“(1) All fish within the fishery conservation zone.

“(2) All anadromous species throughout the migratory range of each such species beyond the fishery conservation zone; except that such management authority shall not extend to such species during the time they are found within any foreign nation’s territorial sea or fishery conservation zone (or the equivalent), to the extent that such sea or zone is recognized by the United States.

SUBCHAPTER III—FOREIGN FISHING AND INTERNATIONAL FISHERY AGREEMENTS

§ 1821. Foreign fishing**(a) In general**

After February 28, 1977, no foreign fishing is authorized within the exclusive economic zone, or for anadromous species or Continental Shelf fishery resources beyond the exclusive economic zone, unless such foreign fishing—

(1) is authorized under subsections (b) or (c) of this section or section 1824(e) of this title, or under a permit issued under section 1824(d) of this title;

(2) is not prohibited under subsection (f) of this section; and

(3) is conducted under, and in accordance with, a valid and applicable permit issued pursuant to section 1824 of this title.

(b) Existing international fishery agreements

Foreign fishing described in subsection (a) of this section may be conducted pursuant to an international fishery agreement (subject to the provisions of section 1822(b) or (c) of this title), if such agreement—

(1) was in effect on April 13, 1976; and

(2) has not expired, been renegotiated, or otherwise ceased to be of force and effect with respect to the United States.

(c) Governing international fishery agreements

Foreign fishing described in subsection (a) of this section may be conducted pursuant to an international fishery agreement (other than a treaty) which meets the requirements of this subsection if such agreement becomes effective after application of section 1823 of this title. Any such international fishery agreement shall hereafter in this chapter be referred to as a “governing international fishery agreement”. Each governing international fishery agreement shall acknowledge the exclusive fishery management authority of the United States, as set forth in this chapter. It is the sense of the Congress that each such agreement shall include a binding commitment, on the part of such foreign nation and its fishing vessels, to comply with the following terms and conditions:

(1) The foreign nation, and the owner or operator of any fishing vessel fishing pursuant to such agreement, will abide by all regulations promulgated by the Secretary pursuant to this chapter, including any regulations promulgated to implement any applicable fishery management plan or any preliminary fishery management plan.

(2) The foreign nation, and the owner or operator of any fishing vessel fishing pursuant to such agreement, will abide by the requirement that—

(A) any officer authorized to enforce the provisions of this chapter (as provided for in section 1861 of this title) be permitted—

(i) to board, and search or inspect, any such vessel at any time,

(ii) to make arrests and seizures provided for in section 1861(b) of this title whenever such officer has reasonable cause to believe, as a result of such a search or inspection, that any such vessel or any person has committed an act prohibited by section 1857 of this title, and

(iii) to examine and make notations on the permit issued pursuant to section 1824 of this title for such vessel;

(B) the permit issued for any such vessel pursuant to section 1824 of this title be prominently displayed in the wheelhouse of such vessel;

(C) transponders, or such other appropriate position-fixing and identification equipment

as the Secretary of the department in which the Coast Guard is operating determines to be appropriate, be installed and maintained in working order on each such vessel;

(D) United States observers required under subsection (h) of this section be permitted to be stationed aboard any such vessel and that all of the costs incurred incident to such stationing, including the costs of data editing and entry and observer monitoring, be paid for, in accordance with such subsection, by the owner or operator of the vessel;

(E) any fees required under section 1824(b)(10) of this title be paid in advance;

(F) agents be appointed and maintained within the United States who are authorized to receive and respond to any legal process issued in the United States with respect to such owner or operator; and

(G) responsibility be assumed, in accordance with any requirements prescribed by the Secretary, for the reimbursement of United States citizens for any loss of, or damage to, their fishing vessels, fishing gear, or catch which is caused by any fishing vessel of that nation;

and will abide by any other monitoring, compliance, or enforcement requirement related to fishery conservation and management which is included in such agreement.

(3) The foreign nation and the owners or operators of all of the fishing vessels of such nation shall not, in any year, harvest an amount of fish which exceeds such nation's allocation of the total allowable level of foreign fishing, as determined under subsection (e) of this section.

(4) The foreign nation will—

(A) apply, pursuant to section 1824 of this title, for any required permits;

(B) deliver promptly to the owner or operator of the appropriate fishing vessel any permit which is issued under that section for such vessel;

(C) abide by, and take appropriate steps under its own laws to assure that all such owners and operators comply with, section 1824(a) of this title and the applicable conditions and restrictions established under section 1824(b)(7) of this title; and

(D) take, or refrain from taking, as appropriate, actions of the kind referred to in subsection (e)(1) of this section in order to receive favorable allocations under such subsection.

(d) Total allowable level of foreign fishing

The total allowable level of foreign fishing, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, shall be that portion of the optimum yield of such fishery which will not be harvested by vessels of the United States, as determined in accordance with this chapter.

(e) Allocation of allowable level

(1)(A) The Secretary of State, in cooperation with the Secretary, may make allocations to foreign nations from the total allowable level of foreign fishing which is permitted with respect to each fishery subject to the exclusive fishery management authority of the United States.

(B) From the determinations made under subparagraph (A), the Secretary of State shall compute the aggregate of all of the fishery allocations made to each foreign nation.

(C) The Secretary of State shall initially release to each foreign nation for harvesting up to 50 percent of the allocations aggregate computed for such nation under subparagraph (B), and such release of allocation shall be apportioned by the Secretary of State, in cooperation with the Secretary, among the individual fishery allocations determined for that nation under subparagraph (A). The basis on which each apportionment is made under this subparagraph shall be stated in writing by the Secretary of State.

(D) After the initial release of fishery allocations under subparagraph (C) to a foreign nation, any subsequent release of an allocation for any fishery to such nation shall only be made—

(i) after the lapse of such period of time as may be sufficient for purposes of making the determination required under clause (ii); and

(ii) if the Secretary of State and the Secretary, after taking into account the size of the allocation for such fishery and the length and timing of the fishing season, determine in writing that such nation is complying with the purposes and intent of this paragraph with respect to such fishery.

If the foreign nation is not determined under clause (ii) to be in such compliance, the Secretary of State shall reduce, in a manner and quantity he considers to be appropriate (I) the remainder of such allocation, or (II) if all of such allocation has been released, the next allocation of such fishery, if any, made to such nation.

(E) The determinations required to be made under subparagraphs (A) and (D)(ii), and the apportionments required to be made under subparagraph (C), with respect to a foreign nation shall be based on—

(i) whether, and to what extent, such nation imposes tariff barriers or nontariff barriers on the importation, or otherwise restricts the market access, of both United States fish and fishery products, particularly fish and fishery products for which the foreign nation has requested an allocation;

(ii) whether, and to what extent, such nation is cooperating with the United States in both the advancement of existing and new opportunities for fisheries exports from the United States through the purchase of fishery products from United States processors, and the advancement of fisheries trade through the purchase of fish and fishery products from United States fishermen, particularly fish and fishery products for which the foreign nation has requested an allocation;

(iii) whether, and to what extent, such nation and the fishing fleets of such nation have cooperated with the United States in the enforcement of United States fishing regulations;

(iv) whether, and to what extent, such nation requires the fish harvested from the exclusive economic zone for its domestic consumption;

(v) whether, and to what extent, such nation otherwise contributes to, or fosters the growth

of, a sound and economic United States fishing industry, including minimizing gear conflicts with fishing operations of United States fishermen, and transferring harvesting or processing technology which will benefit the United States fishing industry;

(vi) whether, and to what extent, the fishing vessels of such nation have traditionally engaged in fishing in such fishery;

(vii) whether, and to what extent, such nation is cooperating with the United States in, and making substantial contributions to, fishery research and the identification of fishery resources; and

(viii) such other matters as the Secretary of State, in cooperation with the Secretary, deems appropriate.

(2)(A) For the purposes of this paragraph—

(i) The term “certification” means a certification made by the Secretary that nationals of a foreign country, directly or indirectly, are conducting fishing operations or engaging in trade or taking which diminishes the effectiveness of the International Convention for the Regulation of Whaling. A certification under this section shall also be deemed a certification for the purposes of section 1978(a) of title 22.

(ii) The term “remedial period” means the 365-day period beginning on the date on which a certification is issued with respect to a foreign country.

(B) If the Secretary issues a certification with respect to any foreign country, then each allocation under paragraph (1) that—

(i) is in effect for that foreign country on the date of issuance; or

(ii) is not in effect on such date but would, without regard to this paragraph, be made to the foreign country within the remedial period;

shall be reduced by the Secretary of State, in consultation with the Secretary, by not less than 50 percent.

(C) The following apply for purposes of administering subparagraph (B) with respect to any foreign country:

(i) If on the date of certification, the foreign country has harvested a portion, but not all, of the quantity of fish specified under any allocation, the reduction under subparagraph (B) for that allocation shall be applied with respect to the quantity not harvested as of such date.

(ii) If the Secretary notified the Secretary of State that it is not likely that the certification of the foreign country will be terminated under section 1978(d) of title 22 before the close of the period for which an allocation is applicable or before the close of the remedial period (whichever close first occurs) the Secretary of State, in consultation with the Secretary, shall reallocate any portion of any reduction made under subparagraph (B) among one or more foreign countries for which no certification is in effect.

(iii) If the certification is terminated under such section 1978(d) of title 22 during the remedial period, the Secretary of State shall return to the foreign country that portion of any al-

location reduced under subparagraph (B) that was not reallocated under clause (ii); unless the harvesting of the fish covered by the allocation is otherwise prohibited under this chapter.

(iv) The Secretary may refund or credit, by reason of reduction of any allocation under this paragraph, any fee paid under section 1824 of this title.

(D) If the certification of a foreign country is not terminated under section 1978(d) of title 22 before the close of the last day of the remedial period, the Secretary of State—

(i) with respect to any allocation made to that country and in effect (as reduced under subparagraph (B)) on such last day, shall rescind, effective on and after the day after such last day, any unharvested portion of such allocation; and

(ii) may not thereafter make any allocation to that country under paragraph (1) until the certification is terminated.

(f) Reciprocity

Foreign fishing shall not be authorized for the fishing vessels of any foreign nation unless such nation satisfies the Secretary and the Secretary of State that such nation extends substantially the same fishing privileges to fishing vessels of the United States, if any, as the United States extends to foreign fishing vessels.

(g) Preliminary fishery management plans

The Secretary, when notified by the Secretary of State that any foreign nation has submitted an application under section 1824(b) of this title shall prepare a preliminary fishery management plan for any fishery covered by such application if the Secretary determines that no fishery management plan for that fishery will be prepared and implemented, pursuant to subchapter IV of this chapter, before March 1, 1977. To the extent practicable, each such plan—

(1) shall contain a preliminary description of the fishery and a preliminary determination as to—

(A) the optimum yield from such fishery;

(B) when appropriate, the capacity and extent to which United States fish processors will process that portion of such optimum yield that will be harvested by vessels of the United States; and

(C) the total allowable level of foreign fishing with respect to such fishery;

(2) shall require each foreign fishing vessel engaged or wishing to engage in such fishery to obtain a permit from the Secretary;

(3) shall require the submission of pertinent data to the Secretary, with respect to such fishery, as described in section 1853(a)(5) of this title; and

(4) may, to the extent necessary to prevent irreversible effects from overfishing, with respect to such fishery, contain conservation and management measures applicable to foreign fishing which—

(A) are determined to be necessary and appropriate for the conservation and management of such fishery,

(B) are consistent with the national standards, the other provisions of this chapter, and other applicable law, and

(C) are described in section 1853(b)(2), (3), (4), (5), and (7) of this title.

Each preliminary fishery management plan shall be in effect with respect to foreign fishing for which permits have been issued until a fishery management plan is prepared and implemented, pursuant to subchapter IV of this chapter, with respect to such fishery. The Secretary may, in accordance with section 553 of title 5, also prepare and promulgate interim regulations with respect to any such preliminary plan. Such regulations shall be in effect until regulations implementing the applicable fishery management plan are promulgated pursuant to section 1855 of this title.

(h) Full observer coverage program

(1)(A) Except as provided in paragraph (2), the Secretary shall establish a program under which a United States observer will be stationed aboard each foreign fishing vessel while that vessel is engaged in fishing within the exclusive economic zone.

(B) The Secretary shall by regulation prescribe minimum health and safety standards that shall be maintained aboard each foreign fishing vessel with regard to the facilities provided for the quartering of, and the carrying out of observer functions by, United States observers.

(2) The requirement in paragraph (1) that a United States observer be placed aboard each foreign fishing vessel may be waived by the Secretary if he finds that—

(A) in a situation where a fleet of harvesting vessels transfers its catch taken within the exclusive economic zone to another vessel, aboard which is a United States observer, the stationing of United States observers on only a portion of the harvesting vessel fleet will provide a representative sampling of the by-catch of the fleet that is sufficient for purposes of determining whether the requirements of the applicable management plans for the by-catch species are being complied with;

(B) in a situation where the foreign fishing vessel is operating under a Pacific Insular Area fishing agreement, the Governor of the applicable Pacific Insular Area, in consultation with the Western Pacific Council, has established an observer coverage program that is at least equal in effectiveness to the program established by the Secretary;

(C) the time during which a foreign fishing vessel will engage in fishing within the exclusive economic zone will be of such short duration that the placing of a United States observer aboard the vessel would be impractical; or

(D) for reasons beyond the control of the Secretary, an observer is not available.

(3) Observers, while stationed aboard foreign fishing vessels, shall carry out such scientific, compliance monitoring, and other functions as the Secretary deems necessary or appropriate to carry out the purposes of this chapter; and shall cooperate in carrying out such other scientific programs relating to the conservation and management of living resources as the Secretary deems appropriate.

(4) In addition to any fee imposed under section 1824(b)(10) of this title and section 1980(e) of title 22 with respect to foreign fishing for any year after 1980, the Secretary shall impose, with respect to each foreign fishing vessel for which a permit is issued under such section 1824 of this title, a surcharge in an amount sufficient to cover all the costs of providing a United States observer aboard that vessel. The failure to pay any surcharge imposed under this paragraph shall be treated by the Secretary as a failure to pay the permit fee for such vessel under section 1824(b)(10) of this title. All surcharges collected by the Secretary under this paragraph shall be deposited in the Foreign Fishing Observer Fund established by paragraph (5).

(5) There is established in the Treasury of the United States the Foreign Fishing Observer Fund. The Fund shall be available to the Secretary as a revolving fund for the purpose of carrying out this subsection. The Fund shall consist of the surcharges deposited into it as required under paragraph (4). All payments made by the Secretary to carry out this subsection shall be paid from the Fund, only to the extent and in the amounts provided for in advance in appropriation Acts. Sums in the Fund which are not currently needed for the purposes of this subsection shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

(6) If at any time the requirement set forth in paragraph (1) cannot be met because of insufficient appropriations, the Secretary shall, in implementing a supplementary observer program:

(A) certify as observers, for the purposes of this subsection, individuals who are citizens or nationals of the United States and who have the requisite education or experience to carry out the functions referred to in paragraph (3);

(B) establish standards of conduct for certified observers equivalent to those applicable to Federal personnel;

(C) establish a reasonable schedule of fees that certified observers or their agents shall be paid by the owners and operators of foreign fishing vessels for observer services; and

(D) monitor the performance of observers to ensure that it meets the purposes of this chapter.

(i) Recreational fishing

Notwithstanding any other provision of this subchapter, foreign fishing vessels which are not operated for profit may engage in recreational fishing within the exclusive economic zone and the waters within the boundaries of a State subject to obtaining such permits, paying such reasonable fees, and complying with such conditions and restrictions as the Secretary and the Governor of the State (or his designee) shall impose as being necessary or appropriate to insure that the fishing activity of such foreign vessels within such zone or waters, respectively, is consistent with all applicable Federal and State laws and any applicable fishery management plan implemented under section 1854 of this title. The Secretary shall consult with the Secretary of State and the Secretary of the Department in which the Coast Guard is operating in formulating the conditions and restrictions to

be applied by the Secretary under the authority of this subsection.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1822, 1824, 1825, 1856, 1857, 1861 of this title.

§ 1822. International fishery agreements

(a) Negotiations

The Secretary of State—

(1) shall renegotiate treaties as provided for in subsection (b) of this section;

(2) shall negotiate governing international fishery agreements described in section 1821(c) of this title;

(3) may negotiate boundary agreements as provided for in subsection (d) of this section;

(4) shall, upon the request of and in cooperation with the Secretary, initiate and conduct negotiations for the purpose of entering into international fishery agreements—

(A) which allow fishing vessels of the United States equitable access to fish over which foreign nations assert exclusive fishery management authority, and

(B) which provide for the conservation and management of anadromous species and highly migratory species; and

(5) may enter into such other negotiations, not prohibited by subsection (c) of this section, as may be necessary and appropriate to further the purposes, policy, and provisions of this chapter.

(b) Treaty renegotiation

The Secretary of State, in cooperation with the Secretary, shall initiate, promptly after April 13, 1976, the renegotiation of any treaty which pertains to fishing within the exclusive economic zone (or within the area that will constitute such zone after February 28, 1977), or for anadromous species or Continental Shelf fishery resources beyond such zone or area, and which is in any manner inconsistent with the purposes, policy, or provisions of this chapter, in order to

conform such treaty to such purposes, policy, and provisions. It is the sense of Congress that the United States shall withdraw from any such treaty, in accordance with its provisions, if such treaty is not so renegotiated within a reasonable period of time after April 13, 1976.

(c) International fishery agreements

No international fishery agreement (other than a treaty) which pertains to foreign fishing within the exclusive economic zone (or within the area that will constitute such zone after February 28, 1977), or for anadromous species or Continental Shelf fishery resources beyond such zone or area—

(1) which is in effect on June 1, 1976, may thereafter be renewed, extended, or amended; or

(2) may be entered into after May 31, 1976;

by the United States unless it is in accordance with the provisions of section 1821(c) of this title or section 1824(e) of this title.

(d) Boundary negotiations

The Secretary of State, in cooperation with the Secretary, may initiate and conduct negotiations with any adjacent or opposite foreign nation to establish the boundaries of the exclusive economic zone of the United States in relation to any such nation.

(e) Highly migratory species agreements

(1) Evaluation

The Secretary of State, in cooperation with the Secretary, shall evaluate the effectiveness of each existing international fishery agreement which pertains to fishing for highly migratory species. Such evaluation shall consider whether the agreement provides for—

(A) the collection and analysis of necessary information for effectively managing the fishery, including but not limited to information about the number of vessels involved, the type and quantity of fishing gear used, the species of fish involved and their location, the catch and bycatch levels in the fishery, and the present and probable future condition of any stock of fish involved;

(B) the establishment of measures applicable to the fishery which are necessary and appropriate for the conservation and management of the fishery resource involved;

(C) equitable arrangements which provide fishing vessels of the United States with (i) access to the highly migratory species that are the subject of the agreement and (ii) a portion of the allowable catch that reflects the traditional participation by such vessels in the fishery;

(D) effective enforcement of conservation and management measures and access arrangements throughout the area of jurisdiction; and

(E) sufficient and dependable funding to implement the provisions of the agreement, based on reasonable assessments of the benefits derived by participating nations.

(2) Access negotiations

The Secretary of State, in cooperation with the Secretary, shall initiate negotiations with respect to obtaining access for vessels of the

United States fishing for tuna species within the exclusive economic zones of other nations on reasonable terms and conditions.

(3) Reports

The Secretary of State shall report to the Congress—

(A) within 12 months after November 28, 1990, on the results of the evaluation required under paragraph (1), together with recommendations for addressing any inadequacies identified; and

(B) within six months after November 28, 1990, on the results of the access negotiations required under paragraph (2).

(4) Negotiation

The Secretary of State, in consultation with the Secretary, shall undertake such negotiations with respect to international fishery agreements on highly migratory species as are necessary to correct inadequacies identified as a result of the evaluation conducted under paragraph (1).

(5) South Pacific tuna treaty

It is the sense of the Congress that the United States Government shall, at the earliest opportunity, begin negotiations for the purpose of extending the Treaty on Fisheries Between the Governments of Certain Pacific Island States and the Government of the United States of America, signed at Port Moresby, Papua New Guinea, April 2, 1987, and its¹ Annexes, Schedules, and implementing agreements for an additional term of 10 years on terms and conditions at least as favorable to vessels of the United States and the United States Government.

(f) Nonrecognition

It is the sense of the Congress that the United States Government shall not recognize the claim of any foreign nation to an exclusive economic zone (or the equivalent) beyond such nation's territorial sea, to the extent that such sea is recognized by the United States, if such nation—

(1) fails to consider and take into account traditional fishing activity of fishing vessels of the United States;

(2) fails to recognize and accept that highly migratory species are to be managed by applicable international fishery agreements, whether or not such nation is a party to any such agreement; or

(3) imposes on fishing vessels of the United States any conditions or restrictions which are unrelated to fishery conservation and management.

(g) Fishery agreement with Russia

(1) The Secretary of State, in consultation with the Secretary, is authorized to negotiate and conclude a fishery agreement with Russia of a duration of no more than 3 years, pursuant to which—

(A) Russia will give United States fishing vessels the opportunity to conduct traditional fisheries within waters claimed by the United States prior to the conclusion of the Agree-

ment between the United States of America and the Union of Soviet Socialist Republics on the Maritime Boundary, signed June 1, 1990, west of the maritime boundary, including the western special area described in Article 3(2) of the Agreement;

(B) the United States will give fishing vessels of Russia the opportunity to conduct traditional fisheries within waters claimed by the Union of Soviet Socialist Republics prior to the conclusion of the Agreement referred to in subparagraph (A), east of the maritime boundary, including the eastern special areas described in Article 3(1) of the Agreement;

(C) catch data shall be made available to the government of the country exercising fisheries jurisdiction over the waters in which the catch occurred; and

(D) each country shall have the right to place observers on board vessels of the other country and to board and inspect such vessels.

(2) Vessels operating under a fishery agreement negotiated and concluded pursuant to paragraph (1) shall be subject to regulations and permit requirements of the country in whose waters the fisheries are conducted only to the extent such regulations and permit requirements are specified in that agreement.

(3) The Secretary of Commerce may promulgate such regulations, in accordance with section 553 of title 5, as may be necessary to carry out the provisions of any fishery agreement negotiated and concluded pursuant to paragraph (1).

(h) Bycatch reduction agreements

(1) The Secretary of State, in cooperation with the Secretary, shall seek to secure an international agreement to establish standards and measures for bycatch reduction that are comparable to the standards and measures applicable to United States fishermen for such purposes in any fishery regulated pursuant to this chapter for which the Secretary, in consultation with the Secretary of State, determines that such an international agreement is necessary and appropriate.

(2) An international agreement negotiated under this subsection shall be—

(A) consistent with the policies and purposes of this chapter; and

(B) subject to approval by Congress under section 1823 of this title.

(3) Not later than January 1, 1997, and annually thereafter, the Secretary, in consultation with the Secretary of State, shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Resources of the House of Representatives a report describing actions taken under this subsection.

“(a) NEGOTIATIONS.—Within 60 days after the date of enactment of this Act [Nov. 28, 1990], the Secretary of State shall commence negotiations with nations which import or export anadromous fish or anadromous fish products for the purpose of securing general agreement among such nations to implement effective measures to prohibit international trade in anadromous fish or anadromous fish products unless such fish or fish products are accompanied by a valid certificate of legal origin attesting that the fish or fish product was lawfully harvested—

“(1) within the jurisdiction of a nation having naturally occurring or artificially established anadromous fish populations of the same species as the imported or exported product; or

“(2) on the high seas according to an international agreement among nations with jurisdiction over more than 1 percent of the stocks of anadromous fish being so harvested.

“(b) ISSUANCE OF CERTIFICATES.—For the purposes of subsection (a), a valid certificate of legal origin may be issued only by a nation which—

“(1) is the nation having jurisdiction over the vessel or other means by which the fish or fish product was harvested; and

“(2) maintains regular harvests of anadromous fish in a manner consistent with the criteria for lawful harvests set out in subsection (a).

“(c) BILATERAL OR MULTILATERAL AGREEMENTS.—Efforts undertaken by the Secretary of State pursuant to subsection (a) may, at the discretion of the Secretary, be directed toward achieving either bilateral or multilateral agreements, including trade agreements, whichever the Secretary determines to be most likely to result in the earliest possible date or dates of agreement by those nations which individually have in excess of \$1,000,000, or the equivalent, in import or export trade in anadromous fish and anadromous fish products.

“(d) REGULATIONS.—The Secretary of Commerce shall, within 180 days after the date of enactment of this Act [Nov. 28, 1990], promulgate regulations providing for—

DRIFTNET IMPACT MONITORING, ASSESSMENT, AND CONTROL

Pub. L. 100-220, title IV, Dec. 29, 1987, 101 Stat. 1477, as amended by Pub. L. 104-208, div. A, title I, §101(a) [title II, §211(b)], Sept. 30, 1996, 110 Stat. 3009, 3009-41, provided that:

“SEC. 4001. SHORT TITLE.

“This title may be cited as the ‘Driftnet Impact Monitoring, Assessment, and Control Act of 1987’.

“SEC. 4002. FINDINGS.

“The Congress finds that—

“(1) the use of long plastic driftnets is a fishing technique that may result in the entanglement and death of enormous numbers of target and nontarget marine resources in the waters of the North Pacific Ocean, including the Bering Sea;

“(2) there is a pressing need for detailed and reliable information on the number of marine resources that become entangled and die in actively fished driftnets and in driftnets that are lost, abandoned, or discarded; and

“(3) increased efforts are necessary to monitor, assess, and reduce the adverse impacts of driftnets.

“SEC. 4003. DEFINITIONS.

“As used in this title—

“(1) DRIFTNET.—The term ‘driftnet’ means a gillnet composed of a panel of plastic webbing one and one-half miles or more in length.

“(2) DRIFTNET FISHING.—The term ‘driftnet fishing’ means a fish-harvesting method in which a driftnet is placed in water and allowed to drift with the currents and winds for the purpose of entangling fish in the webbing.

“(3) EXCLUSIVE ECONOMIC ZONE OF THE UNITED STATES.—The term ‘exclusive economic zone of the United States’ means the zone defined in section 3(6) [now 3(11)] of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1802(b) [1802(11)]).

“(4) MARINE RESOURCES.—The term ‘marine resources’ includes fish, shellfish, marine mammals, seabirds, and other forms of marine life or waterfowl.

“(5) MARINE RESOURCES OF THE UNITED STATES.—The term ‘marine resources of the United States’ means—

“(A) marine resources found in, or which breed within, areas subject to the jurisdiction of the United States, including the exclusive economic zone of the United States; and

“(B) species of fish, wherever found, that spawn in the fresh or estuarine waters of the United States.

“(6) SECRETARY.—The term ‘Secretary’ means the Secretary of Commerce.

“SEC. 4004. MONITORING AGREEMENTS.

“(a) NEGOTIATIONS.—The Secretary, through the Secretary of State and in consultation with the Secretary of the Interior, shall immediately initiate, negotiations with each foreign government that conducts, or authorizes its nationals to conduct, driftnet fishing that results in the taking of marine resources of the United States in waters of the North Pacific Ocean outside of the exclusive economic zone and territorial sea of any nation, for the purpose of entering into agreements for statistically reliable cooperative monitoring and assessment of the numbers of marine resources of the United States killed and retrieved, discarded, or lost by the foreign government’s driftnet fishing vessels. Such agreements shall provide for—

“(1) the use of a sufficient number of vessels from which scientists of the United States and the foreign governments may observe and gather statistically reliable information; and

“(2) appropriate methods for sharing equally the costs associated with such activities.

“(b) REPORT.—The Secretary, in consultation with the Secretary of State, shall provide to the Congress not later than 1 year after the date of enactment of this Act [Dec. 29, 1987] a full report on the results of negotiations under this section.

“SEC. 4005. IMPACT REPORT.

“(a) IN GENERAL.—The Secretary shall provide to the Congress within 1 year after the date of the enactment of this Act [Dec. 29, 1987], and at such other times thereafter as the Secretary considers appropriate, a report identifying the nature, extent, and effects of driftnet fishing in waters of the North Pacific Ocean on marine resources of the United States. The report shall include the best available information on—

“(1) the number and flag state of vessels involved;

“(2) the areas fished;

“(3) the length, width, and mesh size of driftnets used;

“(4) the number of marine resources of the United States killed by such fishing;

“(5) the effect of seabird mortality, as determined by the Secretary of the Interior, on seabird populations; and

“(6) any other information the Secretary considers appropriate.

“(b) INFORMATION FROM FOREIGN GOVERNMENTS.—The Secretary, through the Secretary of State, shall—

“(1) request relevant foreign governments to provide the information described in subsection (a), and

“(2) include in a report under this section the information so provided and an evaluation of the adequacy and reliability of such information.

“SEC. 4006. ENFORCEMENT AGREEMENTS.

“(a) NEGOTIATIONS.—The Secretary shall immediately initiate, through the Secretary of State and in consultation with the Secretary of the Department in which the Coast Guard is operating negotiations with each foreign government that conducts, or authorizes its nationals to conduct, driftnet fishing that results in the taking of marine resources of the United States in waters of the North Pacific Ocean outside of the exclusive economic zone and territorial sea of any nation, for the purpose of entering into agreements for effective enforcement of laws, regulations, and agreements applicable to the location, season, and other aspects of the operations of the foreign government’s driftnet fishing vessels. Such agreements shall include measures for—

“(1) the effective monitoring and detection of violations;

“(2) the collection and presentation of such evidence of violations as may be necessary for the successful prosecution of such violations by the responsible authorities;

“(3) reporting to the United States of penalties imposed by the foreign governments for violations; and

“(4) appropriate methods for sharing equally the costs associated with such activities.

“(b) CERTIFICATION FOR PURPOSES OF FISHERMEN’S PROTECTIVE ACT OF 1967.—If the Secretary, in consultation with the Secretary of State, determines that a foreign government has failed, within 18 months after the date of the enactment of this Act [Dec. 29, 1987], to enter into and implement an agreement under subsection (a) or section 4004(a) that is adequate, the Secretary shall certify such fact to the President, which certification shall be deemed to be a certification for the purposes of section 8(a) of the Fishermen’s Protective Act of 1967 (22 U.S.C. 1978(a)).

“SEC. 4007. EVALUATIONS AND RECOMMENDATIONS.

“(a) MARKING, REGISTRY, AND IDENTIFICATION SYSTEM.—The Secretary shall evaluate, in consultation with officials of other Federal agencies and such other persons as may be appropriate, the feasibility of and develop recommendations for the establishment of a driftnet marking, registry, and identification system to provide a reliable method for the determination of the origin by vessel, of lost, discarded, or abandoned driftnets and fragments of driftnets. In conducting such evaluation, the Secretary shall consider the adequacy of existing driftnet identification systems of foreign nations and the extent to which these systems achieve the objectives of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1821, 1822, 1824, 1857 of this title.

§ 1824. Permits for foreign fishing

(a) In general

After February 28, 1977, no foreign fishing vessel shall engage in fishing within the exclusive economic zone, or for anadromous species or Continental Shelf fishery resources beyond such zone, unless such vessel has on board a valid permit issued under this section for such vessel.

(b) Applications and permits under governing international fishery agreements

(1) Eligibility; duration

Each foreign nation with which the United States has entered into a governing international fishery agreement shall submit an application to the Secretary of State each year for a permit for each of its fishing vessels that wishes to engage in fishing described in subsection (a) of this section. No permit issued under this section may be valid for longer than a year; and section 558(c) of title 5 does not apply to the renewal of any such permit.

(2) Forms

The Secretary, in consultation with the Secretary of State and the Secretary of the department in which the Coast Guard is operating, shall prescribe the forms for permit applications submitted under this subsection and for permits issued pursuant to any such application.

(3) Contents

Any application made under this subsection shall specify—

(A) the name and official number or other identification of each fishing vessel for which a permit is sought, together with the name and address of the owner thereof;

(B) the tonnage, hold capacity, speed, processing equipment, type and quantity of fishing gear, and such other pertinent information with respect to characteristics of each such vessel as the Secretary may require;

(C) each fishery in which each such vessel wishes to fish;

(D) the estimated amount of tonnage of fish which will be caught, taken, or harvested in each such fishery by each such vessel during the time the permit is in force;

(E) the amount or tonnage of United States harvested fish, if any, which each such vessel proposes to receive at sea from vessels of the United States;

(F) the ocean area in which, and the season or period during which, such fishing will be conducted; and

(G) all applicable vessel safety standards imposed by the foreign country, and shall include written certification that the vessel is in compliance with those standards;

and shall include any other pertinent information and material which the Secretary may require.

(4) Transmittal for action

Upon receipt of any application which complies with the requirements of paragraph (3), the Secretary of State shall publish a notice of receipt of the application in the Federal Register. Any such notice shall summarize the contents of the applications from each nation included therein with respect to the matters described in paragraph (3). The Secretary of State shall promptly transmit—

(A) such application, together with his comments and recommendations thereon, to the Secretary;

(B) a copy of the application to the Secretary of the department in which the Coast Guard is operating; and

(C) a copy or a summary of the application to the appropriate Council.

(5) Action by Council

After receiving a copy or summary of an application under paragraph (4)(C), the Council may prepare and submit to the Secretary such written comments on the application as it deems appropriate. Such comments shall be submitted within 45 days after the date on which the application is received by the Council and may include recommendations with respect to approval of the application and, if approval is recommended, with respect to appropriate conditions and restrictions thereon. Any interested person may submit comments to such Council with respect to any such application. The Council shall consider any such comments in formulating its submission to the Secretary.

(6) Approval

(A) After receipt of any application transmitted under paragraph (4)(A), the Secretary shall consult with the Secretary of State and, with respect to enforcement, with the Secretary of the department in which the Coast Guard is operating. The Secretary, after taking into consideration the views and recommendations of such Secretaries, and any comments submitted by any Council under paragraph (5), may approve, subject to subparagraph (B), the application, if he determines that the fishing described in the application will meet the requirements of this chapter, or he may disapprove all or any portion of the application.

(B)(i) In the case of any application which specifies that one or more foreign fishing vessels propose to receive at sea United States harvested fish from vessels of the United States, the Secretary may approve the application unless the Secretary determines, on the basis of the views, recommendations, and comments referred to in subparagraph (A) and other pertinent information, that United States fish processors have adequate capacity, and will utilize such capacity, to process all United States harvested fish from the fishery concerned.

(ii) The amount or tonnage of United States harvested fish which may be received at sea during any year by foreign fishing vessels under permits approved under this paragraph may not exceed that portion of the optimum

yield of the fishery concerned which will not be utilized by United States fish processors.

(iii) In deciding whether to approve any application under this subparagraph, the Secretary may take into account, with respect to the foreign nation concerned, such other matters as the Secretary deems appropriate.

(7) Establishment of conditions and restrictions

The Secretary shall establish conditions and restrictions which shall be included in each permit issued pursuant to any application approved under paragraph (6) or subsection (d) of this section and which must be complied with by the owner or operator of the fishing vessel for which the permit is issued. Such conditions and restrictions shall include the following:

(A) All of the requirements of any applicable fishery management plan, or preliminary fishery management plan, and any applicable Federal or State fishing regulations.

(B) The requirement that no permit may be used by any vessel other than the fishing vessel for which it is issued.

(C) The requirements described in section 1821(c)(1), (2), and (3) of this title.

(D) If the permit is issued other than pursuant to an application approved under paragraph (6)(B) or subsection (d) of this section, the restriction that the foreign fishing vessel may not receive at sea United States harvested fish from vessels of the United States.

(E) If the permit is issued pursuant to an application approved under paragraph (6)(B), the maximum amount or tonnage of United States harvested fish which may be received at sea from vessels of the United States.

(F) Any other condition and restriction related to fishery conservation and management which the Secretary prescribes as necessary and appropriate.

(8) Notice of approval

The Secretary shall promptly transmit a copy of each application approved under paragraph (6) and the conditions and restrictions established under paragraph (7) to—

(A) the Secretary of State for transmittal to the foreign nation involved;

(B) the Secretary of the department in which the Coast Guard is operating; and

(C) any Council which has authority over any fishery specified in such application.

(9) Disapproval of applications

If the Secretary does not approve any application submitted by a foreign nation under this subsection, he shall promptly inform the Secretary of State of the disapproval and his reasons therefore. The Secretary of State shall notify such foreign nation of the disapproval and the reasons therefor. Such foreign nation, after taking into consideration the reasons for disapproval, may submit a revised application under this subsection.

(10) Fees

(A) Fees shall be paid to the Secretary by the owner or operator of any foreign fishing

vessel for which a permit has been issued pursuant to this section. The Secretary, in consultation with the Secretary of State, shall establish a schedule of reasonable fees that shall apply nondiscriminatorily to each foreign nation.

(B) Amounts collected by the Secretary under this paragraph shall be deposited in the general fund of the Treasury.

(11) Issuance of permits

If a foreign nation notifies the Secretary of State of its acceptance of the conditions and restrictions established by the Secretary under paragraph (7), the Secretary of State shall promptly transmit such notification to the Secretary. Upon payment of the applicable fees established pursuant to paragraph (10), the Secretary shall thereupon issue to such foreign nation, through the Secretary of State, permits for the appropriate fishing vessels of that nation. Each permit shall contain a statement of all conditions and restrictions established under paragraph (7) which apply to the fishing vessel for which the permit is issued.

(c) Registration permits

The Secretary of State, in cooperation with the Secretary, shall issue annually a registration permit for each fishing vessel of a foreign nation which is a party to an international fishery agreement under which foreign fishing is authorized by section 1821(b) of this title and which wishes to engage in fishing described in subsection (a) of this section. Each such permit shall set forth the terms and conditions contained in the agreement that apply with respect to such fishing, and shall include the additional requirement that the owner or operator of the fishing vessel for which the permit is issued shall prominently display such permit in the wheelhouse of such vessel and show it, upon request, to any officer authorized to enforce the provisions of this chapter (as provided for in section 1861 of this title). The Secretary of State, after consultation with the Secretary and the Secretary of the department in which the Coast Guard is operating, shall prescribe the form and manner in which applications for registration permits may be made, and the forms of such permits. The Secretary of State may establish, require the payment of, and collect fees for registration permits; except that the level of such fees shall not exceed the administrative costs incurred by him in issuing such permits.

(d) Transshipment permits

(1) Authority to issue permits

The Secretary may issue a transshipment permit under this subsection which authorizes a vessel other than a vessel of the United States to engage in fishing consisting solely of transporting fish or fish products at sea from a point within the exclusive economic zone or, with the concurrence of a State, within the boundaries of that State, to a point outside the United States to any person who—

(A) submits an application which is approved by the Secretary under paragraph (3); and

(B) pays a fee imposed under paragraph (7).

(2) Transmittal

Upon receipt of an application for a permit under this subsection, the Secretary shall promptly transmit copies of the application to the Secretary of State, Secretary of the department in which the Coast Guard is operating, any appropriate Council, and any affected State.

(3) Approval of application

The Secretary may approve, in consultation with the appropriate Council or Marine Fisheries Commission, an application for a permit under this section if the Secretary determines that—

(A) the transportation of fish or fish products to be conducted under the permit, as described in the application, will be in the interest of the United States and will meet the applicable requirements of this chapter;

(B) the applicant will comply with the requirements described in section 1821(c)(2) of this title with respect to activities authorized by any permit issued pursuant to the application;

(C) the applicant has established any bonds or financial assurances that may be required by the Secretary; and

(D) no owner or operator of a vessel of the United States which has adequate capacity to perform the transportation for which the application is submitted has indicated to the Secretary an interest in performing the transportation at fair and reasonable rates.

(4) Whole or partial approval

The Secretary may approve all or any portion of an application under paragraph (3).

(5) Failure to approve application

If the Secretary does not approve any portion of an application submitted under paragraph (1), the Secretary shall promptly inform the applicant and specify the reasons therefor.

(6) Conditions and restrictions

The Secretary shall establish and include in each permit under this subsection conditions and restrictions, including those conditions and restrictions set forth in subsection (b)(7) of this section, which shall be complied with by the owner and operator of the vessel for which the permit is issued.

(7) Fees

The Secretary shall collect a fee for each permit issued under this subsection, in an amount adequate to recover the costs incurred by the United States in issuing the permit, except that the Secretary shall waive the fee for the permit if the foreign nation under which the vessel is registered does not collect a fee from a vessel of the United States engaged in similar activities in the waters of such foreign nation.

(e) Pacific Insular Areas**(1) Negotiation of Pacific Insular Area fishery agreements**

The Secretary of State, with the concurrence of the Secretary and in consultation with any appropriate Council, may negotiate

and enter into a Pacific Insular Area fishery agreement to authorize foreign fishing within the exclusive economic zone adjacent to a Pacific Insular Area—

(A) in the case of American Samoa, Guam, or the Northern Mariana Islands, at the request and with the concurrence of, and in consultation with, the Governor of the Pacific Insular Area to which such agreement applies; and

(B) in the case of a Pacific Insular Area other than American Samoa, Guam, or the Northern Mariana Islands, at the request of the Western Pacific Council.

(2) Agreement terms and conditions

A Pacific Insular Area fishery agreement—

(A) shall not be considered to supersede any governing international fishery agreement currently in effect under this chapter, but shall provide an alternative basis for the conduct of foreign fishing within the exclusive economic zone adjacent to Pacific Insular Areas;

(B) shall be negotiated and implemented consistent only with the governing international fishery agreement provisions of this subchapter specifically made applicable in this subsection;

(C) may not be negotiated with a nation that is in violation of a governing international fishery agreement in effect under this chapter;

(D) shall not be entered into if it is determined by the Governor of the applicable Pacific Insular Area with respect to agreements initiated under paragraph (1)(A), or the Western Pacific Council with respect to agreements initiated under paragraph (1)(B), that such an agreement will adversely affect the fishing activities of the indigenous people of such Pacific Insular Area;

(E) shall be valid for a period not to exceed three years and shall only become effective according to the procedures in section 1823 of this title; and

(F) shall require the foreign nation and its fishing vessels to comply with the requirements of paragraphs (1), (2), (3) and (4)(A) of section 1821(c) of this title, section 1821(d) of this title, and section 1821(h) of this title.

(3) Permits for foreign fishing

(A) Application for permits for foreign fishing authorized under a Pacific Insular Areas fishing agreement shall be made, considered and approved or disapproved in accordance with paragraphs (3), (4), (5), (6), (7)(A) and (B), (8), and (9) of subsection (b) of this section, and shall include any conditions and restrictions established by the Secretary in consultation with the Secretary of State, the Secretary of the department in which the Coast Guard is operating, the Governor of the applicable Pacific Insular Area, and the appropriate Council.

(B) If a foreign nation notifies the Secretary of State of its acceptance of the requirements of this paragraph, paragraph (2)(F), and paragraph (5), including any conditions and restrictions established under subparagraph (A), the Secretary of State shall promptly trans-

mit such notification to the Secretary. Upon receipt of any payment required under a Pacific Insular Area fishing agreement, the Secretary shall thereupon issue to such foreign nation, through the Secretary of State, permits for the appropriate fishing vessels of that nation. Each permit shall contain a statement of all of the requirements, conditions, and restrictions established under this subsection which apply to the fishing vessel for which the permit is issued.

(4) Marine conservation plans

(A) Prior to entering into a Pacific Insular Area fishery agreement, the Western Pacific Council and the appropriate Governor shall develop a 3-year marine conservation plan detailing uses for funds to be collected by the Secretary pursuant to such agreement. Such plan shall be consistent with any applicable fishery management plan, identify conservation and management objectives (including criteria for determining when such objectives have been met), and prioritize planned marine conservation projects. Conservation and management objectives shall include, but not be limited to—

(i) establishment of Pacific Insular Area observer programs, approved by the Secretary in consultation with the Western Pacific Council, that provide observer coverage for foreign fishing under Pacific Insular Area fishery agreements that is at least equal in effectiveness to the program established by the Secretary under section 1821(h) of this title;

(ii) conduct of marine and fisheries research, including development of systems for information collection, analysis, evaluation, and reporting;

(iii) conservation, education, and enforcement activities related to marine and coastal management, such as living marine resource assessments, habitat monitoring and coastal studies;

(iv) grants to the University of Hawaii for technical assistance projects by the Pacific Island Network, such as education and training in the development and implementation of sustainable marine resources development projects, scientific research, and conservation strategies; and

(v) western Pacific community-based demonstration projects under section 112(b) of the Sustainable Fisheries Act and other coastal improvement projects to foster and promote the management, conservation, and economic enhancement of the Pacific Insular Areas.

(B) In the case of American Samoa, Guam, and the Northern Mariana Islands, the appropriate Governor, with the concurrence of the Western Pacific Council, shall develop the marine conservation plan described in subparagraph (A) and submit such plan to the Secretary for approval. In the case of other Pacific Insular Areas, the Western Pacific Council shall develop and submit the marine conservation plan described in subparagraph (A) to the Secretary for approval.

(C) If a Governor or the Western Pacific Council intends to request that the Secretary

of State renew a Pacific Insular Area fishery agreement, a subsequent 3-year plan shall be submitted to the Secretary for approval by the end of the second year of the existing 3-year plan.

(5) Reciprocal conditions

Except as expressly provided otherwise in this subsection, a Pacific Insular Area fishing agreement may include terms similar to the terms applicable to United States fishing vessels for access to similar fisheries in waters subject to the fisheries jurisdiction of another nation.

(6) Use of payments by American Samoa, Guam, Northern Mariana Islands

Any payments received by the Secretary under a Pacific Insular Area fishery agreement for American Samoa, Guam, or the Northern Mariana Islands shall be deposited into the United States Treasury and then covered over to the Treasury of the Pacific Insular Area for which those funds were collected. Amounts deposited in the Treasury of a Pacific Insular Area shall be available, without appropriation or fiscal year limitation, to the Governor of the Pacific Insular Area—

(A) to carry out the purposes of this subsection;

(B) to compensate (i) the Western Pacific Council for mutually agreed upon administrative costs incurred relating to any Pacific Insular Area fishery agreement for such Pacific Insular Area, and (ii) the Secretary of State for mutually agreed upon travel expenses for no more than 2 Federal representatives incurred as a direct result of complying with paragraph (1)(A); and

(C) to implement a marine conservation plan developed and approved under paragraph (4).

(7) Western Pacific Sustainable Fisheries Fund

There is established in the United States Treasury a Western Pacific Sustainable Fisheries Fund into which any payments received by the Secretary under a Pacific Insular Area fishery agreement for any Pacific Insular Area other than American Samoa, Guam, or the Northern Mariana Islands shall be deposited. The Western Pacific Sustainable Fisheries Fund shall be made available, without appropriation or fiscal year limitation, to the Secretary, who shall provide such funds only to—

(A) the Western Pacific Council for the purpose of carrying out the provisions of this subsection, including implementation of a marine conservation plan approved under paragraph (4);

(B) the Secretary of State for mutually agreed upon travel expenses for no more than 2 Federal representatives incurred as a direct result of complying with paragraph (1)(B); and

(C) the Western Pacific Council to meet conservation and management objectives in the State of Hawaii if monies remain in the Western Pacific Sustainable Fisheries Fund after the funding requirements of subparagraphs (A) and (B) have been satisfied.

Amounts deposited in such fund shall not diminish funding received by the Western Pa-

cific Council for the purpose of carrying out other responsibilities under this chapter.

(8) Use of fines and penalties

In the case of violations occurring within the exclusive economic zone off American Samoa, Guam, or the Northern Mariana Islands, amounts received by the Secretary which are attributable to fines or penalties imposed under this chapter, including such sums collected from the forfeiture and disposition or sale of property seized subject to its authority, after payment of direct costs of the enforcement action to all entities involved in such action, shall be deposited into the Treasury of the Pacific Insular Area adjacent to the exclusive economic zone in which the violation occurred, to be used for fisheries enforcement and for implementation of a marine conservation plan under paragraph (4).

§ 1825. Import prohibitions

(a) Determinations by Secretary of State

If the Secretary of State determines that—

(1) he has been unable, within a reasonable period of time, to conclude with any foreign nation an international fishery agreement allowing fishing vessels of the United States equitable access to fisheries over which that nation asserts exclusive fishery management authority, including fisheries for tuna species, as recognized by the United States, in accordance with fishing activities of such vessels, if any, and under terms not more restrictive than those established under sections 1821(c) and (d) and 1824(b)(7) and (10) of this title, because such nation has (A) refused to commence negotiations, or (B) failed to negotiate in good faith;

(2) any foreign nation is not allowing fishing vessels of the United States to engage in fishing for tuna species in accordance with an applicable international fishery agreement, whether or not such nation is a party thereto;

(3) any foreign nation is not complying with its obligations under any existing international fishery agreement concerning fishing by fishing vessels of the United States in any fishery over which that nation asserts exclusive fishery management authority; or

(4) any fishing vessel of the United States, while fishing in waters beyond any foreign nation's territorial sea, to the extent that such sea is recognized by the United States, is seized by any foreign nation—

(A) in violation of an applicable international fishery agreement;

(B) without authorization under an agreement between the United States and such nation; or

(C) as a consequence of a claim of jurisdiction which is not recognized by the United States;

he shall certify such determination to the Secretary of the Treasury.

(b) Prohibitions

Upon receipt of any certification from the Secretary of State under subsection (a) of this section, the Secretary of the Treasury shall immediately take such action as may be necessary and appropriate to prohibit the importation into the United States—

(1) of all fish and fish products from the fishery involved, if any; and

(2) upon recommendation of the Secretary of State, such other fish or fish products, from any fishery of the foreign nation concerned, which the Secretary of State finds to be appropriate to carry out the purposes of this section.

(c) Removal of prohibition

If the Secretary of State finds that the reasons for the imposition of any import prohibition under this section no longer prevail, the Secretary of State shall notify the Secretary of the Treasury, who shall promptly remove such import prohibition.

(d) Definitions

As used in this section—

(1) The term “fish” includes any highly migratory species.

(2) The term “fish products” means any article which is produced from or composed of (in whole or in part) any fish.

(Pub. L. 94-265, title II, §205, Apr. 13, 1976, 90 Stat. 345; Pub. L. 101-627, title I, §105(b)(1), Nov. 28, 1990, 104 Stat. 4440.)

AMENDMENTS

1990—Subsec. (a)(1). Pub. L. 101-627, §105(b)(1)(A), inserted “including fisheries for tuna species,” after “authority,” and struck out “traditional” after “in accordance with”.

Subsec. (a)(2). Pub. L. 101-627, §105(b)(1)(B), substituted “tuna” for “highly migratory”.

EFFECTIVE DATE OF 1990 AMENDMENT

Section 105(b)(2) of Pub. L. 101-627 provided that: “The amendments made by this subsection [amending this section] shall take effect on January 1, 1992.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 972c, 973a of this title.

