subdivisions, including such portion thereof, if any, as may extend beyond the physical limits of the dam, shall nevertheless be designed and constructed solely by the agency having custody and jurisdiction of the dam as provided in subsection (a) of this section.

(e) In making, reviewing, or approving the design of any bridge or approach structure to be constructed under this section, the agency shall, in matters relating to roadway design, loadings, clearances and widths, and traffic safeguards, give full consideration to and be guided by the standards and advice of the Secretary.

(f) The authority conferred by this section shall be in addition to and not in limitation of authority conferred upon any agency by any other law, and nothing in this section contained shall affect or be deemed to relate to any bridge approach structure, or highway constructed or to be constructed by any such agency in furtherance of its lawful purposes and requirements or to satisfy a legal obligation incurred independently of this section.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 152, 153 of this title.

§ 402. Highway safety programs

(a) Each State shall have a highway safety program approved by the Secretary, designed to reduce traffic accidents and deaths, injuries, and property damage resulting therefrom. Such programs shall be in accordance with uniform guidelines promulgated by the Secretary. Such uniform guidelines shall be expressed in terms of performance criteria. In addition, such uniform guidelines shall include programs (1) to reduce injuries and deaths resulting from motor vehicles being driven in excess of posted speed limits, (2) to encourage the proper use of occupant protection devices (including the use of safety belts and child restraint systems) by occupants of motor vehicles and to increase public awareness of the benefit of motor vehicles equipped

with airbags, (3) to reduce deaths and injuries resulting from persons driving motor vehicles while impaired by alcohol or a controlled substance, (4) to reduce deaths and injuries resulting from accidents involving motor vehicles and motorcycles, (5) to reduce injuries and deaths resulting from accidents involving school buses, and (6) to improve law enforcement services in motor vehicle accident prevention, traffic supervision, and post-accident procedures. The Secretary shall establish a highway safety program for the collection and reporting of data on traffic-related deaths and injuries by the States. Under such program, the States shall collect and report such data as the Secretary may require. The purposes of the program are to ensure national uniform data on such deaths and injuries and to allow the Secretary to make determinations for use in developing programs to reduce such deaths and injuries and making recommendations to Congress concerning legislation necessary to implement such programs. The program shall include information obtained by the Secretary under section 4007 of the Intermodal Surface Transportation Efficiency Act of 1991 and provide for annual reports to the Secretary on the efforts being made by the States in reducing deaths and injuries occurring at highway construction sites and the effectiveness and results of such efforts. The Secretary shall establish minimum reporting criteria for the program. Such criteria shall include, but not be limited to, criteria on deaths and injuries resulting from police pursuits, school bus accidents, and speeding, on traffic-related deaths and injuries at highway construction sites and on the configuration of commercial motor vehicles involved in motor vehicle accidents. Such uniform guidelines shall be promulgated by the Secretary so as to improve driver performance (including, but not limited to, driver education, driver testing to determine proficiency to operate motor vehicles, driver examinations (both physical and mental) and driver licensing) and to improve pedestrian performance and bicycle safety. In addition such uniform guidelines shall include, but not be limited to, provisions for an effective record system of accidents (including injuries and deaths resulting therefrom), accident investigations to determine the probable causes of accidents, injuries, and deaths, vehicle registration, operation, and inspection, highway design and maintenance (including lighting, markings, and surface treatment), traffic control, vehicle codes and laws, surveillance of traffic for detection and correction of high or potentially high accident locations, and emergency services. Such guidelines as are applicable to State highway safety programs shall, to the extent determined appropriate by the Secretary, be applicable to federally administered areas where a Federal department or agency controls the highways or supervises traffic operations.

(b)(1) The Secretary shall not approve any State highway safety program under this section which does not—

(A) provide that the Governor of the State shall be responsible for the administration of the program through a State highway safety agency which shall have adequate powers, and be suitably equipped and organized to carry

out, to the satisfaction of the Secretary, such program.