§ 1826. Large-scale driftnet fishing

(a) Short title

This section incorporates and expands upon provisions of the Driftnet Impact Monitoring, Assessment, and Control Act of 1987 and may be cited as the “Driftnet Act Amendments of 1990”.

(b) Findings

The Congress finds that—

(1) the continued widespread use of large-scale driftnets beyond the exclusive economic zone of any nation is a destructive fishing practice that poses a threat to living marine resources of the world’s oceans, including but not limited to the North and South Pacific Ocean and the Bering Sea;

(2) the use of large-scale driftnets is expanding into new regions of the world’s oceans, including the Atlantic Ocean and Caribbean Sea;

(3) there is a pressing need for detailed and reliable information on the number of seabirds, sea turtles, nontarget fish, and marine mammals that become entangled and die in actively fished large-scale driftnets and in large-scale driftnets that are lost, abandoned, or discarded;

(4) increased efforts, including reliable observer data and enforcement mechanisms, are needed to monitor, assess, control, and reduce the adverse impact of large-scale driftnet fishing on living marine resources;

(5) the nations of the world have agreed in the United Nations, through General Assembly Resolution Numbered 44-225, approved December 22, 1989, by the General Assembly, that a moratorium should be imposed by June 30, 1992, on the use of large-scale driftnets beyond the exclusive economic zone of any nation;

(6) the nations of the South Pacific have agreed to a moratorium on the use of large-scale driftnets in the South Pacific through the Convention for the Prohibition of Fishing with Long Driftnets in the South Pacific, which was agreed to in Wellington, New Zealand, on November 29, 1989; and

(7) increasing population pressures and new knowledge of the importance of living marine resources to the health of the global ecosystem demand that greater responsibility be exercised by persons fishing or developing new fisheries beyond the exclusive economic zone of any nation.

(c) Policy

It is declared to be the policy of the Congress in this section that the United States should—

(1) implement the moratorium called for by the United Nations General Assembly in Resolution Numbered 44-225;

(2) support the Tarawa Declaration and the Wellington Convention for the Prohibition of Fishing with Long Driftnets in the South Pacific; and

(3) secure a permanent ban on the use of destructive fishing practices, and in particular large-scale driftnets, by persons or vessels fishing beyond the exclusive economic zone of any nation.

(d) International agreements

The Secretary, through the Secretary of State and the Secretary of the department in which the Coast Guard is operating, shall seek to secure international agreements to implement immediately the findings, policy, and provisions of this section, and in particular an international ban on large-scale driftnet fishing. The Secretary, through the Secretary of State, shall include, in any agreement which addresses the taking of living marine resources of the United States, provisions to ensure that—

(1) each large-scale driftnet fishing vessel of a foreign nation that is party to the agreement, including vessels that may operate independently to develop new fishing areas, which operate beyond the exclusive economic zone of any nation, is included in such agreement;

(2) each large-scale driftnet fishing vessel of a foreign nation that is party to the agreement, which operates beyond the exclusive economic zone of any nation, is equipped with satellite transmitters which provide real-time position information accessible to the United States;

(3) statistically reliable monitoring by the United States is carried out, through the use of on-board observers or through dedicated platforms provided by foreign nations that are parties to the agreement, of all target and nontarget fish species, marine mammals, sea turtles, and sea birds entangled or killed by large-scale driftnets used by fishing vessels of foreign nations that are parties to the agreement;

(4) officials of the United States have the right to board and inspect for violations of the agreement any large-scale driftnet fishing vessels operating under the flag of a foreign nation that is party to the agreement at any time while such vessel is operating in designated areas beyond the exclusive economic zone of any nation;

(5) all catch landed or transshipped at sea by large-scale driftnet fishing vessels of a foreign nation that is a party to the agreement, and which are operated beyond the exclusive economic zone of any nation, is reliably monitored and documented;

(6) time and area restrictions are imposed on the use of large-scale driftnets in order to prevent interception of anadromous species;

(7) all large-scale driftnets used are constructed, insofar as feasible, with biodegradable materials which break into segments that do not represent a threat to living marine resources;

(8) all large-scale driftnets are marked at appropriate intervals in a manner that conclusively identifies the vessel and flag nation responsible for each such driftnet;

(9) the taking of nontarget fish species, marine mammals, sea turtles, seabirds, and endangered species or other species protected by international agreements to which the United States is a party is minimized and does not pose a threat to existing fisheries or the long-term health of living marine resources; and

(10) definitive steps are agreed upon to ensure that parties to the agreement comply with the spirit of other international agreements and resolutions concerning the use of large-scale driftnets beyond the exclusive economic zone of any nation.

(e) Report

Not later than January 1, 1991, and every year thereafter until the purposes of this section are met, the Secretary, after consultation with the Secretary of State and the Secretary of the department in which the Coast Guard is operating, shall submit to the Committee on Commerce, Science, and Transportation of the Senate and

the Committee on Merchant Marine and Fisheries of the House of Representatives a report—

(1) describing the steps taken to carry out the provisions of this section, particularly subsection (c) of this section;

(2) evaluating the progress of those efforts, the impacts on living marine resources, including available observer data, and specifying plans for further action;

(3) containing a list and description of any new fisheries developed by nations that conduct, or authorize their nationals to conduct, large-scale driftnet fishing beyond the exclusive economic zone of any nation; and

(4) containing a list of the nations that conduct, or authorize their nationals to conduct, large-scale driftnet fishing beyond the exclusive economic zone of any nation in a manner that diminishes the effectiveness of or is inconsistent with any international agreement governing large-scale driftnet fishing to which the United States is a party or otherwise subscribes.

(f) Certification

If at any time the Secretary, in consultation with the Secretary of State and the Secretary of the department in which the Coast Guard is operating, identifies any nation that warrants inclusion in the list described under subsection (e)(4) of this section, the Secretary shall certify that fact to the President. Such certification shall be deemed to be a certification for the purposes of section 1978(a) of title 22.

(g) Effect on sovereign rights

This section shall not serve or be construed to expand or diminish the sovereign rights of the United States, as stated by Presidential Proclamation Numbered 5030, dated March 10, 1983, and reflected in this chapter or other existing law.

(h) "Living marine resources" defined

As used in this section, the term "living marine resources" includes fish, marine mammals, sea turtles, and seabirds and other waterfowl.

ABOLITION OF HOUSE COMMITTEE ON MERCHANT MARINE
AND FISHERIES

Committee on Merchant Marine and Fisheries of House of Representatives abolished and its jurisdiction transferred by House Resolution No. 6, One Hundred Fourth Congress, Jan. 4, 1995. Committee on Merchant Marine and Fisheries of House of Representatives treated as referring to Committee on Resources of House of Representatives in case of provisions relating to fisheries, wildlife, international fishing agreements, marine affairs (including coastal zone management) except for measures relating to oil and other pollution of navigable waters, or oceanography by section 1(b)(3) of Pub. L. 104-14, set out as a note preceding section 21 of Title 2, The Congress.

§ 1826a. Denial of port privileges and sanctions for high seas large-scale driftnet fishing

(a) Denial of port privileges

(1) Publication of list

Not later than 30 days after November 2, 1992, and periodically thereafter, the Secretary of Commerce, in consultation with the Secretary of State, shall publish a list of nations whose nationals or vessels conduct large-scale driftnet fishing beyond the exclusive economic zone of any nation.

(2) Denial of port privileges

The Secretary of the Treasury shall, in accordance with recognized principles of international law—

(A) withhold or revoke the clearance required by section 91 of title 46, Appendix, for any large-scale driftnet fishing vessel that is documented under the laws of the United States or of a nation included on a list published under paragraph (1); and

(B) deny entry of that vessel to any place in the United States and to the navigable waters of the United States.

(3) Notification of nation

Before the publication of a list of nations under paragraph (1), the Secretary of State shall notify each nation included on that list regarding—

(A) the effect of that publication on port privileges of vessels of that nation under paragraph (1); and

(B) any sanctions or requirements, under this Act or any other law, that may be imposed on that nation if nationals or vessels of that nation continue to conduct large-scale driftnet fishing beyond the exclusive economic zone of any nation after December 31, 1992.

(b) Sanctions

(1) Identifications

(A) Initial identifications

Not later than January 10, 1993, the Secretary of Commerce shall—

(i) identify each nation whose nationals or vessels are conducting large-scale driftnet fishing beyond the exclusive economic zone of any nation; and

(ii) notify the President and that nation of the identification under clause (i).

(B) Additional identifications

At any time after January 10, 1993, whenever the Secretary of Commerce has reason to believe that the nationals or vessels of any nation are conducting large-scale driftnet fishing beyond the exclusive economic zone of any nation, the Secretary of Commerce shall—

(i) identify that nation; and

(ii) notify the President and that nation of the identification under clause (i).

(2) Consultations

Not later than 30 days after a nation is identified under paragraph (1)(B), the President shall enter into consultations with the government of that nation for the purpose of obtaining an agreement that will effect the immediate termination of large-scale driftnet fishing by the nationals or vessels of that nation beyond the exclusive economic zone of any nation.

(3) Prohibition on imports of fish and fish products and sport fishing equipment

(A) Prohibition

The President—

(i) upon receipt of notification of the identification of a nation under paragraph (1)(A); or

(ii) if the consultations with the government of a nation under paragraph (2) are not satisfactorily concluded within ninety days, shall direct the Secretary of the Treasury to prohibit the importation into the United States of fish and fish products and sport fishing equipment (as that term is defined in section 4162 of title 26) from that nation.

(B) Implementation of prohibition

With respect to an import prohibition directed under subparagraph (A), the Secretary of the Treasury shall implement such prohibition not later than the date that is forty-five days after the date on which the Secretary has received the direction from the President.

(C) Public notice of prohibition

Before the effective date of any import prohibition under this paragraph, the Secretary of the Treasury shall provide public notice of the impending prohibition.

(4) Additional economic sanctions

(A) Determination of effectiveness of sanctions

Not later than six months after the date the Secretary of Commerce identifies a na-

tion under paragraph (1), the Secretary shall determine whether—

(i) any prohibition established under paragraph (3) is insufficient to cause that nation to terminate large-scale driftnet fishing conducted by its nationals and vessels beyond the exclusive economic zone of any nation; or

(ii) that nation has retaliated against the United States as a result of that prohibition.

(B) Certification

The Secretary of Commerce shall certify to the President each affirmative determination under subparagraph (A) with respect to a nation.

(C) Effect of certification

HIGH SEAS DRIFTNET FISHERIES ENFORCEMENT; CONGRESSIONAL STATEMENT OF FINDINGS AND POLICY

Section 2 of Pub. L. 102-582, as amended by Pub. L. 104-208, div. A, title I, §101(a) [title II, §211(b)], Sept. 30, 1996, 110 Stat. 3009, 3009-41, provided that:

“(a) FINDINGS.—Congress makes the following findings:

“(1) Large-scale driftnet fishing on the high seas is highly destructive to the living marine resources and ocean ecosystems of the world’s oceans, including anadromous fish and other living marine resources of the United States.

“(2) The cumulative effects of large-scale driftnet fishing pose a significant threat to the marine ecosystem, and slow-reproducing species like marine mammals, sharks, and seabirds may require many years to recover.

“(3) Members of the international community have reviewed the best available scientific data on the impacts of large-scale pelagic driftnet fishing, and have failed to conclude that this practice has no significant adverse impacts which threaten the conservation and sustainable management of living marine resources.

“(4) The United Nations, via General Assembly Resolutions numbered 44-225, 45-197, and most recently 46-215 (adopted on December 20, 1991), has called for a worldwide moratorium on all high seas driftnet fish-

ing by December 31, 1992, in all the world’s oceans, including enclosed seas and semi-enclosed seas.

“(5) The United Nations has commended the unilateral, regional, and international efforts undertaken by members of the international community and international organizations to implement and support the objectives of the General Assembly resolutions.

“(6) Operative paragraph (4) of United Nations General Assembly Resolution numbered 46-215 specifically ‘encourages all members of the international community to take measures individually and collectively to prevent large-scale pelagic driftnet fishing operations on the high seas of the world’s oceans and seas’.

“(7) The United States, in section 307(1)(M) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1857(1)(M)), has specifically prohibited the practice of large-scale driftnet fishing by United States nationals and vessels both within the exclusive economic zone of the United States and beyond the exclusive economic zone of any nation.

“(8) The Senate, through Senate Resolution 396 of the One Hundredth Congress (approved on March 18, 1988), has called for a moratorium on fishing in the Central Bering Sea and the United States has taken concrete steps to implement such moratorium through international negotiations.

“(9) Despite the continued evidence of a decline in the fishery resources of the Bering Sea and the multi-year cooperative negotiations undertaken by the United States, the Russian Federation, Japan, and other concerned fishing nations, some nations refuse to agree to measures to reduce or eliminate unregulated fishing practices in the waters of the Bering Sea beyond the exclusive economic zones of the United States and the Russian Federation.

“(10) In order to ensure that the global moratorium on large-scale driftnet fishing called for in United Nations General Assembly Resolution numbered 46-215 takes effect by December 31, 1992, and that unregulated fishing practices in the waters of the Central Bering Sea are reduced or eliminated, the United States should take the actions described in this Act [see Short Title of 1992 Amendments note set out under section 1801 of this title] and encourage other nations to take similar action.

“(b) POLICY.—It is the stated policy of the United States to—

“(1) implement United Nations General Assembly Resolution numbered 46-215, approved unanimously on December 20, 1991, which calls for an immediate cessation to further expansion of large-scale driftnet fishing, a 50 percent reduction in existing large-scale driftnet fishing effort by June 30, 1992, and a global moratorium on the use of large-scale driftnets beyond the exclusive economic zone of any nation by December 31, 1992;

“(2) bring about a moratorium on fishing in the Central Bering Sea, or an international conservation and management agreement to which the United States and the Russian Federation are parties that regulates fishing in the Central Bering Sea; and

“(3) secure a permanent ban on the use of destructive fishing practices, and in particular large-scale driftnets, by persons or vessels fishing beyond the exclusive economic zone of any nation.”

SECTION REFERRED TO IN OTHER SECTIONS

§ 1826b. Duration of denial of port privileges and sanctions

Any denial of port privileges or sanction under section 1826a of this title with respect to a nation shall remain in effect until such time as the Secretary of Commerce certifies to the Presi-

dent and the Congress that such nation has terminated large-scale driftnet fishing by its nationals and vessels beyond the exclusive economic zone of any nation.

§ 1826c. Definitions

In sections 1826a to 1826c of this title, the following definitions apply:

(1) Fish and fish products

The term “fish and fish products” means any aquatic species (including marine mammals and plants) and all products thereof exported from a nation, whether or not taken by fishing vessels of that nation or packed, processed, or otherwise prepared for export in that nation or within the jurisdiction thereof.

(2) Large-scale driftnet fishing

(A) In general

Except as provided in subparagraph (B), the term “large-scale driftnet fishing” means a method of fishing in which a gillnet composed of a panel or panels of webbing, or a series of such gillnets, with a total length of two and one-half kilometers or more is placed in the water and allowed to drift with the currents and winds for the purpose of entangling fish in the webbing.

(B) Exception

Until January 1, 1994, the term “large-scale driftnet fishing” does not include the use in the northeast Atlantic Ocean of gillnets with a total length not to exceed five kilometers if the use is in accordance with regulations adopted by the European Community pursuant to the October 28, 1991, decision by the Council of Fisheries Ministers of the Community.

(3) Large-scale driftnet fishing vessel

The term “large-scale driftnet fishing vessel” means any vessel which is—

(A) used for, equipped to be used for, or of a type which is normally used for large-scale driftnet fishing; or

(B) used for aiding or assisting one or more vessels at sea in the performance of large-scale driftnet fishing, including preparation, supply, storage, refrigeration, transportation, or processing.

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in sections 1802, 1821, 3343 of this title.

§ 1851. National standards for fishery conservation and management

(a) In general

Any fishery management plan prepared, and any regulation promulgated to implement any

such plan, pursuant to this subchapter shall be consistent with the following national standards for fishery conservation and management:

(1) Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery for the United States fishing industry.

(2) Conservation and management measures shall be based upon the best scientific information available.

(3) To the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination.

(4) Conservation and management measures shall not discriminate between residents of different States. If it becomes necessary to allocate or assign fishing privileges among various United States fishermen, such allocation shall be (A) fair and equitable to all such fishermen; (B) reasonably calculated to promote conservation; and (C) carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges.

(5) Conservation and management measures shall, where practicable, consider efficiency in the utilization of fishery resources; except that no such measure shall have economic allocation as its sole purpose.

(6) Conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches.

(7) Conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication.

(8) Conservation and management measures shall, consistent with the conservation requirements of this chapter (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities in order to (A) provide for the sustained participation of such communities, and (B) to the extent practicable, minimize adverse economic impacts on such communities.

(9) Conservation and management measures shall, to the extent practicable, (A) minimize bycatch and (B) to the extent bycatch cannot be avoided, minimize the mortality of such bycatch.

(10) Conservation and management measures shall, to the extent practicable, promote the safety of human life at sea.

(b) Guidelines

The Secretary shall establish advisory guidelines (which shall not have the force and effect of law), based on the national standards, to assist in the development of fishery management plans.

“(21) any catcher/processor not listed in this subsection and determined by the Secretary to have harvested more than 2,000 metric tons of the pollock in the 1997 directed pollock fishery and determined to be eligible to harvest pollock in the directed pollock fishery under the license limitation program recommended by the North Pacific Council and approved by the Secretary, except that catcher/processers eligible under this paragraph shall be prohibited from harvesting in the aggregate a total of more than one-half (0.5) of a percent of the pollock apportioned for the directed pollock fishery under section 206(b)(2). Notwithstanding section 213(a), failure to satisfy the requirements of section 4(a) of the Commercial Fishing Industry Vessel Anti-Reflagging Act of 1987 (Public Law 100-239; 46 U.S.C. 12108 note) shall not make a catcher/processor listed under this subsection ineligible for a fishery endorsement.

“(f) **SHORESIDE PROCESSORS**.—(1) Effective January 1, 2000 and except as provided in paragraph (2), the catcher vessels eligible under subsection (a) may deliver pollock harvested from the directed fishing allowance under section 206(b)(1) only to—

“(A) shoreside processors (including vessels in a single geographic location in Alaska State waters) determined by the Secretary to have processed more than 2,000 metric tons round-weight of pollock in the inshore component of the directed pollock fishery during each of 1996 and 1997; and

“(B) shoreside processors determined by the Secretary to have processed pollock in the inshore component of the directed pollock fishery in 1996 or 1997, but to have processed less than 2,000 metric tons round-weight of such pollock in each year, except that effective January 1, 2000, each such shoreside processor may not process more than 2,000 metric tons round-weight from such directed fishing allowance in any year.

“(2) Upon recommendation by the North Pacific Council, the Secretary may approve measures to allow catcher vessels eligible under subsection (a) to deliver pollock harvested from the directed fishing allowance under section 206(b)(1) to shoreside processors not eligible under paragraph (1) if the total allowable catch for pollock in the Bering Sea and Aleutian Islands Management Area increases by more than 10 percent above the total allowable catch in such fishery in 1997, or in the event of the actual total loss or constructive total loss of a shoreside processor eligible under paragraph (1)(A).

“(g) **REPLACEMENT VESSELS**.—In the event of the actual total loss or constructive total loss of a vessel eligible under subsections (a), (b), (c), (d), or (e), the owner of such vessel may replace such vessel with a vessel which shall be eligible in the same manner under that subsection as the eligible vessel, provided that—

“(1) such loss was caused by an act of God, an act of war, a collision, an act or omission of a party other than the owner or agent of the vessel, or any other event not caused by the willful misconduct of the owner or agent;

“(2) the replacement vessel was built in the United States and if ever rebuilt, was rebuilt in the United States;

“(3) the fishery endorsement for the replacement vessel is issued within 36 months of the end of the last year in which the eligible vessel harvested or processed pollock in the directed pollock fishery;

“(4) if the eligible vessel is greater than 165 feet in registered length, of more than 750 gross registered tons, or has engines capable of producing more than 3,000 shaft horsepower, the replacement vessel is of the same or lesser registered length, gross registered tons, and shaft horsepower;

“(5) if the eligible vessel is less than 165 feet in registered length, of fewer than 750 gross registered tons, and has engines incapable of producing less than 3,000 shaft horsepower, the replacement vessel is less than each of such thresholds and does not exceed by more than 10 percent the registered length, gross registered tons or shaft horsepower of the eligible vessel; and

“(6) the replacement vessel otherwise qualifies under federal law for a fishery endorsement, including under section 12102(c) of title 46, United States Code, as amended by this Act.

“(h) **ELIGIBILITY DURING IMPLEMENTATION**.—In the event the Secretary is unable to make a final determination about the eligibility of a vessel under subsection (b)(8) or subsection (e)(21) before January 1, 1999, or a vessel or shoreside processor under subsection (a), subsection (c)(21), or subsection (f) before January 1, 2000, such vessel or shoreside processor, upon the filing of an application for eligibility, shall be eligible to participate in the directed pollock fishery pending final determination by the Secretary with respect to such vessel or shoreside processor.

“(i) **ELIGIBILITY NOT A RIGHT**.—Eligibility under this section shall not be construed—

“(1) to confer any right of compensation, monetary or otherwise, to the owner of any catcher vessel, catcher/processor, mothership, or shoreside processor if such eligibility is revoked or limited in any way, including through the revocation or limitation of a fishery endorsement or any federal permit or license;

“(2) to create any right, title, or interest in or to any fish in any fishery; or

“(3) to waive any provision of law otherwise applicable to such catcher vessel, catcher/processor, mothership, or shoreside processor.

“SEC. 209. LIST OF INELIGIBLE VESSELS.

“Effective December 31, 1998, the following vessels shall be permanently ineligible for fishery endorsements, and any claims (including relating to catch history) associated with such vessels that could qualify any owners of such vessels for any present or future limited access system permit in any fishery within the exclusive economic zone of the United States (including a vessel moratorium permit or license limitation program permit in fisheries under the authority of the North Pacific Council) are hereby extinguished:

“(2) PACIFIC SCOUT (United States official number 934772);

“(3) PACIFIC EXPLORER (United States official number 942592);

“(5) VICTORIA ANN (United States official number 592207);

“(9) BROWNS POINT (United States official number 587440).

“SEC. 210. FISHERY COOPERATIVE LIMITATIONS.

“(a) PUBLIC NOTICE.—(1) Any contract implementing a fishery cooperative under section 1 of the Act of June 25, 1934 (15 U.S.C. 521) in the directed pollock fishery and any material modifications to any such contract shall be filed not less than 30 days prior to the start of fishing under the contract with the North Pacific Council and with the Secretary, together with a copy of a letter from a party to the contract requesting a business review letter on the fishery cooperative from the Department of Justice and any response to such request. Notwithstanding section 402 of the Magnuson-Stevens Act (16 U.S.C. 1881a) or any other provision of law, but taking into account the interest of parties to any such contract in protecting the confidentiality of proprietary information, the North Pacific Council and Secretary shall—

“(A) make available to the public such information about the contract, contract modifications, or fishery cooperative the North Pacific Council and Secretary deem appropriate, which at a minimum shall include a list of the parties to the contract, a list of the vessels involved, and the amount of pollock and other fish to be harvested by each party to such contract; and

“(B) make available to the public in such manner as the North Pacific Council and Secretary deem appropriate information about the harvest by vessels under a fishery cooperative of all species (including bycatch) in the directed pollock fishery on a vessel-by-vessel basis.

“(b) CATCHER VESSELS ONSHORE.—

“(1) CATCHER VESSEL COOPERATIVES.—Effective January 1, 2000, upon the filing of a contract implementing a fishery cooperative under subsection (a) which—

“(A) is signed by the owners of 80 percent or more of the qualified catcher vessels that delivered pollock for processing by a shoreside processor in the directed pollock fishery in the year prior to the year in which the fishery cooperative will be in effect; and

“(B) specifies, except as provided in paragraph (6), that such catcher vessels will deliver pollock in the directed pollock fishery only to such shoreside processor during the year in which the fishery coop-

erative will be in effect and that such shoreside processor has agreed to process such pollock,

the Secretary shall allow only such catcher vessels (and catcher vessels whose owners voluntarily participate pursuant to paragraph (2)) to harvest the aggregate percentage of the directed fishing allowance under section 206(b)(1) in the year in which the fishery cooperative will be in effect that is equivalent to the aggregate total amount of pollock harvested by such catcher vessels (and by such catcher vessels whose owners voluntarily participate pursuant to paragraph (2)) in the directed pollock fishery for processing by the inshore component during 1995, 1996, and 1997 relative to the aggregate total amount of pollock harvested in the directed pollock fishery for processing by the inshore component during such years and shall prevent such catcher vessels (and catcher vessels whose owners voluntarily participate pursuant to paragraph (2)) from harvesting in aggregate in excess of such percentage of such directed fishing allowance.

“(2) VOLUNTARY PARTICIPATION.—Any contract implementing a fishery cooperative under paragraph (1) must allow the owners of other qualified catcher vessels to enter into such contract after it is filed and before the calendar year in which fishing will begin under the same terms and conditions as the owners of the qualified catcher vessels who entered into such contract upon filing.

“(3) QUALIFIED CATCHER VESSEL.—For the purposes of this subsection, a catcher vessel shall be considered a ‘qualified catcher vessel’ if, during the year prior to the year in which the fishery cooperative will be in effect, it delivered more pollock to the shoreside processor to which it will deliver pollock under the fishery cooperative in paragraph (1) than to any other shoreside processor.

“(4) CONSIDERATION OF CERTAIN VESSELS.—Any contract implementing a fishery cooperative under paragraph (1) which has been entered into by the owner of a qualified catcher vessel eligible under section 208(a) that harvested pollock for processing by catcher/processors or motherships in the directed pollock fishery during 1995, 1996, and 1997 shall, to the extent practicable, provide fair and equitable terms and conditions for the owner of such qualified catcher vessel.

“(5) OPEN ACCESS.—A catcher vessel eligible under section 208(a) the catch history of which has not been attributed to a fishery cooperative under paragraph (1) may be used to deliver pollock harvested by such vessel from the directed fishing allowance under section 206(b)(1) (other than pollock reserved under paragraph (1) for a fishery cooperative) to any of the shoreside processors eligible under section 208(f). A catcher vessel eligible under section 208(a) the catch history of which has been attributed to a fishery cooperative under paragraph (1) during any calendar year may not harvest any pollock apportioned under section 206(b)(1) in such calendar year other than the pollock reserved under paragraph (1) for such fishery cooperative.

“(6) TRANSFER OF COOPERATIVE HARVEST.—A contract implementing a fishery cooperative under paragraph (1) may, notwithstanding the other provisions of this subsection, provide for up to 10 percent of the pollock harvested under such cooperative to be processed by a shoreside processor eligible under section 208(f) other than the shoreside processor to which pollock will be delivered under paragraph (1).

“(c) CATCHER VESSELS TO CATCHER/PROCESSORS.—Effective January 1, 1999, not less than 8.5 percent of the directed fishing allowance under section 206(b)(2) shall be available for harvest only by the catcher vessels eligible under section 208(b). The owners of such catcher vessels may participate in a fishery cooperative with the owners of the catcher/processors eligible under paragraphs (1) through (20) of the section 208(e). The owners of such catcher vessels may participate in a fishery cooperative that will be in effect during 1999 only if the contract implementing such cooperative establishes penalties to prevent such vessels from exceed-

ing in 1999 the traditional levels harvested by such vessels in all other fisheries in the exclusive economic zone of the United States.

“(d) CATCHER VESSELS TO MOTHERSHIPS.—

“(1) PROCESSING.—Effective January 1, 2000, the authority in section 1 of the Act of June 25, 1934 (48 Stat. 1213 and 1214; 15 U.S.C. 521 et seq.) shall extend to processing by motherships eligible under section 208(d) solely for the purposes of forming or participating in a fishery cooperative in the directed pollock fishery upon the filing of a contract to implement a fishery cooperative under subsection (a) which has been entered into by the owners of 80 percent or more of the catcher vessels eligible under section 208(c) for the duration of such contract, provided that such owners agree to the terms of the fishery cooperative involving processing by the motherships.

“(2) VOLUNTARY PARTICIPATION.—Any contract implementing a fishery cooperative described in paragraph (1) must allow the owners of any other catcher vessels eligible under section 208(c) to enter such contract after it is filed and before the calendar year in which fishing will begin under the same terms and conditions as the owners of the catcher vessels who entered into such contract upon filing.

“(e) EXCESSIVE SHARES.—

“(1) HARVESTING.—No particular individual, corporation, or other entity may harvest, through a fishery cooperative or otherwise, a total of more than 17.5 percent of the pollock available to be harvested in the directed pollock fishery.

“(2) PROCESSING.—Under the authority of section 301(a)(4) of the Magnuson-Stevens Act (16 U.S.C. 1851(a)(4)), the North Pacific Council is directed to recommend for approval by the Secretary conservation and management measures to prevent any particular individual or entity from processing an excessive share of the pollock available to be harvested in the directed pollock fishery. In the event the North Pacific Council recommends and the Secretary approves an excessive processing share that is lower than 17.5 percent, any individual or entity that previously processed a percentage greater than such share shall be allowed to continue to process such percentage, except that their percentage may not exceed 17.5 percent (excluding pollock processed by catcher/processors that was harvested in the directed pollock fishery by catcher vessels eligible under 208(b)) and shall be reduced if their percentage decreases, until their percentage is below such share. In recommending the excessive processing share, the North Pacific Council shall consider the need of catcher vessels in the directed pollock fishery to have competitive buyers for the pollock harvested by such vessels.

“(3) REVIEW BY MARITIME ADMINISTRATION.—At the request of the North Pacific Council or the Secretary, any individual or entity believed by such Council or the Secretary to have exceeded the percentage in either paragraph (1) or (2) shall submit such information to the Administrator of the Maritime Administration as the Administrator deems appropriate to allow the Administrator to determine whether such individual or entity has exceeded either such percentage. The Administrator shall make a finding as soon as practicable upon such request and shall submit such finding to the North Pacific Council and the Secretary. For the purposes of this subsection, any entity in which 10 percent or more of the interest is owned or controlled by another individual or entity shall be considered to be the same entity as the other individual or entity.

“(f) LANDING TAX JURISDICTION.—Any contract filed under subsection (a) shall include a contract clause under which the parties to the contract agree to make payments to the State of Alaska for any pollock harvested in the directed pollock fishery which is not landed in the State of Alaska, in amounts which would otherwise accrue had the pollock been landed in the State of Alaska subject to any landing taxes estab-

lished under Alaska law. Failure to include such a contract clause or for such amounts to be paid shall result in a revocation of the authority to form fishery cooperatives under section 1 of the Act of June 25, 1934 (15 U.S.C. 521 et seq.).

“(g) PENALTIES.—The violation of any of the requirements of this section or section 211 shall be considered the commission of an act prohibited by section 307 of the Magnuson-Stevens Act (16 U.S.C. 1857). In addition to the civil penalties and permit sanctions applicable to prohibited acts under section 308 of such Act (16 U.S.C. 1858), any person who is found by the Secretary, after notice and an opportunity for a hearing in accordance with section 554 of title 5, United States Code, to have violated a requirement of this section shall be subject to the forfeiture to the Secretary of Commerce of any fish harvested or processed during the commission of such act.

“SEC. 211. PROTECTIONS FOR OTHER FISHERIES; CONSERVATION MEASURES.

“(a) GENERAL.—The North Pacific Council shall recommend for approval by the Secretary such conservation and management measures as it determines necessary to protect other fisheries under its jurisdiction and the participants in those fisheries, including processors, from adverse impacts caused by this Act [probably should be “this title”, see Tables for classification] or fishery cooperatives in the directed pollock fishery.

“(b) CATCHER/PROCESSOR RESTRICTIONS.—

“(1) GENERAL.—The restrictions in this subsection shall take effect on January 1, 1999 and shall remain in effect thereafter except that they may be superceded (with the exception of paragraph (4)) by conservation and management measures recommended after the date of the enactment of this Act [Oct. 21, 1998] by the North Pacific Council and approved by the Secretary in accordance with the Magnuson-Stevens Act.

“(2) BERING SEA FISHING.—The catcher/processors eligible under paragraphs (1) through (20) of section 208(e) are hereby prohibited from, in the aggregate—

“(A) exceeding the percentage of the harvest available in the offshore component of any Bering Sea and Aleutian Islands groundfish fishery (other than the pollock fishery) that is equivalent to the total harvest by such catcher/processors and the catcher/processors listed in section 209 in the fishery in 1995, 1996, and 1997 relative to the total amount available to be harvested by the offshore component in the fishery in 1995, 1996, and 1997;

“(B) exceeding the percentage of the prohibited species available in the offshore component of any Bering Sea and Aleutian Islands groundfish fishery (other than the pollock fishery) that is equivalent to the total of the prohibited species harvested by such catcher/processors and the catcher/processors listed in section 209 in the fishery in 1995, 1996, and 1997 relative to the total amount of prohibited species available to be harvested by the offshore component in the fishery in 1995, 1996, and 1997; and

“(C) fishing for Atka mackerel in the eastern area of the Bering Sea and Aleutian Islands and from exceeding the following percentages of the directed harvest available in the Bering Sea and Aleutian Islands Atka mackerel fishery—

“(i) 11.5 percent in the central area; and

“(ii) 20 percent in the western area.

“(3) BERING SEA PROCESSING.—The catcher/processors eligible under paragraphs (1) through (20) of section 208(e) are hereby prohibited from—

“(A) processing any of the directed fishing allowances under paragraphs (1) or (3) of section 206(b); and

“(B) processing any species of crab harvested in the Bering Sea and Aleutian Islands Management Area.

“(4) GULF OF ALASKA.—The catcher/processors eligible under paragraphs (1) through (20) of section 208(e) are hereby prohibited from—

“(A) harvesting any fish in the Gulf of Alaska;

“(B) processing any groundfish harvested from the portion of the exclusive economic zone off Alaska known as area 630 under the fishery management plan for Gulf of Alaska groundfish; or

“(C) processing any pollock in the Gulf of Alaska (other than as bycatch in non-pollock groundfish fisheries) or processing, in the aggregate, a total of more than 10 percent of the cod harvested from areas 610, 620, and 640 of the Gulf of Alaska under the fishery management plan for Gulf of Alaska groundfish.

“(5) FISHERIES OTHER THAN NORTH PACIFIC.—The catcher/processors eligible under paragraphs (1) through (20) of section 208(e) and motherships eligible under section 208(d) are hereby prohibited from harvesting fish in any fishery under the authority of any regional fishery management council established under section 302(a) of the Magnuson-Stevens Act (16 U.S.C. 1852(a)) other than the North Pacific Council, except for the Pacific whiting fishery, and from processing fish in any fishery under the authority of any such regional fishery management council other than the North Pacific Council, except in the Pacific whiting fishery, unless the catcher/processor or mothership is authorized to harvest or process fish under a fishery management plan recommended by the regional fishery management council of jurisdiction and approved by the Secretary.

“(6) OBSERVERS AND SCALES.—The catcher/processors eligible under paragraphs (1) through (20) of section 208(e) shall—

“(A) have two observers onboard at all times while groundfish is being harvested, processed, or received from another vessel in any fishery under the authority of the North Pacific Council; and

“(B) weigh its catch on a scale onboard approved by the National Marine Fisheries Service while harvesting groundfish in fisheries under the authority of the North Pacific Council.

This paragraph shall take effect on January 1, 1999 for catcher/processors eligible under paragraphs (1) through (20) of section 208(e) that will harvest pollock allocated under section 206(a) in 1999, and shall take effect on January 1, 2000 for all other catcher/processors eligible under such paragraphs of section 208(e).

“(c) CATCHER VESSEL AND SHORESIDE PROCESSOR RESTRICTIONS.—

“(1) REQUIRED COUNCIL RECOMMENDATIONS.—By not later than July 1, 1999, the North Pacific Council shall recommend for approval by the Secretary conservation and management measures to—

“(A) prevent the catcher vessels eligible under subsections (a), (b), and (c) of section 208 from exceeding in the aggregate the traditional harvest levels of such vessels in other fisheries under the authority of the North Pacific Council as a result of fishery cooperatives in the directed pollock fishery; and

“(B) protect processors not eligible to participate in the directed pollock fishery from adverse effects as a result of this Act or fishery cooperatives in the directed pollock fishery.

If the North Pacific Council does not recommend such conservation and management measures by such date, or if the Secretary determines that such conservation and management measures recommended by the North Pacific Council are not adequate to fulfill the purposes of this paragraph, the Secretary may by regulation restrict or change the authority in section 210(b) to the extent the Secretary deems appropriate, including by preventing fishery cooperatives from being formed pursuant to such section and by providing greater flexibility with respect to the shoreside processor or shoreside processors to which catcher vessels in a fishery cooperative under section 210(b) may deliver pollock.

“(2) BERING SEA CRAB AND GROUNDFISH.—

“(A) Effective January 1, 2000, the owners of the motherships eligible under section 208(d) and the

shoreside processors eligible under section 208(f) that receive pollock from the directed pollock fishery under a fishery cooperative are hereby prohibited from processing, in the aggregate for each calendar year, more than the percentage of the total catch of each species of crab in directed fisheries under the jurisdiction of the North Pacific Council than facilities operated by such owners processed of each such species in the aggregate, on average, in 1995, 1996, 1997. For the purposes of this subparagraph, the term ‘facilities’ means any processing plant, catcher/processor, mothership, floating processor, or any other operation that processes fish. Any entity in which 10 percent or more of the interest is owned or controlled by another individual or entity shall be considered to be the same entity as the other individual or entity for the purposes of this subparagraph.

“(B) Under the authority of section 301(a)(4) of the Magnuson-Stevens Act (16 U.S.C. 1851(a)(4)), the North Pacific Council is directed to recommend for approval by the Secretary conservation and management measures to prevent any particular individual or entity from harvesting or processing an excessive share of crab or of groundfish in fisheries in the Bering Sea and Aleutian Islands Management Area.

“(C) The catcher vessels eligible under section 208(b) are hereby prohibited from participating in a directed fishery for any species of crab in the Bering Sea and Aleutian Islands Management Area unless the catcher vessel harvested crab in the directed fishery for that species of crab in such Area during 1997 and is eligible to harvest such crab in such directed fishery under the license limitation program recommended by the North Pacific Council and approved by the Secretary. The North Pacific Council is directed to recommend measures for approval by the Secretary to eliminate latent licenses under such program, and nothing in this subparagraph shall preclude the Council from recommending measures more restrictive than under this paragraph.

“(3) FISHERIES OTHER THAN NORTH PACIFIC.—

“(A) By not later than July 1, 2000, the Pacific Fishery Management Council established under section 302(a)(1)(F) of the Magnuson-Stevens Act (16 U.S.C. 1852(a)(1)(F)) shall recommend for approval by the Secretary conservation and management measures to protect fisheries under its jurisdiction and the participants in those fisheries from adverse impacts caused by this Act [probably should be “this title”, see Tables for classification] or by any fishery cooperatives in the directed pollock fishery.

“(B) If the Pacific Council does not recommend such conservation and management measures by such date, or if the Secretary determines that such conservation and management measures recommended by the Pacific Council are not adequate to fulfill the purposes of this paragraph, the Secretary may by regulation implement adequate measures including, but not limited to, restrictions on vessels which harvest pollock under a fishery cooperative which will prevent such vessels from harvesting Pacific groundfish, and restrictions on the number of processors eligible to process Pacific groundfish.

“(d) BYCATCH INFORMATION.—Notwithstanding section 402 of the Magnuson-Stevens Act (16 U.S.C. 1881a), the North Pacific Council may recommend and the Secretary may approve, under such terms and conditions as the North Pacific Council and Secretary deem appropriate, the public disclosure of any information from the groundfish fisheries under the authority of such Council that would be beneficial in the implementation of section 301(a)(9) or section 303(a)(11) of the Magnuson-Stevens Act (16 U.S.C. 1851(a)(9) and 1853(a)(11)).

“(e) COMMUNITY DEVELOPMENT LOAN PROGRAM.—Under the authority of title XI of the Merchant Marine Act, 1936 (46 U.S.C. App. 1271 et seq.), and subject to the

availability of appropriations, the Secretary is authorized to provide direct loan obligations to communities eligible to participate in the western Alaska community development quota program established under 304(i) [305(i)] of the Magnuson-Stevens Act (16 U.S.C. 1855(i)) for the purposes of purchasing all or part of an ownership interest in vessels and shoreside processors eligible under subsections (a), (b), (c), (d), (e), or (f) of section 208. Notwithstanding the eligibility criteria in section 208(a) and section 208(c), the LISA MARIE (United States official number 1038717) shall be eligible under such sections in the same manner as other vessels eligible under such sections.

“SEC. 212. RESTRICTION ON FEDERAL LOANS.

“[Amended section 302(b) of Pub. L. 104-297, set out as a note under section 1274 of Title 46, Appendix, Shipping.]

“SEC. 213. DURATION.

“(a) GENERAL.—Except as otherwise provided in this title [see Tables for classification], the provisions of this title shall take effect upon the date of the enactment of this Act [Oct. 21, 1998]. Sections 206, 208, and 210 shall remain in effect until December 31, 2004, and shall be repealed on such date, except that the North Pacific Council may recommend and the Secretary may approve conservation and management measures as part of a fishery management plan under the Magnuson-Stevens Act to give effect to the measures in such sections thereafter.

“(b) EXISTING AUTHORITY.—Except for the measures required by this subtitle [this note], nothing in this subtitle shall be construed to limit the authority of the North Pacific Council or the Secretary under the Magnuson-Stevens Act.

“(c) CHANGES TO FISHERY COOPERATIVE LIMITATIONS AND POLLOCK CDQ ALLOCATION.—The North Pacific Council may recommend and the Secretary may approve conservation and management measures in accordance with the Magnuson-Stevens Act—

“(1) that supersede the provisions of this title, except for sections 206 and 208, for conservation purposes or to mitigate adverse effects in fisheries or on owners of fewer than three vessels in the directed pollock fishery caused by this title or fishery cooperatives in the directed pollock fishery, provided such measures take into account all factors affecting the fisheries and are imposed fairly and equitably to the extent practicable among and within the sectors in the directed pollock fishery;

“(2) that supersede the allocation in section 206(a) for any of the years 2002, 2003, and 2004, upon the finding by such Council that the western Alaska community development quota program for pollock has been adversely affected by the amendments in this title; or

“(3) that supersede the criteria required in paragraph (1) of section 210(b) to be used by the Secretary to set the percentage allowed to be harvested by catcher vessels pursuant to a fishery cooperative under such paragraph.

“(d) REPORT TO CONGRESS.—Not later than October 1, 2000, the North Pacific Council shall submit a report to the Secretary and to Congress on the implementation and effects of this Act [probably should be “this title”, see Tables for classification], including the effects on fishery conservation and management, on bycatch levels, on fishing communities, on business and employment practices of participants in any fishery cooperatives, on the western Alaska community development quota program, on any fisheries outside of the authority of the North Pacific Council, and such other matters as the North Pacific Council deems appropriate.

“(e) REPORT ON FILLET PRODUCTION.—Not later than June 1, 2000, the General Accounting Office shall submit a report to the North Pacific Council, the Secretary, and the Congress on whether this Act has negatively affected the market for fillets and fillet blocks, including through the reduction in the supply of such fillets and fillet blocks. If the report determines that such market has been negatively affected, the North

Pacific Council shall recommend measures for the Secretary’s approval to mitigate any negative effects.

“(f) SEVERABILITY.—If any provision of this title, an amendment made by this title, or the application of such provision or amendment to any person or circumstance is held to be unconstitutional, the remainder of this title, the amendments made by this title, and the application of the provisions of such to any person or circumstance shall not be affected thereby.

“(g) INTERNATIONAL AGREEMENTS.—In the event that any provision of section 12102(c) or section 31322(a) of title 46, United States Code, as amended by this Act, is determined to be inconsistent with an existing international agreement relating to foreign investment to which the United States is a party with respect to the owner or mortgagee on October 1, 2001 of a vessel with a fishery endorsement, such provision shall not apply to that owner or mortgagee with respect to such vessel to the extent of any such inconsistency. The provisions of section 12102(c) and section 31322(a) of title 46, United States Code, as amended by this Act, shall apply to all subsequent owners and mortgagees of such vessel, and shall apply, notwithstanding the preceding sentence, to the owner on October 1, 2001 of such vessel if any ownership interest in that owner is transferred to or otherwise acquired by a foreign individual or entity after such date.”

RESTRICTION ON FUNDING CERTAIN NEW FISHERY MANAGEMENT PLANS, AMENDMENTS OR REGULATIONS

Pub. L. 104-208, div. A, title I, §101(a) [title II, §§208, 211(b)], Sept. 30, 1996, 110 Stat. 3009, 3009-40, 3009-41, provided that: “None of the funds appropriated under this Act or any other Act henceforth may be used to develop new fishery management plans, amendments, or regulations which create new individual fishing quota programs (whether such quotas are transferable or not) or to implement any such plans, amendments or regulations approved by a Regional Fishery Management Council or the Secretary after January 4, 1995, until offsetting fees to pay for the cost of administering such plans, amendments, or regulations are expressly authorized under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.). This restriction shall also apply to any program relating to the Gulf of Mexico commercial red snapper fishery that authorizes the consolidation of licenses, permits or endorsements that result in different trip limits for vessels in the same class. This restriction shall not apply in any way to the North Pacific halibut and sablefish, South Atlantic wreckfish, or the Mid-Atlantic surfclam and ocean (including mahogany) quohog individual fishing quota programs. (h) Functions

Each Council shall, in accordance with the provisions of this chapter—

(1) for each fishery under its authority that requires conservation and management, prepare and submit to the Secretary (A) a fishery management plan, and (B) amendments to each such plan that are necessary from time to time (and promptly whenever changes in conservation and management measures in another fishery substantially affect the fishery for which such plan was developed);

(2) prepare comments on any application for foreign fishing transmitted to it under section 1824(b)(4)(C) of this title or section 1824(d) of this title, and any fishery management plan or amendment transmitted to it under section 1854(c)(4) of this title;

(3) conduct public hearings, at appropriate times and in appropriate locations in the geographical area concerned, so as to allow all interested persons an opportunity to be heard in the development of fishery management plans and amendments to such plans, and with respect to the administration and implementation of the provisions of this chapter (and for purposes of this paragraph, the term "geographical area concerned" may include an area under the authority of another Council if

the fish in the fishery concerned migrate into, or occur in, that area or if the matters being heard affect fishermen of that area; but not unless such other Council is first consulted regarding the conduct of such hearings within its area);

(4) submit to the Secretary such periodic reports as the Council deems appropriate, and any other relevant report which may be requested by the Secretary;

(5) review on a continuing basis, and revise as appropriate, the assessments and specifications made pursuant to section 1853(a)(3) and (4) of this title with respect to the optimum yield from, the capacity and extent to which United States fish processors will process United States harvested fish from, and the total allowable level of foreign fishing in, each fishery (except as provided in section⁵ subsection (a)(3) of this section) within its geographical area of authority; and

(6) conduct any other activities which are required by, or provided for in, this chapter or which are necessary and appropriate to the foregoing functions.

(i) Procedural matters

(1) The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Councils or to the scientific and statistical committees or advisory panels established under subsection (g) of this section.

(2) The following guidelines apply with respect to the conduct of business at meetings of a Council, and of the scientific and statistical committee and advisory panels established under subsection (g) of this section:

(A) Unless closed in accordance with paragraph (3), each regular meeting and each emergency meeting shall be open to the public.

(B) Emergency meetings shall be held at the call of the chairman or equivalent presiding officer.

(C) Timely public notice of each regular meeting and each emergency meeting, including the time, place, and agenda of the meeting, shall be published in local newspapers in the major fishing ports of the region (and in other major fishing ports having a direct interest in the affected fishery) and such notice may be given by such other means as will result in wide publicity. Timely notice of each regular meeting shall also be published in the Federal Register. The published agenda of the meeting may not be modified to include additional matters for Council action without public notice or within 14 days prior to the meeting date, unless such modification is to address an emergency action under section 1855(c) of this title, in which case public notice shall be given immediately.

(D) Interested persons shall be permitted to present oral or written statements regarding the matters on the agenda at meetings. All written information submitted to a Council by an interested person shall include a statement of the source and date of such information. Any oral or written statement shall include a

brief description of the background and interests of the person in the subject of the oral or written statement.

(E) Detailed minutes of each meeting of the Council, except for any closed session, shall be kept and shall contain a record of the persons present, a complete and accurate description of matters discussed and conclusions reached, and copies of all statements filed. The Chairman shall certify the accuracy of the minutes of each such meeting and submit a copy thereof to the Secretary. The minutes shall be made available to any court of competent jurisdiction.

(F) Subject to the procedures established under paragraph (4), and the guidelines prescribed by the Secretary under section 1881a(b) of this title, relating to confidentiality, the administrative record, including minutes required under subparagraph (E), of each meeting, and records or other documents which were made available to or prepared for or by the Council, committee, or panel incident to the meeting, shall be available for public inspection and copying at a single location in the offices of the Council or the Secretary, as appropriate.

(3)(A) Each Council, scientific, and statistical committee, and advisory panel—

(i) shall close any meeting, or portion thereof, that concerns matters or information that bears a national security classification; and

(ii) may close any meeting, or portion thereof, that concerns matters or information that pertains to national security, employment matters, or briefings on litigation in which the Council is interested.

Subparagraphs (D) and (F) of paragraph (2) shall not apply to any meeting or portion thereof that is so closed.

(B) If any meeting or portion is closed, the Council concerned shall notify local newspapers in the major fishing ports within its region (and in other major, affected fishing ports), including in that notification the time and place of the meeting. This subparagraph⁶ does not require notification regarding any brief closure of a portion of a meeting in order to discuss employment or other internal administrative matters.

(4) Each Council shall establish appropriate procedures applicable to it and to its committee and advisory panels for ensuring the confidentiality of the statistics that may be submitted to it by Federal or State authorities, and may be voluntarily submitted to it by private persons; including, but not limited to, procedures for the restriction of Council employee access and the prevention of conflicts of interest; except that such procedures, in the case of statistics submitted to the Council by a State or by the Secretary under section 1881a(b) of this title, must be consistent with the laws and regulations of that State, or with the procedures of the Secretary, as the case may be, concerning the confidentiality of the statistics.

(5) Each Council shall specify those procedures that are necessary or appropriate to ensure that the committees and advisory panels established

under subsection (g) of this section are involved, on a continuing basis, in the development and amendment of fishery management plans.

(6) At any time when a Council determines it appropriate to consider new information from a State or Federal agency or from a Council advisory body, the Council shall give comparable consideration to new information offered at that time by interested members of the public. Interested parties shall have a reasonable opportunity to respond to new data or information before the Council takes final action on conservation and management measures.

(j) Disclosure of financial interest and recusal

(1) For the purposes of this subsection—

(A) the term “affected individual” means an individual who—

(i) is nominated by the Governor of a State for appointment as a voting member of a Council in accordance with subsection (b)(2) of this section; or

(ii) is a voting member of a Council appointed—

(I) under subsection (b)(2) of this section; or

(II) under subsection (b)(5) of this section who is not subject to disclosure and recusal requirements under the laws of an Indian tribal government; and

(B) the term “designated official” means a person with expertise in Federal conflict-of-interest requirements who is designated by the Secretary, in consultation with the Council, to attend Council meetings and make determinations under paragraph (7)(B).

(2) Each affected individual must disclose any financial interest held by—

(A) that individual;

(B) the spouse, minor child, or partner of that individual; and

(C) any organization (other than the Council) in which that individual is serving as an officer, director, trustee, partner, or employee; in any harvesting, processing, or marketing activity that is being, or will be, undertaken within any fishery over which the Council concerned has jurisdiction.

(3) The disclosure required under paragraph (2) shall be made—

(A) in the case of an affected individual referred to in paragraph (1)(A)(i), before appointment by the Secretary; and

(B) in the case of an affected individual referred to in paragraph (1)(A)(ii), within 45 days of taking office.

(4) An affected individual referred to in paragraph (1)(A)(ii) must update his or her disclosure form at any time any such financial interest is acquired, or substantially changed, by any person referred to in paragraph (2)(A), (B), or (C).

(6) The participation by an affected individual referred to in paragraph (1)(A)(ii) in an action by a Council during any time in which that individual is not in compliance with the regulations prescribed under paragraph (5) may not be treated as cause for the invalidation of that action.

(7)(A) After the effective date of regulations promulgated under subparagraph (F) of this paragraph, an affected individual required to disclose a financial interest under paragraph (2) shall not vote on a Council decision which would have a significant and predictable effect on such financial interest. A Council decision shall be considered to have a significant and predictable effect on a financial interest if there is a close causal link between the Council decision and an expected and substantially disproportionate benefit to the financial interest of the affected individual relative to the financial interests of other participants in the same gear type or sector of the fishery. An affected individual who may not vote may participate in Council deliberations relating to the decision after notifying the Council of the voting recusal and identifying the financial interest that would be affected.

(B) At the request of an affected individual, or upon the initiative of the appropriate designated official, the designated official shall make a determination for the record whether a Council decision would have a significant and predictable effect on a financial interest.

(C) Any Council member may submit a written request to the Secretary to review any determination by the designated official under subparagraph (B) within 10 days of such determination. Such review shall be completed within 30 days of receipt of the request.

(D) Any affected individual who does not vote in a Council decision in accordance with this subsection may state for the record how he or she would have voted on such decision if he or she had voted.

(E) If the Council makes a decision before the Secretary has reviewed a determination under subparagraph (C), the eventual ruling may not be treated as cause for the invalidation or reconsideration by the Secretary of such decision.

(F) The Secretary, in consultation with the Councils and by not later than one year from October 11, 1996, shall promulgate regulations which prohibit an affected individual from voting in accordance with subparagraph (A), and which allow for the making of determinations under subparagraphs (B) and (C).

(8) Section 208 of title 18 does not apply to an affected individual referred to in paragraph (1)(A)(ii) during any time in which that individual is in compliance with the regulations prescribed under paragraph (5).

(4) assess and specify—

(A) the capacity and the extent to which fishing vessels of the United States, on an annual basis, will harvest the optimum yield specified under paragraph (3),

(B) the portion of such optimum yield which, on an annual basis, will not be harvested by fishing vessels of the United States and can be made available for foreign fishing, and

(C) the capacity and extent to which United States fish processors, on an annual basis, will process that portion of such optimum yield that will be harvested by fishing vessels of the United States;

(5) specify the pertinent data which shall be submitted to the Secretary with respect to commercial, recreational, and charter fishing in the fishery, including, but not limited to, information regarding the type and quantity of fishing gear used, catch by species in numbers of fish or weight thereof, areas in which fishing was engaged in, time of fishing, number of hauls, and the estimated processing capacity of, and the actual processing capacity utilized by, United States fish processors,¹

(6) consider and provide for temporary adjustments, after consultation with the Coast Guard and persons utilizing the fishery, regarding access to the fishery for vessels otherwise prevented from harvesting because of weather or other ocean conditions affecting the safe conduct of the fishery; except that the adjustment shall not adversely affect conservation efforts in other fisheries or discriminate among participants in the affected fishery;

(7) describe and identify essential fish habitat for the fishery based on the guidelines established by the Secretary under section 1855(b)(1)(A) of this title, minimize to the extent practicable adverse effects on such habitat caused by fishing, and identify other actions to encourage the conservation and enhancement of such habitat;

(8) in the case of a fishery management plan that, after January 1, 1991, is submitted to the Secretary for review under section 1854(a) of this title (including any plan for which an amendment is submitted to the Secretary for

(A) participants in the fisheries and fishing communities affected by the plan or amendment; and

(B) participants in the fisheries conducted in adjacent areas under the authority of another Council, after consultation with such Council and representatives of those participants;

(10) specify objective and measurable criteria for identifying when the fishery to which the plan applies is overfished (with an analysis of how the criteria were determined and the relationship of the criteria to the reproductive potential of stocks of fish in that fishery) and, in the case of a fishery which the Council or the Secretary has determined is approaching an overfished condition or is overfished, contain conservation and management measures to prevent overfishing or end overfishing and rebuild the fishery;

(11) establish a standardized reporting methodology to assess the amount and type of bycatch occurring in the fishery, and include conservation and management measures that, to the extent practicable and in the following priority—

(A) minimize bycatch; and

(B) minimize the mortality of bycatch which cannot be avoided;

(12) assess the type and amount of fish caught and released alive during recreational fishing under catch and release fishery management programs and the mortality of such fish, and include conservation and management measures that, to the extent practicable, minimize mortality and ensure the extended survival of such fish;

(13) include a description of the commercial, recreational, and charter fishing sectors which participate in the fishery and, to the extent practicable, quantify trends in landings of the managed fishery resource by the commercial, recreational, and charter fishing sectors; and

(14) to the extent that rebuilding plans or other conservation and management measures which reduce the overall harvest in a fishery are necessary, allocate any harvest restrictions or recovery benefits fairly and equitably among the commercial, recreational, and charter fishing sectors in the fishery.

(b) Discretionary provisions

Any fishery management plan which is prepared by any Council, or by the Secretary, with respect to any fishery, may—

(1) require a permit to be obtained from, and fees to be paid to, the Secretary, with respect to—

economic zone or for anadromous species or Continental Shelf fishery resources beyond such zone;

(B) the operator of any such vessel; or

(C) any United States fish processor who first receives fish that are subject to the plan;

(2) designate zones where, and periods when, fishing shall be limited, or shall not be permitted, or shall be permitted only by specified types of fishing vessels or with specified types and quantities of fishing gear;

(3) establish specified limitations which are necessary and appropriate for the conservation and management of the fishery on the—

(A) catch of fish (based on area, species, size, number, weight, sex, bycatch, total biomass, or other factors);

(B) sale of fish caught during commercial, recreational, or charter fishing, consistent with any applicable Federal and State safety and quality requirements; and

(C) transshipment or transportation of fish or fish products under permits issued pursuant to section 1824 of this title;

(5) incorporate (consistent with the national standards, the other provisions of this chapter, and any other applicable law) the relevant fishery conservation and management measures of the coastal States nearest to the fishery;

(6) establish a limited access system for the fishery in order to achieve optimum yield if, in developing such system, the Council and the Secretary take into account—

(A) present participation in the fishery,

(B) historical fishing practices in, and dependence on, the fishery,

(C) the economics of the fishery,

(D) the capability of fishing vessels used in the fishery to engage in other fisheries,

(E) the cultural and social framework relevant to the fishery and any affected fishing communities, and

(F) any other relevant considerations;

(7) require fish processors who first receive fish that are subject to the plan to submit data (other than economic data) which are necessary for the conservation and management of the fishery;

(8) require that one or more observers be carried on board a vessel of the United States engaged in fishing for species that are subject to the plan, for the purpose of collecting data necessary for the conservation and management of the fishery; except that such a vessel shall not be required to carry an observer on board if the facilities of the vessel for the quartering of an observer, or for carrying out observer functions, are so inadequate or unsafe that the health or safety of the observer or the safe operation of the vessel would be jeopardized;

(9) assess and specify the effect which the conservation and management measures of the

plan will have on the stocks of naturally spawning anadromous fish in the region;

(10) include, consistent with the other provisions of this chapter, conservation and management measures that provide harvest incentives for participants within each gear group to employ fishing practices that result in lower levels of bycatch or in lower levels of the mortality of bycatch;

(11) reserve a portion of the allowable biological catch of the fishery for use in scientific research; and

(12) prescribe such other measures, requirements, or conditions and restrictions as are determined to be necessary and appropriate for the conservation and management of the fishery.

(B) Any fishery management plan, plan amendment, or regulation approved by the Secretary on or after January 4, 1995, which creates any new individual fishing quota program shall be repealed and immediately returned by the Secretary to the appropriate Council and shall not be resubmitted, reapproved, or implemented during the moratorium set forth in subparagraph (A).

(2)(A) No provision of law shall be construed to limit the authority of a Council to submit and the Secretary to approve the termination or limitation, without compensation to holders of any limited access system permits, of a fishery management plan, plan amendment, or regulation that provides for a limited access system, including an individual fishing quota program.

(B) This subsection shall not be construed to prohibit a Council from submitting, or the Secretary from approving and implementing, amendments to the North Pacific halibut and sablefish, South Atlantic wreckfish, or Mid-Atlantic surf clam and ocean (including mahogany) quahog individual fishing quota programs.

(3) An individual fishing quota or other limited access system authorization—

(ii) first-time purchase of individual fishing quotas in that fishery by entry level fishermen.

(B) A Council making a submission under subparagraph (A) shall recommend criteria, consistent with the provisions of this chapter, that a fisherman must meet to qualify for guarantees under clauses (i) and (ii) of subparagraph (A) and the portion of funds to be allocated for guarantees under each clause.

(5) In submitting and approving any new individual fishing quota program on or after October 1, 2000, the Councils and the Secretary shall consider the report of the National Academy of Sciences required under section 108(f) of the Sustainable Fisheries Act, and any recommendations contained in such report, and shall ensure that any such program—

(A) establishes procedures and requirements for the review and revision of the terms of any such program (including any revisions that may be necessary once a national policy with respect to individual fishing quota programs is implemented), and, if appropriate, for the renewal, reallocation, or reissuance of individual fishing quotas;

(B) provides for the effective enforcement and management of any such program, including adequate observer coverage, and for fees under section 1854(d)(2) of this title to recover actual costs directly related to such enforcement and management; and

(C) provides for a fair and equitable initial allocation of individual fishing quotas, prevents any person from acquiring an excessive share of the individual fishing quotas issued, and considers the allocation of a portion of the annual harvest in the fishery for entry-level fishermen, small vessel owners, and crew members who do not hold or qualify for individual fishing quotas.

The Secretary shall, to the extent practicable, achieve a balanced representation of viewpoints among the individuals on each review group. The Secretary of Commerce shall publish in the Federal Register a notice and opportunity for public comment on the draft of the report, or any revision thereof. A detailed summary of comments received and views presented at the hearings, including any dissenting views, shall be included by the National Academy of Sciences in the final report.”

EXISTING QUOTA PLANS

Section 108(i) of Pub. L. 104-297 provided that: “Nothing in this Act [see Short Title of 1996 Amendment note

under section 1801 of this title] or the amendments made by this Act shall be construed to require a re-allocation of individual fishing quotas under any individual fishing quota program approved by the Secretary before January 4, 1995.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 773c, 1821, 1852, 1854, 1855, 1862, 1881, 1883 of this title; title 46 App. section 1274.

§ 1854. Action by Secretary

(a) Review of plans

(1) Upon transmittal by the Council to the Secretary of a fishery management plan or plan amendment, the Secretary shall—

(A) immediately commence a review of the plan or amendment to determine whether it is consistent with the national standards, the other provisions of this chapter, and any other applicable law; and

(B) immediately publish in the Federal Register a notice stating that the plan or amendment is available and that written information, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 60-day period beginning on the date the notice is published.

(2) In undertaking the review required under paragraph (1), the Secretary shall—

(A) take into account the information, views, and comments received from interested persons;

(B) consult with the Secretary of State with respect to foreign fishing; and

(C) consult with the Secretary of the department in which the Coast Guard is operating with respect to enforcement at sea and to fishery access adjustments referred to in section 1853(a)(6) of this title.

(3) The Secretary shall approve, disapprove, or partially approve a plan or amendment within 30 days of the end of the comment period under paragraph (1) by written notice to the Council. A notice of disapproval or partial approval shall specify—

(A) the applicable law with which the plan or amendment is inconsistent;

(B) the nature of such inconsistencies; and

(C) recommendations concerning the actions that could be taken by the Council to conform such plan or amendment to the requirements of applicable law.

If the Secretary does not notify a Council within 30 days of the end of the comment period of the approval, disapproval, or partial approval of a plan or amendment, then such plan or amendment shall take effect as if approved.

(4) If the Secretary disapproves or partially approves a plan or amendment, the Council may submit a revised plan or amendment to the Secretary for review under this subsection.

(5) For purposes of this subsection and subsection (b) of this section, the term “immediately” means on or before the 5th day after the day on which a Council transmits to the Secretary a fishery management plan, plan amendment, or proposed regulation that the Council characterizes as final.

(b) Review of regulations

(1) Upon transmittal by the Council to the Secretary of proposed regulations prepared

under section 1853(c) of this title, the Secretary shall immediately initiate an evaluation of the proposed regulations to determine whether they are consistent with the fishery management plan, plan amendment, this chapter and other applicable law. Within 15 days of initiating such evaluation the Secretary shall make a determination and—

(A) if that determination is affirmative, the Secretary shall publish such regulations in the Federal Register, with such technical changes as may be necessary for clarity and an explanation of those changes, for a public comment period of 15 to 60 days; or

(B) if that determination is negative, the Secretary shall notify the Council in writing of the inconsistencies and provide recommendations on revisions that would make the proposed regulations consistent with the fishery management plan, plan amendment, this chapter, and other applicable law.

(2) Upon receiving a notification under paragraph (1)(B), the Council may revise the proposed regulations and submit them to the Secretary for reevaluation under paragraph (1).

(3) The Secretary shall promulgate final regulations within 30 days after the end of the comment period under paragraph (1)(A). The Secretary shall consult with the Council before making any revisions to the proposed regulations, and must publish in the Federal Register an explanation of any differences between the proposed and final regulations.

(c) Preparation and review of Secretarial plans

(1) The Secretary may prepare a fishery management plan, with respect to any fishery, or any amendment to any such plan, in accordance with the national standards, the other provisions of this chapter, and any other applicable law, if—

(A) the appropriate Council fails to develop and submit to the Secretary, after a reasonable period of time, a fishery management plan for such fishery, or any necessary amendment to such a plan, if such fishery requires conservation and management;

(B) the Secretary disapproves or partially disapproves any such plan or amendment, or disapproves a revised plan or amendment, and the Council involved fails to submit a revised or further revised plan or amendment; or

(C) the Secretary is given authority to prepare such plan or amendment under this section.

(2) In preparing any plan or amendment under this subsection, the Secretary shall—

(A) conduct public hearings, at appropriate times and locations in the geographical areas concerned, so as to allow interested persons an opportunity to be heard in the preparation and amendment of the plan and any regulations implementing the plan; and

(B) consult with the Secretary of State with respect to foreign fishing and with the Secretary of the department in which the Coast Guard is operating with respect to enforcement at sea.

(3) Notwithstanding paragraph (1) for a fishery under the authority of a Council, the Secretary

may not include in any fishery management plan, or any amendment to any such plan, prepared by him, a provision establishing a limited access system, including any individual fishing quota program, unless such system is first approved by a majority of the voting members, present and voting, of each appropriate Council.

(4) Whenever the Secretary prepares a fishery management plan or plan amendment under this section, the Secretary shall immediately—

(A) for a plan or amendment for a fishery under the authority of a Council, submit such plan or amendment to the appropriate Council for consideration and comment; and

(B) publish in the Federal Register a notice stating that the plan or amendment is available and that written information, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 60-day period beginning on the date the notice is published.

(5) Whenever a plan or amendment is submitted under paragraph (4)(A), the appropriate Council must submit its comments and recommendations, if any, regarding the plan or amendment to the Secretary before the close of the 60-day period referred to in paragraph (4)(B). After the close of such 60-day period, the Secretary, after taking into account any such comments and recommendations, as well as any views, information, or comments submitted under paragraph (4)(B), may adopt such plan or amendment.

(6) The Secretary may propose regulations in the Federal Register to implement any plan or amendment prepared by the Secretary. In the case of a plan or amendment to which paragraph (4)(A) applies, such regulations shall be submitted to the Council with such plan or amendment. The comment period on proposed regulations shall be 60 days, except that the Secretary may shorten the comment period on minor revisions to existing regulations.

(7) The Secretary shall promulgate final regulations within 30 days after the end of the comment period under paragraph (6). The Secretary must publish in the Federal Register an explanation of any substantive differences between the proposed and final rules. All final regulations must be consistent with the fishery management plan, with the national standards and other provisions of this chapter, and with any other applicable law.

(d) Establishment of fees

(1) The Secretary shall by regulation establish the level of any fees which are authorized to be charged pursuant to section 1853(b)(1) of this title. The Secretary may enter into a cooperative agreement with the States concerned under which the States administer the permit system and the agreement may provide that all or part of the fees collected under the system shall accrue to the States. The level of fees charged under this subsection shall not exceed the administrative costs incurred in issuing the permits.

(2)(A) Notwithstanding paragraph (1), the Secretary is authorized and shall collect a fee to recover the actual costs directly related to the management and enforcement of any—

(i) individual fishing quota program; and
(ii) community development quota program that allocates a percentage of the total allowable catch of a fishery to such program.

(B) Such fee shall not exceed 3 percent of the ex-vessel value of fish harvested under any such program, and shall be collected at either the time of the landing, filing of a landing report, or sale of such fish during a fishing season or in the last quarter of the calendar year in which the fish is harvested.

(C)(i) Fees collected under this paragraph shall be in addition to any other fees charged under this chapter and shall be deposited in the Limited Access System Administration Fund established under section 1855(h)(5)(B) of this title, except that the portion of any such fees reserved under section 1853(d)(4)(A) of this title shall be deposited in the Treasury and available, subject to annual appropriations, to cover the costs of new direct loan obligations and new loan guarantee commitments as required by section 661c(b)(1)¹ of title 2.

(ii) Upon application by a State, the Secretary shall transfer to such State up to 33 percent of any fee collected pursuant to subparagraph (A) under a community development quota program and deposited in the Limited Access System Administration Fund in order to reimburse such State for actual costs directly incurred in the management and enforcement of such program.

(e) Rebuilding overfished fisheries

(1) The Secretary shall report annually to the Congress and the Councils on the status of fisheries within each Council's geographical area of authority and identify those fisheries that are overfished or are approaching a condition of being overfished. For those fisheries managed under a fishery management plan or international agreement, the status shall be determined using the criteria for overfishing specified in such plan or agreement. A fishery shall be classified as approaching a condition of being overfished if, based on trends in fishing effort, fishery resource size, and other appropriate factors, the Secretary estimates that the fishery will become overfished within two years.

(2) If the Secretary determines at any time that a fishery is overfished, the Secretary shall immediately notify the appropriate Council and request that action be taken to end overfishing in the fishery and to implement conservation and management measures to rebuild affected stocks of fish. The Secretary shall publish each notice under this paragraph in the Federal Register.

(3) Within one year of an identification under paragraph (1) or notification under paragraphs (2) or (7), the appropriate Council (or the Secretary, for fisheries under section 1852(a)(3) of this title) shall prepare a fishery management plan, plan amendment, or proposed regulations for the fishery to which the identification or notice applies—

(A) to end overfishing in the fishery and to rebuild affected stocks of fish; or

(B) to prevent overfishing from occurring in the fishery whenever such fishery is identified as approaching an overfished condition.

¹ See References in Text note below.

(4) For a fishery that is overfished, any fishery management plan, amendment, or proposed regulations prepared pursuant to paragraph (3) or paragraph (5) for such fishery shall—

(A) specify a time period for ending overfishing and rebuilding the fishery that shall—

(i) be as short as possible, taking into account the status and biology of any overfished stocks of fish, the needs of fishing communities, recommendations by international organizations in which the United States participates, and the interaction of the overfished stock of fish within the marine ecosystem; and

(ii) not exceed 10 years, except in cases where the biology of the stock of fish, other environmental conditions, or management measures under an international agreement in which the United States participates dictate otherwise;

(B) allocate both overfishing restrictions and recovery benefits fairly and equitably among sectors of the fishery; and

(C) for fisheries managed under an international agreement, reflect traditional participation in the fishery, relative to other nations, by fishermen of the United States.

(5) If, within the one-year period beginning on the date of identification or notification that a fishery is overfished, the Council does not submit to the Secretary a fishery management plan, plan amendment, or proposed regulations required by paragraph (3)(A), the Secretary shall prepare a fishery management plan or plan amendment and any accompanying regulations to stop overfishing and rebuild affected stocks of fish within 9 months under subsection (c) of this section.

(6) During the development of a fishery management plan, a plan amendment, or proposed regulations required by this subsection, the Council may request the Secretary to implement interim measures to reduce overfishing under section 1855(c) of this title until such measures can be replaced by such plan, amendment, or regulations. Such measures, if otherwise in compliance with the provisions of this chapter, may be implemented even though they are not sufficient by themselves to stop overfishing of a fishery.

(7) The Secretary shall review any fishery management plan, plan amendment, or regulations required by this subsection at routine intervals that may not exceed two years. If the Secretary finds as a result of the review that such plan, amendment, or regulations have not resulted in adequate progress toward ending overfishing and rebuilding affected fish stocks, the Secretary shall—

(A) in the case of a fishery to which section 1852(a)(3) of this title applies, immediately make revisions necessary to achieve adequate progress; or

(B) for all other fisheries, immediately notify the appropriate Council. Such notification shall recommend further conservation and management measures which the Council should consider under paragraph (3) to achieve adequate progress.

(f) Fisheries under authority of more than one Council

(1) Except as provided in paragraph (3),¹ if any fishery extends beyond the geographical area of authority of any one Council, the Secretary may—

(A) designate which Council shall prepare the fishery management plan for such fishery and any amendment to such plan; or

(B) may require that the plan and amendment be prepared jointly by the Councils concerned.

No jointly prepared plan or amendment may be submitted to the Secretary unless it is approved by a majority of the voting members, present and voting, of each Council concerned.

(2) The Secretary shall establish the boundaries between the geographical areas of authority of adjacent Councils.

(g) Atlantic highly migratory species

(1) Preparation and implementation of plan or plan amendment

The Secretary shall prepare a fishery management plan or plan amendment under subsection (c) of this section with respect to any highly migratory species fishery to which section 1852(a)(3) of this title applies. In preparing and implementing any such plan or amendment, the Secretary shall—

(A) consult with and consider the comments and views of affected Councils, commissioners and advisory groups appointed under Acts implementing relevant international fishery agreements pertaining to highly migratory species, and the advisory panel established under section 1852(g) of this title;

(B) establish an advisory panel under section 1852(g) of this title for each fishery management plan to be prepared under this paragraph;

(C) evaluate the likely effects, if any, of conservation and management measures on participants in the affected fisheries and minimize, to the extent practicable, any disadvantage to United States fishermen in relation to foreign competitors;

(D) with respect to a highly migratory species for which the United States is authorized to harvest an allocation, quota, or at a fishing mortality level under a relevant international fishery agreement, provide fishing vessels of the United States with a reasonable opportunity to harvest such allocation, quota, or at such fishing mortality level;

(E) review, on a continuing basis (and promptly whenever a recommendation pertaining to fishing for highly migratory species has been made under a relevant international fishery agreement), and revise as appropriate, the conservation and management measures included in the plan;

(F) diligently pursue, through international entities (such as the International Commission for the Conservation of Atlantic Tunas), comparable international fishery management measures with respect to fishing for highly migratory species; and

(G) ensure that conservation and management measures under this subsection—

- (i) promote international conservation of the affected fishery;
- (ii) take into consideration traditional fishing patterns of fishing vessels of the United States and the operating requirements of the fisheries;
- (iii) are fair and equitable in allocating fishing privileges among United States fishermen and do not have economic allocation as the sole purpose; and
- (iv) promote, to the extent practicable, implementation of scientific research programs that include the tagging and release of Atlantic highly migratory species.

(2) Certain fish excluded from “bycatch” definition

Notwithstanding section 1802(2) of this title, fish harvested in a commercial fishery managed by the Secretary under this subsection or the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971d) that are not regulatory discards and that are tagged and released alive under a scientific tagging and release program established by the Secretary shall not be considered bycatch for purposes of this chapter.

(h) Repeal or revocation of a fishery management plan

The Secretary may repeal or revoke a fishery management plan for a fishery under the authority of a Council only if the Council approves the repeal or revocation by a three-quarters majority of the voting members of the Council.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1821, 1852, 1853, 1855, 1861a, 1862 of this title.

§ 1855. Other requirements and authority

(a) Gear evaluation and notification of entry

(1) Not later than 18 months after October 11, 1996, the Secretary shall publish in the Federal Register, after notice and an opportunity for public comment, a list of all fisheries—

(A) under the authority of each Council and all fishing gear used in such fisheries, based on information submitted by the Councils under section 1853(a) of this title; and

(B) to which section 1852(a)(3) of this title applies and all fishing gear used in such fisheries.

(2) The Secretary shall include with such list guidelines for determining when fishing gear or a fishery is sufficiently different from those listed as to require notification under paragraph (3).

(3) Effective 180 days after the publication of such list, no person or vessel may employ fishing gear or engage in a fishery not included on such list without giving 90 days advance written notice to the appropriate Council, or the Secretary with respect to a fishery to which section 1852(a)(3) of this title applies. A signed return receipt shall serve as adequate evidence of such notice and as the date upon which the 90-day period begins.

(4) A Council may submit to the Secretary any proposed changes to such list or such guidelines the Council deems appropriate. The Secretary shall publish a revised list, after notice and an opportunity for public comment, upon receiving any such proposed changes from a Council.

(5) A Council may request the Secretary to promulgate emergency regulations under subsection (c) of this section to prohibit any persons or vessels from using an unlisted fishing gear or engaging in an unlisted fishery if the appropriate Council, or the Secretary for fisheries to which section 1852(a)(3) of this title applies, determines that such unlisted gear or unlisted fishery would compromise the effectiveness of conservation and management efforts under this chapter.

(6) Nothing in this subsection shall be construed to permit a person or vessel to engage in fishing or employ fishing gear when such fishing or gear is prohibited or restricted by regulation under a fishery management plan or plan amendment, or under other applicable law.

(b) Fish habitat

(1)(A) The Secretary shall, within 6 months of October 11, 1996, establish by regulation guidelines to assist the Councils in the description and identification of essential fish habitat in fishery management plans (including adverse impacts on such habitat) and in the consideration of actions to ensure the conservation and enhancement of such habitat. The Secretary shall set forth a schedule for the amendment of fishery management plans to include the identification of essential fish habitat and for the review and updating of such identifications based on new scientific evidence or other relevant information.

(B) The Secretary, in consultation with participants in the fishery, shall provide each Council with recommendations and information regarding each fishery under that Council's authority to assist it in the identification of essential fish habitat, the adverse impacts on that habitat, and the actions that should be considered to ensure the conservation and enhancement of that habitat.

(C) The Secretary shall review programs administered by the Department of Commerce and ensure that any relevant programs further the conservation and enhancement of essential fish habitat.

(D) The Secretary shall coordinate with and provide information to other Federal agencies to further the conservation and enhancement of essential fish habitat.

(2) Each Federal agency shall consult with the Secretary with respect to any action authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken, by such agency that may adversely affect any essential fish habitat identified under this chapter.

(3) Each Council—

(A) may comment on and make recommendations to the Secretary and any Federal or State agency concerning any activity authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken, by any Federal or State agency that, in the view of the Council, may affect the habitat, including essential fish habitat, of a fishery resource under its authority; and

(B) shall comment on and make recommendations to the Secretary and any Federal or State agency concerning any such activity that, in the view of the Council, is likely to substantially affect the habitat, including essential fish habitat, of an anadromous fishery resource under its authority.

(4)(A) If the Secretary receives information from a Council or Federal or State agency or determines from other sources that an action authorized, funded, or undertaken, or proposed to be authorized, funded, or undertaken, by any State or Federal agency would adversely affect any essential fish habitat identified under this chapter, the Secretary shall recommend to such agency measures that can be taken by such agency to conserve such habitat.

(B) Within 30 days after receiving a recommendation under subparagraph (A), a Federal agency shall provide a detailed response in writing to any Council commenting under paragraph (3) and the Secretary regarding the matter. The response shall include a description of measures proposed by the agency for avoiding, mitigating, or offsetting the impact of the activity on such habitat. In the case of a response that is inconsistent with the recommendations of the Secretary, the Federal agency shall explain its reasons for not following the recommendations.

(c) Emergency actions and interim measures

(1) If the Secretary finds that an emergency exists or that interim measures are needed to reduce overfishing for any fishery, he may promulgate emergency regulations or interim measures necessary to address the emergency or overfishing, without regard to whether a fishery management plan exists for such fishery.

(2) If a Council finds that an emergency exists or that interim measures are needed to reduce overfishing for any fishery within its jurisdiction, whether or not a fishery management plan exists for such fishery—

(A) the Secretary shall promulgate emergency regulations or interim measures under paragraph (1) to address the emergency or overfishing if the Council, by unanimous vote of the members who are voting members, requests the taking of such action; and

(B) the Secretary may promulgate emergency regulations or interim measures under paragraph (1) to address the emergency or overfishing if the Council, by less than a unanimous vote, requests the taking of such action.

(3) Any emergency regulation or interim measure which changes any existing fishery

management plan or amendment shall be treated as an amendment to such plan for the period in which such regulation is in effect. Any emergency regulation or interim measure promulgated under this subsection—

(A) shall be published in the Federal Register together with the reasons therefor;

(B) shall, except as provided in subparagraph (C), remain in effect for not more than 180 days after the date of publication, and may be extended by publication in the Federal Register for one additional period of not more than 180 days, provided the public has had an opportunity to comment on the emergency regulation or interim measure, and, in the case of a Council recommendation for emergency regulations or interim measures, the Council is actively preparing a fishery management plan, plan amendment, or proposed regulations to address the emergency or overfishing on a permanent basis;

(C) that responds to a public health emergency or an oil spill may remain in effect until the circumstances that created the emergency no longer exist, *Provided*, That the public has an opportunity to comment after the regulation is published, and, in the case of a public health emergency, the Secretary of Health and Human Services concurs with the Secretary's action; and

(D) may be terminated by the Secretary at an earlier date by publication in the Federal Register of a notice of termination, except for emergency regulations promulgated under paragraph (2) in which case such early termination may be made only upon the agreement of the Secretary and the Council concerned.

(d) Responsibility of Secretary

The Secretary shall have general responsibility to carry out any fishery management plan or amendment approved or prepared by him, in accordance with the provisions of this chapter. The Secretary may promulgate such regulations, in accordance with section 553 of title 5, as may be necessary to discharge such responsibility or to carry out any other provision of this chapter.

(e) Effect of certain laws on certain time requirements

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.),¹ the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and Executive Order Numbered 12866, dated September 30, 1993, shall be complied with within the time limitations specified in subsections (a), (b), and (c) of section 1854 of this title as they apply to the functions of the Secretary under such provisions.

(f) Judicial review

(1) Regulations promulgated by the Secretary under this chapter and actions described in paragraph (2) shall be subject to judicial review to the extent authorized by, and in accordance with, chapter 7 of title 5, if a petition for such review is filed within 30 days after the date on which the regulations are promulgated or the action is published in the Federal Register, as applicable; except that—

¹ See References in Text note below.

(A) section 705 of such title is not applicable, and

(B) the appropriate court shall only set aside any such regulation or action on a ground specified in section 706(2)(A), (B), (C), or (D) of such title.

(2) The actions referred to in paragraph (1) are actions that are taken by the Secretary under regulations which implement a fishery management plan, including but not limited to actions that establish the date of closure of a fishery to commercial or recreational fishing.

(3)(A) Notwithstanding any other provision of law, the Secretary shall file a response to any petition filed in accordance with paragraph (1), not later than 45 days after the date the Secretary is served with that petition, except that the appropriate court may extend the period for filing such a response upon a showing by the Secretary of good cause for that extension.

(B) A response of the Secretary under this paragraph shall include a copy of the administrative record for the regulations that are the subject of the petition.

(4) Upon a motion by the person who files a petition under this subsection, the appropriate court shall assign the matter for hearing at the earliest possible date and shall expedite the matter in every possible way.

(g) Negotiated conservation and management measures

(1)(A) In accordance with regulations promulgated by the Secretary pursuant to this paragraph, a Council may establish a fishery negotiation panel to assist in the development of specific conservation and management measures for a fishery under its authority. The Secretary may establish a fishery negotiation panel to assist in the development of specific conservation and management measures required for a fishery under section 1854(e)(5) of this title, for a fishery for which the Secretary has authority under section 1854(g) of this title, or for any other fishery with the approval of the appropriate Council.

(B) No later than 180 days after October 11, 1996, the Secretary shall promulgate regulations establishing procedures, developed in cooperation with the Administrative Conference of the United States, for the establishment and operation of fishery negotiation panels. Such procedures shall be comparable to the procedures for negotiated rulemaking established by subchapter III of chapter 5 of title 5.

(2) If a negotiation panel submits a report, such report shall specify all the areas where consensus was reached by the panel, including, if appropriate, proposed conservation and management measures, as well as any other information submitted by members of the negotiation panel. Upon receipt, the Secretary shall publish such report in the Federal Register for public comment.

(3) Nothing in this subsection shall be construed to require either a Council or the Secretary, whichever is appropriate, to use all or any portion of a report from a negotiation panel established under this subsection in the development of specific conservation and management measures for the fishery for which the panel was established.

(h) Central registry system for limited access system permits

(1) Within 6 months after October 11, 1996, the Secretary shall establish an exclusive central registry system (which may be administered on a regional basis) for limited access system permits established under section 1853(b)(6) of this title or other Federal law, including individual fishing quotas, which shall provide for the registration of title to, and interests in, such permits, as well as for procedures for changes in the registration of title to such permits upon the occurrence of involuntary transfers, judicial or nonjudicial foreclosure of interests, enforcement of judgments thereon, and related matters deemed appropriate by the Secretary. Such registry system shall—

(A) provide a mechanism for filing notice of a nonjudicial foreclosure or enforcement of a judgment by which the holder of a senior security interest acquires or conveys ownership of a permit, and in the event of a nonjudicial foreclosure, by which the interests of the holders of junior security interests are released when the permit is transferred;

(B) provide for public access to the information filed under such system, notwithstanding section 1881a(b) of this title; and

(C) provide such notice and other requirements of applicable law that the Secretary deems necessary for an effective registry system.

(2) The Secretary shall promulgate such regulations as may be necessary to carry out this subsection, after consulting with the Councils and providing an opportunity for public comment. The Secretary is authorized to contract with non-Federal entities to administer the central registry system.

(3) To be effective and perfected against any person except the transferor, its heirs and devisees, and persons having actual notice thereof, all security interests, and all sales and other transfers of permits described in paragraph (1), shall be registered in compliance with the regulations promulgated under paragraph (2). Such registration shall constitute the exclusive means of perfection of title to, and security interests in, such permits, except for Federal tax liens thereon, which shall be perfected exclusively in accordance with the Internal Revenue Code of 1986 (26 U.S.C. 1 et seq.). The Secretary shall notify both the buyer and seller of a permit if a lien has been filed by the Secretary of the Treasury against the permit before collecting any transfer fee under paragraph (5) of this subsection.

(4) The priority of security interests shall be determined in order of filing, the first filed having the highest priority. A validly-filed security interest shall remain valid and perfected notwithstanding a change in residence or place of business of the owner of record. For the purposes of this subsection, "security interest" shall include security interests, assignments, liens and other encumbrances of whatever kind.

(5)(A) Notwithstanding section 1854(d)(1) of this title, the Secretary shall collect a reasonable fee of not more than one-half of one percent of the value of a limited access system permit

upon registration of the title to such permit with the central registry system and upon the transfer of such registered title. Any such fee collected shall be deposited in the Limited Access System Administration Fund established under subparagraph (B).

(B) There is established in the Treasury a Limited Access System Administration Fund. The Fund shall be available, without appropriation or fiscal year limitation, only to the Secretary for the purposes of—

(i) administering the central registry system; and

(ii) administering and implementing this chapter in the fishery in which the fees were collected. Sums in the Fund that are not currently needed for these purposes shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

(i) Alaska and western Pacific community development programs

(1)(A) The North Pacific Council and the Secretary shall establish a western Alaska community development quota program under which a percentage of the total allowable catch of any Bering Sea fishery is allocated to the program.

(B) To be eligible to participate in the western Alaska community development quota program under subparagraph (A) a community shall—

(i) be located within 50 nautical miles from the baseline from which the breadth of the territorial sea is measured along the Bering Sea coast from the Bering Strait to the western most of the Aleutian Islands, or on an island within the Bering Sea;

(ii) not be located on the Gulf of Alaska coast of the north Pacific Ocean;

(iii) meet criteria developed by the Governor of Alaska, approved by the Secretary, and published in the Federal Register;

(iv) be certified by the Secretary of the Interior pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) to be a Native village;

(v) consist of residents who conduct more than one-half of their current commercial or subsistence fishing effort in the waters of the Bering Sea or waters surrounding the Aleutian Islands; and

(vi) not have previously developed harvesting or processing capability sufficient to support substantial participation in the ground-fish fisheries in the Bering Sea, unless the community can show that the benefits from an approved Community Development Plan would be the only way for the community to realize a return from previous investments.

(C)(i) Prior to October 1, 2001, the North Pacific Council may not submit to the Secretary any fishery management plan, plan amendment, or regulation that allocates to the western Alaska community development quota program a percentage of the total allowable catch of any Bering Sea fishery for which, prior to October 1, 1995, the Council had not approved a percentage of the total allowable catch for allocation to such community development quota program. The expiration of any plan, amendment, or regulation that meets the requirements of clause (ii) prior to October 1, 2001, shall not be construed to

prohibit the Council from submitting a revision or extension of such plan, amendment, or regulation to the Secretary if such revision or extension complies with the other requirements of this paragraph.

(ii) With respect to a fishery management plan, plan amendment, or regulation for a Bering Sea fishery that—

(I) allocates to the western Alaska community development quota program a percentage of the total allowable catch of such fishery; and

(II) was approved by the North Pacific Council prior to October 1, 1995;

the Secretary shall, except as provided in clause (iii) and after approval of such plan, amendment, or regulation under section 1854 of this title, allocate to the program the percentage of the total allowable catch described in such plan, amendment, or regulation. Prior to October 1, 2001, the percentage submitted by the Council and approved by the Secretary for any such plan, amendment, or regulation shall be no greater than the percentage approved by the Council for such fishery prior to October 1, 1995.

(iii) The Secretary shall phase in the percentage for community development quotas approved in 1995 by the North Pacific Council for the Bering Sea crab fisheries as follows:

(I) 3.5 percent of the total allowable catch of each such fishery for 1998 shall be allocated to the western Alaska community development quota program;

(II) 5 percent of the total allowable catch of each such fishery for 1999 shall be allocated to the western Alaska community development quota program; and

(III) 7.5 percent of the total allowable catch of each such fishery for 2000 and thereafter shall be allocated to the western Alaska community development quota program, unless the North Pacific Council submits and the Secretary approves a percentage that is no greater than 7.5 percent of the total allowable catch of each such fishery for 2001 or the North Pacific Council submits and the Secretary approves any other percentage on or after October 1, 2001.

(D) This paragraph shall not be construed to require the North Pacific Council to resubmit, or the Secretary to reapprove, any fishery management plan or plan amendment approved by the North Pacific Council prior to October 1, 1995, that includes a community development quota program, or any regulations to implement such plan or amendment.

(2)(A) The Western Pacific Council and the Secretary may establish a western Pacific community development program for any fishery under the authority of such Council in order to provide access to such fishery for western Pacific communities that participate in the program.

(B) To be eligible to participate in the western Pacific community development program, a community shall—

(i) be located within the Western Pacific Regional Fishery Management Area;

(ii) meet criteria developed by the Western Pacific Council, approved by the Secretary and published in the Federal Register;

(iii) consist of community residents who are descended from the aboriginal people indigenous to the area who conducted commercial or subsistence fishing using traditional fishing practices in the waters of the Western² Pacific region;

(iv) not have previously developed harvesting or processing capability sufficient to support substantial participation in fisheries in the Western Pacific Regional Fishery Management Area; and

(v) develop and submit a Community Development Plan to the Western Pacific Council and the Secretary.

(C) In developing the criteria for eligible communities under subparagraph (B)(ii), the Western Pacific Council shall base such criteria on traditional fishing practices in or dependence on the fishery, the cultural and social framework relevant to the fishery, and economic barriers to access to the fishery.

(D) For the purposes of this subsection “Western Pacific Regional Fishery Management Area” means the area under the jurisdiction of the Western Pacific Council, or an island within such area.

(E) Notwithstanding any other provision of this chapter, the Western Pacific Council shall take into account traditional indigenous fishing practices in preparing any fishery management plan.

(3) The Secretary shall deduct from any fees collected from a community development quota program under section 1854(d)(2) of this title the costs incurred by participants in the program for observer and reporting requirements which are in addition to observer and reporting requirements of other participants in the fishery in which the allocation to such program has been made.

(4) After October 11, 1996, the North Pacific Council and Western Pacific Council may not submit to the Secretary a community development quota program that is not in compliance with this subsection.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1802, 1821, 1852, 1853, 1854, 5503 of this title.

§ 1856. State jurisdiction

(a) In general

(1) Except as provided in subsection (b) of this section, nothing in this chapter shall be construed as extending or diminishing the jurisdiction or authority of any State within its boundaries.

(2) For the purposes of this chapter, except as provided in subsection (b) of this section, the jurisdiction and authority of a State shall extend—

(A) to any pocket of waters that is adjacent to the State and totally enclosed by lines delimiting the territorial sea of the United States pursuant to the Geneva Convention on the Territorial Sea and Contiguous Zone or any successor convention to which the United States is a party;

(B) with respect to the body of water commonly known as Nantucket Sound, to the pocket of water west of the seventieth meridian west of Greenwich; and

(C) to the waters of southeastern Alaska (for the purpose of regulating fishing for other than any species of crab) that are—

(i) north of the line representing the international boundary at Dixon Entrance and the westward extension of that line; east of 138 degrees west longitude; and not more than three nautical miles seaward from the coast, from the lines extending from headland to headland across all bays, inlets, straits, passes, sounds, and entrances, and from any island or group of islands, including the islands of the Alexander Archipelago (except Forrester Island); or

(ii) between the islands referred to in clause (i) (except Forrester Island) and the mainland.

(3) A State may regulate a fishing vessel outside the boundaries of the State in the following circumstances:

(A) The fishing vessel is registered under the law of that State, and (i) there is no fishery management plan or other applicable Federal fishing regulations for the fishery in which the vessel is operating; or (ii) the State's laws and regulations are consistent with the fishery management plan and applicable Federal fishing regulations for the fishery in which the vessel is operating.

(B) The fishery management plan for the fishery in which the fishing vessel is operating delegates management of the fishery to a State and the State's laws and regulations are consistent with such fishery management plan. If at any time the Secretary determines that a State law or regulation applicable to a fishing vessel under this circumstance is not consistent with the fishery management plan, the Secretary shall promptly notify the State and the appropriate Council of such determination and provide an opportunity for the State to correct any inconsistencies identified in the notification. If, after notice and opportunity for corrective action, the State does not correct the inconsistencies identified by the Secretary, the authority granted to the State under this subparagraph shall not apply until the Secretary and the appropriate Coun-

cil find that the State has corrected the inconsistencies. For a fishery for which there was a fishery management plan in place on August 1, 1996 that did not delegate management of the fishery to a State as of that date, the authority provided by this subparagraph applies only if the Council approves the delegation of management of the fishery to the State by a three-quarters majority vote of the voting members of the Council.

(C) The fishing vessel is not registered under the law of the State of Alaska and is operating in a fishery in the exclusive economic zone off Alaska for which there was no fishery management plan in place on August 1, 1996, and the Secretary and the North Pacific Council find that there is a legitimate interest of the State of Alaska in the conservation and management of such fishery. The authority provided under this subparagraph shall terminate when a fishery management plan under this chapter is approved and implemented for such fishery.

(b) Exception

(1) If the Secretary finds, after notice and an opportunity for a hearing in accordance with section 554 of title 5, that—

(A) the fishing in a fishery, which is covered by a fishery management plan implemented under this chapter, is engaged in predominantly within the exclusive economic zone and beyond such zone; and

(B) any State has taken any action, or omitted to take any action, the results of which will substantially and adversely affect the carrying out of such fishery management plan;

the Secretary shall promptly notify such State and the appropriate Council of such finding and of his intention to regulate the applicable fishery within the boundaries of such State (other than its internal waters), pursuant to such fishery management plan and the regulations promulgated to implement such plan.

(2) If the Secretary, pursuant to this subsection, assumes responsibility for the regulation of any fishery, the State involved may at any time thereafter apply to the Secretary for reinstatement of its authority over such fishery. If the Secretary finds that the reasons for which he assumed such regulation no longer prevail, he shall promptly terminate such regulation.

(3) If the State involved requests that a hearing be held pursuant to paragraph (1), the Secretary shall conduct such hearing prior to taking any action under paragraph (1).

(c) Exception regarding foreign fish processing in internal waters

(1) A foreign fishing vessel may engage in fish processing within the internal waters of a State if, and only if—

(A) the vessel is qualified for purposes of this paragraph pursuant to paragraph (4)(C) or has received a permit under section 1824(d) of this title;

(B) the owner or operator of the vessel applies to the Governor of the State for, and (subject to paragraph (2)) is granted, permission for the vessel to engage in such processing and the application specifies the species to be processed; and

(C) the owner or operator of the vessel submits reports on the tonnage of fish received from vessels of the United States and the locations from which such fish were harvested, in accordance with such procedures as the Secretary by regulation shall prescribe.

(2) The Governor of a State may not grant permission for a foreign fishing vessel to engage in fish processing under paragraph (1)—

(A) for a fishery which occurs in the waters of more than one State or in the exclusive economic zone, except after—

(i) consulting with the appropriate Council and Marine Fisheries Commission, and

(ii) considering any comments received from the Governor of any other State where the fishery occurs; and

(B) if the Governor determines that fish processors within the State have adequate capacity, and will utilize such capacity, to process all of the United States harvested fish from the fishery concerned that are landed in the State.

(3) Nothing in this subsection may be construed as relieving a foreign fishing vessel from the duty to comply with all applicable Federal and State laws while operating within the internal waters of a State incident to permission obtained under paragraph (1)(B).

(4) For purposes of this subsection—

(A) The term “fish processing” includes, in addition to processing, the performance of any other activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, or transportation.

(B) The phrase “internal waters of a State” means all waters within the boundaries of a State except those seaward of the baseline from which the territorial sea is measured.

(C) A foreign fishing vessel shall be treated as qualified for purposes of paragraph (1) if the foreign nation under which it is flagged will be a party to (i) a governing international fishery agreement or (ii) a treaty described in section 1821(b) of this title during the time the vessel will engage in the fish processing for which permission is sought under paragraph (1)(B).

effect Mar. 1, 1977, prior to the general amendment of section 312 by Pub. L. 104-297, title I, §116(a), Oct. 11, 1996, 110 Stat. 3600. See section 1861a of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 971e, 1821, 1827, 1852, 1853, 1858, 1859, 1860, 1861, 3606, 5103 of this title.

§ 1858. Civil penalties and permit sanctions

(a) Assessment of penalty

Any person who is found by the Secretary, after notice and an opportunity for a hearing in accordance with section 554 of title 5, to have committed an act prohibited by section 1857 of this title shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$100,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary, or his designee, by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, and such other matters as justice may require. In assessing such penalty the Secretary may also consider any information provided by the violator relating to the ability of the violator to pay. *Provided*, That the information is served on the Secretary at least 30 days prior to an administrative hearing.

(b) Review of civil penalty

Any person against whom a civil penalty is assessed under subsection (a) of this section or against whom a permit sanction is imposed under subsection (g) of this section (other than a permit suspension for nonpayment of penalty or fine) may obtain review thereof in the United States district court for the appropriate district by filing a complaint against the Secretary in such court within 30 days from the date of such order. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28. The findings and order of the Secretary shall be set aside by such court if they are not found to be supported by substantial evidence, as provided in section 706(2) of title 5.

(c) Action upon failure to pay assessment

If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary shall refer the matter to the Attorney General of the United States, who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(d) In rem jurisdiction

A fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used in the commission of an act prohibited by section 1857 of this title shall be liable in rem for any civil penalty assessed for such violation

under this section and may be proceeded against in any district court of the United States having jurisdiction thereof. Such penalty shall constitute a maritime lien on such vessel which may be recovered in an action in rem in the district court of the United States having jurisdiction over the vessel.

(e) Compromise or other action by Secretary

The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

(f) Subpenas

For the purposes of conducting any hearing under this section, the Secretary may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt or refusal to obey a subpoena served upon any person pursuant to this subsection, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(g) Permit sanctions

(1) In any case in which (A) a vessel has been used in the commission of an act prohibited under section 1857 of this title, (B) the owner or operator of a vessel or any other person who has been issued or has applied for a permit under this chapter has acted in violation of section 1857 of this title, (C) any amount in settlement of a civil forfeiture imposed on a vessel or other property, or any civil penalty or criminal fine imposed on a vessel or owner or operator of a vessel or any other person who has been issued or has applied for a permit under any marine resource law enforced by the Secretary has not been paid and is overdue, or (D) any payment required for observer services provided to or contracted by an owner or operator who has been issued a permit or applied for a permit under any marine resource law administered by the Secretary has not been paid and is overdue, the Secretary may—

(i) revoke any permit issued with respect to such vessel or person, with or without prejudice to the issuance of subsequent permits;

(ii) suspend such permit for a period of time considered by the Secretary to be appropriate;

(iii) deny such permit; or

(iv) impose additional conditions and restrictions on any permit issued to or applied for by such vessel or person under this chapter and, with respect to foreign fishing vessels, on the approved application of the foreign nation involved and on any permit issued under that application.