(B) authorize political subdivisions of such State to carry out local highway safety programs within their jurisdictions as a part of the State highway safety program if such local highway safety programs are approved by the Governor and are in accordance with the uniform guidelines of the Secretary promulgated under this section.

(C) provide that at least 40 per centum of all Federal funds apportioned under this section to such State for any fiscal year will be expended by the political subdivisions of such State in carrying out local highway safety programs authorized in accordance with subparagraph (B) of this paragraph.

(D) provide adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks throughout the State.

(E) provide for programs (which may include financial incentives and disincentives) to encourage the use of safety belts by drivers of, and passengers in, motor vehicles.

(2) The Secretary is authorized to waive the requirement of subparagraph (C) of paragraph (1) of this subsection, in whole or in part, for a fiscal year for any State whenever he determines that there is an insufficient number of local highway safety programs to justify the expenditure in such State of such percentage of Federal funds during such fiscal year.

(3) ADMINISTRATIVE REQUIREMENTS.—The Secretary may not approve a State highway safety program under this section which does not—

(A) provide that the Governor of the State shall be responsible for the administration of the program through a State highway safety agency which shall have adequate powers and be suitably equipped and organized to carry out, to the satisfaction of the Secretary, such program;

(B) authorize political subdivisions of the State to carry out local highway safety programs within their jurisdictions as a part of the State highway safety program if such local highway safety programs are approved by the Governor and are in accordance with the minimum standards established by the Secretary under this section;

(C) except as provided in paragraph (5), provide that at least 40 percent of all Federal funds apportioned under this section to the State for any fiscal year will be expended by the political subdivisions of the State, including Indian tribal governments, in carrying out local highway safety programs authorized in accordance with subparagraph (B); and

(D) provide adequate and reasonable access for the safe and convenient movement of individuals with disabilities, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks throughout the State.

(4) WAIVER.—The Secretary may waive the requirement of paragraph (3)(C), in whole or in part, for a fiscal year for any State whenever

the Secretary determines that there is an insufficient number of local highway safety programs to justify the expenditure in the State of such percentage of Federal funds during the fiscal year.

(5) USE OF TECHNOLOGY FOR TRAFFIC ENFORCEMENT.—The Secretary may encourage States to use technologically advanced traffic enforcement devices (including the use of automatic speed detection devices such as photo-radar) by law enforcement officers.

(c) Funds authorized to be appropriated to carry out this section shall be used to aid the States to conduct the highway safety programs approved in accordance with subsection (a), including development and implementation of manpower training programs, and of demonstration programs that the Secretary determines will contribute directly to the reduction of accidents, and deaths and injuries resulting therefrom. Such funds shall be subject to a deduction not to exceed 5 per centum for the necessary costs of administering the provisions of this section, and the remainder shall be apportioned among the several States. Such funds shall be apportioned 75 per centum in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census, and 25 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. For the purposes of this subsection, a "public road" means any road under the jurisdiction of and maintained by a public authority and open to public travel. Public road mileage as used in this subsection shall be determined as of the end of the calendar year preceding the year in which the funds are apportioned and shall be certified to by the Governor of the State and subject to approval by the Secretary. The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment, except that the apportionments to the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall not be less than one-quarter of 1 per centum of the total apportionment. The Secretary shall not apportion any funds under the subsection to any State which is not implementing a highway safety program approved by the secretary in accordance with this section. For the purpose of the seventh sentence of this subsection, a highway safety program approved by the Secretary shall not include any requirement that a State implement such a program by adopting or enforcing any law, rule, or regulation based on a guideline promulgated by the Secretary under this section requiring any motorcycle operator eighteen years of age or older or passenger eighteen years of age or older to wear a safety helmet when operating or riding a motorcycle on the streets and highways of that State. Implementation of a highway safety program under this section shall not be construed to require the Secretary to require compliance with every uniform guideline, or with every element of every uniform guideline, in every State. Funds apportioned under this section to any State, that does not have a highway safety program approved by the Secretary or that is not implementing an approved pro-