(2) In imposing a sanction under this subsection, the Secretary shall take into account—

(A) the nature, circumstances, extent, and gravity of the prohibited acts for which the sanction is imposed; and

(B) with respect to the violator, the degree of culpability, any history of prior offenses, and such other matters as justice may require.

(3) Transfer of ownership of a vessel, by sale or otherwise, shall not extinguish any permit sanction that is in effect or is pending at the time of transfer of ownership. Before executing the transfer of ownership of a vessel, by sale or otherwise, the owner shall disclose in writing to the prospective transferee the existence of any permit sanction that will be in effect or pending with respect to the vessel at the time of the transfer.

(4) In the case of any permit that is suspended under this subsection for nonpayment of a civil penalty or criminal fine, the Secretary shall reinstate the permit upon payment of the penalty or fine and interest thereon at the prevailing rate.

(5) No sanctions shall be imposed under this subsection unless there has been a prior opportunity for a hearing on the facts underlying the violation for which the sanction is imposed, either in conjunction with a civil penalty proceeding under this section or otherwise.

Such bond or other security shall be conditioned upon such person (i) delivering such property to the appropriate court upon order thereof, without any impairment of its value, or (ii) paying the monetary value of such property pursuant to an order of such court. Judgment shall be recoverable on such bond or other security against both the principal and any sureties in the event that any condition thereof is breached, as determined by such court. Nothing in this paragraph may be construed to require the Secretary, except in the Secretary's discretion or pursuant to the order of a court under section 1861(d) of this title, to release on bond any seized fish or other property or the proceeds from the sale thereof.

(2) Any fish seized pursuant to this chapter may be sold, subject to the approval and direction of the appropriate court, for not less than the fair market value thereof. The proceeds of any such sale shall be deposited with such court pending the disposition of the matter involved.

(e) Rebuttable presumptions

(1) For purposes of this section, it shall be a rebuttable presumption that all fish found on board a fishing vessel which is seized in connection with an act prohibited by section 1857 of this title were taken or retained in violation of this chapter.

(2) For purposes of this chapter, it shall be a rebuttable presumption that any fish of a species which spawns in fresh or estuarine waters and migrates to ocean waters that is found on board a vessel is of United States origin if the vessel is within the migratory range of the species during that part of the year to which the migratory range applies.

(3) For purposes of this chapter, it shall be a rebuttable presumption that any vessel that is shoreward of the outer boundary of the exclusive economic zone of the United States or beyond the exclusive economic zone of any nation, and that has gear on board that is capable of use for large-scale driftnet fishing, is engaged in such fishing.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1417, 1861, 3606, 3637, 5103, 5106, 5606 of this title.

§ 1861. Enforcement

(a) Responsibility

The provisions of this chapter shall be enforced by the Secretary and the Secretary of the department in which the Coast Guard is operating. Such Secretaries may, by agreement, on a reimbursable basis or otherwise, utilize the personnel, services, equipment (including aircraft and vessels), and facilities of any other Federal agency, including all elements of the Department of Defense, and of any State agency, in the performance of such duties.

(b) Powers of authorized officers

(1) Any officer who is authorized (by the Secretary, the Secretary of the department in which the Coast Guard is operating, or the head of any Federal or State agency which has entered into an agreement with such Secretaries under subsection (a) of this section) to enforce the provisions of this chapter may—

(A) with or without a warrant or other process—

(i) arrest any person, if he has reasonable cause to believe that such person has committed an act prohibited by section 1857 of this title;

(ii) board, and search or inspect, any fishing vessel which is subject to the provisions of this chapter;

(iii) seize any fishing vessel (together with its fishing gear, furniture, appurtenances, stores, and cargo) used or employed in, or with respect to which it reasonably appears that such vessel was used or employed in, the violation of any provision of this chapter;

(iv) seize any fish (wherever found) taken or retained in violation of any provision of this chapter; and

The arrest authority described in the preceding sentence may be conferred upon an officer or employee of a State agency, subject to such conditions and restrictions as are set forth by agreement between the State agency, the Secretary, and, with respect to enforcement operations within the exclusive economic zone, the Secretary of the department in which the Coast Guard is operating.

(c) Issuance of citations

If any officer authorized to enforce the provisions of this chapter (as provided for in this section) finds that a fishing vessel is operating or has been operated in violation of any provision of this chapter, such officer may, in accordance with regulations issued jointly by the Secretary and the Secretary of the department in which the Coast Guard is operating, issue a citation to the owner or operator of such vessel in lieu of proceeding under subsection (b) of this section. If a permit has been issued pursuant to this chapter for such vessel, such officer shall note the issuance of any citation under this subsection, including the date thereof and the reason therefor, on the permit. The Secretary shall maintain a record of all citations issued pursuant to this subsection.

(d) Jurisdiction of courts

The district courts of the United States shall have exclusive jurisdiction over any case or controversy arising under the provisions of this chapter. In the case of Guam or any possession of the United States in the Pacific Ocean, the appropriate court is the United States District Court for the District of Guam, except that in the case of American Samoa, the appropriate court is the United States District Court for the District of Hawaii, and except that in the case of the Northern Mariana Islands, the appropriate court is the United States District Court for the District of the Northern Mariana Islands. Any such court may, at any time—

(1) enter restraining orders or prohibitions;

(2) issue warrants, process in rem, or other process;

(3) prescribe and accept satisfactory bonds or other security; and

(4) take such other actions as are in the interest of justice.

(e) Payment of storage, care, and other costs

(1) Notwithstanding any other provision of law, the Secretary or the Secretary of the

Treasury may pay from sums received as fines, penalties, and forfeitures of property for violations of any provisions of this chapter or of any other marine resource law enforced by the Secretary, including the Lacey Act Amendments of 1981 (16 U.S.C. 3371 et seq.)—

(A) the reasonable and necessary costs incurred in providing temporary storage, care, and maintenance of seized fish or other property pending disposition of any civil or criminal proceeding alleging a violation of any provision of this chapter or any other marine resource law enforced by the Secretary with respect to that fish or other property;

(B) a reward of not less than 20 percent of the penalty collected or \$20,000, whichever is the lesser amount, to any person who furnishes information which leads to an arrest, conviction, civil penalty assessment, or forfeiture of property for any violation of any provision of this chapter or any other marine resource law enforced by the Secretary;

(C) any expenses directly related to investigations and civil or criminal enforcement proceedings, including any necessary expenses for equipment, training, travel, witnesses, and contracting services directly related to such investigations or proceedings;

(2) Any person found in an administrative or judicial proceeding to have violated this chapter or any other marine resource law enforced by the Secretary shall be liable for the cost incurred in the sale, storage, care, and maintenance of any fish or other property lawfully seized in connection with the violation.

(f) Enforcement of Northeast Multispecies Fishery Management Plan

(1) Enforcement agreements

Beginning not later than October 1, 1993, the Secretary shall, if requested by the Governor of a State represented on the New England Fishery Management Council, enter into an agreement under subsection (a) of this section, with each of the States represented on such Council, that authorizes the marine law enforcement agency of such State to perform duties of the Secretary relating to enforcement of the Northeast Multispecies Fishery Management Plan.

(2) Reimbursement

An agreement with a State under this subsection shall provide, subject to the availabil-

ity of appropriations, for reimbursement of the State for expenses incurred in detection and prosecution of violations of any fishery management plan approved by the Secretary.

(3) Coast Guard enforcement working group

(A) Establishment

The Commander of the First Coast Guard District shall establish an informal fisheries enforcement working group to improve the overall compliance with and effectiveness of the regulations issued under the Northeast Multispecies Fishery Management Plan.

(B) Membership

The working group shall consist of members selected by the Commander, and shall include—

(i) individuals who are representatives of various fishing ports located in the States represented on the New England Fishery Management Council;

(iii) other individuals the Commander considers appropriate.

(C) Non-Federal status of working group members

An individual shall not receive any compensation for, and shall not be considered to be a Federal employee based on, membership in the working group.

(D) Meetings

The working group shall meet, at the call of the Commander, at least 4 times each year. The meetings shall be held at various major fishing ports in States represented on the New England Fishery Management Council, as specified by the Commander.

(4) Use of fines and penalties

Amounts available to the Secretary under this chapter which are attributable to fines and penalties imposed for violations of the Northeast Multispecies Fishery Management Plan shall be used by the Secretary pursuant to this section to enforce that Plan.

(g) Enforcement in Pacific Insular Areas

AGREEMENT TO MAKE MORE EFFECTIVE ENFORCEMENT
OF DOMESTIC LAWS AND INTERNATIONAL AGREEMENTS

Pub. L. 102-582, title II, §202, Nov. 2, 1992, 106 Stat. 4905, provided that not later than six months after Nov. 2, 1992, the Secretary of the department in which the Coast Guard is operating, the Secretary of Commerce, and the Secretary of Defense were to enter into an agreement under subsec. (a) of this section to make more effective the enforcement of domestic laws and international agreements that conserve and manage living marine resources of the United States.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 1821, 1824, 1857, 1859, 1860, 3607, 3637, 5103, 5106, 5606 of this title.

§ 1861a. Transition to sustainable fisheries

(a) Fisheries disaster relief

(1) At the discretion of the Secretary or at the request of the Governor of an affected State or a fishing community, the Secretary shall determine whether there is a commercial fishery failure due to a fishery resource disaster as a result of—

- (A) natural causes;
- (B) man-made causes beyond the control of fishery managers to mitigate through conservation and management measures; or
- (C) undetermined causes.

(2) Upon the determination under paragraph (1) that there is a commercial fishery failure, the Secretary is authorized to make sums available to be used by the affected State, fishing community, or by the Secretary in cooperation with the affected State or fishing community for assessing the economic and social effects of the commercial fishery failure, or any activity that the Secretary determines is appropriate to restore the fishery or prevent a similar failure in the future and to assist a fishing community affected by such failure. Before making funds available for an activity authorized under this section, the Secretary shall make a determination that such activity will not expand the size or scope of the commercial fishery failure in that fishery or into other fisheries or other geographic regions.

(3) The Federal share of the cost of any activity carried out under the authority of this subsection shall not exceed 75 percent of the cost of that activity.

(4) There are authorized to be appropriated to the Secretary such sums as are necessary for each of the fiscal years 1996, 1997, 1998, and 1999.

(b) Fishing capacity reduction program

(1) The Secretary, at the request of the appropriate Council for fisheries under the authority of such Council, or the Governor of a State for fisheries under State authority, may conduct a fishing capacity reduction program (referred to in this section as the “program”) in a fishery if the Secretary determines that the program—

(A) is necessary to prevent or end overfishing, rebuild stocks of fish, or achieve measurable and significant improvements in the conservation and management of the fishery;

(B) is consistent with the Federal or State fishery management plan or program in effect for such fishery, as appropriate, and that the fishery management plan—

(i) will prevent the replacement of fishing capacity removed by the program through a moratorium on new entrants, restrictions on vessel upgrades, and other effort control measures, taking into account the full potential fishing capacity of the fleet; and

(ii) establishes a specified or target total allowable catch or other measures that trigger closure of the fishery or adjustments to reduce catch; and

(C) is cost-effective and capable of repaying any debt obligation incurred under section 1279f¹ of title 46, Appendix.

(2) The objective of the program shall be to obtain the maximum sustained reduction in fishing capacity at the least cost and in a minimum period of time. To achieve that objective, the Secretary is authorized to pay—

(A) the owner of a fishing vessel, if such vessel is (i) scrapped, or (ii) through the Secretary of the department in which the Coast Guard is operating, subjected to title restrictions that permanently prohibit and effectively prevent its use in fishing, and if the permit authorizing the participation of the vessel in the fishery is surrendered for permanent revocation and the owner relinquishes any claim associated with the vessel and permit that could qualify such owner for any present or future limited access system permit in the fishery for which the program is established; or

(B) the holder of a permit authorizing participation in the fishery, if such permit is surrendered for permanent revocation, and such holder relinquishes any claim associated with the permit and vessel used to harvest fishery resources under the permit that could qualify such holder for any present or future limited access system permit in the fishery for which the program was established.

(3) Participation in the program shall be voluntary, but the Secretary shall ensure compliance by all who do participate.

(4) The Secretary shall consult, as appropriate, with Councils, Federal agencies, State and regional authorities, affected fishing communities, participants in the fishery, conservation organizations, and other interested parties throughout the development and implementation of any program under this section.

(c) Program funding

(1) The program may be funded by any combination of amounts—

(A) available under clause (iv) of section 713c-3(b)(1)(A) of title 15;

(B) appropriated for the purposes of this section;

(C) provided by an industry fee system established under subsection (d) of this section and in accordance with section 1279f¹ of title 46, Appendix; or

(D) provided from any State or other public sources or private or non-profit organizations.

(2) All funds for the program, including any fees established under subsection (d) of this sec-

¹ See References in Text note below.

tion, shall be paid into the fishing capacity reduction fund established under section 1279f¹ of title 46, Appendix.

(d) Industry fee system

(1)(A) If an industry fee system is necessary to fund the program, the Secretary, at the request of the appropriate Council, may conduct a referendum on such system. Prior to the referendum, the Secretary, in consultation with the Council, shall—

(i) identify, to the extent practicable, and notify all permit or vessel owners who would be affected by the program; and

(ii) make available to such owners information about the industry fee system describing the schedule, procedures, and eligibility requirements for the referendum, the proposed program, and the amount and duration and any other terms and conditions of the proposed fee system.

(B) The industry fee system shall be considered approved if the referendum votes which are cast in favor of the proposed system constitute a two-thirds majority of the participants voting.

(2) Notwithstanding section 1854(d) of this title and consistent with an approved industry fee system, the Secretary is authorized to establish such a system to fund the program and repay debt obligations incurred pursuant to section 1279f¹ of title 46, Appendix. The fees for a program established under this section shall—

(A) be determined by the Secretary and adjusted from time to time as the Secretary considers necessary to ensure the availability of sufficient funds to repay such debt obligations;

(B) not exceed 5 percent of the ex-vessel value of all fish harvested from the fishery for which the program is established;

(C) be deducted by the first ex-vessel fish purchaser from the proceeds otherwise payable to the seller and accounted for and forwarded by such fish purchasers to the Secretary in such manner as the Secretary may establish; and

(D) be in effect only until such time as the debt obligation has been fully paid.

(e) Implementation plan

(1) The Secretary, in consultation with the appropriate Council or State and other interested parties, shall prepare and publish in the Federal Register for a 60-day public comment period an implementation plan, including proposed regulations, for each program. The implementation plan shall—

(A) define criteria for determining types and numbers of vessels which are eligible for participation in the program taking into account characteristics of the fishery, the requirements of applicable fishery management plans, the needs of fishing communities, and the need to minimize program costs; and

(B) establish procedures for program participation (such as submission of owner bid under an auction system or fair market-value assessment) including any terms and conditions for participation which the Secretary deems to be reasonably necessary to meet the goals of the program.

(2) During the 60-day public comment period—

(A) the Secretary shall conduct a public hearing in each State affected by the program; and

(B) the appropriate Council or State shall submit its comments and recommendations, if any, regarding the plan and regulations.

(3) Within 45 days after the close of the public comment period, the Secretary, in consultation with the appropriate Council or State, shall analyze the public comment received and publish in the Federal Register a final implementation plan for the program and regulations for its implementation. The Secretary may not adopt a final implementation plan involving industry fees or debt obligation unless an industry fee system has been approved by a referendum under this section.

A, title I, §101(a) [title II, §211(b)], Sept. 30, 1996, 110 Stat. 3009, 3009-41, provided that: "The Secretary of Commerce shall establish a task force comprised of interested parties to study and report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Resources of the House of Representatives within 2 years of the date of enactment of this Act [Oct. 11, 1996] on the role of the Federal Government in—

"(1) subsidizing the expansion and contraction of fishing capacity in fishing fleets managed under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.); and

"(2) otherwise influencing the aggregate capital investments in fisheries."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in title 15 section 713c-3; title 46 App. section 1279f.

§ 1862. North Pacific fisheries conservation

(a) In general

The North Pacific Council may prepare, in consultation with the Secretary, a fisheries research plan for all fisheries under the Council's jurisdiction except salmon fisheries which—

(1) requires that observers be stationed on fishing vessels engaged in the catching, taking, or harvesting of fish and on United States fish processors fishing for or processing species under the jurisdiction of the Council, in-

cluding the Northern Pacific halibut fishery, for the purpose of collecting data necessary for the conservation, management, and scientific understanding of any fisheries under the Council's jurisdiction; and

(2) establishes a system of fees to pay for the costs of implementing the plan.

(b) Standards

(1) Any plan or plan amendment prepared under this section shall be reasonably calculated to—

(A) gather reliable data, by stationing observers on all or a statistically reliable sample of the fishing vessels and United States fish processors included in the plan, necessary for the conservation, management, and scientific understanding of the fisheries covered by the plan;

(B) be fair and equitable to all vessels and processors;

(C) be consistent with applicable provisions of law; and

(D) take into consideration the operating requirements of the fisheries and the safety of observers and fishermen.

(2) Any system of fees established under this section shall—

(A) provide that the total amount of fees collected under this section not exceed the combined cost of (i) stationing observers on board fishing vessels and United States fish processors, (ii) the actual cost of inputting collected data, and (iii) assessments necessary for a risk-sharing pool implemented under subsection (e) of this section, less any amount received for such purpose from another source or from an existing surplus in the North Pacific Fishery Observer Fund established in subsection (d) of this section;

(B) be fair and equitable to all participants in the fisheries under the jurisdiction of the Council, including the Northern Pacific halibut fishery;

(C) provide that fees collected not be used to pay any costs of administrative overhead or other costs not directly incurred in carrying out the plan;

(D) not be used to offset amounts authorized under other provisions of law;

(E) be expressed as a percentage, not to exceed 2 percent, of the unprocessed ex-vessel value of fish and shellfish harvested under the jurisdiction of the Council, including the Northern Pacific halibut fishery;

(F) be assessed against all fishing vessels and United States fish processors, including those not required to carry an observer under the plan, participating in fisheries under the jurisdiction of the Council, including the Northern Pacific halibut fishery;

(G) provide that fees collected will be deposited in the North Pacific Fishery Observer Fund established under subsection (d) of this section;

(H) provide that fees collected will only be used for implementing the plan established under this section; and

(I) meet the requirements of section 9701(b) of title 31.

(c) Action by Secretary

(1) Within 60 days after receiving a plan or plan amendment from the North Pacific Council under this section, the Secretary shall review such plan or plan amendment and either (A) remand such plan or plan amendment to the Council with comments if it does not meet the requirements of this section, or (B) publish in the Federal Register proposed regulations for implementing such plan or plan amendment.

(2) During the 60-day public comment period, the Secretary shall conduct a public hearing in each State represented on the Council for the purpose of receiving public comments on the proposed regulations.

(3) Within 45 days of the close of the public comment period, the Secretary, in consultation with the Council, shall analyze the public comment received and publish final regulations for implementing such plan.

(4) If the Secretary remands a plan or plan amendment to the Council for failure to meet the requirements of this section, the Council may resubmit such plan or plan amendment at any time after taking action the Council believes will address the defects identified by the Secretary. Any plan or plan amendment resubmitted to the Secretary will be treated as an original plan submitted to the Secretary under paragraph (1) of this subsection.

(d) Fishery Observer Fund

There is established in the Treasury a North Pacific Fishery Observer Fund. The Fund shall be available, without appropriation or fiscal year limitation, only to the Secretary for the purpose of carrying out the provisions of this section, subject to the restrictions in subsection (b)(2) of this section. The Fund shall consist of all monies deposited into it in accordance with this section. Sums in the Fund that are not currently needed for the purposes of this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

(e) Special provisions regarding observers

(1) The Secretary shall review—

(A) the feasibility of establishing a risk sharing pool through a reasonable fee, subject to the limitations of subsection (b)(2)(E) of this section, to provide coverage for vessels and owners against liability from civil suits by observers, and

(B) the availability of comprehensive commercial insurance for vessel and owner liability against civil suits by observers.

(2) If the Secretary determines that a risk sharing pool is feasible, the Secretary shall establish such a pool, subject to the provisions of subsection (b)(2) of this section, unless the Secretary determines that—

(A) comprehensive commercial insurance is available for all fishing vessels and United States fish processors required to have observers under the provisions of this section, and

(B) such comprehensive commercial insurance will provide a greater measure of coverage at a lower cost to each participant.

(f) Bycatch reduction

In implementing section 1853(a)(11) of this title and this section, the North Pacific Council

shall submit conservation and management measures to lower, on an annual basis for a period of not less than four years, the total amount of economic discards occurring in the fisheries under its jurisdiction.

(g) Bycatch reduction incentives

(1) Notwithstanding section 1854(d) of this title, the North Pacific Council may submit, and the Secretary may approve, consistent with the provisions of this chapter, a system of fines in a fishery to provide incentives to reduce bycatch and bycatch rates; except that such fines shall not exceed \$25,000 per vessel per season. Any fines collected shall be deposited in the North Pacific Fishery Observer Fund, and may be made available by the Secretary to offset costs related to the reduction of bycatch in the fishery from which such fines were derived, including conservation and management measures and research, and to the State of Alaska to offset costs incurred by the State in the fishery from which such penalties were derived or in fisheries in which the State is directly involved in management or enforcement and which are directly affected by the fishery from which such penalties were derived.

(2)(A) Notwithstanding section 1853(d) of this title, and in addition to the authority provided in section 1853(b)(10) of this title, the North Pacific Council may submit, and the Secretary may approve, conservation and management measures which provide allocations of regulatory discards to individual fishing vessels as an incentive to reduce per vessel bycatch and bycatch rates in a fishery, *Provided*, That—

(i) such allocations may not be transferred for monetary consideration and are made only on an annual basis; and

(ii) any such conservation and management measures will meet the requirements of subsection (h) of this section and will result in an actual reduction in regulatory discards in the fishery.

(B) The North Pacific Council may submit restrictions in addition to the restriction imposed by clause (i) of subparagraph (A) on the transferability of any such allocations, and the Secretary may approve such recommendation.

(h) Catch measurement

(1) By June 1, 1997 the North Pacific Council shall submit, and the Secretary may approve, consistent with the other provisions of this chapter, conservation and management measures to ensure total catch measurement in each fishery under the jurisdiction of such Council. Such measures shall ensure the accurate enumeration, at a minimum, of target species, economic discards, and regulatory discards.

(2) To the extent the measures submitted under paragraph (1) do not require United States fish processors and fish processing vessels (as defined in chapter 21 of title 46) to weigh fish, the North Pacific Council and the Secretary shall submit a plan to the Congress by January 1, 1998, to allow for weighing, including recommendations to assist such processors and processing vessels in acquiring necessary equipment, unless the Council determines that such weighing is not necessary to meet the requirements of this subsection.

(i) Full retention and utilization

(1) The North Pacific Council shall submit to the Secretary by October 1, 1998 a report on the advisability of requiring the full retention by fishing vessels and full utilization by United States fish processors of economic discards in fisheries under its jurisdiction if such economic discards, or the mortality of such economic discards, cannot be avoided. The report shall address the projected impacts of such requirements on participants in the fishery and describe any full retention and full utilization requirements that have been implemented.

(2) The report shall address the advisability of measures to minimize processing waste, including standards setting minimum percentages which must be processed for human consumption. For the purpose of the report, “processing waste” means that portion of any fish which is processed and which could be used for human consumption or other commercial use, but which is not so used.

§ 1863. Northwest Atlantic Ocean Fisheries Reinvestment Program

(a) Program

(1) Not later than October 1, 1993, the Secretary shall establish a Northwest Atlantic Ocean Fisheries Reinvestment Program for the purposes of—

(A) promoting development of commercial fisheries and markets for underutilized species of the northwest Atlantic Ocean;

(B) developing alternative fishing opportunities for participants in the New England groundfish fishery;

(C) providing technical support and assistance to United States fishermen and fish processors to improve the value-added processing of underutilized species and to make participation in fisheries for underutilized species of the northwest Atlantic Ocean economically viable;

(D) creating new economic opportunities through the improved processing and expanded use of fish waste; and

(E) helping to restore overfished New England groundfish stocks through aquaculture or hatchery programs.

(2) CONSULTATION.—In establishing and implementing the Northwest Fisheries Reinvestment Program, the Secretary shall consult with representatives of the commercial fishing industry,

the seafood processing industry, and the academic community (including the National Sea Grant Program).

(3) **ACTIVITIES UNDER PROGRAM.**—Subject to the availability of appropriations, the Secretary shall award contracts, grants and other financial assistance to United States citizens to carry out the purposes of subsection¹ (1), under the terms and conditions provided in section 713c-3(c) of title 15, except that, in making awards under this section for projects involving participation in fisheries for underutilized species, the Secretary shall give the highest priority to a person who owns or operates a fishing vessel permitted under this chapter to participate in the New England groundfish fishery who agrees to surrender that permit to the Secretary during the duration of the contract, grant or other assistance.

(4) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated \$5,000,000 for each of fiscal years 1993 through 1999 to carry out the purposes of this section. For fiscal year 1993 no more than \$1,000,000, and for fiscal year 1994 no more than \$2,000,000, of such funds may be provided from monies made available under section 713c-3(b) of title 15.

(b) Assistance of other agencies

The Secretary shall actively seek the assistance of other Federal agencies in the development of fisheries for underutilized species of the northwest Atlantic Ocean, including, to the extent permitted by other applicable laws, assistance from the Secretary of Agriculture in including such underutilized species as agricultural commodities in the programs of the Foreign Agricultural Service for which amounts are authorized under the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101-624; 104 Stat. 3359).

(c) Management plans for underutilized species

The New England Fishery Management Council, in consultation with other appropriate Councils, shall develop fishery management plans as soon as possible for any underutilized species of the northwest Atlantic Ocean that is not covered under such a plan, in order to prevent overfishing of that species.

(d) “Underutilized species” defined

For purposes of this section, the term “underutilized species of the northwest Atlantic Ocean” means any fish species of the northwest Atlantic Ocean that is identified, by the Director of the Northeast Fisheries Center of the National Marine Fisheries Service, as an underutilized species.

SUBCHAPTER V—FISHERY MONITORING AND RESEARCH

§ 1881. Registration and information management

(a) Standardized fishing vessel registration and information management system

The Secretary shall, in cooperation with the Secretary of the department in which the Coast Guard is operating, the States, the Councils, and Marine Fisheries Commissions, develop recommendations for implementation of a standardized fishing vessel registration and information management system on a regional basis. The recommendations shall be developed after consultation with interested governmental and non-governmental parties and shall—

(1) be designed to standardize the requirements of vessel registration and information collection systems required by this chapter, the Marine Mammal Protection Act (16 U.S.C. 1361 et seq.), and any other marine resource law implemented by the Secretary, and, with the permission of a State, any marine resource law implemented by such State;

(2) integrate information collection programs under existing fishery management plans into a non-duplicative information collection and management system;

(3) avoid duplication of existing State, tribal, or Federal systems and shall utilize, to the maximum extent practicable, information collected from existing systems;

(4) provide for implementation of the system through cooperative agreements with appropriate State, regional, or tribal entities and Marine Fisheries Commissions;

(5) provide for funding (subject to appropriations) to assist appropriate State, regional, or tribal entities and Marine Fisheries Commissions in implementation;

(6) establish standardized units of measurement, nomenclature, and formats for the collection and submission of information;

(7) minimize the paperwork required for vessels registered under the system;

(8) include all species of fish within the geographic areas of authority of the Councils and all fishing vessels including charter fishing vessels, but excluding recreational fishing vessels;

(9) require United States fish processors, and fish dealers and other first ex-vessel purchasers of fish that are subject to the proposed system, to submit information (other than economic information) which may be necessary to meet the goals of the proposed system; and

(10) include procedures necessary to ensure—

(A) the confidentiality of information collected under this section in accordance with section 1881a(b) of this title; and

(B) the timely release or availability to the public of information collected under

this section consistent with section 1881a(b) of this title.

(b) Fishing vessel registration

The proposed registration system should, at a minimum, obtain the following information for each fishing vessel—

(1) the name and official number or other identification, together with the name and address of the owner or operator or both;

(2) gross tonnage, vessel capacity, type and quantity of fishing gear, mode of operation (catcher, catcher processor, or other), and such other pertinent information with respect to vessel characteristics as the Secretary may require; and

(3) identification (by species, gear type, geographic area of operations, and season) of the fisheries in which the fishing vessel participates.

(c) Fishery information

The proposed information management system should, at a minimum, provide basic fisheries performance information for each fishery, including—

(1) the number of vessels participating in the fishery including charter fishing vessels;

(2) the time period in which the fishery occurs;

(3) the approximate geographic location or official reporting area where the fishery occurs;

(4) a description of fishing gear used in the fishery, including the amount and type of such gear and the appropriate unit of fishing effort; and

(5) other information required under subsection¹ 1853(a)(5) of this title or requested by the Council under section 1881a of this title.

(d) Use of registration

Any registration recommended under this section shall not be considered a permit for the purposes of this chapter, and the Secretary may not propose to revoke, suspend, deny, or impose any other conditions or restrictions on any such registration or the use of such registration under this chapter.

(e) Public comment

Within one year after October 11, 1996, the Secretary shall publish in the Federal Register for a 60-day public comment period a proposal that would provide for implementation of a standardized fishing vessel registration and information collection system that meets the requirements of subsections (a) through (c) of this section. The proposal shall include—

(1) a description of the arrangements of the Secretary for consultation and cooperation with the department in which the Coast Guard is operating, the States, the Councils, Marine Fisheries Commissions, the fishing industry and other interested parties; and

(2) any proposed regulations or legislation necessary to implement the proposal.

(f) Congressional transmittal

Within 60 days after the end of the comment period and after consideration of comments re-

ceived under subsection (e) of this section, the Secretary shall transmit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Resources of the House of Representatives a recommended proposal for implementation of a national fishing vessel registration system that includes—

(1) any modifications made after comment and consultation;

(2) a proposed implementation schedule, including a schedule for the proposed cooperative agreements required under subsection (a)(4) of this section; and

(3) recommendations for any such additional legislation as the Secretary considers necessary or desirable to implement the proposed system.

(g) Report to Congress

Within 15 months after October 11, 1996, the Secretary shall report to Congress on the need to include recreational fishing vessels into a national fishing vessel registration and information collection system. In preparing its report, the Secretary shall cooperate with the Secretary of the department in which the Coast Guard is operating, the States, the Councils, and Marine Fisheries Commissions, and consult with governmental and nongovernmental parties.

§ 1881a. Information collection

(a) Council requests

If a Council determines that additional information (other than information that would disclose proprietary or confidential commercial or financial information regarding fishing operations or fish processing operations) would be beneficial for developing, implementing, or revising a fishery management plan or for determining whether a fishery is in need of management, the Council may request that the Secretary implement an information collection program for the fishery which would provide the

types of information (other than information that would disclose proprietary or confidential commercial or financial information regarding fishing operations or fish processing operations) specified by the Council. The Secretary shall undertake such an information collection program if he determines that the need is justified, and shall promulgate regulations to implement the program within 60 days after such determination is made. If the Secretary determines that the need for an information collection program is not justified, the Secretary shall inform the Council of the reasons for such determination in writing. The determinations of the Secretary under this subsection regarding a Council request shall be made within a reasonable period of time after receipt of that request.

(b) Confidentiality of information

(1) Any information submitted to the Secretary by any person in compliance with any requirement under this chapter shall be confidential and shall not be disclosed, except—

(A) to Federal employees and Council employees who are responsible for fishery management plan development and monitoring;

(B) to State or Marine Fisheries Commission employees pursuant to an agreement with the Secretary that prevents public disclosure of the identity or business of any person;

(C) when required by court order;

(D) when such information is used to verify catch under an individual fishing quota program;

(E) that observer information collected in fisheries under the authority of the North Pacific Council may be released to the public as specified in a fishery management plan or regulation for weekly summary bycatch information identified by vessel, and for haul-specific bycatch information without vessel identification; or

(F) when the Secretary has obtained written authorization from the person submitting such information to release such information to persons for reasons not otherwise provided for in this subsection, and such release does not violate other requirements of this chapter.

(2) The Secretary shall, by regulation, prescribe such procedures as may be necessary to preserve the confidentiality of information submitted in compliance with any requirement or regulation under this chapter, except that the Secretary may release or make public any such information in any aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such information. Nothing in this subsection shall be interpreted or construed to prevent the use for conservation and management purposes by the Secretary, or with the approval of the Secretary, the Council, of any information submitted in compliance with any requirement or regulation under this chapter or the use, release, or publication of bycatch information pursuant to paragraph (1)(E).

(c) Restriction on use of certain information

(1) The Secretary shall promulgate regulations to restrict the use, in civil enforcement or criminal proceedings under this chapter, the

Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.), and the Endangered Species Act (16 U.S.C. 1531 et seq.), of information collected by voluntary fishery data collectors, including sea samplers, while aboard any vessel for conservation and management purposes if the presence of such a fishery data collector aboard is not required by any of such chapter or Acts or regulations thereunder.

(2) The Secretary may not require the submission of a Federal or State income tax return or statement as a prerequisite for issuance of a permit until such time as the Secretary has promulgated regulations to ensure the confidentiality of information contained in such return or statement, to limit the information submitted to that necessary to achieve a demonstrated conservation and management purpose, and to provide appropriate penalties for violation of such regulations.

(d) Contracting authority

Notwithstanding any other provision of law, the Secretary may provide a grant, contract, or other financial assistance on a sole-source basis to a State, Council, or Marine Fisheries Commission for the purpose of carrying out information collection or other programs if—

(1) the recipient of such a grant, contract, or other financial assistance is specified by statute to be, or has customarily been, such State, Council, or Marine Fisheries Commission; or

(2) the Secretary has entered into a cooperative agreement with such State, Council, or Marine Fisheries Commission.

(e) Resource assessments

(1) The Secretary may use the private sector to provide vessels, equipment, and services necessary to survey the fishery resources of the United States when the arrangement will yield statistically reliable results.

(2) The Secretary, in consultation with the appropriate Council and the fishing industry—

(A) may structure competitive solicitations under paragraph (1) so as to compensate a contractor for a fishery resources survey by allowing the contractor to retain for sale fish harvested during the survey voyage;

(B) in the case of a survey during which the quantity or quality of fish harvested is not expected to be adequately compensatory, may structure those solicitations so as to provide that compensation by permitting the contractor to harvest on a subsequent voyage and retain for sale a portion of the allowable catch of the surveyed fishery; and

(C) may permit fish harvested during such survey to count toward a vessel's catch history under a fishery management plan if such survey was conducted in a manner that precluded a vessel's participation in a fishery that counted under the plan for purposes of determining catch history.

(3) The Secretary shall undertake efforts to expand annual fishery resource assessments in all regions of the Nation.

§ 1881b. Observers

(a) Guidelines for carrying observers

Within one year after October 11, 1996, the Secretary shall promulgate regulations, after notice and opportunity for public comment, for fishing vessels that carry observers. The regulations shall include guidelines for determining—

- (1) when a vessel is not required to carry an observer on board because the facilities of such vessel for the quartering of an observer, or for carrying out observer functions, are so inadequate or unsafe that the health or safety of the observer or the safe operation of the vessel would be jeopardized; and
- (2) actions which vessel owners or operators may reasonably be required to take to render such facilities adequate and safe.

(b) Training

The Secretary, in cooperation with the appropriate States and the National Sea Grant College Program, shall—

- (1) establish programs to ensure that each observer receives adequate training in collecting and analyzing the information necessary for the conservation and management purposes of the fishery to which such observer is assigned;
- (2) require that an observer demonstrate competence in fisheries science and statistical analysis at a level sufficient to enable such person to fulfill the responsibilities of the position;
- (3) ensure that an observer has received adequate training in basic vessel safety; and
- (4) make use of university and any appropriate private nonprofit organization training facilities and resources, where possible, in carrying out this subsection.

(c) Observer status

An observer on a vessel and under contract to carry out responsibilities under this chapter or the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) shall be deemed to be a Federal employee for the purpose of compensation under the Federal Employee Compensation Act (5 U.S.C. 8101 et seq.).

§ 1881c. Fisheries research

(a) In general

The Secretary shall initiate and maintain, in cooperation with the Councils, a comprehensive program of fishery research to carry out and further the purposes, policy, and provisions of this chapter. Such program shall be designed to acquire knowledge and information, including statistics, on fishery conservation and management and on the economics and social characteristics of the fisheries.

(b) Strategic plan

Within one year after October 11, 1996, and at least every 3 years thereafter, the Secretary shall develop and publish in the Federal Register a strategic plan for fisheries research for the 5 years immediately following such publication. The plan shall—

- (1) identify and describe a comprehensive program with a limited number of priority objectives for research in each of the areas specified in subsection (c) of this section;
- (2) indicate goals and timetables for the program described in paragraph (1);
- (3) provide a role for commercial fishermen in such research, including involvement in field testing;
- (4) provide for collection and dissemination, in a timely manner, of complete and accurate information concerning fishing activities, catch, effort, stock assessments, and other research conducted under this section; and
- (5) be developed in cooperation with the Councils and affected States, and provide for coordination with the Councils, affected States, and other research entities.

(c) Areas of research

Areas of research are as follows:

(1) Research to support fishery conservation and management, including but not limited to, biological research concerning the abundance and life history parameters of stocks of fish, the interdependence of fisheries or stocks of fish, the identification of essential fish habitat, the impact of pollution on fish populations, the impact of wetland and estuarine degradation, and other factors affecting the abundance and availability of fish.

(2) Conservation engineering research, including the study of fish behavior and the development and testing of new gear technology and fishing techniques to minimize bycatch and any adverse effects on essential fish habi-

tat and promote efficient harvest of target species.

(3) Research on the fisheries, including the social, cultural, and economic relationships among fishing vessel owners, crew, United States fish processors, associated shoreside labor, seafood markets and fishing communities.

(4) Information management research, including the development of a fishery information base and an information management system under section 1881 of this title that will permit the full use of information in the support of effective fishery conservation and management.

(d) Public notice

In developing the plan required under subsection (a) of this section, the Secretary shall consult with relevant Federal, State, and international agencies, scientific and technical experts, and other interested persons, public and private, and shall publish a proposed plan in the Federal Register for the purpose of receiving public comment on the plan. The Secretary shall ensure that affected commercial fishermen are actively involved in the development of the portion of the plan pertaining to conservation engineering research. Upon final publication in the Federal Register, the plan shall be submitted by the Secretary to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Resources of the House of Representatives.

PRIOR PROVISIONS

A prior section 404 of Pub. L. 94-265, amended section 1362 of this title and enacted provisions formerly set out as a note under section 1362 of this title, prior to being amended generally by Pub. L. 104-297.

STUDY OF CONTRIBUTION OF BYCATCH TO CHARITABLE ORGANIZATIONS

Section 208 of Pub. L. 104-297, as amended by Pub. L. 104-208, div. A, title I, §101(a) [title II, §211(b)], Sept. 30, 1996, 110 Stat. 3009, 3009-41, provided that:

“(a) STUDY.—The Secretary of Commerce shall conduct a study of the contribution of bycatch to charitable organizations by commercial fishermen. The study shall include determinations of—

“(1) the amount of bycatch that is contributed each year to charitable organizations by commercial fishermen;

“(2) the economic benefits to commercial fishermen from those contributions; and

“(3) the impact on fisheries of the availability of those benefits.

“(b) REPORT.—Not later than 1 year after the date of enactment of this Act [Oct. 11, 1996], the Secretary of Commerce shall submit to the Congress a report containing determinations made in the study under subsection (a).

“(c) BYCATCH DEFINED.—In this section the term ‘bycatch’ has the meaning given that term in section 3 of the Magnuson-Stevens Fishery Conservation and Management Act [16 U.S.C. 1802], as amended by section 102 of this Act.”

§ 1881d. Incidental harvest research

(a) Collection of information

Within nine months after October 11, 1996, the Secretary shall, after consultation with the Gulf

Council and South Atlantic Council, conclude the collection of information in the program to assess the impact on fishery resources of incidental harvest by the shrimp trawl fishery within the authority of such Councils. Within the same time period, the Secretary shall make available to the public aggregated summaries of information collected prior to June 30, 1994 under such program.

(b) Identification of stock

The program concluded pursuant to subsection (a) of this section shall provide for the identification of stocks of fish which are subject to significant incidental harvest in the course of normal shrimp trawl fishing activity.

(c) Collection and assessment of specific stock information

For stocks of fish identified pursuant to subsection (b) of this section, with priority given to stocks which (based upon the best available scientific information) are considered to be overfished, the Secretary shall conduct—

(1) a program to collect and evaluate information on the nature and extent (including the spatial and temporal distribution) of incidental mortality of such stocks as a direct result of shrimp trawl fishing activities;

(2) an assessment of the status and condition of such stocks, including collection of information which would allow the estimation of life history parameters with sufficient accuracy and precision to support sound scientific evaluation of the effects of various management alternatives on the status of such stocks; and

(3) a program of information collection and evaluation for such stocks on the magnitude and distribution of fishing mortality and fishing effort by sources of fishing mortality other than shrimp trawl fishing activity.

(d) Bycatch reduction program

Not later than 12 months after October 11, 1996, the Secretary shall, in cooperation with affected interests, and based upon the best scientific information available, complete a program to—

(1) develop technological devices and other changes in fishing operations necessary and appropriate to minimize the incidental mortality of bycatch in the course of shrimp trawl activity to the extent practicable, taking into account the level of bycatch mortality in the fishery on November 28, 1990;

(2) evaluate the ecological impacts and the benefits and costs of such devices and changes in fishing operations; and

(3) assess whether it is practicable to utilize bycatch which is not avoidable.

(e) Report to Congress

The Secretary shall, within one year of completing the programs required by this section, submit a detailed report on the results of such programs to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Resources of the House of Representatives.

(f) Implementation criteria

To the extent practicable, any conservation and management measure implemented under

this chapter to reduce the incidental mortality of bycatch in the course of shrimp trawl fishing shall be consistent with—

- (1) measures applicable to fishing throughout the range in United States waters of the bycatch species concerned; and
- (2) the need to avoid any serious adverse environmental impacts on such bycatch species or the ecology of the affected area.

(c) Recommendations

Prior to selecting advisory panel members, the Secretary shall, with respect to panel members described in subsection (b)(1) of this section, solicit recommendations from the National Academy of Sciences.

(d) Report

Within 2 years after October 11, 1996, the Secretary shall submit to the Congress a completed report of the panel established under this section, which shall include—

- (1) an analysis of the extent to which ecosystem principles are being applied in fishery conservation and management activities, including research activities;
- (2) proposed actions by the Secretary and by the Congress that should be undertaken to expand the application of ecosystem principles in fishery conservation and management; and

§ 1883. Gulf of Mexico red snapper research

(a) Independent peer review

(1) Within 30 days of October 11, 1996, the Secretary shall initiate an independent peer review to evaluate—

(A) the accuracy and adequacy of fishery statistics used by the Secretary for the red snapper fishery in the Gulf of Mexico to account for all commercial, recreational, and charter fishing harvests and fishing effort on the stock;

(B) the appropriateness of the scientific methods, information, and models used by the Secretary to assess the status and trends of the Gulf of Mexico red snapper stock and as the basis for the fishery management plan for the Gulf of Mexico red snapper fishery;

(C) the appropriateness and adequacy of the management measures in the fishery management plan for red snapper in the Gulf of Mexico for conserving and managing the red snapper fishery under this chapter; and

(D) the costs and benefits of all reasonable alternatives to an individual fishing quota program for the red snapper fishery in the Gulf of Mexico.

(2) The Secretary shall ensure that commercial, recreational, and charter fishermen in the red snapper fishery in the Gulf of Mexico are provided an opportunity to—

(A) participate in the peer review under this subsection; and

(B) provide information to the Secretary concerning the review of fishery statistics under this subsection without being subject to penalty under this chapter or other applicable law for any past violation of a requirement to report such information to the Secretary.

(3) The Secretary shall submit a detailed written report on the findings of the peer review conducted under this subsection to the Gulf Council no later than one year after October 11, 1996.

(b) Prohibition

In addition to the restrictions under section 1853(d)(1)(A) of this title, the Gulf Council may

not, prior to October 1, 2000, undertake or continue the preparation of any fishery management plan, plan amendment or regulation under this chapter for the Gulf of Mexico commercial red snapper fishery that creates an individual fishing quota program or that authorizes the consolidation of licenses, permits, or endorsements that result in different trip limits for vessels in the same class.

(c) Referendum

(1) On or after October 1, 2000, the Gulf Council may prepare and submit a fishery management plan, plan amendment, or regulation for the Gulf of Mexico commercial red snapper fishery that creates an individual fishing quota program or that authorizes the consolidation of licenses, permits, or endorsements that result in different trip limits for vessels in the same class, only if the preparation of such plan, amendment, or regulation is approved in a referendum conducted under paragraph (2) and only if the submission to the Secretary of such plan, amendment, or regulation is approved in a subsequent referendum conducted under paragraph (2).

(2) The Secretary, at the request of the Gulf Council, shall conduct referendums under this subsection. Only a person who held an annual vessel permit with a red snapper endorsement for such permit on September 1, 1996 (or any person to whom such permit with such endorsement was transferred after such date) and vessel captains who harvested red snapper in a commercial fishery using such endorsement in each red snapper fishing season occurring between January 1, 1993, and such date may vote in a referendum under this subsection. The referendum shall be decided by a majority of the votes cast. The Secretary shall develop a formula to weigh votes based on the proportional harvest under each such permit and endorsement and by each such captain in the fishery between January 1, 1993, and September 1, 1996. Prior to each referendum, the Secretary, in consultation with the Council, shall—

(A) identify and notify all such persons holding permits with red snapper endorsements and all such vessel captains; and

(B) make available to all such persons and vessel captains information about the schedule, procedures, and eligibility requirements for the referendum and the proposed individual fishing quota program.

(d) Catch limits

Any fishery management plan, plan amendment, or regulation submitted by the Gulf Council for the red snapper fishery after October 11, 1996, shall contain conservation and management measures that—

(1) establish separate quotas for recreational fishing (which, for the purposes of this subsection shall include charter fishing) and commercial fishing that, when reached, result in a prohibition on the retention of fish caught during recreational fishing and commercial fishing, respectively, for the remainder of the fishing year; and

(2) ensure that such quotas reflect allocations among such sectors and do not reflect any harvests in excess of such allocations.

(Pub. L. 94-265, title IV, §407, as added Pub. L. 104-297, title II, §207(b), Oct. 11, 1996, 110 Stat. 3612.)

§ 1901. Congressional findings and declaration of policy

The Congress finds and declares that—

(a) the level of technology of mineral exploration and development has changed radically in recent years and continued application of the mining laws of the United States to those areas of the National Park System to which it applies, conflicts with the purposes for which they were established; and

(b) all mining operations in areas of the National Park System should be conducted so as to prevent or minimize damage to the environment and other resource values, and, in certain areas of the National Park System, surface disturbance from mineral development should be temporarily halted while Congress determines whether or not to acquire any valid mineral rights which may exist in such areas.

Valley and Organ Pipe Cactus National Monuments and Mount McKinley National Park, submit to Congress recommendations for acquisition of valid claims, and study and submit to Congress recommendations for modifications of existing boundaries of the Death Valley Monument and the Glacier Bay National Monument.

Section 1906, Pub. L. 94-429, § 7, Sept. 28, 1976, 90 Stat. 1343, provided that within 4 years the Secretary determine the validity of unpatented mining claims within Crater Lake National Park, Coronado National Memorial, and Glacier Bay National Monument, and submit to Congress recommendations for acquisition of valid claims.

§ 1907. Recordation of mining claims; publication of notice

All mining claims under the Mining Law of 1872, as amended and supplemented (30 U.S.C. chapters 2, 12A, and 16 and sections 161 and 162) which lie within the boundaries of units of the National Park System shall be recorded with the Secretary of the Interior within one year after September 28, 1976. Any mining claim not so recorded shall be conclusively presumed to be abandoned and shall be void. Such recordation will not render valid any claim which was not valid on September 28, 1976, or which becomes invalid thereafter. Within thirty days following September 28, 1976, the Secretary shall publish notice of the requirement for such recordation in the Federal Register. He shall also publish similar notices in newspapers of general circulation in the areas adjacent to those units of the National Park System listed in section 3 of this Act.

(a) Whenever the Secretary of the Interior finds on his own motion or upon being notified in writing by an appropriate scientific, historical, or archeological authority, that a district, site, building, structure, or object which has been found to be nationally significant in illustrating natural history or the history of the United States and which has been designated as a natural or historical landmark may be irreparably lost or destroyed in whole or in part by any surface mining activity, including exploration for or removal or production of minerals or materials, he shall notify the person conducting such activity and submit a report thereon,

including the basis for his finding that such activity may cause irreparable loss or destruction of a national landmark, to the Advisory Council on Historic Preservation, with a request for advice of the Council as to alternative measures that may be taken by the United States to mitigate or abate such activity.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 582a of this title.

§ 2001. Congressional findings

The Congress finds that:

(1) There is a growing demand on the soil, water, and related resources of the Nation to meet present and future needs.

(2) The Congress, in its concern for sustained use of the resource base,¹ of the United States, has ensured that the Department of Agriculture possesses information, technical expertise, and a

delivery system for providing assistance to land users with respect to conservation and use of soils; plants; woodlands; watershed protection and flood prevention; the conservation, development, utilization, and disposal of water; animal husbandry; fish and wildlife management; recreation; community development; and related resource uses.

(3) Resource appraisal is basic to effective soil and water conservation. Since individual and governmental decisions concerning soil and water resources often transcend administrative boundaries and affect other programs and decisions, a coordinated appraisal and program framework are essential.

(Pub. L. 95-192, §2, Nov. 18, 1977, 91 Stat. 1407; Pub. L. 103-354, title II, §246(f)(2)(A), Oct. 13, 1994, 108 Stat. 3225.)

AMENDMENTS

1994—Par. (2). Pub. L. 103-354 struck out “created the Soil Conservation Service” after “resource base,” and substituted “, has ensured that the Department of Agriculture” for “Department of Agriculture which” after “United States”.

§ 2003. Congressional policy and declaration of purpose

(a) Responsiveness to long-term needs

In order to further the conservation of soil, water, and related resources, it is declared to be the policy of the United States and purpose of this chapter that the conduct of programs administered by the Secretary of Agriculture for the conservation of such resources shall be responsive to the long-term needs of the Nation, as determined under the provisions of this chapter.

(b) Full utilization of cooperative arrangements with State agencies

Recognizing that the arrangements under which the Federal Government cooperates with State soil and water conservation agencies and other appropriate State natural resource agencies such as those concerned with forestry and fish and wildlife and, through conservation districts, with other local units of government and land users, have effectively aided in the protection and improvement of the Nation's basic resources, including the restoration and maintenance of resources damaged by improper use, it is declared to be the policy of the United States that these arrangements and similar cooperative arrangements should be utilized to the fullest extent practicable to achieve the purpose of this chapter consistent with the roles and responsibilities of the non-Federal agencies, landowners and land users.

(c) Attainment of policies and purposes

The Secretary shall promote the attainment of the policies and purposes expressed in this chapter by—

- (1) appraising on a continuing basis the soil, water, and related resources of the Nation;
- (2) developing and updating periodically a program for furthering the conservation, protection, and enhancement of the soil, water, and related resources of the Nation consistent with the roles and program responsibilities of other Federal agencies and State and local governments; and
- (3) providing to Congress and the public, through reports, the information developed pursuant to paragraphs (1) and (2) of this subsection, and by providing Congress with an annual evaluation report as provided in section 2006 of this title.

(Pub. L. 95-192, § 4, Nov. 18, 1977, 91 Stat. 1407.)

§ 2004. Continuing appraisal of soil, water, and related resources

(a) Data

In recognition of the importance of and need for obtaining and maintaining information on the current status of soil, water, and related resources, the Secretary is authorized and directed

to carry out a continuing appraisal of the soil, water, and related resources of the Nation. The appraisal shall include, but not be limited to—

- (1) data on the quality and quantity of soil, water, and related resources, including fish and wildlife habitats;
- (2) data on the capability and limitations of those resources for meeting current and projected demands on the resource base;
- (3) data on the changes that have occurred in the status and condition of those resources resulting from various past uses, including the impact of farming technologies, techniques, and practices;
- (4) data on current Federal and State laws, policies, programs, rights, regulations, ownerships, and their trends and other considerations relating to the use, development, and conservation of soil, water, and related resources;
- (5) data on the costs and benefits of alternative soil and water conservation practices; and
- (6) data on alternative irrigation techniques regarding their costs, benefits, and impact on soil and water conservation, crop production, and environmental factors.

(b) Collection of data

The appraisal shall utilize data collected under this chapter and pertinent data and information collected by the Department of Agriculture and other Federal, State, and local agencies and organizations. The Secretary shall establish an integrated system capable of using combinations of resource data to determine the quality and capabilities for alternative uses of the resource base and to identify areas of local, State, and National concerns and related roles pertaining to soil and water conservation, resource use and development, and environmental improvement.

(c) Public participation

§ 2005. Soil and water conservation program

(a) Program development

The Secretary is hereby authorized and directed to develop in cooperation with and participation by the public through conservation districts, State and national organizations and agencies, and other appropriate means, a national soil and water conservation program (hereinafter called the “program”) to be used as a guide in carrying out the activities of the Secretary which assist landowners and land users, at their request, in furthering soil and water conservation on the private and non-Federal lands of the Nation. The program shall set forth direction for future soil and water conservation efforts of the United States Department of Agriculture based on the current soil, water, and related resource appraisal developed in accordance with section 2004 of this title, taking into consideration both the long- and short-term needs of the Nation, the landowners, and the land users, and the roles and responsibilities of Federal, State, and local governments in such conservation efforts. The program shall also include but not be limited to—

- (1) analysis of the Nation’s soil, water, and related resource problems;
- (2) analysis of existing Federal, State, and local government authorities and adjustments needed;

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 2006 of this title; title 7 section 3121.

§ 2005a. Repealed. Pub. L. 104–127, title III, § 336(e), Apr. 4, 1996, 110 Stat. 1007

Section, Pub. L. 99–198, title XII, §1251, Dec. 23, 1985, 99 Stat. 1516, related to technical assistance for water resources.

§ 2005b. Conservation of private grazing land

(a) Findings

Congress finds that—

- (1) private grazing land constitutes nearly ½ of the non-Federal land of the United States and is basic to the environmental, social, and economic stability of rural communities;
- (2) private grazing land contains a complex set of interactions among soil, water, air, plants, and animals;
- (3) grazing land constitutes the single largest watershed cover type in the United States and contributes significantly to the quality and quantity of water available for all of the many uses of the land;
- (4) private grazing land constitutes the most extensive wildlife habitat in the United States;
- (5) private grazing land can provide opportunities for improved nutrient management from land application of animal manures and other by-product nutrient resources;
- (6) owners and managers of private grazing land need to continue to recognize conservation problems when the problems arise and receive sound technical assistance to improve or

conserve grazing land resources to meet ecological and economic demands;

(7) new science and technology must continually be made available in a practical manner so owners and managers of private grazing land may make informed decisions concerning vital grazing land resources;

(8) agencies of the Department with private grazing land responsibilities are the agencies that have the expertise and experience to provide technical assistance, education, and research to owners and managers of private grazing land for the long-term productivity and ecological health of grazing land;

(9) although competing demands on private grazing land resources are greater than ever before, assistance to private owners and managers of private grazing land is currently limited and does not meet the demand and basic need for adequately sustaining or enhancing the private grazing land resources; and

(10) private grazing land can be enhanced to provide many benefits to all citizens of the United States through voluntary cooperation among owners and managers of the land, local conservation districts, and the agencies of the Department responsible for providing assistance to owners and managers of land and to conservation districts.

(b) Purpose

It is the purpose of this section to authorize the Secretary to provide a coordinated technical, educational, and related assistance program to conserve and enhance private grazing land resources and provide related benefits to all citizens of the United States by—

(1) establishing a coordinated and cooperative Federal, State, and local grazing conservation program for management of private grazing land;

(2) strengthening technical, educational, and related assistance programs that provide assistance to owners and managers of private grazing land;

(3) conserving and improving wildlife habitat on private grazing land;

(4) conserving and improving fish habitat and aquatic systems through grazing land conservation treatment;

(5) protecting and improving water quality;

(6) improving the dependability and consistency of water supplies;

(7) identifying and managing weed, noxious weed, and brush encroachment problems on private grazing land; and

(8) integrating conservation planning and management decisions by owners and managers of private grazing land, on a voluntary basis.

(c) Definitions

In this section:

(1) Department

The term “Department” means the Department of Agriculture.

(2) Private grazing land

The term “private grazing land” means private, State-owned, tribally-owned, and any other non-federally owned rangeland, pastureland, grazed forest land, and hay land.

(3) Secretary

The term “Secretary” means the Secretary of Agriculture.

(d) Private grazing land conservation assistance

(1) Assistance to grazing landowners and others

Subject to the availability of appropriations for this section, the Secretary shall establish a voluntary program to provide technical, educational, and related assistance to owners and managers of private grazing land and public agencies, through local conservation districts, to enable the landowners, managers, and public agencies to voluntarily carry out activities that are consistent with this section, including—

(A) maintaining and improving private grazing land and the multiple values and uses that depend on private grazing land;

(B) implementing grazing land management technologies;

(C) managing resources on private grazing land, including—

(i) planning, managing, and treating private grazing land resources;

(ii) ensuring the long-term sustainability of private grazing land resources;

(iii) harvesting, processing, and marketing private grazing land resources; and

(iv) identifying and managing weed, noxious weed, and brush encroachment problems;

(D) protecting and improving the quality and quantity of water yields from private grazing land;

(E) maintaining and improving wildlife and fish habitat on private grazing land;

(F) enhancing recreational opportunities on private grazing land;

(G) maintaining and improving the aesthetic character of private grazing lands; and

(H) identifying the opportunities and encouraging the diversification of private grazing land enterprises.

(2) Program elements

(A) Funding

If funding is provided to carry out this section, it shall be provided through a specific line-item in the annual appropriations for the Natural Resources Conservation Service.

(B) Technical assistance and education

Personnel of the Department trained in pasture and range management shall be made available under the program to deliver and coordinate technical assistance and education to owners and managers of private grazing land, at the request of the owners and managers.

(e) Grazing technical assistance self-help

(1) Findings

Congress finds that—

(A) there is a severe lack of technical assistance for farmers and ranchers who graze livestock;

(B) Federal budgetary constraints preclude any significant expansion, and may force a

reduction of, current levels of technical support; and

(C) farmers and ranchers have a history of cooperatively working together to address common needs in the promotion of their products and in the drainage of wet areas through drainage districts.

(2) Establishment of grazing demonstration

In accordance with paragraph (3), the Secretary may establish 2 grazing management demonstration districts at the recommendation of the grazing lands conservation initiative steering committee.

(3) Procedure

(A) Proposal

Within a reasonable time after the submission of a request of an organization of farmers or ranchers engaged in grazing, the Secretary shall propose that a grazing management district be established.

(B) Funding

The terms and conditions of the funding and operation of the grazing management district shall be proposed by the producers.

(C) Approval

The Secretary shall approve the proposal if the Secretary determines that the proposal—

- (i) is reasonable;
- (ii) will promote sound grazing practices; and
- (iii) contains provisions similar to the provisions contained in the beef promotion and research order issued under section 2903 of title 7 in effect on April 4, 1996.

(D) Area included

The area proposed to be included in a grazing management district shall be determined by the Secretary on the basis of a petition by farmers or ranchers.

(E) Authorization

The Secretary may use authority under the Agricultural Adjustment Act (7 U.S.C. 601 et seq.), reenacted with amendments by the Agricultural Marketing Agreement Act of 1937, to operate, on a demonstration basis, a grazing management district.

(F) Activities

The activities of a grazing management district shall be scientifically sound activities, as determined by the Secretary in consultation with a technical advisory committee composed of ranchers, farmers, and technical experts.

(f) Authorization of appropriations

There are authorized to be appropriated to carry out this section—

- (1) \$20,000,000 for fiscal year 1996;
- (2) \$40,000,000 for fiscal year 1997; and
- (3) \$60,000,000 for fiscal year 1998 and each subsequent fiscal year.

(Pub. L. 104-127, title III, § 386, Apr. 4, 1996, 110 Stat. 1017.)

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in sections 1606, 2106a of this title; title 7 section 6614.

§ 2101. Findings, purpose, and policy**(a) Findings**

Congress finds that—

(1) most of the productive forest land of the United States is in private, State, and local governmental ownership, and the capacity of the United States to produce renewable forest resources is significantly dependent on such non-Federal forest lands;

(2) adequate supplies of timber and other forest resources are essential to the United States, and adequate supplies are dependent on efficient methods for establishing, managing, and harvesting trees and processing, marketing, and using wood and wood products;

(3) nearly one-half of the wood supply of the United States comes from nonindustrial private timberlands and such percentage could rise with expanded assistance programs;

(4) managed forest lands provide habitats for fish and wildlife, as well as aesthetics, outdoor recreation opportunities, and other forest resources;

(5) the soil, water, and air quality of the United States can be maintained and improved through good stewardship of privately held forest resources;

(6) insects and diseases affecting trees occur and sometimes create emergency conditions on all land, whether Federal or non-Federal, and efforts to prevent and control such insects and diseases often require coordinated action by both Federal and non-Federal land managers;

(7) fires in rural areas threaten human lives, property, forests and other resources, and Federal-State cooperation in forest fire protection has proven effective and valuable;

(8) trees and forests are of great environmental and economic value to urban areas;

(9) managed forests contribute to improving the quality, quantity, and timing of water yields that are of broad benefit to society;

(10) over half the forest lands of the United States are in need of some type of conservation treatment;

(11) forest landowners are being faced with increased pressure to convert their forest land to development and other purposes;

(12) increased population pressures and user demands are being placed on private, as well as public, landholders to provide a wide variety of products and services, including fish and wildlife habitat, aesthetic quality, and recreational opportunities;

(13) stewardship of privately held forest resources requires a long-term commitment that can be fostered through local, State, and Federal governmental actions;

(14) the Department of Agriculture, through the coordinated efforts of its agencies with forestry responsibilities, cooperating with other Federal agencies, State foresters, and

State political subdivisions, has the expertise and experience to assist private landowners in achieving individual goals and public benefits regarding forestry;

(15) the products and services resulting from nonindustrial private forest land stewardship provide income and employment that contribute to the economic health and diversity of rural communities;¹

(16) sustainable agroforestry systems and tree planting in semiarid lands can improve environmental quality and maintain farm yields and income; and¹

(18)² the same forest resource supply, protection, and management issues that exist in the United States are also present on an international scale, and the forest and rangeland renewable resources of the world are threatened by deforestation due to conversion to agriculture of lands better suited to other purposes, over-grazing, over-harvesting, and other causes which pose a direct adverse threat to people, the global environment, and the world economy.¹

(b) Purpose

It is the purpose of this chapter to authorize the Secretary of Agriculture (hereafter in this chapter referred to as the "Secretary"), with respect to non-Federal forest lands in the United States, and forest lands in foreign countries, of the United States, to assist in—

(1) the establishment of a coordinated and cooperative Federal, State, and local forest stewardship program for management of the non-Federal forest lands;

(2) the encouragement of the production of timber;

(3) the prevention and control of insects and diseases affecting trees and forests;

(4) the prevention and control of rural fires;

(5) the efficient utilization of wood and wood residues, including the recycling of wood fiber;

(6) the improvement and maintenance of fish and wildlife habitat;

(7) the planning and conduct of urban forestry programs;

(8) broadening existing forest management, fire protection, and insect and disease protection programs on non-Federal forest lands to meet the multiple use objectives of landowners in an environmentally sensitive manner;

(9) providing opportunities to private landowners to protect ecologically valuable and threatened non-Federal forest lands; and

(10) strengthening educational, technical, and financial assistance programs that provide assistance to owners of non-Federal forest lands in the United States, and forest lands in foreign countries.³

(c) Policy

It is the policy of Congress that it is in the national interest for the Secretary to work through and in cooperation with State foresters, or equivalent State officials, nongovernmental organizations, and the private sector in imple-

menting Federal programs affecting non-Federal forest lands.

(d) Construction

TRANSFER OF FOREST TREE NURSERY FACILITIES TO STATES

Pub. L. 87-492, June 25, 1962, 76 Stat. 107, provided: “That the Congress recognizes that for many years the United States and certain States have cooperated in the production of tree planting stock for use in the reforestation of the public and private lands of the Nation; that the program of production of tree planting stock which was initiated and pursued under the Soil Bank Act (7 U.S.C. 1801 et seq.) [repealed] was carried on under written agreements which provided for (a) cooperation between the Forest Service, on behalf of the United States, and the States which participated in the program, (b) payments to said States for costs and expenses incurred in the development of nursery facilities, (c) the holding of such funds by the States in trust for the purpose of carrying out the provisions of said agreements, and (d) restoration to the trust fund of an amount equal to the residual value of any supplies, materials, equipment, or improvements acquired or constructed with trust funds and transferred to State forestry work other than the soil bank program; that such program under said Soil Bank Act has been discontinued, but the need for the trees continues to be great; that the States and Federal Government are cooperating in the procurement, production, and distribution of forest-tree seeds and plants under section 4 of the Clarke-McNary Act of June 7, 1924 (16 U.S.C. 567), and in the reforestation of lands under title IV of the Agricultural Act of 1956 (16 U.S.C. 568e and 568g); and that said participating States need the said supplies, materials, equipment, or improvements for use in connection with their respective forestry programs, and it is in the public interest to permit these States to use said property without the requirement that payment be made for the residual value thereof.

§ 2103. Forestry incentives program

(a) Development and implementation; statement of purposes

The Secretary is authorized to develop and implement a forestry incentives program to encourage the development, management, and protection of nonindustrial private forest lands. The purposes of such program shall be to en-

courage landowners to apply practices that will provide for afforestation of suitable open lands, reforestation of cutover or other nonstocked or understocked forest lands, timber stand improvement practices, including thinning, prescribed burning, and other silvicultural treatments, and forest resources management and protection, so as to provide for the production of timber and other forest resources associated therewith.

(b) “Private forest land” defined

For the purposes of this section, the term “private forest land” means land capable of producing crops of industrial wood and owned by any private individual, group, Indian tribe or other native group, association, corporation, or other legal entity.

(c) Eligibility of landowners for cost sharing; exemption; limitation on approval of cost sharing

Landowners shall be eligible for cost sharing under this program if they own one thousand acres or less of private forest land, except that the Secretary may approve cost sharing with landowners owning more than one thousand acres of such land if significant public benefits will accrue. In no case, however, may the Secretary approve cost sharing with landowners owning more than five thousand acres of private forest land.

(d) Administration

The Secretary shall administer this section in accordance with regulations the Secretary shall develop in consultation with the committee described in section 2109(c) of this title. Regulations issued under title X of the Agricultural Act of 1970, as in effect before the amendment made by section 336(d)(1) of the Federal Agriculture Improvement and Reform Act of 1996, to the extent not inconsistent with the provisions of this section, shall remain in effect until revoked or amended by regulations issued under this subsection. The regulations issued under this subsection shall include guidelines for the administration of this section at the Federal and State levels, and shall identify the measures and activities eligible for cost sharing under this section.

(e) Individual forest management plans as basis for agreements between landowners and Secretary; preparation of plans

Individual forest management plans developed by the landowner in cooperation with and approved by the State forester or equivalent State official shall be the basis for agreements between the landowner and the Secretary under this section. The Secretary shall encourage participating States to use private agencies, consultants, organizations, and firms to the extent feasible for the preparation of individual forest management plans.

(f) Cost sharing for implementation of appropriate forestry practices and measures set forth in agreement; apportionment; maximum amount

In return for the agreement by the landowner, the Secretary shall agree to share the cost of implementing those forestry practices and

measures set forth in the agreement for which the Secretary determines that cost sharing is appropriate. The portion of such cost (including labor) to be shared shall be that portion that the Secretary determines is necessary and appropriate to implement the forestry practices and measures under the agreement, but not more than 75 percent of the actual costs incurred by the landowner. The maximum amount any individual may receive annually under the program authorized by this section shall be determined by the Secretary in consultation with the committee described in section 2109(c) of this title.

(g) Prerequisites for distribution of funds available for cost sharing

The Secretary shall, for the purposes of this section, distribute funds available for cost sharing among the States only after assessing the public benefit incident thereto, and after giving appropriate consideration to (1) the acreage of private commercial forest land in each State, (2) the potential productivity of such land, (3) the number of ownerships eligible for cost sharing in each State, (4) the need for reforestation, timber stand improvement, or other forestry investments on such ownerships, and (5) the enhancement of other forest resources.

(h) Use of advertising and bid procedure in determining lands to be covered by agreements; prerequisites

The Secretary may, if the Secretary determines that doing so will contribute to the effective and equitable administration of the program authorized by this section, use an advertising and bid procedure in determining the lands in any area to be covered by agreements under this section.

(i) Applicability of other Federal authorities in implementation of provisions

In implementing this section, the Secretary may use the authorities provided in sections 1001, 1002, 1003, 1004, and 1008 of the Agricultural Act of 1970, as in effect before the amendment made by section 336(d)(1) of the Federal Agriculture Improvement and Reform Act of 1996.

(j) Authorization of appropriations

There are hereby authorized to be appropriated for each of fiscal years 1996 through 2002 such sums as may be needed to implement this section, including funds necessary for technical assistance and expenses associated therewith.

§ 2103a. Forest Stewardship Program**(a) Establishment**

The Secretary, in consultation with State foresters or equivalent State officials, shall establish a Forest Stewardship Program (hereafter referred to in this section as the “Program”) to encourage the long-term stewardship of non-industrial private forest lands by assisting owners of such lands to more actively manage their forest and related resources by utilizing existing State, Federal, and private sector resource management expertise and assistance programs.

(b) Goal

The goal of the Program shall be to enter at least 25,000,000 acres of nonindustrial private forest lands in the Program by December 31, 1995.

(c) “Nonindustrial private forest lands” defined

For the purposes of this section, the term “nonindustrial private forest lands” means rural, as determined by the Secretary, lands with existing tree cover, or suitable for growing trees, and owned by any private individual, group, association, corporation, Indian tribe, or other private legal entity.

(d) Implementation

In carrying out the Program the Secretary, in consultation with State foresters or equivalent State officials, shall provide financial, technical, educational, and related assistance to State foresters or equivalent State officials, including assistance to help such State foresters or equivalent officials to provide financial assistance to other State and local natural resource entities, both public and private, and land-grant universities for the delivery of information and professional assistance to owners of nonindustrial private forest lands. Such information and assistance shall be directed to help such owners understand and evaluate alternative actions they might take, including—

(1) managing and enhancing the productivity of timber, fish and wildlife habitat, water quality, wetlands, recreational resources, and the aesthetic value of forest lands;

(2) investing in practices to protect, maintain, and enhance the resources identified in paragraph (1);

(3) ensuring that afforestation, reforestation, improvement of poorly stocked stands,

timber stand improvement, practices necessary to improve seedling growth and survival, and growth enhancement practices occur where needed to enhance and sustain the long-term productivity of timber and nontimber forest resources to help meet future public demand for all forest resources and provide the environmental benefits that result; and

(4) protecting their forests from damage caused by fire, insects, disease, and damaging weather.

(e) Eligibility

All nonindustrial private forest lands that are not in management under Federal, State, or private sector financial and technical assistance programs existing on November 28, 1990, are eligible for assistance under the Program. Non-industrial private forest lands that are managed under such existing programs are eligible for assistance under the Program if forest management activities are expanded and enhanced and the landowner agrees to meet the requirements of this chapter.

(f) Duties of owners

To enter forest land into the Program, landowners shall—

(1) prepare and submit to the State forester or equivalent State official a forest stewardship plan that meets the requirements of this section and that—

(A) is prepared by a professional resource manager;

(B) identifies and describes actions to be taken by the landowner to protect soil, water, range, aesthetic quality, recreation, timber, water, and fish and wildlife resources on such land in a manner that is compatible with the objectives of the landowner; and

(C) is approved by the State forester, or equivalent State official; and

(2) agree that all activities conducted on such land shall be consistent with the stewardship plan.

(g) Stewardship recognition

The Secretary, in consultation with State foresters or equivalent State officials, is encouraged to develop an appropriate recognition program for landowners who practice stewardship management on their lands, with an appropriate, special recognition symbol and title.

(h) Authorization of appropriations

There are hereby authorized to be appropriated \$25,000,000 for each of the fiscal years 1991 through 1995, and such sums as may be necessary thereafter, to carry out this section.

§ 2103c. Forest Legacy Program

(a) Establishment and purpose

The Secretary shall establish a program, to be known as the Forest Legacy Program, in cooperation with appropriate State, regional, and other units of government for the purposes of ascertaining and protecting environmentally important forest areas that are threatened by conversion to nonforest uses and, through the use of conservation easements and other mechanisms, for promoting forest land protection and other conservation opportunities. Such purposes shall also include the protection of important scenic, cultural, fish, wildlife, and recreational resources, riparian areas, and other ecological values.

(b) State and regional forest legacy programs

The Secretary shall exercise the authority under subsection (a) of this section in conjunction with State or regional programs that the Secretary deems consistent with this section.

(c) Interests in land

In addition to the authorities granted under section 515 of this title and section 428a(a) of title 7, the Secretary may acquire from willing landowners lands and interests therein, including conservation easements and rights of public access, for Forest Legacy Program purposes. The Secretary shall not acquire conservation easements with title held in common ownership with any other entity.

(d) Implementation

(1) In general

Lands and interests therein acquired under subsection (c) of this section may be held in perpetuity for program and easement administration purposes as the Secretary may provide. In administering lands and interests therein under the program, the Secretary shall identify the environmental values to be protected by entry of the lands into the program, management activities which are planned and the manner in which they may af-

fect the values identified, and obtain from the landowner other information determined appropriate for administration and management purposes.

(2) Initial programs

Not later than November 28, 1991, the Secretary shall establish a regional program in furtherance of the Northern Forest Lands Study in the States of New York, New Hampshire, Vermont, and Maine under Public Law 100-446. The Secretary shall establish additional programs in each of the Northeast, Midwest, South, and Western regions of the United States, and the Pacific Northwest (including the State of Washington), on the preparation of an assessment of the need for such programs.

(e) Eligibility

Not later than November 28, 1991, and in consultation with State Forest Stewardship Coordinating Committees established under section 2113(b) of this title and similar regional organizations, the Secretary shall establish eligibility criteria for the designation of forest areas from which lands may be entered into the Forest Legacy Program and subsequently select such appropriate areas. To be eligible, such areas shall have significant environmental values or shall be threatened by present or future conversion to nonforest uses. Of land proposed to be included in the Forest Legacy Program, the Secretary shall give priority to lands which can be effectively protected and managed, and which have important scenic or recreational values; riparian areas; fish and wildlife values, including threatened and endangered species; or other ecological values.

(f) Application

For areas included in the Forest Legacy Program, an owner of lands or interests in lands who wishes to participate may prepare and submit an application at such time in such form and containing such information as the Secretary may prescribe. The Secretary shall give reasonable advance notice for the submission of all applications to the State forester, equivalent State official, or other appropriate State or regional natural resource management agency. If applications exceed the ability of the Secretary to fund them, priority shall be given to those forest areas having the greatest need for protection pursuant to the criteria described in subsection (e) of this section.

(g) State consent

Where a State has not approved the acquisition of land under section 515 of this title, the Secretary shall not acquire lands or interests therein under authority granted by this section outside an area of that State designated as a part of a program established under subsection (b) of this section.

(h) Forest management activities

(1) In general

Conservation easements or deed reservations acquired or reserved pursuant to this section may allow forest management activities, including timber management, on areas entered

in the Forest Legacy Program insofar as the Secretary deems such activities consistent with the purposes of this section.

(2) Assignment of responsibilities

For Forest Legacy Program areas, the Secretary may delegate or assign management and enforcement responsibilities over federally owned lands and interests in lands only to another governmental entity.

(i) Duties of owners

Under the terms of a conservation easement or other property interest acquired under subsection (b)¹ of this section, the landowner shall be required to manage property in a manner that is consistent with the purposes for which the land was entered in the Forest Legacy Program and shall not convert such property to other uses. Hunting, fishing, hiking, and similar recreational uses shall not be considered inconsistent with the purposes of this program.

(j) Compensation and cost sharing

(1) Compensation

The Secretary shall pay the fair market value of any property interest acquired under this section. Payments under this section shall be in accordance with Federal appraisal and acquisition standards and procedures.

(2) Cost sharing

In accordance with terms and conditions that the Secretary shall prescribe, costs for the acquisition of lands or interests therein or project costs shall be shared among participating entities including regional organizations, State and other governmental units, landowners, corporations, or private organizations. Such costs may include, but are not limited to, those associated with planning, administration, property acquisition, and property management. To the extent practicable, the Federal share of total program costs shall not exceed 75 percent, including any in-kind contribution.

(k) Easements

(1) Reserved interest deeds

As used in this section, the term “conservation easement” includes an easement utilizing a reserved interest deed where the grantee acquires all rights, title, and interests in a property, except those rights, title, and interests that may run with the land that are expressly reserved by a grantor.

(2) Prohibitions on limitations

Notwithstanding any provision of State law, no conservation easement held by the United States or its successors or assigns under this section shall be limited in duration or scope or be defeasible by—

(A) the conservation easement being in gross or appurtenant;

(B) the management of the conservation easement having been delegated or assigned to a non-Federal entity;

(C) any requirement under State law for re-recording or renewal of the easement; or

(D) any future disestablishment of a Forest Legacy Program area or other Federal project for which the conservation easement was originally acquired.

(3) Construction

Notwithstanding any provision of State law, conservation easements shall be construed to effect the Federal purposes for which they were acquired and, in interpreting their terms, there shall be no presumption favoring the conservation easement holder or fee owner.

(l) Optional State grants

(1) In general

The Secretary shall, at the request of a participating State, provide a grant to the State to carry out the Forest Legacy Program in the State.

(2) Administration

If a State elects to receive a grant under this subsection—

(A) the Secretary shall use a portion of the funds made available under subsection (m) of this section, as determined by the Secretary, to provide a grant to the State; and

(B) the State shall use the grant to carry out the Forest Legacy Program in the State, including the acquisition by the State of lands and interests in lands.

(m) Appropriation

There are authorized to be appropriated such sums as may be necessary to carry out this section.

§ 2105. Urban and community forestry assistance

(a) Findings

The Congress finds that—

(1) the health of forests in urban areas and communities, including cities, their suburbs, and towns, in the United States is on the decline;

(2) forest lands, shade trees, and open spaces in urban areas and communities improve the quality of life for residents;

(3) forest lands and associated natural resources enhance the economic value of residential and commercial property in urban and community settings;

(4) urban trees are 15 times more effective than forest trees at reducing the buildup of carbon dioxide and aid in promoting energy conservation through mitigation of the heat island effect in urban areas;

(5) tree plantings and ground covers such as low growing dense perennial turfgrass sod in urban areas and communities can aid in reducing carbon dioxide emissions, mitigating the heat island effect, and reducing energy consumption, thus contributing to efforts to reduce global warming trends;

(6) efforts to encourage tree plantings and protect existing open spaces in urban areas and communities can contribute to the social well-being and promote a sense of community in these areas; and

(7) strengthened research, education, technical assistance, and public information and participation in tree planting and maintenance programs for trees and complementary ground covers for urban and community forests are needed to provide for the protection and expansion of tree cover and open space in urban areas and communities.

(b) Purposes

The purposes of this section are to—

(1) improve understanding of the benefits of preserving existing tree cover in urban areas and communities;

(2) encourage owners of private residences and commercial properties to maintain trees and expand forest cover on their properties;

(3) provide education programs and technical assistance to State and local organizations (including community associations and schools) in maintaining forested lands and individual trees in urban and community settings and identifying appropriate tree species and sites for expanding forest cover;

(4) provide assistance through competitive matching grants awarded to local units of government, approved organizations that meet the requirements of section 501(c)(3) of title 26, or other local community tree volunteer groups, for urban and community forestry projects;

(5) implement a tree planting program to complement urban and community tree maintenance and open space programs and to reduce carbon dioxide emissions, conserve energy, and improve air quality in addition to providing other environmental benefits;

(6) promote the establishment of demonstration projects in selected urban and community settings to illustrate the benefits of maintaining and creating forest cover and trees;

(7) enhance the technical skills and understanding of sound tree maintenance and arboricultural practices including practices involving the cultivation of trees, shrubs and complementary ground covers, of individuals involved in the planning, development, and maintenance of urban and community forests and trees; and

(8) expand existing research and educational efforts intended to improve understanding of—

(A) tree growth and maintenance, tree physiology and morphology, species adaptations, and forest ecology,

(B) the value of integrating trees and ground covers,

(C) the economic, environmental, social, and psychological benefits of trees and forest cover in urban and community environments, and

(D) the role of urban trees in conserving energy and mitigating the urban heat island.

(c) General authority

The Secretary is authorized to provide financial, technical, and related assistance to State foresters or equivalent State officials for the purpose of encouraging States to provide information and technical assistance to units of local government and others that will encourage cooperative efforts to plan urban forestry programs and to plant, protect, and maintain, and utilize wood from, trees in open spaces, greenbelts, roadside screens, parks, woodlands, curb areas, and residential developments in urban areas. In providing such assistance, the Secretary is authorized to cooperate with interested members of the public, including nonprofit private organizations. The Secretary is also authorized to cooperate directly with units of local

government and others in implementing this section whenever the Secretary and the affected State forester or equivalent State official agree that direct cooperation would better achieve the purposes of this section.

(d) Program of education and technical assistance

The Secretary, in cooperation with State foresters and State extension directors or equivalent State officials and interested members of the public, including nonprofit private organizations, shall implement a program of education and technical assistance for urban and community forest resources. The program shall be designed to—

(1) assist urban areas and communities in conducting inventories of their forest resources, including inventories of the species, number, location, and health of trees in urban areas and communities, identifying opportunities for the establishment of plantings for the purposes of conserving energy, and determining the status of related resources (including fish and wildlife habitat, water resources, and trails);

(2) assist State and local organizations (including community associations and schools) in organizing and conducting urban and community forestry projects and programs;

(3) improve education and technical support in—

(A) selecting tree species appropriate for planting in urban and community environments and for promotion of energy conservation;

(B) providing for proper tree planting, maintenance, and protection in urban areas and communities;

(C) protecting individual trees and preserving existing open spaces with or without tree cover; and

(D) identifying opportunities for expanding tree cover in urban areas and communities;

(4) assist in the development of State and local management plans for trees and associated resources in urban areas and communities; and

(5) increase public understanding of the energy conservation, economic, social, environmental, and psychological values of trees and open space in urban and community environments and expand knowledge of the ecological relationships and benefits of trees and related resources in these environments.

(e) Procurement of plant materials

The Secretary, in cooperation with State foresters or equivalent State officials, shall assist in identifying sources of plant materials and may procure or otherwise obtain such plant materials from public or private sources and may make such plant materials available to urban areas and communities for the purpose of reforesting open spaces, replacing dead and dying urban trees, promoting energy conservation, and providing other environmental benefits through expanding tree cover in urban areas and communities.

(f) Challenge cost-share program

(1) In general

The Secretary shall establish an urban and community forestry challenge cost-share program. Funds or other support shall be provided under such program to eligible communities and organizations, on a competitive basis, for urban and community forestry projects. Each State forester or equivalent State official may make recommendations to the Secretary for awards under the program for project proposals in their State which meet such criteria. Awards shall be consistent with the cost-share requirements of this section.

(2) Cost-sharing

The Federal share of support for a project provided under this subsection may not exceed 50 percent of the support for that project and shall be provided on a matching basis. The non-Federal share of such support may be in the form of cash, services, or in-kind contributions.

(g) Forestry Advisory Council

§ 2106. Rural fire prevention and control

(a) Congressional findings

Congress finds that—

(1) significant accomplishments have been made by the Secretary and cooperating States in the prevention and control of fires on forest lands and on nonforested watersheds for more than fifty years;

(2) progress is being made by the Secretary and cooperating States and rural communities in the protection of human lives, agricultural crops and livestock, property and other improvements, and natural resources from fires in rural areas;

§ 2301. Congressional statement of findings and purpose

(a) The Congress hereby finds that—

(1) the purpose of the National Park System is to preserve outstanding natural, scenic, historic, and recreation areas for the enjoyment, education, inspiration, and use of all people;

(2) units of the National Park System have recently been established near major metropolitan areas in order to preserve remaining open space and to provide recreational opportunities for urban residents (many of whom do not have access to personal motor vehicles); and

(3) circumstances which necessarily require people desiring to visit units of the National Park System to rely on personal motor vehicles may diminish the natural and recreational value of such units by causing traffic congestion and environmental damage, and by requiring the provision of roads, parking, and other facilities in ever-increasing numbers and density.

(b) The purpose of this chapter is to make the National Park System more accessible in a manner consistent with the preservation of parks and the conservation of energy by encouraging the use of transportation modes other than personal motor vehicles for access to and within units of the National Park System with minimum disruption to nearby communities through authorization of a pilot transportation program.

(Pub. L. 95-344, title III, §301, Aug. 15, 1978, 92 Stat. 477.)

§ 2302. Transportation service and facility programs

To carry out the purposes of subsection (a) of this section, the Secretary is authorized to—

(2) operate such services directly in the absence of suitable and adequate agencies or carriers;

(4) where necessary to carry out the purposes of this chapter, acquire by lease, purchase, donation, exchange, or transfer, lands, waters, and interests therein which are situated outside the boundary of a unit of the national park system, which property shall be administered as part of the unit: *Provided*, That any land or interests in land owned by a State or any of its political subdivisions may be acquired only by donation: *Provided further*, That any land acquisition shall be subject to such statutory limitations, if any, on methods of acquisition and appropriations thereof as may be specifically applicable to such area.

(c) Repealed. Pub. L. 104-333, div. I, title VIII, § 814(d)(1)(A), Nov. 12, 1996, 110 Stat. 4195

(d) Appropriation of fees collected and covered into Planning, Development, and Operation of Recreational Facilities appropriation account

All fees directly collected by the National Park Service in the operation of the facilities and services authorized by this chapter shall be covered into the Planning, Development, and Operation of Recreation Facilities appropriation account to be subject to appropriation.

(e) Establishment of information programs

The Secretary shall establish information programs to inform the public of available park access opportunities and to promote the use of transportation modes other than personal motor vehicles for access to and travel within the units of the national park system.

(f) Undertaking of concession facilities or services

Transportation facilities and services provided pursuant to this chapter shall not be considered as concession facilities or services within the meaning of the Act of October 9, 1965 (79 Stat. 969)¹ and may be undertaken by the Secretary

(g) Construction of grant of authority respecting operation of motor vehicles excepted from statutory coverage

No grant of authority in this chapter shall be deemed to expand the exemption of section 10526(a)(9)¹ of title 49.

(Pub. L. 95-344, title III, §302, Aug. 15, 1978, 92 Stat. 478; Pub. L. 103-437, §6(d)(18), Nov. 2, 1994, 108 Stat. 4584; Pub. L. 104-333, div. I, title VIII, §814(d)(1)(A), Nov. 12, 1996, 110 Stat. 4195.)

§ 2401. Congressional findings and declaration of purpose

(a) Findings

- The Congress finds that—
- (1) for well over a quarter of a century, scientific investigation has been the principal activity of the Federal Government and United States nationals in Antarctica;
 - (2) more recently, interest of American tourists in Antarctica has increased;
 - (3) as the lead civilian agency in Antarctica, the National Science Foundation has long had responsibility for ensuring that United States scientific activities and tourism, and their supporting logistics operations, are conducted with an eye to preserving the unique values of the Antarctic region;
 - (4) the Antarctic Treaty and the Protocol establish a firm foundation for the conservation of Antarctic resources, for the continuation of international cooperation and the freedom of scientific investigation in Antarctica; and
 - (5) the Antarctic Treaty and the Protocol establish international mechanisms and create legal obligations necessary for the maintenance of Antarctica as a natural reserve devoted to peace and science.

(b) Purpose

The purpose of this chapter is to provide for the conservation and protection of the fauna

and flora of Antarctica, and of the ecosystem upon which such fauna and flora depend, consistent with the Antarctic Treaty and the Protocol. (Pub. L. 95-541, §2, Oct. 28, 1978, 92 Stat. 2048; Pub. L. 104-227, title I, §101, Oct. 2, 1996, 110 Stat. 3034.)

AMENDMENTS

1996—Subsec. (a)(1) to (3). Pub. L. 104-227, §101(a)(1), added pars. (1) to (3). Former pars. (1) and (2) redesignated (4) and (5), respectively.

Subsec. (a)(4). Pub. L. 104-227, §101(a)(1), (2), redesignated par. (1) as (4) and substituted “the Protocol establish a firm foundation for the conservation of Antarctic resources,” for “the Agreed Measures for the Conservation of Antarctic Fauna and Flora, adopted at the Third Antarctic Treaty Consultative Meeting, have established a firm foundation”.

Subsec. (a)(5). Pub. L. 104-227, §101(a)(1), (3), redesignated par. (2) as (5) and substituted “the Antarctic Treaty and the Protocol establish international mechanisms and create legal obligations necessary for the maintenance of Antarctica as a natural reserve devoted to peace and science.” for “the study of Antarctic fauna and flora, their adaptation to their rigorous environment, and their interrelationships with that environment has special scientific importance for all mankind.”

Subsec. (b). Pub. L. 104-227, §101(b), substituted “Treaty and the Protocol” for “Treaty, the Agreed Measures for the Conservation of Antarctic Fauna and Flora, and Recommendation VII-3 of the Eighth Antarctic Treaty Consultative Meeting”.

SHORT TITLE OF 1996 AMENDMENT

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 2404, 2405, 2407, 2408, 2409 of this title.

§ 2403a. Environmental impact assessment

(a) Federal activities

(1)(A) The obligations of the United States under Article 8 of and Annex I to the Protocol shall be implemented by applying the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) to proposals for Federal agency activities in Antarctica, as specified in this section.

(B) The obligations contained in section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) shall apply to all proposals for Federal agency activities occurring in Antarctica and affecting the quality of the human environment in Antarctica or dependent or associated ecosystems, only as specified in this section. For purposes of the application of such section 102(2)(C) under this subsection, the term “significantly affecting the quality of the human environment” shall have the same meaning as the term “more than a minor or transitory impact”.

(2)(A) Unless an agency which proposes to conduct a Federal activity in Antarctica determines that the activity will have less than a minor or transitory impact, or unless a comprehensive environmental evaluation is being prepared in accordance with subparagraph (C), the agency shall prepare an initial environmental evaluation in accordance with Article 2 of Annex I to the Protocol.

(B) If the agency determines, through the preparation of the initial environmental evaluation, that the proposed Federal activity is likely to have no more than a minor or transitory impact, the activity may proceed if appropriate procedures are put in place to assess and verify the impact of the activity.

(C) If the agency determines, through the preparation of the initial environmental evaluation or otherwise, that a proposed Federal activity is likely to have more than a minor or transitory impact, the agency shall prepare and circulate a comprehensive environmental evalua-

tion in accordance with Article 3 of Annex I to the Protocol, and shall make such comprehensive environmental evaluation publicly available for comment.

(3) Any agency decision under this section on whether a proposed Federal activity, to which paragraph (2)(C) applies, should proceed, and, if so, whether in its original or in a modified form, shall be based on the comprehensive environmental evaluation as well as other considerations which the agency, in the exercise of its discretion, considers relevant.

(4) For the purposes of this section, the term “Federal activity” includes all activities conducted under a Federal agency research program in Antarctica, whether or not conducted by a Federal agency.

(b) Federal activities carried out jointly with foreign governments

(1) For the purposes of this subsection, the term “Antarctic joint activity” means any Federal activity in Antarctica which is proposed to be conducted, or which is conducted, jointly or in cooperation with one or more foreign governments. Such term shall be defined in regulations promulgated by such agencies as the President may designate.

(2) Where the Secretary of State, in cooperation with the lead United States agency planning an Antarctic joint activity, determines that—

(A) the major part of the joint activity is being contributed by a government or governments other than the United States;

(B) one such government is coordinating the implementation of environmental impact assessment procedures for that activity; and

(C) such government has signed, ratified, or acceded to the Protocol,

the requirements of subsection (a) of this section shall not apply with respect to that activity.

(3) In all cases of Antarctic joint activity other than those described in paragraph (2), the requirements of subsection (a) of this section shall apply with respect to that activity, except as provided in paragraph (4).

(4) Determinations described in paragraph (2), and agency actions and decisions in connection with assessments of impacts of Antarctic joint activities, shall not be subject to judicial review.

(c) Nongovernmental activities

(1) The Administrator shall, within 2 years after October 2, 1996, promulgate regulations to provide for—

(A) the environmental impact assessment of nongovernmental activities, including tourism, for which the United States is required to give advance notice under paragraph 5 of Article VII of the Treaty; and

(B) coordination of the review of information regarding environmental impact assessment received from other Parties under the Protocol.

(2) Such regulations shall be consistent with Annex I to the Protocol.

(d) Decision to proceed

(1) No decision shall be taken to proceed with an activity for which a comprehensive environ-

mental evaluation is prepared under this section unless there has been an opportunity for consideration of the draft comprehensive environmental evaluation at an Antarctic Treaty Consultative Meeting, except that no decision to proceed with a proposed activity shall be delayed through the operation of this paragraph for more than 15 months from the date of circulation of the draft comprehensive environmental evaluation pursuant to Article 3(3) of Annex I to the Protocol.

(2) The Secretary of State shall circulate the final comprehensive environmental evaluation, in accordance with Article 3(6) of Annex I to the Protocol, at least 60 days before the commencement of the activity in Antarctica.

(e) Cases of emergency

The requirements of this section, and of regulations promulgated under this section, shall not apply in cases of emergency relating to the safety of human life or of ships, aircraft, or equipment and facilities of high value, or the protection of the environment, which require an activity to be undertaken without fulfilling those requirements.

(f) Exclusive mechanism

Notwithstanding any other provision of law, the requirements of this section shall constitute the sole and exclusive statutory obligations of the Federal agencies with regard to assessing the environmental impacts of proposed Federal activities occurring in Antarctica.

(g) Decisions on permit applications

The provisions of this section requiring environmental impact assessments (including initial environmental evaluations and comprehensive environmental evaluations) shall not apply to Federal actions with respect to issuing permits under section 2404 of this title.

(h) Publication of notices

Whenever the Secretary of State makes a determination under paragraph (2) of subsection (b) of this section, or receives a draft comprehensive environmental evaluation in accordance with Annex I, Article 3(3) to the Protocol, the Secretary of State shall cause timely notice thereof to be published in the Federal Register.

§ 2404. Permits

(a) In general

The Director may issue permits which authorize acts otherwise prohibited by section 2403(b) of this title.

(b) Applications for permits

(1) Applications for permits under this section shall be made in such manner and form, and

shall contain such information, as the Director shall by regulation prescribe.

(2) The Director shall publish notice in the Federal Register of each application which is made for a permit under this section. The notice shall invite the submission by interested parties, within 30 days after the date of publication of the notice, of written data, comments, or views with respect to the application. Information received by the Director as a part of any application shall be available to the public as a matter of public record.

(c) Action by appropriate Secretaries on certain permit applications

(1) If the Director receives an application for a permit under this section requesting authority to undertake any action with respect to—

(A) any native mammal which is a marine mammal within the meaning of section 1362(5)¹ of this title;

(B) any native mammal, native bird, or native plant which is an endangered species or threatened species under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.); or

(C) any native bird which is protected under the Migratory Bird Treaty Act (16 U.S.C. 701 et seq.);

the Director shall submit a copy of the application to the Secretary of Commerce or to the Secretary of the Interior, as appropriate (hereinafter in this subsection referred to respectively as the “appropriate Secretary”).

(2) After receiving a copy of any application from the Director under paragraph (1) the appropriate Secretary shall promptly determine, and notify the Director, whether or not any action proposed in the application also requires a permit or other authorization under any law administered by the appropriate Secretary.

(3) If the appropriate Secretary notifies the Director that any action proposed in the application requires a permit or other authorization under any law administered by the appropriate Secretary, the Director may not issue a permit under this section with respect to such action unless such other required permit or authorization is issued by the appropriate Secretary and a copy thereof is submitted to the Director. The issuance of any permit or other authorization by the appropriate Secretary for the carrying out of any action with respect to any native mammal, native bird, or native plant shall not be deemed to entitle the applicant concerned to the issuance by the Director of a permit under this section.

(d) Issuance of permits

As soon as practicable after receiving any application for a permit under this section, or, in the case of any application to which subsection (c) of this section applies, as soon as practicable after the applicable requirements of such subsection are complied with, the Director shall issue, or deny the issuance of, the permit. Within 10 days after the date of the issuance or denial of a permit under this subsection, the Director shall publish notice of the issuance or denial in the Federal Register.

¹ See References in Text note below.

(e)² Terms and conditions of permits

(1) Each permit issued under this section shall—

(A) if applicable, specify—

(i) the number and species of native mammals, native birds, native plants, or native invertebrates to which the permit applies, and

(ii) the manner in which the taking or harmful interference shall be conducted (which manner shall be determined by the Director to be humane) and the area in which it will be conducted;

(B) the period during which the permit is valid; and

(C) such other terms and conditions as the Director deems necessary and appropriate to ensure that any act authorized under the permit is carried out in a manner consistent with the purpose of this chapter, the criteria set forth in paragraph (2), if applicable, and the regulations prescribed under this chapter.

(2) The terms and conditions imposed by the Director in any permit issued under this section that authorizes any of the following acts shall be consistent with the following criteria:

(A) Permits authorizing the taking or harmful interference within Antarctica of any native mammal or native bird (other than a Specially Protected Species of any such mammal or bird)—

(i) may be issued only for the purpose of providing—

(I) specimens for scientific study or scientific information, or

(II) specimens for museums, zoological gardens, or other educational or cultural institutions or uses, or

(III) for unavoidable consequences of scientific activities or the construction and operation of scientific support facilities; and

(ii) shall ensure, as far as possible, that—

(I) no more native mammals and native birds are taken in any year than can normally be replaced by net natural reproduction in the following breeding season, and

(II) the variety of species and the balance of the natural ecological systems within Antarctica are maintained.

(B) Permits authorizing the taking of Specially Protected Species may be issued only if—

(i) there is a compelling scientific purpose for such taking; and

(ii) the actions allowed under any such permit will not jeopardize any existing natural ecological system, or the survival, of such species.

(C) A permit authorizing the entry into an Antarctic Specially Protected Area shall be issued only—

(i) if the entry is consistent with an approved management plan, or

(ii) if a management plan relating to the area has not been approved but—

(I) there is a compelling purpose for such entry which cannot be served elsewhere, and

(II) the actions allowed under the permit will not jeopardize the natural ecological system existing in such area.

(e)³ Judicial review

Any applicant for a permit may obtain judicial review of the terms and conditions of any permit issued by the Director under this section or of the refusal of the Director to issue such a permit. Such review, which shall be pursuant to chapter 7 of title 5, may be initiated by filing a petition for review in the United States district court for the district wherein the applicant for a permit resides, or has his principal place of business, or in the United States District Court for the District of Columbia, within 60 days after the date on which such permit is issued or denied.

(f) Modification, suspension, and revocation

(1) The Director may modify, suspend, or revoke, in whole or part, any permit issued under this section—

(A) in order to make the permit consistent with any change made after the date of issuance of the permit, to any regulation prescribed under section 2405 of this title;

(B) if there is any change in conditions which makes the permit inconsistent with the purpose of this chapter; or

(C) in any case in which there has been any violation of any term or condition of the permit, any regulation prescribed under this chapter, or any provision of this chapter.

(2) Whenever the Director proposes any modification, suspension, or revocation of a permit under this subsection, the permittee shall be afforded opportunity, after due notice, for a hearing by the Director with respect to such proposed modification, suspension, or revocation. If a hearing is requested, the action proposed by the Director shall not take effect before a decision is issued by him after the hearing, unless the proposed action is taken by the Director to meet an emergency situation. Any action taken by the Director after such a hearing is subject to judicial review on the same basis as is provided for with respect to permit applications under subsection (e) of this section.

(3) Notice of the modification, suspension, or revocation of any permit by the Director shall be published in the Federal Register within 10 days from the date of the Director's decision.

(g) Permit fees

The Director may establish and charge fees for processing applications for permits under this section. The amount of such fees shall be commensurate with the administrative costs incurred by the Director in undertaking such processing.

(Pub. L. 98-623, title III, §306, Nov. 8, 1984, 98 Stat. 3401.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 2437, 2438, 2439 of this title.

§ 2436. Regulations

The Secretary of Commerce, after consultation with the Secretary of State, the Secretary of the department in which the Coast Guard is operating, and the heads of other appropriate departments or agencies of the United States, shall promulgate such regulations as are necessary and appropriate to implement the provisions of this chapter.