gram, shall be reduced by amounts equal to not less than 50 per centum of the amounts that would otherwise be apportioned to the State under this section, until such time as the Secretary approves such program or determines that the State is implementing an approved program, as appropriate. The Secretary shall consider the gravity of the State's failure to have or implement an approved program in determining the amount of the reduction. The Secretary shall promptly apportion to the State the funds withheld from its apportionment if he approves the State's highway safety program or determines that the State has begun implementing an approved program, as appropriate, prior to the end of the fiscal year for which the funds were withheld. If the Secretary determines that the State did not correct its failure within such period, the Secretary shall reapportion the withheld funds to the other States in accordance with the formula specified in this subsection not later than 30 days after such determination.

(d) All provisions of chapter 1 of this title that are applicable to National Highway System highway funds other than provisions relating to the apportionment formula and provisions limiting the expenditure of such funds to the Federal-aid systems, shall apply to the highway safety funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section, and except that the aggregate of all expenditures made during any fiscal year by a State and its political subdivisions (exclusive of Federal funds) for carrying out the State highway safety program (other than planning and administration) shall be available for the purpose of crediting such State during such fiscal year for the non-Federal share of the cost of any project under this section (other than one for planning or administration) without regard to whether such expenditures were actually made in connection with such project and except that, in the case of a local highway safety program carried out by an Indian tribe, if the Secretary is satisfied that an Indian tribe does not have sufficient funds available to meet the non-Federal share of the cost of such program, he may increase the Federal share of the cost thereof payable under this Act to the extent necessary. In applying such provisions of chapter 1 in carrying out this section the term "State highway department" as used in such provisions shall mean the Governor of a State for the purposes of this section.

(e) Uniform guidelines promulgated by the Secretary to carry out this section shall be developed in cooperation with the States, their political subdivisions, appropriate Federal departments and agencies, and such other public and private organizations as the Secretary deems appropriate.

(f) The Secretary may make arrangements with other Federal departments and agencies for assistance in the preparation of uniform guidelines for the highway safety programs contemplated by subsection (a) and in the administration of such programs. Such departments and agencies are directed to cooperate in such preparation and administration, on a reimbursable basis.

(g) Nothing in this section authorizes the appropriation or expenditure of funds for (1) highway construction, maintenance, or design (other than design of safety features of highways to be incorporated into guidelines) or (2) any purpose for which funds are authorized by section 403 of this title.

[(h) Repealed. Pub. L. 97-35, title XI, §1107(c), Aug. 13, 1981, 95 Stat. 626.]

(i) For the purpose of the application of this section on Indian reservations, "State" and "Governor of a State" includes the Secretary of the Interior and "political subdivision of a State" includes an Indian tribe: *Provided*, That, notwithstanding the provisions of subparagraph (C) of subsection (b)(1) hereof, 95 per centum of the funds apportioned to the Secretary of the Interior after date of enactment, shall be expended by Indian tribes to carry out highway safety programs within their jurisdictions: *And provided further*, That the provisions of subparagraph (E) of subsection (b)(1) hereof shall be applicable except in those tribal jurisdictions in which the Secretary determines such programs would not be practicable.

(j) RULEMAKING PROCESS.—The Secretary shall, not later than September 1, 1987, begin a rulemaking process to determine those programs most effective in reducing accidents, injuries, and deaths. Not later than April 1, 1988, the Secretary shall promulgate a final rule establishing those programs determined to be most effective in reducing accidents, injuries, and deaths. If such rule is promulgated by April 1, 1988, then it shall take effect October 1, 1988. If such rule is not promulgated by April 1, 1988, it shall take effect October 1, 1989. (3) The amount of the grant to any State under this subsection for the first fiscal year such State is eligible for a grant under this subsection shall equal 10 per centum of the amount apportioned to such State for fiscal year 1985 under this section. The amount of a grant to any State under this subsection for the second fiscal year such State is eligible for a grant under this subsection shall equal 10 per centum of the amount apportioned to such State for fiscal year 1986 under this section.