(Pub. L. 98-623, title III, §307, Nov. 8, 1984, 98 Stat. 3401.)

§ 2437. Civil penalties**(a) Assessment of penalties**

(1) Any person who is found by the Secretary of Commerce, after notice and opportunity for a hearing in accordance with subsection (b) of this section, to have committed any act prohibited by section 2435 of this title shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$5,000 for each violation unless the prohibited act was knowingly committed, in which case the amount of the civil penalty shall not exceed \$10,000 for each violation. Each day of a continuing violation shall constitute a separate violation for purposes of this subsection. The amount of any civil penalty shall be assessed by the Secretary of Commerce by written notice. In determining the amount of such penalty, the Secretary of Commerce shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed, and, with respect to the person committing the violation, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require, to the extent that such information is reasonably available to the Secretary.

(2) The Secretary of Commerce may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section, until such time as the matter is referred to the Attorney General under subsection (c) of this section.

(b) Hearings

Hearings for the assessment of civil penalties under subsection (a) of this section shall be conducted in accordance with section 554 of title 5. For the purposes of conducting any such hearing, the Secretary of Commerce may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpoena served upon any person pursuant to this subsection, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the Attorney General of the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary of Commerce or to appear and produce documents before the Secretary of Commerce, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(c) Review of civil penalty

Any person against whom a civil penalty is assessed under subsection (a) of this section may obtain review thereof in the appropriate district court of the United States by filing a notice of appeal in such court within 30 days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary of Commerce, the Attorney General, and the appropriate United States Attorney.

The Secretary of Commerce shall promptly refer the matter to the Attorney General of the United States, who shall file in such court a certified copy of the record upon which the violation was found or such penalty imposed, as provided in section 2112 of title 28. The court shall set aside the findings and order of the Secretary if the findings and order are found to be unsupported by substantial evidence, as provided in section 706(2)(E) of title 5.

(d) Recovery of civil penalties

The Attorney General of the United States may seek to recover in any appropriate district court of the United States (1) any civil penalty imposed under this section that has become a final and unappealable order and has been referred to the Attorney General by the Secretary of Commerce or (2) any final judgment rendered under this section in favor of the United States by an appropriate Court.

(e) Penalties under other laws

The assessment of a civil penalty under subsection (a) of this section for any act shall not be deemed to preclude the assessment of a civil penalty for such act under any other law.

(Pub. L. 98-623, title III, §308, Nov. 8, 1984, 98 Stat. 3401.)

§ 2438. Criminal offenses**(a) Offenses**

A person is guilty of an offense if that person commits any act prohibited by paragraph (4), (5), (6), or (7) of section 2435 of this title.

(b) Punishment

Any offense described in subsection (a) of this section is punishable by a fine of \$50,000, or imprisonment for not more than ten years, or both.

(c) Offenses under other laws

A conviction under subsection (a) of this section for any act shall not be deemed to preclude a conviction for such act under any other law.

(Pub. L. 98-623, title III, §309, Nov. 8, 1984, 98 Stat. 3403.)

§ 2439. Enforcement**(a) Responsibility**

The provisions of this chapter shall be enforced by the Secretary of Commerce and the Secretary of the department in which the Coast Guard is operating. Such Secretaries may utilize by agreement, on a reimbursable basis or otherwise, the personnel, services, and facilities of any other department or agency of the United States in the performance of such duties.

(b) Powers of authorized officers and employees

Any officer or employee of the United States who is authorized (by the Secretary of Commerce, the Secretary of the department in which the Coast Guard is operating, or the head of any department or agency of the United States which has entered into an agreement with either Secretary under subsection (a) of this section) to enforce the provisions of this chapter and of any regulation promulgated under this chapter may, in enforcing such provisions—

(1) secure, execute, and serve any order, warrant, subpoena, or other process, which is issued under the authority of the United States;

(2) search without warrant any person, place, vehicle or aircraft subject to the jurisdiction of the United States where there are reasonable grounds to believe that a person has committed or is attempting to commit an act prohibited by section 2435 of this title;

(3) with or without a warrant board and search or inspect any vessel of the United States or vessel subject to the jurisdiction of the United States;

(4) seize without warrant—

(A) any evidentiary item where there are reasonable grounds to believe that a person has committed or is attempting to commit an act prohibited by section 2435 of this title,

(B) any Antarctic marine living resources (or part of¹ product thereof) with respect to which such an act is committed,

(C) any vessel of the United States (including its gear, furniture, appurtenances, stores, and cargo), any vessel subject to the jurisdiction of the United States (including its gear, furniture, appurtenances, stores, and cargo), and any vehicle, aircraft, or other means of transportation subject to the jurisdiction of the United States used in connection with such an act, and

(D) any guns, traps, nets, or equipment used in connection with such an act;

(5) offer and pay rewards for services or information which may lead to the apprehension of persons violating such provisions;

(6) make inquiries, and administer to, or take from, any person an oath, affirmation, or affidavit, concerning any matter which is related to the enforcement of such provisions;

(7) in coordination with the Secretary of the Treasury, detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation into, or exportation from, the United States;

(8) make an arrest with or without a warrant with respect to any act prohibited by paragraph (4), (5), (6), or (7) of section 2435 of this title if such officer or employee has reasonable grounds to believe that the person to be arrested is committing such act in his or her presence or view or has committed such act;

(9) exercise enforcement powers conferred on such officer or employee under a system of observation and inspection, or interim arrangements pending the establishment of such a system, which the Secretary of State has agreed to on behalf of the United States pursuant to section 2434(b) of this title; and

(c) Seizure

Subject to the succeeding provisions of this subsection, any property or item seized pursuant to subsection (b) of this section shall be held by any officer or employee of the United States,

who is authorized by the Secretary of Commerce or the Secretary of the department in which the Coast Guard is operating, pending the disposition of civil or criminal proceedings concerning the violation relating to the property or item, or the institution of an action in rem for the forfeiture of such property or item. Such authorized officer or employee may, upon the order of a court of competent jurisdiction, either release such seized property or item to the wild or destroy such property or item, when the cost of maintenance of the property or item pending the disposition of the case is greater than the legitimate market value of the property or item. Such authorized officer or employee and all officers or employees acting by or under his or her direction shall be indemnified from any penalties or actions for damages for so releasing or destroying such property or item. Such authorized officer or employee may, in lieu of holding such property or item, permit the owner or consignee thereof to post a bond or other satisfactory surety.

(d) Forfeiture

(1) Any Antarctic marine living resource (or part or product thereof) with respect to which an act prohibited by section 2435 of this title is committed, any vessel of the United States (including its gear, furniture, appurtenances, stoves, and cargo), vessel subject to the jurisdiction of the United States (including its gear, furniture, appurtenances, stoves, and cargo), or vessel, vehicle, or aircraft or other means of transportation subject to the jurisdiction of the United States, which is used in connection with an act prohibited by section 2435 of this title, and all guns, traps, nets, and other equipment used in connection with such act, shall be subject to forfeiture to the United States.

(2) Upon the forfeiture to the United States of any property or item described in paragraph (1), or upon the abandonment or waiver of any claim to any such property or item, it shall be disposed of by the Secretary of Commerce, or the Secretary of the department in which the Coast Guard is operating, as the case may be, in such a manner, consistent with the purposes of this chapter, as may be prescribed by regulation.

(e) Application of customs laws

All provisions of law relating to the seizure, forfeiture, and condemnation of property (including vessels) for violation of the customs laws, the disposition of such property or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, and the compromise of claims, under the provisions of this chapter, insofar as such provisions of law are applicable and not inconsistent with the provisions of this chapter; except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Customs Service may, for the purposes of this chapter, also be exercised or performed by the Secretary of Commerce or the Secretary of the department in which the Coast Guard is operating, or by such officers or employees of the United States as each Secretary may designate.

RESOURCES PROTECTION**

Sec.	
2461.	Findings and purpose. (a) Findings. (b) Purpose.
2462.	Definitions.
2463.	Prohibition of Antarctic mineral resource activities.
2464.	Repealed.
2465.	Enforcement. (a) In general. (b) Penalty.
2466.	Repealed.

§ 2461. Findings and purpose**(a) Findings**

Congress finds that—

(1) the Antarctic continent with its associated and dependent ecosystems is a distinctive environment providing a habitat for many unique species and offering a natural laboratory from which to monitor critical aspects of stratospheric ozone depletion and global climate change;

(2) Antarctica is protected by a series of international agreements, including the Antarctic Treaty and associated recommendations, the Convention on the Conservation of Antarctic Seals, and the Convention on the Conservation of Antarctic Marine Living Resources, which are intended to conserve the renewable natural resources of Antarctica and to recognize the importance of Antarctica for the conduct of scientific research;

(3) recurring and recent developments in Antarctica, including increased siting of sci-

entific stations, poor waste disposal practices, oil spills, increased tourism, and the over-exploitation of marine living resources, have raised serious questions about the adequacy and implementation of existing agreements and domestic law to protect the Antarctic environment and its living marine resources;

(4) the parties to the Antarctic Treaty have negotiated a Convention on the Regulation of Antarctic Mineral Resources Activities which the United States has signed but not yet ratified;

(5) the Convention on the Regulation of Antarctic Mineral Resources Activities does not guarantee the preservation of the fragile environment of Antarctica and could actually stimulate movement toward Antarctic mineral resource activity;

(6) the exploitation of mineral resources in Antarctica could lead to additional degradation of the Antarctic environment, including increased risk of oil spills;

(7) the Antarctic Treaty Consultative Parties have agreed to a voluntary ban on Antarctic mineral resource activities which needs to be made legally binding;

(8) the level of scientific study, including necessary support facilities, has increased to the point that some scientific programs may be degrading the Antarctic environment; and

(9) the planned special consultative meeting of parties to the Antarctic Treaty and the imminence of the thirtieth anniversary of the Antarctic Treaty provide opportunities for the United States to exercise leadership toward protection and sound management of Antarctica.

(b) Purpose

The purpose of this chapter is to—

(1) strengthen substantially overall environmental protection of Antarctica;

(2) prohibit prospecting, exploration, and development of Antarctic mineral resources by United States citizens and other persons subject to the jurisdiction of the United States;

(3) urge other nations to join the United States in immediately negotiating one or more new agreements to provide an indefinite ban on all Antarctic mineral resource activities and comprehensive protection for Antarctica and its associated and dependent ecosystems; and

(4) urge all nations to consider a permanent ban on Antarctic mineral resource activities.

(Pub. L. 101-594, §2, Nov. 16, 1990, 104 Stat. 2975.)

SHORT TITLE

Section 1 of Pub. L. 101-594 provided that: "This Act [enacting this chapter] may be cited as the 'Antarctic Protection Act of 1990'."

the meaning of article III of the Antarctic Treaty, done at Washington on December 1, 1959.

(3) The term “development” means any activity, including logistic support, which takes place following exploration, the purpose of which is the exploitation of specific mineral resource deposits, including processing, storage, and transport activities.

(4) The term “exploration” means any activity, including logistic support, the purpose of which is the identification or evaluation of specific mineral resource deposits. The term includes exploratory drilling, dredging, and other surface or subsurface excavations required to determine the nature and size of mineral resource deposits and the feasibility of their development.

(5) The term “mineral resources” means all nonliving natural nonrenewable resources, including fossil fuels, minerals, whether metallic or nonmetallic, but does not include ice, water, or snow.

(6) The term “person” means any individual, corporation, partnership, trust, association, or any other entity existing or organized under the laws of the United States, or any officer, employee, agent, department, or other instrumentality of the Federal Government or of any State or political subdivision thereof.

(7) The term “prospecting” means any activity, including logistic support, the purpose of which is the identification of mineral resource potential for possible exploration and development.

(8) The term “Under Secretary” means the Under Secretary of Commerce for Oceans and Atmosphere.

(Pub. L. 101-594, § 3, Nov. 16, 1990, 104 Stat. 2976.)

Section, Pub. L. 101-594, § 5, Nov. 16, 1990, 104 Stat. 2977, declared the sense of Congress that Secretary of State should negotiate international agreements relating to protection of Antarctic environment and that any such international agreement be consistent with purpose and provisions of this chapter.

§ 2465. Enforcement

(a) In general

A violation of this chapter or any regulation promulgated under this chapter is deemed to be a violation of the Antarctic Marine Living Resources Convention Act (16 U.S.C. 2431-2444) and shall be enforced under that Act by the Under Secretary or another Federal official to whom the Under Secretary has delegated this responsibility.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 43 section 1457a.

§ 2501. Congressional findings

The Congress finds that—

(a) the quality of life in urban areas is closely related to the availability of fully functional park and recreation systems including land, facilities, and service programs;

(b) residents of cities need close-to-home recreational opportunities that are adequate to specialized urban demands, with parks and facilities properly located, developed, and well maintained;

(c) the greatest recreational deficiencies with respect to land, facilities, and programs are found in many large cities, especially at the neighborhood level;

(d) inadequate financing of urban recreation programs due to fiscal difficulties in many large cities has led to the deterioration of facilities, nonavailability of recreation services, and an inability to adapt recreational programs to changing circumstances; and

(e) there is no existing Federal assistance program which fully addresses the needs for physical rehabilitation and revitalization of these park and recreation systems.

(Pub. L. 95-625, title X, §1002, Nov. 10, 1978, 92 Stat. 3538.)

SHORT TITLE

Section 1001 of title X of Pub. L. 95-625 provided that: "This title [enacting this chapter] may be cited as the 'Urban Park and Recreation Recovery Act of 1978'."

§ 2502. Congressional statement of purpose; complementary program authorization; terms and conditions

The purpose of this chapter is to authorize the Secretary to establish an urban park and recreation recovery program which would provide Federal grants to economically hard-pressed communities specifically for the rehabilitation of critically needed recreation areas, facilities, and development of improved recreation programs. This program is intended to complement existing Federal programs such as the Land and Water Conservation Fund and Community Development Grant Programs by encouraging and stimulating local governments to revitalize their park and recreation systems and to make long-term commitments to continuing maintenance of these systems. Such assistance shall be subject to such terms and conditions as the Secretary considers appropriate and in the public interest to carry out the purposes of this chapter. It is further the purpose of this chapter to improve recreation facilities and expand recreation services in urban areas with a high incidence of crime and to help deter crime through the expansion of recreation opportunities for at-risk youth. It is the further purpose of this section¹ to increase the security of urban parks and to promote collaboration between local agencies involved in parks and recreation, law enforcement, youth social services, and juvenile justice system.

§ 2504. Federal assistance grants

(a) General purpose local governments eligible for assistance; basis; publication in Federal Register: list of eligibles, criteria of eligibility

Eligibility of general purpose local governments for assistance under this chapter shall be based upon need as determined by the Secretary. Within one hundred and twenty days after November 10, 1978, the Secretary shall publish in the Federal Register, a list of the local governments eligible to participate in this program, to be accompanied by a discussion of criteria used in determining eligibility. Such criteria shall be based upon factors which the Secretary determines are related to deteriorated recreational facilities or systems, and physical and economic distress.

(b) Other general purpose local governments eligible for assistance; limitation of funds

Notwithstanding the list of eligible local governments established in accordance with subsection (a) of this section, the Secretary is also authorized to establish eligibility, at his discretion and in accord with the findings and purpose of this chapter, to other general purpose local governments in standard metropolitan statistical areas as defined by the census: *Provided*, That grants to these discretionary applicants do not exceed in the aggregate 15 per centum of funds appropriated under this chapter for rehabilitation, innovation, and recovery action program grants.

(c) Priority criteria for project selection and approval

The Secretary shall also establish priority criteria for project selection and approval which consider such factors as—

(2) condition of existing recreation areas and facilities;

(3) demonstrated deficiencies in access to neighborhood recreation opportunities, particularly for minority, and low- and moderate-income residents;

(4) public participation in determining rehabilitation or development needs;

(5) the extent to which a project supports or complements target activities undertaken as part of a local government's overall community development and urban revitalization program;

(6) the extent to which a proposed project would provide employment opportunities for minorities, youth, and low- and moderate-income residents in the project neighborhood and/or would provide for participation of neighborhood, nonprofit or tenant organizations in the proposed rehabilitation activity or in subsequent maintenance, staffing, or supervision of recreation areas and facilities;

(7) the amount of State and private support for a project as evidenced by commitments of non-Federal resources to project construction or operation; and

(8) in the case of at-risk youth recreation grants, the Secretary shall give a priority to each of the following criteria:

(A) Programs which are targeted to youth who are at the greatest risk of becoming involved in violence and crime.

(B) Programs which teach important values and life skills, including teamwork, respect, leadership, and self-esteem.

(C) Programs which offer tutoring, remedial education, mentoring, and counseling in addition to recreation opportunities.

AMENDMENTS

1994—Subsec. (c)(8). Pub. L. 103-322, which directed the addition of par. (8) to this section without specifying the subsec. to which par. (8) was to be added, was executed by adding par. (8) to subsec. (c) to reflect the probable intent of Congress.

“SECRETARY” DEFINED

Secretary means the Secretary of the Interior, see section 2 of Pub. L. 95-625, set out as a note under section 2503 of this title.

§ 2505. Rehabilitation and innovation grants

(a) Authorization; transfer; payments; modification

The Secretary is authorized to provide 70 per centum matching rehabilitation and innovative

grants directly to eligible general purpose local governments upon his approval of applications therefor by the chief executives of such governments.

(1) At the discretion of such applicants, and if consistent with an approved application, rehabilitation and innovation grants may be transferred in whole or in part to independent special purpose local governments, private nonprofit agencies or county or regional park authorities: *Provided*, That assisted recreation areas and facilities owned or managed by them offer recreation opportunities to the general population within the jurisdictional boundaries of an eligible applicant.

(2) Payments may be made only for those rehabilitation or innovative projects which have been approved by the Secretary. Such payments may be made from time to time in keeping with the rate of progress toward the satisfactory completion of a project, except that the Secretary may, when appropriate, make advance payments on approved rehabilitation and innovative projects in an amount not to exceed 20 per centum of the total project cost.

(3) The Secretary may authorize modification of an approved project only when a grantee has adequately demonstrated that such modification is necessary because of circumstances not foreseeable at the time a project was proposed.

(b) Special considerations

Innovation grants should be closely tied to goals, priorities, and implementation strategies expressed in local park and recreation recovery action programs, with particular regard to the special considerations listed in section 2506(b)(2) of this title.

(Pub. L. 95-625, title X, §1006, Nov. 10, 1978, 92 Stat. 3541.)

“SECRETARY” DEFINED

Secretary means the Secretary of the Interior, see section 2 of Pub. L. 95-625, set out as a note under section 2503 of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 2507, 2512 of this title.

§ 2506. Local commitments to system recovery and maintenance

(a) Recovery action programs; preliminary action programs; five-year recovery action programs; continuing planning process

As a requirement for project approval, local governments applying for assistance under this chapter shall submit to the Secretary evidence of their commitments to ongoing planning, rehabilitation, service, operation, and maintenance programs for their park and recreation systems. These commitments will be expressed in local park and recreation recovery action programs which maximize coordination of all community resources, including other federally supported urban development and recreation programs. During an initial interim period to be established by regulations under this chapter, this requirement may be satisfied by local government submissions of preliminary action programs which briefly define objectives, priorities,

and implementation strategies for overall system recovery and maintenance and commit the applicant to a scheduled program development process. Following this interim period, all local applicants shall submit to the Secretary, as a condition of eligibility, a five-year action program for park and recreation recovery that satisfactorily demonstrate:

(1) systematic identification of recovery objectives, priorities, and implementation strategies;

(2) adequate planning for rehabilitation of specific recreation areas and facilities, including projections of the cost of proposed projects;

(3) capacity and commitment to assure that facilities provided or improved under this chapter shall thereafter continue to be adequately maintained, protected, staffed, and supervised;

(4) intention to maintain total local public outlays for park and recreation purposes at levels at least equal to those in the year preceding that in which grant assistance is sought beginning in fiscal year 1980 except in any case where a reduction in park and recreation outlays is proportionate to a reduction in overall spending by the applicant; and

(5) the relationship of the park and recreation recovery program to overall community development and urban revitalization efforts.

Where appropriate, the Secretary may encourage local governments to meet action program requirements through a continuing planning process which includes periodic improvements and updates in action program submissions to eliminate identified gaps in program information and policy development.

(b) Recovery action program special considerations

Action programs shall address, but are not limited to the following considerations:

(1) Rehabilitation of existing recreational sites and facilities, including general system-wide renovation; special rehabilitation requirements for recreational sites and facilities in areas of high population concentration and economic distress; and restoration of outstanding or unique structures, landscaping, or similar features in parks of historical or architectural significance.

(2) Local commitments to innovative and cost-effective programs and projects at the neighborhood level to augment recovery of park and recreation systems, including but not limited to recycling of abandoned schools and other public buildings for recreational purposes; multiple use of operating educational and other public buildings; purchase of recreation services on a contractual basis; use of mobile facilities and recreational, cultural, and educational programs or other innovative approaches to improving access for neighborhood residents; integration of recovery program with federally assisted projects to maximize recreational opportunities through conversion of abandoned railroad and highway rights-of-way, waterfront, and other redevelopment efforts and such other federally assisted projects as may be appropriate; conver-

sion of recreation use of street space, derelict land, and other public lands not now designated for neighborhood recreational use; and use of various forms of compensated and uncompensated land regulation, tax inducements, or other means to encourage the private sector to provide neighborhood park and recreation facilities and programs.

The Secretary shall establish and publish in the Federal Register requirements for preparation, submission, and updating of local park and recreation recovery action programs. In order to be eligible to receive "at-risk youth recreation grants" a local government shall amend its 5-year action program to incorporate the goal of reducing crime and juvenile delinquency and to provide a description of the implementation strategies to achieve this goal. The plan shall also address how the local government is coordinating its recreation programs with crime prevention efforts of law enforcement, juvenile corrections, and youth social service agencies.

(c) Recovery action program grants

The Secretary is authorized to provide up to 50 per centum matching grants to eligible local applicants for program development and planning specifically to meet the objectives of this chapter.

(Pub. L. 95-625, title X, §1007, Nov. 10, 1978, 92 Stat. 3541; Pub. L. 103-322, title III, §31504, Sept. 13, 1994, 108 Stat. 1889.)

AMENDMENTS

1994—Subsec. (b). Pub. L. 103-322 inserted at end of concluding provisions "In order to be eligible to receive 'at-risk youth recreation grants' a local government shall amend its 5-year action program to incorporate the goal of reducing crime and juvenile delinquency and to provide a description of the implementation strategies to achieve this goal. The plan shall also address how the local government is coordinating its recreation programs with crime prevention efforts of law enforcement, juvenile corrections, and youth social service agencies."

"SECRETARY" DEFINED

Secretary means the Secretary of the Interior, see section 2 of Pub. L. 95-625, set out as a note under section 2503 of this title.

§ 2507. State action incentive; Federal implementation grants, increase

The Secretary is authorized to increase Federal implementation grants authorized in section 2505 of this title by providing an additional match equal to the total match provided by a State of up to 15 per centum of total project costs. In no event may the Federal matching amount exceed 85 per centum of total project cost. The Secretary shall further encourage the States to assist him in assuring that local recovery plans and programs are adequately implemented by cooperating with the Department of the Interior in monitoring local park and recreation recovery plans and programs and in assuring consistency of such plans and programs, where appropriate, with State recreation

policies as set forth in statewide comprehensive outdoor recreation plans.

§ 2508. Matching requirements; non-Federal share of project costs

The non-Federal share of project costs assisted under this chapter may be derived from general or special purpose State or local revenues. State categorical grants, special appropriations by State legislatures, donations of land, buildings, or building materials and/or in-kind construction, technical, and planning services. No moneys from the Land and Water Conservation Fund (77 Stat. 49), as amended [16 U.S.C. 4601-5], or from any other Federal grant program other than general revenue sharing and the community development block grant programs shall be used to match Federal grants under this program. Reasonable local costs of action program development to meet the requirements of section 2506(a) of this title may be used as part of the local match only when local applicants have not received program development grants under the authority of section 2506(c) of this title. The Secretary shall encourage States and private interests to contribute, to the maximum extent possible, to the non-Federal share of project costs.

§ 2601. Findings

The Congress finds that the protection of the public health, safety, and welfare, the preservation of national security, and the proper exercise of congressional authority under the Constitution to regulate interstate commerce require—

- (1) a program providing for increased conservation of electric energy, increased efficiency in the use of facilities and resources by electric utilities, and equitable retail rates for electric consumers,
- (2) a program to improve the wholesale distribution of electric energy, the reliability of electric service, the procedures concerning consideration of wholesale rate applications before the Federal Energy Regulatory Commission, the participation of the public in matters before the Commission, and to provide other measures with respect to the regulation of the wholesale sale of electric energy,
- (3) a program to provide for the expeditious development of hydroelectric potential at existing small dams to provide needed hydroelectric power,
- (4) a program for the conservation of natural gas while insuring that rates to natural gas consumers are equitable,
- (5) a program to encourage the development of crude oil transportation systems, and
- (6) the establishment of certain other authorities as provided in title VI of this Act.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 824a-4 of this title.

§ 2612. Coverage

(a) Volume of total retail sales

This chapter applies to each electric utility in any calendar year, and to each proceeding relating to each electric utility in such year, if the total sales of electric energy by such utility for purposes other than resale exceeded 500 million kilowatt-hours during any calendar year beginning after December 31, 1975, and before the immediately preceding calendar year.

(b) Exclusion of wholesale sales

The requirements of this chapter do not apply to the operations of an electric utility, or to proceedings respecting such operations, to the extent that such operations or proceedings relate to sales of electric energy for purposes of resale.

(c) List of covered utilities

Before the beginning of each calendar year, the Secretary shall publish a list identifying

each electric utility to which this chapter applies during such calendar year. Promptly after publication of such list each State regulatory authority shall notify the Secretary of each electric utility on the list for which such State regulatory authority has ratemaking authority. § 2613. Federal contracts

Notwithstanding the limitation contained in section 2612(b) of this title, no contract between a Federal agency and any electric utility for the sale of electric energy by such Federal agency for resale which is entered into or renewed after November 9, 1978, may contain any provision which will have the effect of preventing the implementation of any requirement of subchapter II or III of this chapter. Any provision in any such contract which has such effect shall be null and void.

SUBCHAPTER II—STANDARDS FOR ELECTRIC UTILITIES

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in sections 2613, 2631, 2632, 2633, 2634, 2642 of this title.

§ 2621. Consideration and determination respecting certain ratemaking standards

(a) Consideration and determination

Each State regulatory authority (with respect to each electric utility for which it has ratemaking authority) and each nonregulated electric utility shall consider each standard established by subsection (d) of this section and make a determination concerning whether or not it is appropriate to implement such standard to carry out the purposes of this chapter. For purposes of such consideration and determination in accordance with subsections (b) and (c) of this section, and for purposes of any review of such consideration and determination in any court in accordance with section 2633 of this title, the purposes of this chapter supplement otherwise applicable State law. Nothing in this subsection prohibits any State regulatory authority or nonregulated electric utility from making any determination that it is not appropriate to implement any such standard, pursuant to its authority under otherwise applicable State law.

(b) Procedural requirements for consideration and determination

(1) The consideration referred to in subsection (a) of this section shall be made after public notice and hearing. The determination referred to in subsection (a) of this section shall be—

(A) in writing,

(B) based upon findings included in such determination and upon the evidence presented at the hearing, and

(C) available to the public.

(2) Except as otherwise provided in paragraph (1), in the second sentence of section 2622(a) of this title, and in sections 2631 and 2632 of this title, the procedures for the consideration and determination referred to in subsection (a) of this section shall be those established by the State regulatory authority or the nonregulated electric utility.

(c) Implementation

(1) The State regulatory authority (with respect to each electric utility for which it has ratemaking authority) or nonregulated electric utility may, to the extent consistent with otherwise applicable State law—

(A) implement any such standard determined under subsection (a) of this section to be appropriate to carry out the purposes of this chapter, or

(B) decline to implement any such standard.

(2) If a State regulatory authority (with respect to each electric utility for which it has ratemaking authority) or nonregulated electric utility declines to implement any standard established by subsection (d) of this section which is determined under subsection (a) of this section to be appropriate to carry out the purposes of this chapter, such authority or nonregulated electric utility shall state in writing the reasons therefor. Such statement of reasons shall be available to the public.

(3) If a State regulatory authority implements a standard established by subsection (d)(7) or (8) of this section, such authority shall—

(A) consider the impact that implementation of such standard would have on small businesses engaged in the design, sale, supply, installation or servicing of energy conservation, energy efficiency or other demand side management measures, and

(B) implement such standard so as to assure that utility actions would not provide such utilities with unfair competitive advantages over such small businesses.

(d) Establishment

The following Federal standards are hereby established:

(1) Cost of service

Rates charged by any electric utility for providing electric service to each class of electric consumers shall be designed, to the maximum extent practicable, to reflect the costs of providing electric service to such class, as determined under section 2625(a) of this title.

(2) Declining block rates

The energy component of a rate, or the amount attributable to the energy component in a rate, charged by any electric utility for providing electric service during any period to any class of electric consumers may not decrease as kilowatt-hour consumption by such class increases during such period except to the extent that such utility demonstrates that the costs to such utility of providing electric service to such class, which costs are attributable to such energy component, decrease as such consumption increases during such period.

(3) Time-of-day rates

The rates charged by any electric utility for providing electric service to each class of electric consumers shall be on a time-of-day basis which reflects the costs of providing electric service to such class of electric consumers at different times of the day unless such rates are not cost-effective with respect to such class, as determined under section 2625(b) of this title.

(4) Seasonal rates

The rates charged by an electric utility for providing electric service to each class of electric consumers shall be on a seasonal basis which reflects the costs of providing service to such class of consumers at different seasons of the year to the extent that such costs vary seasonally for such utility.

(5) Interruptible rates

Each electric utility shall offer each industrial and commercial electric consumer an interruptible rate which reflects the cost of providing interruptible service to the class of which such consumer is a member.

(6) Load management techniques

Each electric utility shall offer to its electric consumers such load management techniques as the State regulatory authority (or the nonregulated electric utility) has determined will—

(A) be practicable and cost-effective, as determined under section 2625(c) of this title,

(B) be reliable, and

(C) provide useful energy or capacity management advantages to the electric utility.

(7) Integrated resource planning

Each electric utility shall employ integrated resource planning. All plans or filings before a State regulatory authority to meet the requirements of this paragraph must be updated on a regular basis, must provide the opportunity for public participation and comment, and contain a requirement that the plan be implemented.

(8) Investments in conservation and demand management

The rates allowed to be charged by a State regulated electric utility shall be such that the utility's investment in and expenditures for energy conservation, energy efficiency resources, and other demand side management measures are at least as profitable, giving appropriate consideration to income lost from reduced sales due to investments in and expenditures for conservation and efficiency, as its investments in and expenditures for the construction of new generation, transmission, and distribution equipment. Such energy conservation, energy efficiency resources and other demand side management measures shall be appropriately monitored and evaluated.

(9) Energy efficiency investments in power generation and supply

The rates charged by any electric utility shall be such that the utility is encouraged to make investments in, and expenditures for, all

cost-effective improvements in the energy efficiency of power generation, transmission and distribution. In considering regulatory changes to achieve the objectives of this paragraph, State regulatory authorities and non-regulated electric utilities shall consider the disincentives caused by existing ratemaking policies, and practices, and consider incentives that would encourage better maintenance, and investment in more efficient power generation, transmission and distribution equipment.

(10) Consideration of the effects of wholesale power purchases on utility cost of capital; effects of leveraged capital structures on the reliability of wholesale power sellers; and assurance of adequate fuel supplies

(A) To the extent that a State regulatory authority requires or allows electric utilities for which it has ratemaking authority to consider the purchase of long-term wholesale power supplies as a means of meeting electric demand, such authority shall perform a general evaluation of:

(i) the potential for increases or decreases in the costs of capital for such utilities, and any resulting increases or decreases in the retail rates paid by electric consumers, that may result from purchases of long-term wholesale power supplies in lieu of the construction of new generation facilities by such utilities;

(ii) whether the use by exempt wholesale generators (as defined in section 79z-5a of title 15) of capital structures which employ proportionally greater amounts of debt than the capital structures of such utilities threatens reliability or provides an unfair advantage for exempt wholesale generators over such utilities;

(iii) whether to implement procedures for the advance approval or disapproval of the purchase of a particular long-term wholesale power supply; and

(iv) whether to require as a condition for the approval of the purchase of power that there be reasonable assurances of fuel supply adequacy.

(B) For purposes of implementing the provisions of this paragraph, any reference contained in this section to November 9, 1978, shall be deemed to be a reference to October 24, 1992.

(C) Notwithstanding any other provision of Federal law, nothing in this paragraph shall prevent a State regulatory authority from taking such action, including action with respect to the allowable capital structure of exempt wholesale generators, as such State regulatory authority may determine to be in the public interest as a result of performing evaluations under the standards of subparagraph (A).

(D) Notwithstanding section 2634 of this title and paragraphs (1) and (2) of section 2622(a) of this title, each State regulatory authority shall consider and make a determination concerning the standards of subparagraph (A) in accordance with the requirements of subsections (a) and (b) of this section, without re-

gard to any proceedings commenced prior to October 24, 1992.

(E) Notwithstanding subsections (b) and (c) of section 2622 of this title, each State regulatory authority shall consider and make a determination concerning whether it is appropriate to implement the standards set out in subparagraph (A) not later than one year after October 24, 1992.

§ 2622. Obligations to consider and determine

(a) Request for consideration and determination

Each State regulatory authority (with respect to each electric utility for which it has ratemaking authority) and each nonregulated electric utility may undertake the consideration and make the determination referred to in section 2621 of this title with respect to any standard established by section 2621(d) of this title in any proceeding respecting the rates of the electric utility. Any participant or intervenor (including an intervenor referred to in section 2631 of this title) in such a proceeding may request, and shall obtain, such consideration and determination in such proceeding. In undertaking such consideration and making such determination in any such proceeding with respect to the application to any electric utility of any standard established by section 2621(d) of this title, a State regulatory authority (with respect to an electric utility for which it has ratemaking authority) or nonregulated electric utility may take into account in such proceeding—

(1) any appropriate prior determination with respect to such standard—

(A) which is made in a proceeding which takes place after November 9, 1978, or

(B) which was made before such date (or is made in a proceeding pending on such date) and complies, as provided in section 2634 of this title, with the requirements of this chapter; and

(2) the evidence upon which such prior determination was based (if such evidence is referenced in such proceeding).

(b) Time limitations

(1) Not later than 2 years after November 9, 1978 (or after October 24, 1992, in the case of standards under paragraphs (7), (8), and (9) of section 2621(d) of this title), each State regulatory authority (with respect to each electric utility for which it has ratemaking authority) and each nonregulated electric utility shall commence the consideration referred to in section 2621 of this title, or set a hearing date for such consideration, with respect to each standard established by section 2621(d) of this title.

(2) Not later than three years after November 9, 1978 (or after October 24, 1992, in the case of standards under paragraphs (7), (8), and (9) of section 2621(d) of this title), each State regulatory authority (with respect to each electric

utility for which it has ratemaking authority), and each nonregulated electric utility, shall complete the consideration, and shall make the determination, referred to in section 2621 of this title with respect to each standard established by section 2621(d) of this title.

(c) Failure to comply

Each State regulatory authority (with respect to each electric utility for which it has ratemaking authority) and each nonregulated electric utility shall undertake the consideration, and make the determination, referred to in section 2621 of this title with respect to each standard established by section 2621(d) of this title in the first rate proceeding commenced after the date three years after November 9, 1978, respecting the rates of such utility if such State regulatory authority or nonregulated electric utility has not, before such date, complied with subsection (b)(2) of this section with respect to such standard.

§ 2623. Adoption of certain standards

(a) Adoption of standards

Not later than two years after November 9, 1978, each State regulatory authority (with respect to each electric utility for which it has ratemaking authority), and each nonregulated electric utility, shall provide public notice and conduct a hearing respecting the standards established by subsection (b) of this section and, on the basis of such hearing, shall—

(1) adopt the standards established by subsection (b) of this section (other than paragraph (4) thereof) if, and to the extent, such authority or nonregulated electric utility determines that such adoption is appropriate to carry out the purposes of this chapter, is otherwise appropriate, and is consistent with otherwise applicable State law, and

(2) adopt the standard established by subsection (b)(4) of this section if, and to the extent, such authority or nonregulated electric utility determines that such adoption is appropriate and consistent with otherwise applicable State law.

For purposes of any determination under paragraphs (1) or (2) and any review of such deter-

mination in any court in accordance with section 2633 of this title, the purposes of this chapter supplement otherwise applicable State law. Nothing in this subsection prohibits any State regulatory authority or nonregulated electric utility from making any determination that it is not appropriate to adopt any such standard, pursuant to its authority under otherwise applicable State law.

(b) Establishment

The following Federal standards are hereby established:

(1) Master metering

To the extent determined appropriate under section 2625(d) of this title, master metering of electric service in the case of new buildings shall be prohibited or restricted to the extent necessary to carry out the purposes of this chapter.

(2) Automatic adjustment clauses

No electric utility may increase any rate pursuant to an automatic adjustment clause unless such clause meets the requirements of section 2625(e) of this title.

(3) Information to consumers

Each electric utility shall transmit to each of its electric consumers information regarding rate schedules in accordance with the requirements of section 2625(f) of this title.

(4) Procedures for termination of electric service

No electric utility may terminate electric service to any electric consumer except pursuant to procedures described in section 2625(g) of this title.

(5) Advertising

No electric utility may recover from any person other than the shareholders (or other owners) of such utility any direct or indirect expenditure by such utility for promotional or political advertising as defined in section 2625(h) of this title.

(c) Procedural requirements

Each State regulatory authority (with respect to each electric utility for which it has rate-making authority) and each nonregulated electric utility, within the two-year period specified in subsection (a) of this section, shall (1) adopt, pursuant to subsection (a) of this section, each of the standards established by subsection (b) of this section, or, (2) with respect to any such standard which is not adopted, such authority or nonregulated electric utility shall state in writing that it has determined not to adopt such standard, together with the reasons for such determination. Such statement of reasons shall be available to the public.

(Pub. L. 95-617, title I, § 113, Nov. 9, 1978, 92 Stat. 3123.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 2625, 2626, 2627, 2641 of this title.

§ 2624. Lifeline rates

(a) Lower rates

No provision of this chapter prohibits a State regulatory authority (with respect to an electric

utility for which it has ratemaking authority) or a nonregulated electric utility from fixing, approving, or allowing to go into effect a rate for essential needs (as defined by the State regulatory authority or by the nonregulated electric utility, as the case may be) of residential electric consumers which is lower than a rate under the standard referred to in section 2621(d)(1) of this title.

(b) Determination

If any State regulated electric utility or nonregulated electric utility does not have a lower rate as described in subsection (a) of this section in effect two years after November 9, 1978, the State regulatory authority having ratemaking authority with respect to such State regulated electric utility or the nonregulated electric utility, as the case may be, shall determine, after an evidentiary hearing, whether such a rate should be implemented by such utility.

(c) Prior proceedings

Section 2634 of this title shall not apply to the requirements of this section.

(Pub. L. 95-617, title I, § 114, Nov. 9, 1978, 92 Stat. 3124.)

§ 2625. Special rules for standards

(a) Cost of service

In undertaking the consideration and making the determination under section 2621 of this title with respect to the standard concerning cost of service established by section 2621(d)(1) of this title, the costs of providing electric service to each class of electric consumers shall, to the maximum extent practicable, be determined on the basis of methods prescribed by the State regulatory authority (in the case of a State regulated electric utility) or by the electric utility (in the case of a nonregulated electric utility). Such methods shall to the maximum extent practicable—

(1) permit identification of differences in cost-incurrence, for each such class of electric consumers, attributable to daily and seasonal time of use of service and

(2) permit identification of differences in cost-incurrence attributable to differences in customer demand, and energy components of cost. In prescribing such methods, such State regulatory authority or nonregulated electric utility shall take into account the extent to which total costs to an electric utility are likely to change if—

(A) additional capacity is added to meet peak demand relative to base demand; and

(B) additional kilowatt-hours of electric energy are delivered to electric consumers.

(b) Time-of-day rates

In undertaking the consideration and making the determination required under section 2621 of this title with respect to the standard for time-of-day rates established by section 2621(d)(3) of this title, a time-of-day rate charged by an electric utility for providing electric service to each class of electric consumers shall be determined to be cost-effective with respect to each such class if the long-run benefits of such rate to the electric utility and its electric consumers in the

class concerned are likely to exceed the metering costs and other costs associated with the use of such rates.

(c) Load management techniques

In undertaking the consideration and making the determination required under section 2621 of this title with respect to the standard for load management techniques established by section 2621(d)(6) of this title, a load management technique shall be determined, by the State regulatory authority or nonregulated electric utility, to be cost-effective if—

- (1) such technique is likely to reduce maximum kilowatt demand on the electric utility, and
- (2) the long-run cost-savings to the utility of such reduction are likely to exceed the long-run costs to the utility associated with implementation of such technique.

(d) Master metering

Separate metering shall be determined appropriate for any new building for purposes of section 2623(b)(1) of this title if—

- (1) there is more than one unit in such building,
- (2) the occupant of each such unit has control over a portion of the electric energy used in such unit, and
- (3) with respect to such portion of electric energy used in such unit, the long-run benefits to the electric consumers in such building exceed the costs of purchasing and installing separate meters in such building.

(e) Automatic adjustment clauses

(1) An automatic adjustment clause of an electric utility meets the requirements of this subsection if—

(A) such clause is determined, not less often than every four years, by the State regulatory authority (with respect to an electric utility for which it has ratemaking authority) or by the electric utility (in the case of a nonregulated electric utility), after an evidentiary hearing, to provide incentives for efficient use of resources (including incentives for economical purchase and use of fuel and electric energy) by such electric utility, and

(B) such clause is reviewed not less often than every two years, in the manner described in paragraph (2), by the State regulatory authority having ratemaking authority with respect to such utility (or by the electric utility, in the case of a nonregulated electric utility), to insure the maximum economies in those operations and purchases which affect the rates to which such clause applies.

(2) In making a review under subparagraph (B) of paragraph (1) with respect to an electric utility, the reviewing authority shall examine and, if appropriate, cause to be audited the practices of such electric utility relating to costs subject to an automatic adjustment clause, and shall require such reports as may be necessary to carry out such review (including a disclosure of any ownership or corporate relationship between such electric utility and the seller to such utility of fuel, electric energy, or other items).

(3) As used in this subsection and section 2623(b) of this title, the term “automatic adjust-

ment clause” means a provision of a rate schedule which provides for increases or decreases (or both), without prior hearing, in rates reflecting increases or decreases (or both) in costs incurred by an electric utility. Such term does not include an interim rate which takes effect subject to a later determination of the appropriate amount of the rate.

(f) Information to consumers

(1) For purposes of the standard for information to consumers established by section 2623(b)(3) of this title, each electric utility shall transmit to each of its electric consumers a clear and concise explanation of the existing rate schedule and any rate schedule applied for (or proposed by a nonregulated electric utility) applicable to such consumer. Such statement shall be transmitted to each such consumer—

(A) not later than sixty days after the date of commencement of service to such consumer or ninety days after the standard established by section 2623(b)(3) of this title is adopted with respect to such electric utility, whichever last occurs, and

(B) not later than thirty days (sixty days in the case of an electric utility which uses a bi-monthly billing system) after such utility's application for any change in a rate schedule applicable to such consumer (or proposal of such a change in the case of a nonregulated utility).

(2) For purposes of the standard for information to consumers established by section 2623(b)(3) of this title, each electric utility shall transmit to each of its electric consumers not less frequently than once each year—

(A) a clear and concise summary of the existing rate schedules applicable to each of the major classes of its electric consumers for which there is a separate rate, and

(B) an identification of any classes whose rates are not summarized.

Such summary may be transmitted together with such consumer's billing or in such other manner as the State regulatory authority or nonregulated electric utility deems appropriate.

(3) For purposes of the standard for information to consumers established by section 2623(b)(3) of this title, each electric utility, on request of an electric consumer of such utility, shall transmit to such consumer a clear and concise statement of the actual consumption (or degree-day adjusted consumption) of electric energy by such consumer for each billing period during the prior year (unless such consumption data is not reasonably ascertainable by the utility).

(g) Procedures for termination of electric service

The procedures for termination of service referred to in section 2623(b)(4) of this title are procedures prescribed by the State regulatory authority (with respect to electric utilities for which it has ratemaking authority) or by the nonregulated electric utility which provide that—

(1) no electric service to an electric consumer may be terminated unless reasonable prior notice (including notice of rights and remedies) is given to such consumer and such

consumer has a reasonable opportunity to dispute the reasons for such termination, and

(2) during any period when termination of service to an electric consumer would be especially dangerous to health, as determined by the State regulatory authority (with respect to an electric utility for which it has rate-making authority) or nonregulated electric utility, and such consumer establishes that—

(A) he is unable to pay for such service in accordance with the requirements of the utility's billing, or

(B) he is able to pay for such service but only in installments,

such service may not be terminated.

Such procedures shall take into account the need to include reasonable provisions for elderly and handicapped consumers.

(h) Advertising

(1) For purposes of this section and section 2623(b)(5) of this title—

(A) The term “advertising” means the commercial use, by an electric utility, of any media, including newspaper, printed matter, radio, and television, in order to transmit a message to a substantial number of members of the public or to such utility's electric consumers.

(B) The term “political advertising” means any advertising for the purpose of influencing public opinion with respect to legislative, administrative, or electoral matters, or with respect to any controversial issue of public importance.

(C) The term “promotional advertising” means any advertising for the purpose of encouraging any person to select or use the service or additional service of an electric utility or the selection or installation of any appliance or equipment designed to use such utility's service.

(2) For purposes of this subsection and section 2623(b)(5) of this title, the terms “political advertising” and “promotional advertising” do not include—

(A) advertising which informs electric consumers how they can conserve energy or can reduce peak demand for electric energy,

(B) advertising required by law or regulation, including advertising required under part 1 of title II of the National Energy Conservation Policy Act [42 U.S.C. 8211 et seq.],

(C) advertising regarding service interruptions, safety measures, or emergency conditions,

(D) advertising concerning employment opportunities with such utility,

(E) advertising which promotes the use of energy efficient appliances, equipment or services, or

(F) any explanation or justification of existing or proposed rate schedules, or notifications of hearings thereon.

In order to initiate and participate in the consideration of one or more of the standards established by subchapter II of this chapter or other concepts which contribute to the achievement of the purposes of this chapter, the Secretary, any affected electric utility, or any electric consumer of an affected electric utility may intervene and participate as a matter of right in any ratemaking proceeding or other appropriate regulatory proceeding relating to rates or rate design which is conducted by a State regulatory authority (with respect to an electric utility for which it has ratemaking authority) or by a nonregulated electric utility.

(b) Access to information

Any intervenor or participant in a proceeding described in subsection (a) of this section shall have access to information available to other parties to the proceeding if such information is relevant to the issues to which his intervention or participation in such proceeding relates. Such information may be obtained through reasonable rules relating to discovery of information prescribed by the State regulatory authority (in the case of proceedings concerning electric utilities for which it has ratemaking authority) or by the nonregulated electric utility (in the case of a proceeding conducted by a nonregulated electric utility).

(c) Effective date; procedures

Any intervention or participation under this section, in any proceeding commenced before November 9, 1978, but not completed before such date, shall be permitted under this section only to the extent such intervention or participation is timely under otherwise applicable law.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 2621, 2622, 2633, 2634 of this title.

§ 2632. Consumer representation

(a) Compensation for costs of participation or intervention

(1) If no alternative means for assuring representation of electric consumers is adopted in accordance with subsection (b) of this section

and if an electric consumer of an electric utility substantially contributed to the approval, in whole or in part, of a position advocated by such consumer in a proceeding concerning such utility, and relating to any standard set forth in subchapter II of this chapter, such utility shall be liable to compensate such consumer (pursuant to paragraph (2)) for reasonable attorneys' fees, expert witness fees, and other reasonable costs incurred in preparation and advocacy of such position in such proceeding (including fees and costs of obtaining judicial review of any determination made in such proceeding with respect to such position).

(2) A consumer entitled to fees and costs under paragraph (1) may collect such fees and costs from an electric utility by bringing a civil action in any State court of competent jurisdiction, unless the State regulatory authority (in the case of a proceeding concerning a State regulated electric utility) or nonregulated electric utility (in the case of a proceeding concerning such nonregulated electric utility) has adopted a reasonable procedure pursuant to which such authority or nonregulated electric utility—

(A) determines the amount of such fees and costs, and

(B) includes an award of such fees and costs in its order in the proceeding.

(3) The procedure adopted by such State regulatory authority or nonregulated utility under paragraph (2) may include a preliminary proceeding to require that—

(A) as a condition of receiving compensation under such procedure such consumer demonstrate that, but for the ability to receive such award, participation or intervention in such proceeding may be a significant financial hardship for such consumer, and

(B) persons with the same or similar interests have a common legal representative in the proceeding as a condition to receiving compensation.

(b) Alternative means

Compensation shall not be required under subsection (a) of this section if the State, the State regulatory authority (in the case of a proceeding concerning a State regulated electric utility), or the nonregulated electric utility (in the case of a proceeding concerning such nonregulated electric utility) has provided an alternative means for providing adequate compensation to persons—

(1) who have, or represent, an interest—

(A) which would not otherwise be adequately represented in the proceeding, and

(B) representation of which is necessary for a fair determination in the proceeding, and

(2) who are, or represent an interest which is, unable to effectively participate or intervene in the proceeding because such persons cannot afford to pay reasonable attorneys' fees, expert witness fees, and other reasonable costs of preparing for, and participating or intervening in, such proceeding (including fees and costs of obtaining judicial review of such proceeding).

(c) Transcripts

The State regulatory authority or nonregulated electric utility, as the case may be, shall

make transcripts of the proceeding available, at cost of reproduction, to parties or intervenors in any ratemaking proceeding, or other regulatory proceeding relating to rates or rate design, before a State regulatory authority or nonregulated electric utility.

(d) Federal agencies

Any claim under this section against any Federal agency shall be subject to the availability of appropriated funds.

(e) Rights under other authority

Nothing in this section affects or restricts any rights of any participant or intervenor in any proceeding under any other applicable law or rule of law.

§ 2633. Judicial review and enforcement

(a) Limitation of Federal jurisdiction

Notwithstanding any other provision of law, no court of the United States shall have jurisdiction over any action arising under any provision of subchapter I or II of this chapter or of this subchapter except for—

(1) an action over which a court of the United States has jurisdiction under subsection (b) or (c)(2) of this section; and

(2) review of any action in the Supreme Court of the United States in accordance with sections 1257 and 1258 of title 28.

(b) Enforcement of intervention right

(1) The Secretary may bring an action in any appropriate court of the United States to enforce his right to intervene and participate under section 2631(a) of this title, and such court shall have jurisdiction to grant appropriate relief.

(2) If any electric utility or electric consumer having a right to intervene under section 2631(a) of this title is denied such right by any State court, such electric utility or electric consumer may bring an action in the appropriate United States district court to require the State regulatory authority or nonregulated electric utility to permit such intervention and participation, and such court shall have jurisdiction to grant appropriate relief.

(3) Nothing in this subsection prohibits any person bringing any action under this subsection in a court of the United States from seeking review and enforcement at any time in any State court of any rights he may have with respect to any motion to intervene or participate in any proceeding.

(c) Review and enforcement

(1) Any person (including the Secretary) may obtain review of any determination made under subchapter I or II of this chapter or under this subchapter with respect to any electric utility (other than a utility which is a Federal agency) in the appropriate State court if such person (or the Secretary) intervened or otherwise participated in the original proceeding or if State law

otherwise permits such review. Any person (including the Secretary) may bring an action to enforce the requirements of this chapter in the appropriate State court, except that no such action may be brought in a State court with respect to a utility which is a Federal agency. Such review or action in a State court shall be pursuant to any applicable State procedures.

(2) Any person (including the Secretary) may obtain review in the appropriate court of the United States of any determination made under subchapter I or II of this chapter or this subchapter by a Federal agency if such person (or the Secretary) intervened or otherwise participated in the original proceeding or if otherwise applicable law permits such review. Such court shall have jurisdiction to grant appropriate relief. Any person (including the Secretary) may bring an action to enforce the requirements of subchapter I or II of this chapter or this subchapter with respect to any Federal agency in the appropriate court of the United States and such court shall have jurisdiction to grant appropriate relief.

(3) In addition to his authority to obtain review under paragraph (1) or (2), the Secretary may also participate as an amicus curiae in any review by any court of an action arising under the provisions of subchapter I or II of this chapter or this subchapter.

(d) Other authority of Secretary

Nothing in this section prohibits the Secretary from—

(1) intervening and participating in any proceeding, or

(2) intervening and participating in any review by any court of any action

under section 6804 of title 42.

§ 2634. Prior and pending proceedings

For purposes of subchapters I and II of this chapter, and this subchapter, proceedings commenced by State regulatory authorities (with respect to electric utilities for which it has ratemaking authority) and nonregulated electric utilities before November 9, 1978, and actions taken before such date in such proceedings shall be treated as complying with the requirements of subchapters I and II of this chapter, and this subchapter if such proceedings and actions substantially conform to such requirements. For purposes of subchapters I and II of this chapter, and this subchapter, any such proceeding or action commenced before November 9, 1978, but not completed before such date, shall comply with the requirements of subchapters I and II of this chapter, and this subchapter, to the maximum extent practicable, with respect to so much of such proceeding or action as takes place after such date, except as otherwise provided in section 2631(c) of this title.

SUBCHAPTER IV—ADMINISTRATIVE PROVISIONS

§ 2641. Voluntary guidelines

The Secretary may prescribe voluntary guidelines respecting the standards established by sections 2621(d) and 2623(b) of this title. Such guidelines may not expand the scope or legal effect of such standards or establish additional standards respecting electric utility rates.

(Pub. L. 95-617, title I, § 131, Nov. 9, 1978, 92 Stat. 3131.)

§ 2642. Responsibilities of Secretary**(a) Authority**

The Secretary may periodically notify the State regulatory authorities, and electric utilities identified pursuant to section 2612(c) of this title, of—

- (1) load management techniques and the results of studies and experiments concerning load management techniques;
- (2) developments and innovations in electric utility ratemaking throughout the United States, including the results of studies and experiments in rate structure and rate reform;
- (3) methods for determining cost of service; and
- (4) any other data or information which the Secretary determines would assist such authorities and utilities in carrying out the provisions of this chapter.

(b) Technical assistance

The Secretary may provide such technical assistance as he determines appropriate to assist the State regulatory authorities in carrying out their responsibilities under subchapter II of this chapter and as is requested by any State regulatory authority relating to the standards established by subchapter II of this chapter.

(Pub. L. 95-617, title I, § 132, Nov. 9, 1978, 92 Stat. 3131.)

§ 2643. Gathering information on costs of service**(a) Information required to be gathered**

Each electric utility shall periodically gather information under such rules (promulgated by the Commission) as the Commission determines necessary to allow determination of the costs associated with providing electric service. For purposes of this section, and for purposes of any

consideration and determination respecting the standard established by section 2621(d)(2) of this title, such costs shall be separated, to the maximum extent practicable, into the following components: customer cost component, demand cost component, and energy cost component. Rules under this subsection shall include requirements for the gathering of the following information with respect to each electric utility—

(1) the costs of serving each electric consumer class, including costs of serving different consumption patterns within such class, based on voltage level, time of use, and other appropriate factors;

(2) daily kilowatt demand load curves for all electric consumer classes combined representative of daily and seasonal differences in demand, and daily kilowatt demand load curves for each electric consumer class for which there is a separate rate, representative of daily and seasonal differences in demand;

(3) annual capital, operating, and maintenance costs—

(A) for transmission and distribution services, and

(B) for each type of generating unit; and

(4) costs of purchased power, including representative daily and seasonal differences in the amount of such costs.

Such rules shall provide that information required to be gathered under this section shall be presented in such categories and such detail as may be necessary to carry out the purposes of this section.

(b) Commission rules

The Commission shall, within 180 days after November 9, 1978, by rule, prescribe the methods, procedure, and format to be used by electric utilities in gathering the information described in this section. Such rules may provide for the exemption by the Commission of an electric utility or class of electric utilities from gathering all or part of such information, in cases where such utility or utilities show and the Commission finds, after public notice and opportunity for the presentation of written data, views, and arguments, that gathering such information is not likely to carry out the purposes of this section. The Commission shall periodically review such findings and may revise such rules.

(c) Filing and publication

Not later than two years after November 9, 1978, and periodically, but not less frequently than every two years thereafter, each electric utility shall file with—

(1) the Commission, and

(2) any State regulatory authority which has ratemaking authority for such utility,

the information gathered pursuant to this section and make such information available to the public in such form and manner as the Commission shall prescribe. In addition, at the time of application for, or proposal of, any rate increase, each electric utility shall make such information available to the public in such form and manner as the Commission shall prescribe. The two-year period after November 9, 1978, specified in this subsection may be extended by

the Commission for a reasonable additional period in the case of any electric utility for good cause shown.

(d) Enforcement

For purposes of enforcement, any violation of a requirement of this section shall be treated as a violation of a provision of the Energy Supply and Environmental Coordination Act of 1974 [15 U.S.C. 791 et seq.] enforceable under section 12 of such Act [15 U.S.C. 797] (notwithstanding any expiration date in such Act) except that in applying the provisions of such section 12 any reference to the Federal Energy Administrator shall be treated as a reference to the Commission.

(1) studies to determine the feasibility of undertaking a small hydroelectric power project at an existing dam or dams and

(2) preparing any application for a necessary license or other Federal, State, and local approval respecting such a project at an existing dam or dams and of participating in any administrative proceeding regarding any such application.

This section is referred to in sections 2704, 2707 of this title; title 42 section 7375.

§ 2703. Loans for project costs

(a) Authority

The Secretary is authorized to make loans to any municipality, electric cooperative, industrial development agency, nonprofit organization, or other person of up to 75 percent of the project costs of a small hydroelectric power project. No such loan may be made unless the Secretary finds that—

(1) the project will be constructed in connection with an existing dam or dams,

(2) all licenses and other required Federal, State, and local approvals necessary for construction of the project have been issued,

(3) the project will have no significant adverse environmental effects, including significant adverse effects on fish and wildlife, on recreational use of water, and on stream flow, and

(4) the project will not have a significant adverse effect on any other use of the water used by such project.

The Secretary may make a commitment to make a loan under this subsection to an applicant who has not met the requirements of paragraph (2), pending compliance by such applicant with such requirements. Such commitment shall be for period¹ of not to exceed 3 years unless the Secretary, in consultation with the Commission, extends such period for good cause shown. Notwithstanding any such commitment, no such loan shall be made before such person has complied with such requirements.

(b) Preference

The Secretary shall give preference to applicants under this section who do not have available alternative financing which the Secretary deems appropriate to carry out the project and whose projects will provide useful information as to the technical and economic feasibility of—

(1) the generation of electric energy by such projects, and

(2) the use of energy produced by such projects.

(c) Information

Every applicant for a license for a small hydroelectric power project receiving loans pursuant to this section shall furnish the Secretary with such information as the Secretary may require regarding equipment and services proposed to be used in the design, construction, and operation of such project. The Secretary shall have the right to forbid the use in such project of any equipment or services he finds inappropriate for such project by reason of cost, performance, or failure to carry out the purposes of this section. The Secretary shall make information which he obtains under this subsection available to the public, other than information described as entitled to confidentiality under section 796(d) of title 15.

(d) Joint participation

In making loans for small hydroelectric power projects under this section, the Secretary shall encourage joint participation, to the extent permitted by law, by applicants eligible to receive loans under this section with respect to the same project.

§ 2705. Simplified and expeditious licensing procedures

(a) Establishment of program

The Commission shall establish, in such manner as the Commission deems appropriate, consistent with the applicable provisions of law, a program to use simple and expeditious licensing procedures under the Federal Power Act [16 U.S.C. 791a et seq.] for small hydroelectric power projects in connection with existing dams.

(b) Prerequisites

Before issuing any license under the Federal Power Act [16 U.S.C. 791a et seq.] for the construction or operation of any small hydroelectric power project the Commission—

(1) shall assess the safety of existing structures in any proposed project (including possible consequences associated with failure of such structures), and

(2) shall provide an opportunity for consultation with the Council on Environmental Quality and the Environmental Protection Agency with respect to the environmental effects of such project.

Nothing in this subsection exempts any such project from any requirement applicable to any such project under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.], the Fish and Wildlife Coordination Act [16 U.S.C. 661 et seq.], the Endangered Species Act [16 U.S.C. 1531 et seq.], or any other provision of Federal law.

(c) Fish and wildlife facilities

The Commission shall encourage applicants for licenses for small hydroelectric power projects to make use of public funds and other assistance for the design and construction of fish and wildlife facilities which may be required in connection with any development of such project.

(d) Exemptions from licensing requirements in certain cases

The Commission may in its discretion (by rule or order) grant an exemption in whole or in part

from the requirements (including the licensing requirements) of part I of the Federal Power Act [16 U.S.C. 791a et seq.] to small hydroelectric power projects having a proposed installed capacity of 5,000 kilowatts or less, on a case-by-case basis or on the basis of classes or categories of projects, subject to the same limitations (to ensure protection for fish and wildlife as well as other environmental concerns) as those which are set forth in subsections (c) and (d) of section 30 of the Federal Power Act [16 U.S.C. 823a (c) and (d)] with respect to determinations made and exemptions granted under subsection (a) of such section 30 [16 U.S.C. 823a(a)]; and subsections (c) and (d) of such section 30 shall apply with respect to actions taken and exemptions granted under this subsection. Except as specifically provided in this subsection, the granting of an exemption to a project under this subsection shall in no case have the effect of waiving or limiting the application (to such project) of the second sentence of subsection (b) of this section.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 7 sections 3321, 3322.

§ 2801. Congressional findings, purpose, and policy

(a) Findings

Congress finds the following:

(1) The harvest of certain species of fish and shellfish exceeds levels of optimum sustainable yield, thereby making it more difficult to meet the increasing demand for aquatic food.

¹ So in original. Probably should be “acquisition”.

(2) To satisfy the domestic market for aquatic food, the United States imports more than 50 per centum of its fish and shellfish, but this dependence on imports adversely affects the national balance of payments and contributes to the uncertainty of supplies.

(3) Although aquaculture currently contributes approximately 13 percent of world seafood production, less than 6 percent of current United States seafood production results from aquaculture. Domestic aquacultural production, therefore, has the potential for significant growth.

(4) Aquacultural production of aquatic plants can provide sources of food, industrial materials, pharmaceuticals, and energy, and can assist in the control and abatement of pollution.

(5) The rehabilitation and enhancement of fish and shellfish resources are desirable applications of aquacultural technology.

(6) The principal responsibility for the development of aquaculture in the United States must rest with the private sector.

(7) Despite its potential, the development of aquaculture in the United States has been inhibited by many scientific, economic, legal, and production factors, such as inadequate credit, diffused legal jurisdiction, the lack of management information, the lack of supportive Government policies, and the lack of reliable supplies of seed stock.

(8) Many areas of the United States are suitable for aquaculture, but are subject to land-use or water-use management policies that do not adequately consider the potential for aquaculture and may inhibit the development of aquaculture.

(b) Purpose

It is the purpose of this chapter to promote aquaculture in the United States by—

- (1) declaring a national aquaculture policy;
- (2) establishing and implementing a national aquaculture development plan;
- (3) establishing the Department of Agriculture as the lead Federal agency with respect to the coordination and dissemination of national aquaculture information by designating the Secretary of Agriculture as the permanent chairman of the coordinating group and by establishing a National Aquaculture Information Center within the Department of Agriculture; and
- (4) encouraging aquaculture activities and programs in both the public and private sectors of the economy;

that will result in increased aquacultural production, the coordination of domestic aquaculture efforts, the conservation and enhancement of aquatic resources, the creation of new industries and job opportunities, and other national benefits.

(c) Policy

Congress declares that aquaculture has the potential for reducing the United States trade deficit in fisheries products, for augmenting existing commercial and recreational fisheries and for producing other renewable resources, thereby assisting the United States in meeting its fu-

ture food needs and contributing to the solution of world resource problems. It is, therefore, in the national interest, and it is the national policy, to encourage the development of aquaculture in the United States.

(Pub. L. 96-362, §2, Sept. 26, 1980, 94 Stat. 1198; Pub. L. 99-198, title XVII, §1732, Dec. 23, 1985, 99 Stat. 1641.)

AMENDMENTS

1985—Subsec. (a)(3). Pub. L. 99-198, §1732(1), substituted “13 percent” for “10 per centum” and “6 percent” for “3 per centum”.

Subsec. (a)(7). Pub. L. 99-198, §1732(2), inserted “scientific,” before “economic,” and “the lack of supportive Government policies,” after “management information.”

Subsec. (b)(3), (4). Pub. L. 99-198, §1732(3), added par. (3) and redesignated former par. (3) as (4).

Subsec. (c). Pub. L. 99-198, §1732(4), inserted “or reducing the United States trade deficit in fisheries products.”

SHORT TITLE OF 1985 AMENDMENT

§ 2803. National Aquaculture Development Plan

(a) In general

(1) Within eighteen months after September 26, 1980, the Secretaries shall establish the National Aquaculture Development Plan.

(2) In developing the Plan, and revisions thereto under subsection (d) of this section, beginning not later than six months after September 26, 1980, the Secretary shall consult with the Secretary of Commerce and the Secretary of the Interior, other appropriate Federal officers, States, regional fishery management councils established under section 1852 of this title, and representatives of the aquaculture industry. In addition, the Secretary shall give interested persons and organizations an opportunity to comment during the development of the Plan.

(b) Contents of Plan

The Plan shall—

(1) identify aquatic species that the Secretaries determine to have significant potential for culturing on a commercial or other basis;

(2) recommend actions to be taken by the public and private sectors (which may include, but are not limited to, research and development, technical assistance, demonstration, extension education, and training activities) that are necessary to achieve such potential;

(3) address, after taking into account the status of aquaculture regarding the aquatic species concerned—

(A) aquaculture facility design and operation,

(B) water quality management,

(C) use of waste products (including thermal effluents),

(D) nutrition and the development of economical feeds, including natural food sources,

(E) life history, genetics, physiology, pathology, and disease control (including research regarding organisms that may not be harmful to fish and shellfish, but are injurious to humans),

(F) processing and market development,

(G) production management and quality control, and

(H) the development of adequate supplies of seed stock;

(4) include, where appropriate, research programs on the effect of aquaculture on estuarine and other water areas and on the management of such areas for aquaculture;

(5) include, where appropriate, programs to analyze, and formulate proposed resolutions of, the legal or regulatory constraints that may affect aquaculture; and

(6) include such other research and development, technical assistance, demonstration, extension education, and training programs as the Secretary deems necessary or appropriate to carry out this chapter.

In formulating the Plan, the Secretary shall, to the extent practicable, take into account any significant action that (i) has been, or is proposed to be, undertaken by any other Federal department or agency, any State agency, or any person, and (ii) may affect the implementation of the Plan.

(c) Actions and implementation

The Plan shall specify—

(1) with respect to those actions that the Secretary determines should be undertaken, the period of time within which each such action should be completed, in order to implement the Plan; and

(2) with respect to each such action which of the Secretaries, acting individually, jointly, or collectively, has the responsibility for implementing the action.

The specifications of Secretarial responsibilities under paragraph (2) for implementing actions shall be determined on the basis of—

(A) the responsibilities conferred on the respective Secretaries by law or by any executive action having the effect of law (including, but not limited to, Reorganization Plan Numbered 4 of 1970);

(C) the concurrence of the Secretaries.

(d) Revision of Plan

The Secretaries shall undertake periodic reviews of the operation and effectiveness of the Plan. If as a result of any such review, or the aquaculture assessment required under subsection (e) of this section, the Secretaries determine that—

(1) any aquatic species not currently identified in the Plan has significant potential for aquaculture;

(2) any action specified in the Plan is not being accomplished on a successful and timely basis; or

(3) any action specified in the Plan should be terminated because its objectives have been achieved or its projected benefits do not warrant further support;

the Secretaries shall appropriately amend the Plan.

(e) Continuing aquaculture assessment

The Secretaries, through the coordinating group, shall undertake a continuing assessment of aquaculture in the United States for the purpose of maintaining, on a continuing basis—

- (1) a complete profile of the aquacultural industry with respect to the incidence, size, and status of commercial aquacultural enterprises;
- (2) the identification of the private and public institutions and organizations involved in aquacultural research, extension, credit, and market development;
- (3) the identification of the various aquatic species being cultured and a description of the status of commercial development of each of those species;
- (4) to the extent practicable, the identification of aquacultural production regions, species, and markets that have significant potential for development;
- (5) a catalog describing all Federal programs and activities that directly or indirectly encourage, support, or assist aquaculture; and
- (6) the identification of the economic, physical, legal, institutional, and social constraints that inhibit the development of aquaculture in the United States.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 4402 of this title.

§ 2901. Congressional findings and declaration of purpose

(a) Findings

The Congress finds and declares the following:

(1) Fish and wildlife are of ecological, educational, esthetic, cultural, recreational, economic, and scientific value to the Nation.

(2) The improved conservation and management of fish and wildlife, particularly non-

game fish and wildlife, will assist in restoring and maintaining fish and wildlife and in assuring a productive and more esthetically pleasing environment for all citizens.

(3) Many citizens, particularly those residing in urban areas, have insufficient opportunity to participate in recreational and other programs designed to foster human interaction with fish and wildlife and thereby are unable to have a greater appreciation and awareness of the environment.

(4) Historically, fish and wildlife conservation programs have been focused on the more recreationally and commercially important species within any particular ecosystem. As a consequence such programs have been largely financed by hunting and fishing license revenues or excise taxes on certain hunting and fishing equipment. These traditional financing mechanisms are neither adequate nor fully appropriate to meet the conservation needs of nongame fish and wildlife.

(5) Each State should be encouraged to develop, revise, and implement, in consultation with appropriate Federal, State, and local and regional agencies, a plan for the conservation of fish and wildlife, particularly those species which are indigenous to the State.

(b) Purpose

It is the purpose of this chapter—

(1) to provide financial and technical assistance to the States for the development, revision, and implementation of conservation plans and programs for nongame fish and wildlife; and

(2) to encourage all Federal departments and agencies to utilize their statutory and administrative authority, to the maximum extent practicable and consistent with each agency's statutory responsibilities, to conserve and to promote conservation of nongame fish and wildlife and their habitats, in furtherance of the provisions of this chapter.

(Pub. L. 96-366, § 2, Sept. 29, 1980, 94 Stat. 1322.)

SHORT TITLE

Section 1 of Pub. L. 96-366 provided: "That this Act [enacting this chapter] may be cited as the 'Fish and Wildlife Conservation Act of 1980'."

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 2905 of this title.

§ 2902. Definitions

As used in this chapter—

(1) The term "approved conservation plan" means the conservation plan of a State approved by the Secretary pursuant to section 2904(a) of this title.

(2) The term "conservation plan" means a plan developed by a State for the conservation of fish and wildlife which meets the requirements set forth in section 2903 of this title.

(3) The terms "conserve", "conserving", and "conservation" mean to use, and the use of, such methods and procedures which are necessary to ensure, to the maximum extent practicable, the well being and enhancement of fish and wildlife and their habitats for the ecological, educational, esthetic, cultural, rec-

reational, and scientific enrichment of the public. Such methods and procedures may include, but are not limited to, any activity associated with scientific resources management, such as research, census, law enforcement, habitat acquisition, maintenance, development, information education, population manipulation, propagation, technical assistance to private landowners, live trapping, and transplantation.

(4) The term “designated State agency” means the commission, department, division, or other agency of a State which has primary legal authority for the conservation of fish and wildlife. If any State has placed such authority in more than one agency, such term means each such agency acting with respect to its assigned responsibilities but such agencies, for purposes of this chapter, shall submit a single conservation plan.

(5) The term “fish and wildlife” means wild vertebrate animals that are in an unconfined state, including, but not limited to, nongame fish and wildlife.

(6) The term “nongame fish and wildlife” means wild vertebrate animals that are in an unconfined state and that—

(A) are not ordinarily taken for sport, fur, or food, except that if under applicable State law, any of such animals may be taken for sport, fur, or food in some, but not all, areas of the State, any of such animals within any area of the State in which such taking is not permitted may be deemed to be nongame fish and wildlife;

(B) are not listed as endangered species or threatened species under the Endangered Species Act of 1973 (16 U.S.C. 1531–1543); and

(C) are not marine mammals within the meaning of section 1362(5)¹ of this title.

§ 2904. Approval of conservation plans and certain nongame fish and wildlife conservation actions

(a) Approval by Secretary of plans

(1) Any State may apply to the Secretary for approval of a conservation plan.

(2) Applications for the approval of conservation plans shall be made and reviewed by the Secretary in such manner as the Secretary shall by regulation prescribe.

(3) As soon as practicable, but no later than 180 days, after the date on which a State submits (or resubmits in the case of prior disapproval) an application for the approval of a conservation plan the Secretary shall—

(A) approve the conservation plan, and designate it as an approved conservation plan, if he determines that the plan—

(i) meets the requirements set forth in section 2903 of this title, and

(ii) is substantial in character and design; or

(B) disapprove the conservation plan if he determines that—

(i) the plan does not meet the requirements set forth in section 2903 of this title, or

(ii) to implement any part of the plan on the basis of the specifications, determinations, identifications, or priorities therein would threaten the natural stability and continued viability of any of the plan species concerned.

If the Secretary disapproves a plan, he shall give the State concerned a written statement of the reasons for disapproval and provide the State opportunity for consultation with respect to deficiencies in the plan and the modifications required for approval.

(b) Effect of approval of plans

If the Secretary approves the conservation plan of any State under subsection (a) of this section—

(d) Nongame conservation actions in the absence of an approved plan

In the absence of an approved conservation plan, and on a showing of need by the State, the Secretary may deem certain conservation actions to be nongame fish and wildlife projects for which reimbursement is available under section 2905(a)(3) of this title if they—

(1) are consistent with such of the requirements set forth in section 2903 of this title as may be appropriate, including, but not limited to, the requirements in paragraphs (3), (4), (5), and (7) of such section; and

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 668dd of this title.

SUBCHAPTER I—GENERAL PROVISIONS

§ 3101. Congressional statement of purpose

(a) Establishment of units

In order to preserve for the benefit, use, education, and inspiration of present and future generations certain lands and waters in the State of Alaska that contain nationally significant natural, scenic, historic, archeological, geological, scientific, wilderness, cultural, recreational, and wildlife values, the units described in the following titles are hereby established.

(b) Preservation and protection of scenic, geological, etc., values

It is the intent of Congress in this Act to preserve unrivaled scenic and geological values associated with natural landscapes; to provide for the maintenance of sound populations of, and habitat for, wildlife species of inestimable value to the citizens of Alaska and the Nation, including those species dependent on vast relatively undeveloped areas; to preserve in their natural state extensive unaltered arctic tundra, boreal forest, and coastal rainforest ecosystems; to protect the resources related to subsistence needs; to protect and preserve historic and archeological sites, rivers, and lands, and to preserve wilderness resource values and related recreational opportunities including but not limited to hiking, canoeing, fishing, and sport hunting, within large arctic and subarctic wildlands and on freeflowing rivers; and to maintain opportunities for scientific research and undisturbed ecosystems.

(c) Subsistence way of life for rural residents

It is further the intent and purpose of this Act consistent with management of fish and wildlife in accordance with recognized scientific principles and the purposes for which each conservation system unit is established, designated, or expanded by or pursuant to this Act, to provide the opportunity for rural residents engaged in a subsistence way of life to continue to do so.

(d) Need for future legislation obviated

This Act provides sufficient protection for the national interest in the scenic, natural, cultural and environmental values on the public lands in Alaska, and at the same time provides adequate opportunity for satisfaction of the economic and social needs of the State of Alaska and its people; accordingly, the designation and disposition of the public lands in Alaska pursuant to this Act are found to represent a proper balance between the reservation of national conservation system units and those public lands necessary and appropriate for more intensive use and disposition, and thus Congress believes that the need for future legislation designating new conservation system units, new national conservation areas, or new national recreation areas, has been obviated thereby.

§ 3103. Maps

(a) Filing and availability for inspection; discrepancies; coastal areas

The boundary maps described in this Act shall be on file and available for public inspection in the office of the Secretary or the Secretary of Agriculture with regard to the National Forest System. In the event of discrepancies between the acreages specified in this Act and those depicted on such maps, the maps shall be controlling, but the boundaries of areas added to the National Park, Wildlife Refuge and National Forest System shall, in coastal areas not extend seaward beyond the mean high tide line to include lands owned by the State of Alaska unless the State shall have concurred in such boundary extension and such extension is accomplished under the notice and reporting requirements of this Act.

(b) Changes in land management status; publication in Federal Register; filing; clerical errors; boundary features and adjustments

As soon as practicable after December 2, 1980, a map and legal description of each change in land management status effected by this Act, including the National Wilderness Preservation System, shall be published in the Federal Register and filed with the Speaker of the House of Representatives and the President of the Senate, and each such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in each such legal description and map may be made. Each such map and legal description shall be on file and available for public inspection in the office of the

Secretary. Whenever possible boundaries shall follow hydrographic divides or embrace other topographic or natural features. Following reasonable notice in writing to the Congress of his intention to do so the Secretary and the Secretary of Agriculture may make minor adjustments in the boundaries of the areas added to or established by this Act as units of National Park, Wildlife Refuge, Wild and Scenic Rivers, National Wilderness Preservation, and National Forest Systems and as national conservation areas and national recreation areas. For the purposes of this subsection, a minor boundary adjustment shall not increase or decrease the amount of land within any such area by more than 23,000 acres.

(c) Lands included within unit; acquisition of land by Secretary

Only those lands within the boundaries of any conservation system unit which are public lands (as such term is defined in this Act) shall be deemed to be included as a portion of such unit. No lands which, before, on, or after December 2, 1980, are conveyed to the State, to any Native Corporation, or to any private party shall be subject to the regulations applicable solely to public lands within such units. If the State, a Native Corporation, or other owner desires to convey any such lands, the Secretary may acquire such lands in accordance with applicable law (including this Act), and any such lands shall become part of the unit, and be administered accordingly.

**SUBCHAPTER II—SUBSISTENCE
MANAGEMENT AND USE**

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in sections 410hh, 410hh-1, 3202 of this title.

§ 3111. Congressional declaration of findings

The Congress finds and declares that—

(1) the continuation of the opportunity for subsistence uses by rural residents of Alaska, including both Natives and non-Natives, on the public lands and by Alaska Natives on Native lands is essential to Native physical, economic, traditional, and cultural existence and to non-Native physical, economic, traditional, and social existence.

(2) the situation in Alaska is unique in that, in most cases, no practical alternative means are available to replace the food supplies and other items gathered from fish and wildlife which supply rural residents dependent on subsistence uses;

(3) continuation of the opportunity for subsistence uses of resources on public and other lands in Alaska is threatened by the increasing population of Alaska, with resultant pres-

sure on subsistence resources, by sudden decline in the populations of some wildlife species which are crucial subsistence resources, by increased accessibility of remote areas containing subsistence resources, and by taking of fish and wildlife in a manner inconsistent with recognized principles of fish and wildlife management;

(4) in order to fulfill the policies and purposes of the Alaska Native Claims Settlement Act [43 U.S.C. 1601 et seq.] and as a matter of equity, it is necessary for the Congress to invoke its constitutional authority over Native affairs and its constitutional authority under the property clause and the commerce clause to protect and provide the opportunity for continued subsistence uses on the public lands by Native and non-Native rural residents; and

(5) the national interest in the proper regulation, protection, and conservation of fish and wildlife on the public lands in Alaska and the continuation of the opportunity for a subsistence way of life by residents of rural Alaska require that an administrative structure be established for the purpose of enabling rural residents who have personal knowledge of local conditions and requirements to have a meaningful role in the management of fish and wildlife and of subsistence uses on the public lands in Alaska.

AMENDMENTS

1997—Pub. L. 105-83, § 316(b)(3), which directed the designation of existing provisions as subsec. (a) and the addition of subsec. (b) relating to further congressional findings as to subsistence use of public lands by rural residents of Alaska, was repealed by Pub. L. 105-83, § 316(d). See Effective and Termination Dates of 1997 Amendment note below.

EFFECTIVE AND TERMINATION DATES OF 1997
AMENDMENT

Until laws are adopted in Alaska which provide for definition, preference, and participation specified in sections 3113 to 3115 of this title, amendment by Pub. L. 105-83 was effective only for purpose of determining whether State's laws provide for such definition, preference, and participation, and such amendment was repealed on Dec. 1, 1998, because such laws had not been adopted, see section 316(d) of Pub. L. 105-83 set out as a note under section 3102 of this title.

§ 3112. Congressional statement of policy

It is hereby declared to be the policy of Congress that—

(1) consistent with sound management principles, and the conservation of healthy populations of fish and wildlife, the utilization of the public lands in Alaska is to cause the least adverse impact possible on rural residents who depend upon subsistence uses of the resources

of such lands; consistent with management of fish and wildlife in accordance with recognized scientific principles and the purposes for each unit established, designated, or expanded by or pursuant to titles II through VII of this Act, the purpose of this subchapter is to provide the opportunity for rural residents engaged in a subsistence way of life to do so;

(2) nonwasteful subsistence uses of fish and wildlife and other renewable resources shall be the priority consumptive uses of all such resources on the public lands of Alaska when it is necessary to restrict taking in order to assure the continued viability of a fish or wildlife population or the continuation of subsistence uses of such population, the taking of such population for nonwasteful subsistence uses shall be given preference on the public lands over other consumptive uses; and

(3) except as otherwise provided by this Act or other Federal laws, Federal land managing agencies, in managing subsistence activities on the public lands and in protecting the continued viability of all wild renewable resources in Alaska, shall cooperate with adjacent landowners and land managers, including Native Corporations, appropriate State and Federal agencies, and other nations.

§ 3113. Definitions

As used in this Act, the term “subsistence uses” means the customary and traditional uses by rural Alaska residents of wild, renewable resources for direct personal or family consumption as food, shelter, fuel, clothing, tools, or transportation; for the making and selling of handicraft articles out of nonedible byproducts of fish and wildlife resources taken for personal or family consumption; for barter, or sharing for personal or family consumption; and for customary trade. For the purposes of this section, the term—

(1) “family” means all persons related by blood, marriage, or adoption, or any person living within the household on a permanent basis; and

(2) “barter” means the exchange of fish or wildlife or their parts, taken for subsistence uses—

(A) for other fish or game or their parts; or

(B) for other food or for nonedible items other than money if the exchange is of a limited and noncommercial nature.

§ 3114. Preference for subsistence uses

Except as otherwise provided in this Act and other Federal laws, the taking on public lands of fish and wildlife for nonwasteful subsistence uses shall be accorded priority over the taking on such lands of fish and wildlife for other purposes. Whenever it is necessary to restrict the taking of populations of fish and wildlife on such lands for subsistence uses in order to protect the continued viability of such populations, or to continue such uses, such priority shall be implemented through appropriate limitations based on the application of the following criteria:

(1) customary and direct dependence upon the populations as the mainstay of livelihood;

(2) local residency; and

(3) the availability of alternative resources.

AMENDMENTS

1997—Pub. L. 105-83, §316(b)(5), which directed the designation of existing provisions as subsec. (a) and the addition of subsec. (b) reading as follows: “The priority granted by this section is for a reasonable opportunity to take fish and wildlife. For the purposes of this subsection, the term ‘reasonable opportunity’ means an opportunity, consistent with customary and traditional uses (as defined in section 3113(3) of this title), to participate in a subsistence hunt or fishery with a reasonable expectation of success, and does not mean a guarantee that fish and wildlife will be taken.” was repealed by Pub. SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 3115, 3116, 3117 of this title.

§ 3115. Local and regional participation**(a) Establishment of subsistence resources regions, local advisory committees, and regional advisory councils; membership, duties, and authority of regional advisory councils**

Except as otherwise provided in subsection (d) of this section, the Secretary in consultation with the State shall establish—

(1) at least six Alaska subsistence resource regions which, taken together, include all public lands. The number and boundaries of the regions shall be sufficient to assure that regional differences in subsistence uses are adequately accommodated;

(2) such local advisory committees within each region as he finds necessary at such time as he may determine, after notice and hearing, that the existing State fish and game advisory committees do not adequately perform the functions of the local committee system set forth in paragraph (3)(D)(iv) of this subsection; and

(3) a regional advisory council in each subsistence resource region.

Each regional advisory council shall be composed of residents of the region and shall have the following authority:

(A) the review and evaluation of proposals for regulations, policies, management plans, and other matters relating to subsistence uses of fish and wildlife within the region;

(B) the provision of a forum for the expression of opinions and recommendations by persons interested in any matter related to subsistence uses of fish and wildlife within the region;

(C) the encouragement of local and regional participation pursuant to the provisions of this subchapter in the decisionmaking process affecting the taking of fish and wildlife on the

public lands within the region for subsistence uses;

(D) the preparation of an annual report to the Secretary which shall contain—

(i) an identification of current and anticipated subsistence uses of fish and wildlife populations within the region;

(ii) an evaluation of current and anticipated subsistence needs for fish and wildlife populations within the region;

(iii) a recommended strategy for the management of fish and wildlife populations within the region to accommodate such subsistence uses and needs; and

(iv) recommendations concerning policies, standards, guidelines, and regulations to implement the strategy. The State fish and game advisory committees or such local advisory committees as the Secretary may establish pursuant to paragraph (2) of this subsection may provide advice to, and assist, the regional advisory councils in carrying out the functions set forth in this paragraph.

(b) Assignment of staff and distribution of data

The Secretary shall assign adequate qualified staff to the regional advisory councils and make timely distribution of all available relevant technical and scientific support data to the regional advisory councils and the State fish and game advisory committees or such local advisory committees as the Secretary may establish pursuant to paragraph (2) of subsection (a) of this section.

(c) Consideration of reports and recommendations of regional advisory councils

The Secretary, in performing his monitoring responsibility pursuant to section 3116 of this title and in the exercise of his closure and other administrative authority over the public lands, shall consider the report and recommendations of the regional advisory councils concerning the taking of fish and wildlife on the public lands within their respective regions for subsistence uses. The Secretary may choose not to follow any recommendation which he determines is not supported by substantial evidence, violates recognized principles of fish and wildlife conservation, or would be detrimental to the satisfaction of subsistence needs. If a recommendation is not adopted by the Secretary, he shall set forth the factual basis and the reasons for his decision.

(d) Supersedure by enactment and implementation of State laws governing State responsibility; consideration of recommendations by State rulemaking authority

The Secretary shall not implement subsections (a), (b), and (c) of this section if the State enacts and implements laws of general applicability which are consistent with, and which provide for the definition, preference, and participation specified in, sections 3113, 3114, and 3115 of this title, such laws, unless and until repealed, shall supersede such sections insofar as such sections govern State responsibility pursuant to this subchapter for the taking of fish and wildlife on the public lands for subsistence uses. Laws establishing a system of local advisory committees and regional advisory councils consistent with this section shall provide that the

State rulemaking authority shall consider the advice and recommendations of the regional councils concerning the taking of fish and wildlife populations on public lands within their respective regions for subsistence uses. The regional councils may present recommendations, and the evidence upon which such recommendations are based, to the State rulemaking authority during the course of the administrative proceedings of such authority. The State rulemaking authority may choose not to follow any recommendation which it determines is not supported by substantial evidence presented during the course of its administrative proceedings, violates recognized principles of fish and wildlife conservation or would be detrimental to the satisfaction of rural subsistence needs. If a recommendation is not adopted by the State rulemaking authority, such authority shall set forth the factual basis and the reasons for its decision.

(e) Reimbursement to State; limitation; report to Congress

(1) The Secretary shall reimburse the State, from funds appropriated to the Department of the Interior for such purposes, for reasonable costs relating to the establishment and operation of the regional advisory councils established by the State in accordance with subsection (d) of this section and the operation of the State fish and game advisory committees so long as such committees are not superseded by the Secretary pursuant to paragraph (2) of subsection (a) of this section. Such reimbursement may not exceed 50 per centum of such costs in any fiscal year. Such costs shall be verified in a statement which the Secretary determines to be adequate and accurate. Sums paid under this subsection shall be in addition to any grants, payments, or other sums to which the State is entitled from appropriations to the Department of the Interior.

(2) Total payments to the State under this subsection shall not exceed the sum of \$5,000,000 in any one fiscal year. The Secretary shall advise the Congress at least once in every five years as to whether or not the maximum payments specified in this subsection are adequate to ensure the effectiveness of the program established by the State to provide the preference for subsistence uses of fish and wildlife set forth in section 3114 of this title.

See Effective and Termination Dates of 1997 Amendment note below.

Subsec. (d). Pub. L. 105-83, §316(b)(6)(B), which directed the amendment of subsec. (d) generally to provide for supersedure by enactment and implementation of State laws governing State responsibility, consideration of recommendations by State rulemaking authority, and for the creation of regional advisory councils, was repealed by Pub. L. 105-83, §316(d). See Effective and Termination Dates of 1997 Amendment note below.

§ 3117. Judicial enforcement

(a) Exhaustion of administrative remedies; civil action; parties; preliminary injunctive relief; other relief; costs and attorney's fees

Local residents and other persons and organizations aggrieved by a failure of the State or the Federal Government to provide for the priority for subsistence uses set forth in section 3114 of this title (or with respect to the State as set forth in a State law of general applicability if the State has fulfilled the requirements of section 3115(d) of this title) may, upon exhaustion of any State or Federal (as appropriate) administrative remedies which may be available, file a civil action in the United States District Court for the District of Alaska to require such actions to be taken as are necessary to provide for the priority. In a civil action filed against the State, the Secretary may be joined as a party to such action. The court may grant preliminary injunctive relief in any civil action if the granting of such relief is appropriate under the facts upon which the action is based. No order granting preliminary relief shall be issued until after an opportunity for hearing. The regional advisory council established pursuant to section 3115 of this title which has jurisdiction within the area in which the park or park monument is located shall appoint three members to the commission each of whom is a member of either the regional advisory council or a local advisory committee within the region and also engages in subsistence uses within the park or park monument. Within eighteen months from December 2, 1980, each commission shall devise and recommend to the Secretary and the Governor a program for subsistence hunting within the park or park monument. Such program shall be prepared using technical information and other pertinent data assembled or produced by necessary field studies or investigations conducted jointly or separately by the technical and administrative personnel of the State and the Department of the Interior, information submitted by, and after consultation with the appropriate local advisory committees and regional advisory councils, and any testimony received in a public hearing or hearings held by the commission prior to preparation of the plan at a convenient location or locations in the vicinity of the park or park monument. Each year thereafter, the commission, after consultation with the appro-

(b) Implementation of subsistence hunting program

The Secretary shall promptly implement the program and recommendations submitted to him by each commission unless he finds in writing that such program or recommendations violates recognized principles of wildlife conservation, threatens the conservation of healthy populations of wildlife in the park or park monument is contrary to the purposes for which the park or park monument is established, or would be detrimental to the satisfaction of subsistence needs of local residents. Upon notification by the Governor, the Secretary shall take no action on a submission of a commission for sixty days during which period he shall consider any proposed changes in the program or recommendations submitted by the commission which the Governor provides him.

(c) Subsistence uses prior to implementation of subsistence hunting program

Pending the implementation of a program under subsection (a) of this section, the Secretary shall permit subsistence uses by local residents in accordance with the provisions of this subchapter and other applicable Federal and State law.

As used in this section—

(1) The term “coastal plain” means that area identified as such in the map entitled “Arctic National Wildlife Refuge”, dated August 1980.

(2) The term “exploratory activity” means surface geological exploration or seismic exploration, or both, for oil and gas within the coastal plain.

(c) Baseline study

The Secretary, in consultation with the Governor of the State, Native Village and Regional Corporations, and the North Slope Borough within the study area and interested persons, shall conduct a continuing study of the fish and wildlife (with special emphasis on caribou, wolves, wolverines, grizzly bears, migratory waterfowl, musk oxen, and polar bears) of the coastal plain and their habitat. In conducting the study, the Secretary shall—

(A) assess the size, range, and distribution of the populations of the fish and wildlife;

(B) determine the extent, location and carrying capacity of the habitats of the fish and wildlife;

(C) assess the impacts of human activities and natural processes on the fish and wildlife and their habitats;

(D) analyze the potential impacts of oil and gas exploration, development, and production on such wildlife and habitats; and

(E) analyze the potential effects of such activities on the culture and lifestyle (including subsistence) of affected Native and other people.

Within eighteen months after December 2, 1980, the Secretary shall publish the results of the study as of that date and shall thereafter publish such revisions thereto as are appropriate as new information is obtained.

(d) Guidelines

(1) Within two years after December 2, 1980, the Secretary shall by regulation establish ini-

tial guidelines governing the carrying out of exploratory activities. The guidelines shall be based upon the results of the study required under subsection (c) of this section and such other information as may be available to the Secretary. The guidelines shall include such prohibitions, restrictions, and conditions on the carrying out of exploratory activities as the Secretary deems necessary or appropriate to ensure that exploratory activities do not significantly adversely affect the fish and wildlife, their habitats, or the environment, including, but not limited to—

(A) a prohibition on the carrying out of exploratory activity during caribou calving and immediate post-calving seasons or during any other period in which human activity may have adverse effects;

(B) temporary or permanently closing of appropriate areas to such activity;

(C) specification of the support facilities, equipment and related manpower that is appropriate in connection with exploratory activity; and

(D) requirements that exploratory activities be coordinated in such a manner as to avoid unnecessary duplication.

(2) The initial guidelines prescribed by the Secretary to implement this subsection shall be accompanied by an environmental impact statement on exploratory activities. The initial guidelines shall thereafter be revised to reflect changes made in the baseline study and other appropriate information made available to the Secretary.

(e) Exploration plans

(1) After the initial guidelines are prescribed under subsection (d) of this section, any person including the United States Geological Survey may submit one or more plans for exploratory activity (hereinafter in this section referred to as “exploration plans”) to the Secretary for approval. An exploration plan must set forth such information as the Secretary may require in order to determine whether the plan is consistent with the guidelines, including, but not limited to—

(A) a description and schedule of the exploratory activity proposed to be undertaken;

(B) a description of the equipment, facilities, and related manpower that would be used in carrying out the activity;

(C) the area in which the activity would be undertaken; and

(D) a statement of the anticipated effects that the activity may have on fish and wildlife, their habitats and the environment.

(2) Upon receiving any exploration plan for approval, the Secretary shall promptly publish notice of the application and the text of the plan in the Federal Register and newspapers of general circulation in the State. The Secretary shall determine, within one hundred and twenty days after any plan is submitted for approval, if the plan is consistent with the guidelines established under subsection (d) of this section. If the Secretary determines that the plan is so consistent, he shall approve the plan: except that no plan shall be approved during the two-year pe-

riod following December 2, 1980. Before making the determination, the Secretary shall hold at least one public hearing in the State for purposes of receiving the comments and views of the public on the plan. The Secretary shall not approve of any plan submitted by the United States Geological Survey unless he determines that (1) no other person has submitted a plan for the area involved which meets established guidelines and (2) the information which would be obtained is needed to make an adequate report under subsection (h) of this section. The Secretary, as a condition of approval of any plan under this section—

(A) may require that such modifications be made to the plan as he considers necessary and appropriate to make it consistent with the guidelines;

(B) shall require that all data and information (including processed, analyzed and interpreted information) obtained as a result of carrying out the plan shall be submitted to the Secretary; and

(C) shall make such data and information available to the public except that any processed, analyzed and interpreted data or information shall be held confidential by the Secretary for a period of not less than two years following any lease sale including the area from which the information was obtained and: *Provided*, That the Secretary shall prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information. The Secretary shall require that any permittee shall make available such data to any person at fair cost.

(f) Modification to exploration plans

If at any time while exploratory activity is being carried out under an exploration plan approved under subsection (e) of this section, the Secretary, on the basis of information available to him, determines that continuation of further activities under the plan or permit will significantly adversely affect fish or wildlife, their habitat, or the environment, the Secretary may suspend the carrying out of activities under the plan or permit for such time, make such modifications to the plan or to the terms and conditions of the permit (or both suspend and so modify) as he determines necessary and appropriate.

(g) Civil penalties

(1) Any person who is found by the Secretary, after notice and an opportunity for a hearing in accordance with section 554 of title 5, to have violated any provision of a plan approved under subsection (e) of this section or any term or condition of a permit issued under subsection (f) of this section, or to have committed any act prohibited under subsection (d) of this section shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$10,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary by written notice. In determining the amount of such penalty, the Sec-

retary shall take into account the nature, circumstances, extent, and gravity of the prohibited act committed, and, with respect to the violator, the history of any prior offenses, his demonstrated good faith in attempting to achieve timely compliance after being cited for the violation, and such other matters as justice may require.

(2) Any person against whom a civil penalty is assessed under paragraph (1) may obtain review thereof in the appropriate district court of the United States by filing a notice of appeal in such court within thirty days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28. The findings and order of the Secretary shall be set aside by such court if they are not found to be supported by substantial evidence, as provided in section 706(2)(E) of title 5.

(3) If any person fails to pay an assessment of a civil penalty against him under paragraph (1) after it has become final, or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary shall refer the matter to the Attorney General of the United States, who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(4) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this subsection unless the matter is pending in court for judicial review or recovery of assessment.

(h) Report to Congress

Not earlier than five years after December 2, 1980, and not later than five years and nine months after such date, the Secretary shall prepare and submit to Congress a report containing—

(1) the identification by means other than drilling of exploratory wells of those areas within the coastal plain that have oil and gas production potential and estimate of the volume of the oil and gas concerned;

(2) the description of the fish and wildlife, their habitats, and other resources that are within the areas identified under paragraph (1);

(3) an evaluation of the adverse effects that the carrying out of further exploration for, and the development and production of, oil and gas within such areas will have on the resources referred to in paragraph (2);

(4) a description of how such oil and gas, if produced within such area, may be transported to processing facilities;

(5) an evaluation of how such oil and gas relates to the national need for additional domestic sources of oil and gas; and

(6) the recommendations of the Secretary with respect to whether further exploration for, and the development and production of, oil and gas within the coastal plain should be

permitted and, if so, what additional legal authority is necessary to ensure that the adverse effects of such activities on fish and wildlife, their habitats, and other resources are avoided or minimized.

(i) Effect of other laws

Until otherwise provided for in law enacted after December 2, 1980, all public lands within the coastal plain are withdrawn from all forms of entry or appropriation under the mining laws, and from operation of the mineral leasing laws, of the United States.

(Pub. L. 96-487, title X §1002, Dec. 2, 1980, 94 Stat. 2449; Pub. L. 97-394, title I, §110, Dec. 30, 1982, 96 Stat. 1982.)

1982—Subsec. (e)(2)(C). Pub. L. 97-394 inserted proviso that the Secretary prohibit by regulation any person who obtains access to such data and information from the Secretary or from any person other than a permittee from participation in any lease sale which includes the areas from which the information was obtained and from any commercial use of the information, and that Secretary require that any permittee make available such data to any person at fair cost.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3144 of this title.

Production of oil and gas from the Arctic National Wildlife Refuge is prohibited and no leasing or other development leading to production of oil and gas from the range shall be undertaken until authorized by an Act of Congress.

(Pub. L. 96-487, title X, §1003, Dec. 2, 1980, 94 Stat. 2452.)

§ 3144. Wilderness portion of study

tions with respect to the designation of the area or any part thereof as wilderness together with a map thereof and a definition of its boundaries.

(c) Preservation of wilderness character and potential

Subject to valid existing rights and the provisions of section 3142 of this title, the wilderness study area designated by this section shall, until Congress determines otherwise, be administered by the Secretary so as to maintain presently existing wilderness character and potential for inclusion in the National Wilderness Preservation System. (Pub. L. 96-487, title X, §1004, Dec. 2, 1980, 94 Stat. 2452.)

§ 3145. Wildlife resources portion of study and impact of potential oil spills in Arctic Ocean

(a) Wildlife resources

The Secretary shall work closely with the State of Alaska and Native Village and Regional Corporations in evaluating the impact of oil and gas exploration, development, production, and transportation and other human activities on the wildlife resources of these lands, including impacts on the Arctic and Porcupine caribou herds, polar bear, muskox, grizzly bear, wolf, wolverine, seabirds, shore birds, and migratory waterfowl. In addition the Secretary shall consult with the appropriate agencies of the Government of Canada in evaluating such impacts particularly with respect to the Porcupine caribou herd.