(4) A State is eligible for a grant under this subsection if—

(A) it certifies to the Secretary that it has in operation a computerized traffic safety recordkeeping system and identifies proposed means of upgrading the system acceptable to the Secretary; or

(B) it provides to the Secretary a plan acceptable to the Secretary for establishing and maintaining a computerized traffic safety recordkeeping system.

(5) The Secretary, after making the deduction authorized by the second sentence of subsection (c) of this section for fiscal years 1985 and 1986, shall set aside 10 per centum of the remaining funds authorized to be appropriated to carry out this section for the purpose of making grants under this subsection. “(b) SCHOOLBUS SAFETY GRANT PROGRAM.—

“(1) SET-ASIDE.—Before apportioning any funds made available to carry out section 402 of title 23, United States Code, for each of fiscal years 1989, 1990, and 1991, the Secretary may set aside an amount not to exceed \$5,000,000 for making grants to States to implement those schoolbus safety measures published by the Secretary under subsection (a).

“(2) APPLICATION.—Any State interested in receiving under this subsection a grant to implement schoolbus safety measures in fiscal year 1989, 1990, or 1991 shall submit to the Secretary an application for such grant. SPECIAL PARKING PRIVILEGES FOR HANDICAPPED PERSONS

Pub. L. 98-78, title III, §321, Aug. 15, 1983, 97 Stat. 473, provided that:

“(a) The Congress finds that—

“(1) in this Nation there exist millions of handicapped people with severe physical impairments including partial paralysis, limb amputation, chronic heart condition, emphysema, arthritis, rheumatism, and other debilitating conditions which greatly limit their personal mobility;

“(2) these people reside in each of the several States and have need and reason to travel from one State to another for business and recreational purposes;

“(3) each State maintains the right to establish and enforce its own code of regulations regarding the appropriate use of motor vehicles operating within its jurisdiction;

“(4) within a given State handicapped individuals are oftentimes granted special parking privileges to help offset the limitations imposed by their physical impairment;

“(5) these special parking privileges vary from State to State as do the methods and means of identifying vehicles used by disabled individuals, all of which serve to impede both the enforcement of special parking privileges and the handicapped individual's freedom to properly utilize such privileges;

“(6) there are many efforts currently underway to help alleviate these problems through public awareness and administrative change as encouraged by concerned individuals and national associations directly involved in matters relating to the issue of special parking privileges for disabled individuals; and

“(7) despite these efforts the fact remains that many States may need to give the matter legislative consideration to ensure a proper resolution of this issue, especially as it relates to law enforcement and placard responsibility.

“(b) The Congress encourages each of the several States working through the National Governors Conference to—

“(1) adopt the International Symbol of Access as the only recognized and adopted symbol to be used to identify vehicles carrying those citizens with acknowledged physical impairments;

“(2) grant to vehicles displaying this symbol the special parking privileges which a State may provide; and

“(3) permit the International Symbol of Access to appear either on a specialized license plate, or on a specialized placard placed in the vehicles so as to be clearly visible through the front windshield, or on both such places.

“(c) It is the sense of the Congress that agreements of reciprocity relating to the special parking privileges granted handicapped individuals should be developed and entered into by and between the several States so as to—

“(1) facilitate the free and unencumbered use between the several States, of the special parking privileges afforded those people with acknowledged handicapped conditions, without regard to the State of residence of the handicapped person utilizing such privilege;

“(2) improve the ease of law enforcement in each State of its special parking privileges and to facilitate the handling of violators; and

“(3) ensure that motor vehicles carrying individuals with acknowledged handicapped conditions be given fair and predictable treatment throughout the Nation.

“(d) As used in this section the term ‘State’ means the several States and the District of Columbia.

“(e) The Secretary of Transportation shall provide a copy of this section to the Governor of each State and the Mayor of the District of Columbia.”

Until such report is submitted, the Secretary shall not, pursuant to subsection (c) of section 402 of title 23, United States Code, withhold any apportionment or any funds apportioned to any State because such State is failing to implement a highway safety program approved by the Secretary in accordance with such section 402."