(b) Oil spills

(1) The Congress finds that—

(A) Canada has discovered commercial quantities of oil and gas in the Amalagak region of the Northwest Territory;

(B) Canada is exploring alternatives for transporting the oil from the Amalagak field to markets in Asia and the Far East;

(C) one of the options the Canadian Government is exploring involves transshipment of oil from the Amalagak field across the Beaufort Sea to tankers which would transport the oil overseas;

(D) the tankers would traverse the American Exclusive Economic Zone through the Beaufort Sea into the Chuckchi Sea and then through the Bering Straits;

(E) the Beaufort and Chuckchi Seas are vital to Alaska's Native people, providing them with subsistence in the form of walrus, seals, fish, and whales;

(F) the Secretary of the Interior has conducted Outer Continental Shelf lease sales in the Beaufort and Chuckchi Seas and oil and gas exploration is ongoing;

(G) an oil spill in the Arctic Ocean, if not properly contained and cleaned up, could have significant impacts on the indigenous people of Alaska's North Slope and on the Arctic environment; and

(H) there are no international contingency plans involving our two governments concern-

ing containment and cleanup of an oil spill in the Arctic Ocean.

(2)(A) The Secretary of the Interior, in consultation with the Governor of Alaska, shall conduct a study of the issues of recovery of damages, contingency plans, and coordinated actions in the event of an oil spill in the Arctic Ocean.

(B) The Secretary shall, no later than January 31, 1991, transmit a report to the Congress on the findings and conclusions reached as the result of the study carried out under this subsection.

(c) Treaty negotiations

The Congress calls upon the Secretary of State, in consultation with the Secretary of the Interior, the Secretary of Transportation, and the Governor of Alaska, to begin negotiations with the Foreign Minister of Canada regarding a treaty dealing with the complex issues of recovery of damages, contingency plans, and coordinated actions in the event of an oil spill in the Arctic Ocean.

(d) Report to Congress

The Secretary of State shall report to the Congress on the Secretary's efforts pursuant to this section no later than June 1, 1991.

(Pub. L. 96-487, title X, §1005, Dec. 2, 1980, 94 Stat. 2453; Pub. L. 101-380, title VIII, §8302, Aug. 18, 1990, 104 Stat. 572.)

AMENDMENTS

1990—Pub. L. 101-380 inserted “and impact of potential oil spills in Arctic Ocean” in section catchline, designated existing text as subsec. (a), and added subsecs. (b) to (d).

EFFECTIVE DATE OF 1990 AMENDMENT

Amendment by Pub. L. 101-380 applicable to incidents occurring after Aug. 18, 1990, see section 1020 of Pub. L. 101-380, set out as an Effective Date note under section 2701 of Title 33, Navigation and Navigable Waters.

STUDY ON BARREN-GROUND CARIBOU

Section 306 of Pub. L. 96-487 provided:

“(a) The Congress finds that the barren-ground caribou are a migratory species deserving of careful study and special protection, and that the Western Arctic and the Porcupine herds of such caribou are of national and international significance.

“(b) The Secretary of the Interior shall conduct, and the Governor of Alaska is urged to cooperate with the Secretary in conducting, an ecological study of the barren-ground caribou herds north of the Yukon River and the herds that have been known to migrate between the United States and Canada, including, but not limited to, a determination of the seasonal migration patterns, reproduction and mortality rates, composition and age structure, behavioral characteristics, habitats (including but not limited to calving, feeding, summering and wintering areas, and key migration routes) that are critical to their natural stability and productivity and the effects on the herds of development by man, predation, and disease. In conducting this study the Secretary shall review the experience of other Arctic circumpolar countries with caribou and is authorized to enter into such contracts as he deems necessary to carry out portions or all of this study.”

§ 3146. Transportation alternatives portion of study

In studying oil and gas alternative transportation systems, the Secretary shall consult with

the Secretary of Transportation and shall consider—

(1) the extent to which environmentally and economically feasible alternative routes could be established;

(2) the prospective oil and gas production potential of this area of Alaska for each alternative transportation route; and

(3) the environmental and economic costs and other values associated with such alternative routes.

(Pub. L. 96-487, title X, §1006, Dec. 2, 1980, 94 Stat. 2453.)

§ 3147. Arctic research study

(a) Mission, facilities, and administration of Naval Arctic Research Laboratory

The Secretary, the Secretary of Defense, and the Secretary of Energy shall initiate and carry out a study of the mission, facilities and administration of the Naval Arctic Research Laboratory (NARL), at Point Barrow, Alaska. The study shall review the historical responsibilities carried out at NARL and their contribution to applied and basic Arctic research. The study shall specifically address and the Secretary shall make recommendations on the need for redirecting the United States Arctic research policy and the role of the NARL facilities in developing and implementing that policy.

(b) Assessment of future uses of NARL

The Secretaries shall assess the future use of NARL in—

(1) developing relevant scientific information on the Arctic environment and utilizing applied research to (A) deal with the unique problems the Arctic presents in providing public services; (B) minimize the impact of resource development on the environment and the culture of the Native people; and (C) promote international cooperation among the Nations which share responsibility for the Arctic environment;

(2) assessing the impact of oil and gas exploration, development, and transportation on the Arctic environment, including impact on fish, marine and land mammals, and migratory waterfowl;

(3) developing advanced design technologies, operational practices, and transportation systems to improve the environmental safety and efficiency of oil and gas exploration and production in the Arctic, including offshore activities;

(4) enlarging the body of knowledge on Arctic ice conditions and developing practical and efficient means of dealing with potential oil spills and other hazards associated with resource development in Alaska's Arctic; and

(5) developing a comprehensive Arctic policy for the Federal Government that will accommodate the need for development and use of Arctic resources with appropriate recognition and consideration given to the unique nature of the Arctic environment and the needs of its Native residents.

(c) Recommendations

After completion of the study, the Secretaries shall make recommendations on—

(1) changes in the mission and management of NARL necessary to accomplish the research and policy goals addressed in the study;

(2) the appropriate Federal agency or agencies that should have primary responsibility for management of NARL;

(3) changes in the organizational structure of NARL that would allow greater involvement by State and private organizations in the use, management and/or funding of NARL; and

(4) the appropriate level of Federal funding for scientific and technological research on the Arctic environment and its uses.

(d) Consultations; opportunity for public review and comment

In the course of the study, the Secretaries shall consult with representatives of the Department of Navy, the National Oceanic and Atmospheric Administration, the National Science Foundation, the Smithsonian Institution, the State of Alaska, local governments, representatives of public and private institutions conducting Arctic research, and Native Village and Regional Corporations in the areas now affected by the activities of NARL. The Secretaries shall provide an opportunity for public review and comment on the draft report and proposed recommendations prior to final approval, and shall include any recommendations of the local community in the final study.

(e) Submission of study to Congress

The Secretaries shall submit the study and their recommendations to the Congress no later than one year after December 2, 1980.

(f) Continuation of level of funding for NARL

Pending submission of the study to the Congress, the President is directed to continue the operation of NARL at the level of funding provided for in fiscal year 1979.

(Pub. L. 96-487, title X, §1007, Dec. 2, 1980, 94 Stat. 2453.)

§ 3148. Oil and gas leasing program for non-North Slope Federal lands

(a) Establishment; restrictions

The Secretary shall establish, pursuant to the Mineral Leasing Act of 1920, as amended [30 U.S.C. 181 et seq.], an oil and gas leasing program on the Federal lands of Alaska not subject to the study required by section 3141 of this title, other than lands included in the National Petroleum Reserve—Alaska. Such program shall not be undertaken by the Secretary on those lands where applicable law prohibits such leasing or on those units of the National Wildlife Refuge System where the Secretary determines, after having considered the national interest in producing oil and gas from such lands, that the exploration for and development of oil or gas would be incompatible with the purpose for which such unit was established.

(b) Study of oil and gas potential and impact of development and production; permits; consultations; State studies; reports to Congress

(1)(A) In such areas as the Secretary deems favorable for the discovery of oil or gas, he shall

conduct a study, or studies, or collect and analyze information obtained by permittees authorized to conduct studies under this section, of the oil and gas potential of such lands and those environmental characteristics and wildlife resources which would be affected by the exploration for and development of such oil and gas.

(B) The Secretary is authorized to issue permits for study, including geological, geophysical, and other assessment activities, if such activities can be conducted in a manner which is consistent with the purposes for which each affected area is managed under applicable law.

(2) The Secretary shall consult with the Secretary of Energy regarding the national interest involved in exploring for and developing oil and gas from such lands and shall seek the views of the Governor of the State of Alaska, Alaskan local governments, Native Regional and Village Corporations, the Alaska Land Use Council, representatives of the oil and gas industry, conservation groups, and other interested groups and individuals in determining which land should be studied and/or leased for the exploration and development of oil and gas.

(3) The Secretary shall encourage the State to undertake similar studies on lands associated, either through geological or other land values or because of possible transportation needs, with Federal lands. The Secretary shall integrate these studies, to the maximum extent practicable, with studies on Federal lands so that needs for cooperation between the Federal Government and the State of Alaska in managing energy and other natural resources, including fish and wildlife, can be established early in the program.

(4) The Secretary shall report to the Congress by October 1, 1981, and yearly thereafter, on his efforts pursuant to this Act regarding the leasing of, and exploration and development activities on, such lands.

(c) Repealed. Pub. L. 100-203, title V, §5105(1), Dec. 22, 1987, 101 Stat. 1330-259

(d) Issuance of leases; competitive bidding

Pursuant to the Mineral Leasing Act of 1920, as amended [30 U.S.C. 181 et seq.], the Secretary is authorized to issue leases, on the Federal lands described in this section, under such terms and conditions as he may, by regulation, prescribe.

(e) Repealed. Pub. L. 100-203, title V, §5105(1), Dec. 22, 1987, 101 Stat. 1330-259

(f) Exploration plan

Prior to any exploration activities on a lease issued pursuant to this section, the Secretary shall require the lessee to describe exploration activities in an exploration plan. He shall approve such plan if such activities can be conducted in conformity with such requirements as may be made by the Secretary for the protection and use of the land for the purpose for which it is managed under applicable law.

(g) Development and production plan

Subsequent to a discovery of oil or gas in paying quantities, and prior to developing and pro-

ducing such oil and gas, the Secretary shall require the lessee to describe development and production activities in a development and production plan. He shall approve such plan if such activities may be conducted in conformity with such requirements as may be made by the Secretary for the protection and use of the land for the purpose for which it is managed under applicable law.

(h) Revised development and production plan

The Secretary shall monitor the performance of the lessee and, if he determines that due to significant changes in circumstances regarding that operation, including environmental or economic changes, new requirements are needed, he may require a revised development and production plan.

(i) Suspension and cancellation of lease

If the Secretary determines that immediate and irreparable damage will result from continuation in force of a lease, that the threat will not disappear and that the advantages of cancellation outweigh the advantages of continuation in force of a lease, he shall suspend operations for up to five years. If such a threat persists beyond such five-year suspension period, he shall cancel a lease and provide compensation to the lease under such terms as the Secretary establishes, by regulation, to be appropriate.

(Pub. L. 96-487, title X, §1008, Dec. 2, 1980, 94 Stat. 2454; Pub. L. 100-203, title V, §5105, Dec. 22, 1987, 101 Stat. 1330-259.)

(c) which read as follows: “At such time as the studies requested in subsection (b)(4) of this section are completed by the Secretary, or at such time as the Secretary determines that sufficient interest has been indicated in exploring an area for oil or gas, and leasing should be commenced, he shall identify those areas which he determines to be favorable for the discovery of oil or gas (hereinafter referred to as ‘favorable petroleum geological provinces’). In making such determination, the Secretary shall utilize all information obtained in studies conducted under subsection (b) of this section as well as any other information he may develop or require by regulation to be transmitted.”

noncompetitive leasing in the area and shall determine the favorable petroleum geological province in proximity to such discovery. All further leasing in such area shall be in accordance with the requirements of subsection (d) of this section.”

§ 3149. Oil and gas lease applications

(a) Lands within National Wildlife Refuge System but not part of National Wilderness Preservation System

Notwithstanding any other provision of law or regulation, whenever the Secretary receives an application for an oil and gas lease pursuant to the Mineral Leasing Act of 1920 [30 U.S.C. 181 et seq.] for lands in Alaska within a unit of the National Wildlife Refuge System which are not also part of the national Wilderness Preservation System he shall, in addition to any other requirements of applicable law, follow the procedures set forth in this section.

(b) Statement of reasons for decision to issue or not to issue lease

Any decision to issue or not to issue a lease shall be accompanied by a statement setting forth the reasons for the decision, including the reasons why oil and gas leasing would be compatible or incompatible with the purposes of the refuge.

(c) Environmental impact statement

If the Secretary determines that the requirements of section 4332(2)(C) of title 42 do not apply to his decision, the Secretary shall render his decision within six months after receipt of a lease application. If such requirements are applicable to the Secretary’s decision, he shall render his decision within three months after publication of the final environmental impact statement.

§ 3150. Alaska mineral resource assessment program

(a) Mineral assessments

The Secretary shall, to the full extent of his authority, assess the oil, gas, and other mineral potential on all public lands in the State of Alaska in order to expand the data base with respect to the mineral potential of such lands. The mineral assessment program may include, but shall not be limited to, techniques such as side-looking radar imagery and, on public lands other than such lands within the national park system, core and test drilling for geologic information, notwithstanding any restriction on such drilling under the Wilderness Act [16 U.S.C. 1131 et seq.]. For purposes of this Act, core and test drilling means the extraction by drilling of subsurface geologic samples in order to assess the metalliferous or other mineral values of geo-

logic terrain, but shall not be construed as including exploratory drilling of oil and gas test wells. To the maximum extent practicable, the Secretary shall consult and exchange information with the State of Alaska regarding the responsibilities of the Secretary under this section and similar programs undertaken by the State. In order to carry out mineral assessments authorized under this or any other law, including but not limited to the National Uranium Resource Evaluation program, the Secretary shall allow for access by air for assessment activities permitted in this subsection to all public lands involved in such study. He shall consult with the Secretary of Energy and heads of other Federal agencies carrying out such programs, to determine such reasonable requirements as may be necessary to protect the resources of such area, including fish and wildlife. Such requirements may provide that access will not occur during nesting, calving, spawning or such other times as fish and wildlife in the specific area may be especially vulnerable to such activities. The Secretary is authorized to enter into contracts with public or private entities to carry out all or any portion of the mineral assessment program. This section shall not apply to the lands described in section 3141 of this title.

(b) Regulations

Activities carried out in conservation system units under subsection (a) of this section shall be subject to regulations promulgated by the Secretary. Such regulations shall ensure that such activities are carried out in an environmentally sound manner—

SUBCHAPTER IV—TRANSPORTATION AND UTILITY SYSTEMS IN AND ACROSS, AND ACCESS INTO, CONSERVATION SYSTEM UNITS

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in section 3166 of this title.

§ 3161. Congressional declaration of findings

Congress finds that—

(a) Alaska’s transportation and utility network is largely undeveloped and the future needs for transportation and utility systems in Alaska would best be identified and provided for through an orderly, continuous decisionmaking process involving the State and Federal Governments and the public;

(b) the existing authorities to approve or disapprove applications for transportation and utility systems through public lands in Alaska are diverse, dissimilar, and, in some cases, absent; and

(c) to minimize the adverse impacts of siting transportation and utility systems within units established or expanded by this Act and to insure the effectiveness of the decisionmaking process, a single comprehensive statutory authority for the approval or disapproval of applications for such systems must be provided in this Act.

is not one that the department or agency having jurisdiction over the unit or area is establishing incident to its management of the unit or area).

(B) The types of systems to which subparagraph (A) applies are as follows:

(i) Canals, ditches, flumes, laterals, pipes, pipelines, tunnels, and other systems for the transportation of water.

(ii) Pipelines and other systems for the transportation of liquids other than water, including oil, natural gas, synthetic liquid and gaseous fuels, and any refined product produced therefrom.

(iii) Pipelines, slurry and emulsion systems and conveyor belts for the transportation of solid materials.

Any system described in this subparagraph includes such related structures and facilities (both temporary and permanent) along the route of the system as may be minimally necessary for the construction, operation, and maintenance of this system. Such related structures and facilities shall be described in the application required by section 3164 of this title, and shall be approved or disapproved in accordance with the procedures set forth in this subchapter.

(Pub. L. 96-487, title XI, §1102, Dec. 2, 1980, 94 Stat. 2458.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3164 of this title.

§ 3163. Effect on other laws

Except as specifically provided for in this subchapter, applicable law shall apply with respect to the authorization and administration of transportation or utility systems.

(Pub. L. 96-487, title XI, §1103, Dec. 2, 1980, 94 Stat. 2459.)

§ 3164. Procedural requirements

(a) In general

Notwithstanding any provision of applicable law, no action by any Federal agency under applicable law with respect to the approval or disapproval of the authorization, in whole or in part, of any transportation or utility system shall have any force or effect unless the provision of this section are complied with.

(b) Consolidated applications

(1) Within one hundred and eighty days after December 2, 1980, the Secretary, the Secretary of Agriculture, and the Secretary of Transportation, in consultation with the heads of other appropriate Federal agencies, shall jointly prescribe and publish a consolidated application

form to be used for applying for the approval of each type of transportation or utility system. Each such application form shall be designed to elicit such information as may be necessary to meet the requirements of this subchapter and the applicable law with respect to the type of system concerned.

(2) For purposes of this section, the heads of all appropriate Federal agencies, including the Secretary of Transportation, shall share decisionmaking responsibility in the case of any transportation or utility system described in section 3162(4)(B)(ii), (iii), or (vii) of this title; but with respect to any such system for which he does not have programmatic responsibility, the Secretary of Transportation shall provide to the other Federal agencies concerned such planning and other assistance as may be appropriate.

(c) Filing

Each applicant for the approval of any transportation or utility system shall file on the same day an application with each appropriate Federal agency. The applicant shall utilize the consolidated form prescribed under subsection (b) of this section for the type of transportation or utility system concerned.

(d) Agency notice

(1) Within sixty days after the receipt of an application filed pursuant to subsection (c) of this section, the head of each Federal agency with whom the application was filed shall inform the applicant in writing that, on its face—

(A) the application appears to contain the information required by this subchapter and applicable law insofar as that agency is concerned; or

(B) the application does not contain such information.

(2) Any notice provided under paragraph (1)(B) shall specify what additional information the applicant must provide. If the applicant provides additional information, the head of the Federal agency must inform the applicant in writing, within thirty days after receipt of such information, whether the information is sufficient.

(e) Environmental impact statement

The draft of any environmental impact statement required under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] in connection with any application filed under this section shall be completed, within nine months from the date of filing, by the head of the Federal agency assigned lead responsibility for the statement. Any such statement shall be jointly prepared by all Federal agencies with which the application was filed under subsection (c) of this section. The final environmental impact statement shall be completed within one year from the date of such filing. Such nine-month and one-year periods may be extended for good cause by the Federal agency head assigned lead responsibility for the preparation of such statement if he determines that additional time is necessary for such preparation, notifies the applicant in writing of such determination, and publishes notices of such determination, together with the reasons therefor, in the Federal Register. The provisions of section 1734 of title 43 shall apply to each environmental impact

statement under this subsection in the same manner as such provisions apply to applications relating to the public lands referred to in section 1734 of title 43. The Federal agency assigned lead responsibility shall, in conjunction with such other Federal agencies before which the application is pending, hold public hearings in the District of Columbia and an appropriate location in the State on each draft joint environmental impact statement and the views expressed therein shall be considered by all Federal agencies concerned before publication of the final joint environmental impact statement.

(f) Other views

During both the nine-month period, and the succeeding three-month period plus any extension thereof provided for in subsection (e) of this section, the heads of the Federal agencies concerned shall solicit and consider the views of other Federal departments and agencies, the Alaska Land Use Council, the State, affected units of local government in the State, and affected corporations formed pursuant to the Alaska Native Claims Settlement Act [43 U.S.C. 1601 et seq.], and, after public notice, shall receive and consider statements and recommendations regarding the application submitted by interested individuals and organizations.

(g) Agency decision

(1) Within four months after the final environmental impact statement is published in accordance with subsection (e) of this section with respect to any transportation or utility system, each Federal agency shall make a decision to approve or disapprove, in accordance with applicable law, each authorization and that applies with respect to the system and that is within the jurisdiction of that agency.

(2) The head of each Federal agency, in making a decision referred to in paragraph (1), shall consider, and make detailed findings supported by substantial evidence, with respect to—

(A) the need for, and economic feasibility of, the transportation or utility system;

(B) alternative routes and modes of access, including a determination with respect to whether there is any economically feasible and prudent alternative to the routing of the system through or within a conservation system unit, national recreation area, or national conservation area and, if not, whether there are alternative routes or modes which would result in fewer or less severe adverse impacts upon the conservation system unit;

(C) the feasibility and impacts of including different transportation or utility systems in the same area;

(D) short- and long-term social, economic, and environmental impacts of national, State, or local significance, including impacts on fish and wildlife and their habitat, and on rural, traditional lifestyles;

(E) the impacts, if any, on the national security interests of the United States, that may result from approval or denial of the application for a transportation or utility system;

(F) any impacts that would affect the purposes for which the Federal unit or area concerned was established;

(G) measures which should be instituted to avoid or minimize negative impacts; and

(H) the short- and long-term public values which may be adversely affected by approval of the transportation or utility system versus the short- and long-term public benefits which may accrue from such approval.

If the President denies an application the applicant shall be deemed to have exhausted his administrative remedies, and may file suite in any appropriate Federal court to challenge such decision. (2) If the plan prepared pursuant to this section is agreed to by the Secretary and the Governor includes any recommendations regarding

(i) the exchange of State lands, (ii) the management of Federal lands within any conservation system unit, or (iii) any other actions which require the approval of either the Congress or the Alaska State Legislature, then the Secretary and the Governor shall submit to the Congress and the State Legislature as appropriate, their proposals for legislation necessary to carry out the recommendations contained in the plan.

(f) Transitional provisions

On December 2, 1980, and for a period of three years thereafter, all Federal land within the region (except that land conveyed by title IX of this Act to the State of Alaska and Federal lands located within the boundaries of conservation system units) shall be withdrawn from all forms of appropriation under the public land laws, including selections by the State, and from location and entry under the mining laws and from leasing under the Mineral Leasing Act [30 U.S.C. 181 et seq.], and shall be managed by the Bureau of Land Management under its existing statutory authority and consistent with provisions of this section.

Subchapter LIX-F of chapter 1 of this title, referred to in subsec. (b), commences with section 410hh of this title.

§ 3192. Land acquisition authority

(a) General authority

Except as provided in subsections (b) and (c) of this section, the Secretary is authorized, consistent with other applicable law in order to carry out the purposes of this Act, to acquire by purchase, donation, exchange, or otherwise any lands within the boundaries of any conservation system unit other than National Forest Wilderness.

(b) Restrictions

Lands located within the boundaries of a conservation system unit which are owned by—

(A) the State or a political subdivision of the State;

(B) a Native Corporation or Native Group which has Natives as a majority of its stockholders;

(C) the actual occupant of a tract, title to the surface estate of which was on, before, or after December 2, 1980, conveyed to such occupant pursuant to section 1613(c)(1) and (h)(5) of

title 43, unless the Secretary determines that the tract is no longer occupied for the purpose described in section 1613(c)(1) or (h)(5) of title 43 for which the tract was conveyed and that activities on the tract are or will be detrimental to the purposes of the unit in which the tract is located; or

(D) a spouse or lineal descendant of the actual occupant of a tract described in subparagraph (C), unless the Secretary determines that activities on the tract are or will be detrimental to the purposes of the unit in which the tract is located—

may not be acquired by the Secretary without the consent of the owner.

(c) Exchanges

Lands located within the boundaries of a conservation system unit (other than National Forest Wilderness) which are owned by persons or entities other than those described in subsection (b) of this section shall not be acquired by the Secretary without the consent of the owner unless prior to final judgment on the value of the acquired land, the owner, after being offered appropriate land of similar characteristics and like value (if such land is available from public lands located outside the boundaries of any conservation system unit), chooses not to accept the exchange. In identifying public lands for exchange pursuant to this subsection, the Secretary shall consult with the Alaska Land Use Council.

(d) Improved property

No improved property shall be acquired under subsection (a) of this section without the consent of the owner unless the Secretary first determines that such acquisition is necessary to the fulfillment of the purposes of this Act or to the fulfillment of the purposes for which the concerned conservation system unit was established or expanded.

(e) Retained rights

The owner of an improved property on the date of its acquisition, as a condition of such acquisition, may retain for himself, his heirs and assigns, a right of use and occupancy of the improved property for noncommercial residential or recreational purposes, as the case may be, for a definite term of not more than twenty-five years, or in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. The owner shall elect the term to be reserved. Unless the property is wholly or partially donated, the Secretary shall pay to the owner the fair market value of the owner's interest in the property on the date of its acquisition, less the fair market value on that date of the right retained by the owner. A right retained by the owner pursuant to this section shall be subject to termination by the Secretary upon his determination that such right is being exercised in a manner inconsistent with the purposes of this Act, and it shall terminate by operation of law upon notification by the Secretary to the holder of the right of such determination and tendering to him the amount equal to the fair market value of that portion which remains unexpired.

(f) “Improved property” defined

For the purposes of this section, the term “improved property” means—

(1) a detached single family dwelling, the construction of which was begun before January 1, 1980 (hereinafter referred to as the “dwelling”), together with the land on which the dwelling is situated to the extent that such land—

(A) is in the same ownership as the dwelling or is Federal land on which entry was legal and proper, and

(B) is designated by the Secretary to be necessary for the enjoyment of the dwelling for the sole purpose of noncommercial residential use, together with any structures necessary to the dwelling which are situated on the land so designated, or

(2) property developed for noncommercial recreational uses, together with any structures accessory thereto which were so used on or before January 1, 1980, to the extent that entry onto such property was legal and proper.

In determining when and to what extent a property is to be considered an “improved property”, the Secretary shall take into consideration the manner of use of such buildings and lands prior to January 1, 1980, and shall designate such lands as are reasonably necessary for the continued enjoyment of the property in the same manner and to the same extent as existed before such date.

(g) Consideration of hardship

The Secretary shall give prompt and careful consideration to any offer made by the owner of any property within a conservation system unit to sell such property, if such owner notifies the Secretary that the continued ownership is causing, or would result in, undue hardship.

(h) Exchange authority

(1) Notwithstanding any other provision of law, in acquiring lands for the purposes of this Act, the Secretary is authorized to exchange lands (including lands within conservation system units and within the National Forest System) or interests therein (including Native selection rights) with the corporations organized by the Native Groups, Village Corporations, Regional Corporations, and the Urban Corporations, and other municipalities and corporations or individuals, the State (acting free of the restrictions of section 6(i) of the Alaska Statehood Act), or any Federal agency. Exchanges shall be on the basis of equal value, and either party to the exchange may pay or accept cash in order to equalize the value of the property exchanged, except that if the parties agree to an exchange and the Secretary determines it is in the public interest, such exchanges may be made for other than equal value.

(2) Nothing in this Act or any other provision of law shall be construed as authorizing the Secretary to convey, by exchange or otherwise, lands or interest in lands within the coastal plain of the Arctic National Wildlife Refuge (other than land validly selected prior to July 28, 1987), without prior approval by Act of Congress.

(i) Donation or exchange

(1) The Secretary is authorized to acquire by donation or exchange, lands (A) which are contiguous to any conservation system unit established or expanded by this Act, and (B) which are owned or validly selected by the State of Alaska.

(2) Any such lands so acquired shall become a part of such conservation system unit.

§3193. Use of cabins and other sites of occupancy on conservation system units**(a) Improved property on National Park System lands**

(1) On public lands within the boundaries of any unit of the National Park System created or enlarged by this Act, cabins or other structures existing prior to December 18, 1973, may be occupied and used by the claimant to these structures pursuant to a renewable, nontransferable permit. Such use and occupancy shall be for terms of five years each: *Provided*, That the claimant of the structure by application:

(A) Reasonably demonstrates by affidavit, bill of sale or other documentation, proof of

possessory interest or right of occupancy in the cabin or structure;

(B) Submits a sketch or photograph of the cabin or structure and a map showing its geographic location;

(C) Agrees to vacate the cabin and to remove all personal property from the cabin or structure upon expiration of the permit; and

(D) Acknowledges in the permit that the applicant has no interest in the real property on which the cabin or structure is located.

(2) On public lands within the boundaries of any unit of the National Park System created or enlarged by this Act, cabins or other structures, the occupancy or use of which commenced between December 18, 1973, and December 1, 1978, may be used and occupied by the claimant of such structure pursuant to a nontransferable, nonrenewable permit. Such use and occupancy shall be for a maximum term of one year: *Provided, however*, That the claimant, by application:

(A) Reasonably demonstrates by affidavit, bill of sale, or other documentation, proof of possessory interest or right of occupancy in the cabin or structure;

(B) Submits a sketch or photograph of the cabin or structure and a map showing its geographic location;

(C) Agrees to vacate the cabin or structure and to remove all personal property from it upon expiration of the permit; and

(D) Acknowledges in the permit that the applicant has no legal interest in the real property on which the cabin or structure is located.

The Secretary may, on a case by case basis, subject to reasonable regulations, extend such permit term beyond one year for such reasons as the Secretary deems equitable and just.

(3) Cabins or other structure not under permit as specified herein shall be used only for official government business: *Provided however*, That during emergencies involving the safety of human life or where designated for public use by the Secretary, these cabins may be used by the general public.

(4) The Secretary may issue a permit under such conditions as he may prescribe for the temporary use, occupancy, construction and maintenance of new cabins or other structures if he determines that the use is necessary to reasonably accommodate subsistence uses or is otherwise authorized by law.

(b) Improved property on other units or areas established or expanded by this Act

The following conditions shall apply regarding the construction, use and occupancy of cabins and related structures on Federal lands within conservation system units or areas not provided for in subsection (a) of this section:

(1) The construction of new cabins is prohibited except as may be authorized pursuant to a nontransferable, five-year special use permit issued by the Secretary. Such special use permit shall only be issued upon a determination that the proposed use, construction, and maintenance of a cabin is compatible with the purposes for which the unit or area was estab-

lished and that the use of the cabin is either directly related to the administration of the unit or area or is necessary to provide for a continuation of an ongoing activity or use otherwise allowed within the unit or area where the permit applicant has no reasonable alternative site for constructing a cabin. No special use permit shall be issued to authorize the construction of a cabin for private recreational use.

(2) Traditional and customary uses of existing cabins and related structures on Federal lands within a unit or area may be allowed to continue in accordance with a nontransferable, renewable five-year special use permit issued by the Secretary. Such special use permit shall be issued only upon a determination that the traditional and customary uses are compatible with the purposes for which the unit or area was established. No special use permits shall be issued to authorize the use of an existing cabin constructed for private recreational use.

(3) No special use permit shall be issued under paragraphs (1) or (2) of this subsection unless the permit applicant:

(A) In the case of existing cabins or structures, reasonably demonstrates by affidavit, bill of sale or other documentation, proof of possessory interests or right of occupancy in the cabin or structure;

(B) Submits a sketch or photograph of the existing or proposed cabin or structure and a map showing its geographic location;

Upon termination of such activities and uses (but not upon regular or seasonal cessation), such structures or facilities shall, upon written request, be removed from the area by the permittee.

Notwithstanding the foregoing provisions, the Secretary may determine, after adequate notice, that the establishment and use of such new facilities or equipment would constitute a significant expansion of existing facilities or uses which would be detrimental to the purposes for which the affected conservation system unit was established, including the wilderness character of any wilderness area within such unit, and may thereupon deny such proposed use or establishment.

§ 3231. Areas subject to national need recommendation process

The process contained in this subchapter shall apply to all public lands within Alaska except for lands within units of the National Park System and the Arctic National Wildlife Refuge.

(Pub. L. 96-487, title XV, §1501, Dec. 2, 1980, 94 Stat. 2549.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3232 of this title.

§ 3232. Recommendations of President to Congress

(a) Recommendation

At any time after December 2, 1980, the President may transmit a recommendation to the Congress that mineral exploration, development, or extraction not permitted under this Act or other applicable law shall be permitted in a specified area of the lands referred to in section 3231 of this title. Notice of such transmittal shall be published in the Federal Register. No recommendation of the President under this section may be transmitted to the Congress before ninety days after publication in the Federal Register of notice of his intention to submit such recommendation.

(b) Findings

A recommendation may be transmitted to the Congress under subsection (a) of this section if

the President finds that, based on the information available to him—

(1) there is an urgent national need for the mineral activity; and

(2) such national need outweighs the other public values of the public lands involved and the potential adverse environmental impacts which are likely to result from the activity.

(c) Report

Together with his recommendation, the President shall submit to the Congress—

(1) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendation;

(2) a statement of the conditions and stipulations which would govern the activity if approved by the Congress; and

(3) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.], a statement which complies with the requirements of section 102(2)(C) of such Act [42 U.S.C. 4332(2)(C)]. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of the National Environmental Policy Act of 1969 [42 U.S.C. 4332(2)(C)], the President may, if he deems it desirable, include such a statement in his transmittal to the Congress.

(d) Approval

Any recommendation under this section shall take effect only upon enactment of a joint resolution approving such recommendation within the first period of one hundred and twenty calendar days of continuous session of Congress beginning on the date after the date of receipt by the Senate and House of Representatives of such recommendation. Any recommendation of the President submitted to Congress under subsection (a) of this section shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recommendation is submitted.

(e) One-hundred-and-twenty-day computation

For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the one-hundred-and-twenty-day calendar period.

SUBCHAPTER I—GENERAL PROVISIONS

§ 3301. Congressional findings and declaration of purpose

(a) The Congress finds and declares the following:

(1) The stocks of salmon and steelhead which originate in the rivers of the conservation areas constitute valuable and renewable natural resources. Many groups of commercial, recreational, and treaty fishermen have historically depended upon these stocks of fish for their livelihoods and avocations. These fishery resources contribute to the food supply and economic health of the Pacific Northwest and the Nation as a whole, provide valuable recreational experiences for thousands of citizens from various parts of the United States and represent a central element of the cultures and economies of Indian tribes and the citizens of the Pacific Northwest.

(2) Over a period of several decades, competing uses of salmon and steelhead habitat and historical problems relating to conservation measures, the regulation of harvest and enhancement have depressed several of these stocks of salmon and steelhead.

(3) Improved management and enhancement planning and coordination among salmon and steelhead managers will help prevent a further decline of salmon and steelhead stocks and will assist in increasing the supply of these stocks.

(4) Due in principal part to the Federal court decisions in the United States against Washington and Sohappay against Smith, the fishing capacity of nontreaty fishermen in the conservation areas established by this chapter exceeds that required to harvest the available salmon resources. This excess capacity causes severe economic problems for these fishermen.

(5) The supply of salmon and steelhead can be increased through carefully planned enhancement measures designed to improve the survival of stocks and to augment the production of artificially propagated stocks. By careful choice of species, areas, and stocking procedures, enhancement programs can be used to—

(A) improve the distribution of fish among different groups of treaty and nontreaty fishermen; and

(B) add stability to the treaty and nontreaty fisheries by reducing variations in fish availability.

(b) In order to assist the harvesters of the salmon and steelhead resources within the Columbia River conservation area and the Washington conservation area established by this chapter to overcome temporary dislocations arising from the decisions in the cases of United States against Washington and Sohappay against Smith and from other causes, this chapter authorizes the establishment of a cooperative program involving the United States, the States of Washington and Oregon, the treaty tribes acting through the appropriate tribal coordinating bodies, and other parties, to—

(1) encourage stability in and promote the economic well being of the treaty and nontreaty commercial fishing and charter fishing industries and improve the distribution of fishing power between treaty and nontreaty fisheries through—

(A) the purchase of nontreaty commercial and charter fishing vessels, gear, and licenses; and

(B) coordinated research, enhancement, and management of salmon and steelhead resources and habitat; and

(2) improve the quality of, and maintain the opportunities for, salmon and steelhead recreational fishing.

SUBCHAPTER III—RESOURCE
ENHANCEMENT

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in sections 3312, 3313, 3314, 3342, 3343 of this title.

§ 3321. Grants for projects under approved enhancement plans

(a) Authority

The Secretary of the Interior (hereinafter referred to in this subchapter as the "Secretary"), in consultation with the Secretary of Commerce, is authorized to establish a program to provide grants for projects for the enhancement of the salmon and steelhead resources of the Washington conservation area and the Columbia River conservation area.

(b) Plans

Any such project in the Washington conservation area must be in accordance with a comprehensive enhancement plan developed and agreed to by the State of Washington and the Washington tribal coordinating body within 18 months after December 22, 1980. Any enhancement project in the Columbia River conservation area must be in accordance with a comprehensive enhancement plan developed and agreed to by the State of Washington, the State of Oregon, and the Columbia River tribal coordinating body within 18 months after December 22, 1980. Such plans must be approved by the Secretary, in consultation with the Secretary of Commerce, as provided in this subchapter. The States shall solicit and consider the comments and views of interested commercial and recreational fishermen, and other interested parties, in developing the comprehensive enhancement plan.

(c) Scope

Each comprehensive enhancement plan, and any revisions, or modifications of such plan, shall describe all enhancement projects in the conservation area, and associated stocking policies (when relevant), including any related research necessary to such enhancement anticipated by the States and the treaty tribes (acting through the appropriate tribal coordinating body) for a period of at least 5 years.

(d) Standards

Each comprehensive enhancement plan shall include such standards, restrictions, or conditions as are necessary, to assure that any project included in the plans contributes to the balanced and integrated development of the salmon and steelhead resources of the area. Such standards shall include, but not be limited to provisions designed to—

(1) assure that all commercial and recreational fishermen and the treaty tribes shall have a reasonable opportunity to participate in the benefits, considered as a whole, of the salmon and steelhead resources development;

(2) minimize, to the extent practicable, significant adverse interaction between naturally spawning and artificially¹ propagated stocks;

(3) ensure that all projects included within the plan are designed to complement the contribution of sound State, Federal, and tribal enhancement activities;

(4) ensure that all projects included within the plan are economically and biologically sound and supported by adequate scientific research;

¹ So in original. Probably should be "artificially".

(5) assure that all projects included within the plan achieve significant benefits relative to the overall cost of each such project;

(6) consider the effect of enhancement activities as they relate to existing and future international commitments; and

(7) notwithstanding any of the above measures, provide for the harvest of fish by treaty tribes in accordance with treaty rights, unless agreed otherwise by the affected treaty tribes.

(e) Approval

(1) The Secretary, in consultation with the Secretary of Commerce, shall review each comprehensive enhancement plan and approve such plan within 120 days of the date of its receipt, if found to be consistent with this chapter and other applicable law. If the Secretary, in consultation with the Secretary of Commerce, finds that a plan is not in conformity with the provisions of this chapter or other applicable law, he shall return such plan to the State of Washington or the State of Oregon, or both, as appropriate, and the appropriate tribal coordinating body with recommendations.

(2) Upon receiving such a plan, the Secretary, in consultation with the Secretary of Commerce, shall—

(A) publish a notice in the Federal Register of the availability of the plan;

(B) provide a copy of the plan to the Pacific Fishery Management Council and, upon request, to any other interested person or group, and solicit and consider the comments and views of such persons or groups with respect to the plan;

(C) undertake a biological and technical review of the plan, in consultation with individuals who are knowledgeable with regard to the management, conservation, enhancement, and harvest of the salmon and steelhead resources of the area;

(D) provide a copy of the plan to and consult with the Secretary of State and the Secretary of Commerce, with respect to the effect of such plan on any international fisheries; and

(E) determine whether the State of Washington or the State of Oregon, as appropriate, and the treaty tribes, acting through their chosen agency or agencies, have the authority to carry out the plan in accordance with this chapter, and in accordance with standards included within the plan.

(3) The Secretary, in consultation with the Secretary of Commerce, shall not approve a comprehensive enhancement plan unless the State of Washington or the State of Oregon, or both, as appropriate, and the treaty tribes, acting through the appropriate tribal coordinating body, agree not to undertake any salmon or steelhead enhancement project, using funds provided pursuant to this subchapter or otherwise, that would be inconsistent with the plan.

(4) The Secretary may not approve a comprehensive plan unless the Secretary of Commerce concurs that such plan satisfactorily complies with standards (1), (6), and (7) of subsection (d) of this section.

(f) Review, modification, or revisions

Each comprehensive enhancement plan shall be reviewed periodically. The Secretary, the

Secretary of Commerce, the State of Washington, the State of Oregon, or the appropriate tribal coordinating body may request a review, modification, or revision of a plan at any time. Any revision or modification of a plan, developed and agreed to by the State of Washington or the State of Oregon, as appropriate, and the appropriate tribal coordinating body, shall be approved by the Secretary, in consultation with the Secretary of Commerce, within 45 days of receipt of the proposed revision or modification, if such revision or modification is in conformity with this chapter and other applicable law. The Federal share payable under this subchapter shall not exceed 75 percent of the total cost of the program.

(b) Legal title

- (2) set aside specific allocations of funds for each gear type to achieve the specific fleet reductions provided for in the program;
- (3) obtain an effective and expeditious reduction in the overall fishing capacity of and the number of vessels and licenses in the non-Indian commercial and charter salmon fishing fleets in the Washington conservation area; and
- (4) provide State funding for 25 per centum of the total cost of the program.

(Pub. L. 96-561, title I, § 131, Dec. 22, 1980, 94 Stat. 3284.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3333 of this title.

§ 3333. Program approval

The State shall submit its program and submit revisions, modifications, or amendments to the Secretary in accordance with standards established pursuant to section 3332 of this title and in such manner and form as the Secretary shall prescribe.

(b) Requirements for approval

Prior to approving such program or any revision, modification, or amendment, and authorizing Federal funds to be distributed in accordance with this subchapter, the Secretary must find that—

- (1) the State, acting through its chosen agency or agencies, has authority to carry out a commercial and charter vessel fleet reduction program in accordance with the provisions of this subchapter;
- (2) the State program provides that a fishing or charter vessel may not be purchased by the State from other than the person who owned the vessel on December 22, 1980;
- (3) the State program prevents the expenditure of a disproportionate amount of funds available for vessel acquisition on vessels owned by any one person;

- (5) the State program provides that no person may purchase from the State any vessel which that person or a member of that person's immediate family had previously sold to the State;
- (6) the State program provides that no person may purchase any vessel sold to the State pursuant to the program and use such vessel for commercial or charter salmon fishing in the Washington conservation area, unless State law provides that the use of such vessel could not result in any additional fishing effort in the non-Indian fishing fleet;

(7) the State program provides for purchase of vessels at their fair market value;

(8) the State program provides for the reduction of salmon fishing licenses, through purchase of such licenses at their fair market value, and the use of bonuses and schedules, to—

- (A) secure an early retirement from the salmon fishery;
- (B) recognize productiveness if the commercial harvesters using a gear type wish¹ that gear type's specific allocation of funds to recognize productiveness; and
- (C) recognize passenger-carrying capacity for charter fishing licenses;

(9) the State program provides, with respect to marginally productive commercial salmon fishermen, for the purchase of their salmon fishing licenses, but not their fishing vessels;

(10) the State maintains a moratorium, or similar program, to preclude the issuance of new commercial or charter salmon fishing licenses; and

(11) the State has established a revolving fund for the operation of the fleet reduction program that includes an individual account for each category of fishing license (based on type of fishing gear used) and that any moneys received by the State or its agents from the resale of any fishing vessel or gear purchased under the program (A) shall be placed in such revolving fund, (B) shall, for at least 2 years from the date of the program's inception, be placed in the appropriate individual account, and (C) shall be used exclusively to purchase commercial fishing and charter vessels and licenses in accordance with the provisions of this subchapter.

(c) Secretarial action

The Secretary shall approve such program within ninety days of the date of receipt of the program if found to be consistent with this chapter and other applicable law. If the Secretary finds that such program is not in conformity with the provisions of this chapter or other applicable law, he shall return such program to the State with recommendations. (2) Any person who violates section 3372(b) of this title may be assessed a civil penalty by the Secretary of not more than \$250.

(3) For purposes of paragraphs (1) and (2), any reference to a provision of this chapter or to a section of this chapter shall be treated as including any regulation issued to carry out any such provision or section.

(4) No civil penalty may be assessed under this subsection unless the person accused of the violation is given notice and opportunity for a hearing with respect to the violation. Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which a person may have taken or been in possession of the said fish or wildlife or plants.

(5) Any civil penalty assessed under this subsection may be remitted or mitigated by the Secretary.

(6) In determining the amount of any penalty assessed pursuant to paragraphs (1) and (2), the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited act committed, and with respect to the violator, the degree of culpability, ability to pay, and such other matters as justice may require.

(b) Hearings

Hearings held during proceedings for the assessment of civil penalties shall be conducted in accordance with section 554 of title 5. The administrative law judge may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, or docu-

(c) Review of civil penalty

Any person against whom a civil penalty is assessed under this section may obtain review thereof in the appropriate District Court of the United States by filing a complaint in such court within 30 days after the date of such order and by simultaneously serving a copy of the complaint by certified mail on the Secretary, the Attorney General, and the appropriate United States attorney. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28. If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary may request the Attorney General of the United States to institute a civil action in an appropriate district court of the United States to collect the penalty, and such court shall have jurisdiction to hear and decide any such action. In hearing such action, the court shall have authority to review the violation and the assessment of the civil penalty de novo.

Each violation shall be a separate offense and the offense shall be deemed to have been committed not only in the district where the violation first occurred, but also in any district in which the defendant may have taken or been in possession of the said fish or wildlife or plants.

(3) Any person who knowingly violates section 3372(d) of this title—

(e) Permit sanctions

The payments under such contracts shall be in such amounts as determined by the Secretary to be necessary to effectuate the purposes of this subchapter but shall not exceed an amount equal to the number of acres of cropland removed from agricultural production for such purpose multiplied by 50 per centum of the typical annual rent, as determined by the Secretary, paid for similar land in the county. Financial assistance may not be provided under this section with respect to any conservation measure without the approval of the soil and water conservation district board for the district in which the land is located, and may not, in the aggregate, be provided in any year with respect to more than one-half of 1 per centum of the cropland in any county.

(b) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this section, such sums to remain available until expended.

§ 3472. Conservation tillage; Congressional findings, etc.

(a) Congress finds that—

(1) domestic and international demand for agricultural products from the United States is great and is expected to significantly increase over the next twenty years;

(2) the ability of the United States to provide agricultural products to meet that demand is seriously impaired by the annual loss of five billion tons of soil due to wind and water erosion;

(3) the battle against soil erosion is being lost despite the annual expenditure of millions of dollars by the Federal Government on research, technical assistance, and conservation incentives to control soil erosion;

(4) conservation tillage practices are estimated to reduce soil erosion by 50 to 90 per centum over conventional farming practices; and

(5) conservation tillage may result in better yields, greater land use flexibility, decreased fuel use, decreased labor and equipment costs, increased retention of soil moisture, and more productive land than conventional farming practices and may be adaptable to a broad range of soil types and slopes throughout the country.

(b) It is the sense of Congress that the Secretary of Agriculture should, and is hereby urged and requested to—

(1) direct the attention of our Nation's farmers to the costs and benefits of conservation

tillage as a means of controlling soil erosion and improving profitability; and

(2) conduct a program of research designed to resolve any unanswered questions regarding the advantages and disadvantages of conservation tillage over other soil conservation practices.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 42 section 5172.

§ 3501. Congressional statement of findings and purpose

(a) The Congress finds that—

(1) coastal barriers along the Atlantic and Gulf coasts and along the shore areas of the Great Lakes of the United States and the adjacent wetlands, marshes, estuaries, inlets and nearshore waters provide—

(A) habitats for migratory birds and other wildlife; and

(B) habitats which are essential spawning, nursery, nesting, and feeding areas for commercially and recreationally important species of finfish and shellfish, as well as other aquatic organisms such as sea turtles;

(2) coastal barriers contain resources of extraordinary scenic, scientific, recreational, natural, historic, archeological, cultural, and economic importance; which are being irretrievably damaged and lost due to development on, among, and adjacent to, such barriers;

(3) coastal barriers serve as natural storm protective buffers and are generally unsuitable for development because they are vulnerable to hurricane and other storm damage and because natural shoreline recession and the movement of unstable sediments undermine manmade structures;

(4) certain actions and programs of the Federal Government have subsidized and permitted development on coastal barriers and the result has been the loss of barrier resources, threats to human life, health, and property, and the expenditure of millions of tax dollars each year; and

(5) a program of coordinated action by Federal, State, and local governments is critical to the more appropriate use and conservation of coastal barriers.

(b) The Congress declares that it is the purpose of this chapter to minimize the loss of human life, wasteful expenditure of Federal revenues, and the damage to fish, wildlife, and other natural resources associated with the coastal barriers along the Atlantic and Gulf coasts and along the shore areas of the Great Lakes by restricting future Federal expenditures and financial assistance which have the effect of encouraging development of coastal barriers, by establishing a Coastal Barrier Resources System, and by considering the means and measures by which the long-term conservation of these fish, wildlife, and other natural resources may be achieved.

(2) The term "Committees" refers to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(3) The term "financial assistance" means any form of loan, grant, guaranty, insurance, payment, rebate, subsidy, or any other form of direct or indirect Federal assistance other than—

An Act to provide for the conservation and management of the fisheries, and for other purposes, approved April 13, 1976 (16 U.S.C. 1801 et seq.), referred to in par. (1), is Pub. L. 94-265, Apr. 13, 1976, 90 Stat. 331, as amended, known as the Magnuson-Stevens Fishery Conservation and Management Act, which is classified principally to chapter 38 (§1801 et seq.) of this title. For complete classification of this Act to the Code, see Short Title note set out under section 1801 of this title and Tables.

Section 3 of the Act of 1976 (16 U.S.C. 1802), referred to in pars. (6) and (8), was subsequently amended, and section 3(10) and (19) no longer defines the terms “fishing” and “person”. However, such terms are defined elsewhere in that section.

CODIFICATION

Section 3602 of this title, referred to in par. (3), was in the original “section 403 of this title”, meaning section 403 of title III of Pub. L. 97-389, and has been translated as section 3602 of this title, section 303 of title III of Pub. L. 97-389, as the probable intent of Congress, because title III of Pub. L. 97-389 does not contain a section 403 and section 3602 of this title relates to appointment of a United States Commissioner.

SHORT TITLE

Section 301 of title III of Pub. L. 97-389 provided: “This title [enacting this chapter] may be cited as the ‘Atlantic Salmon Convention Act of 1982’.”

Section 1 of Pub. (b) Alternate Commissioners

The Secretary of State, in consultation with the Secretary of Commerce and the Secretary of the Interior, may designate alternate United States Commissioners. In the absence of a Commissioner appointed under subsection (a) of this section, an alternate Commissioner may exercise at any meeting of the Organization, the Council, or any Commission all functions of such Commissioner.

(c) Limited Federal employee status

Individuals who serve as Commissioners and alternate Commissioners shall not receive any compensation for such service. Such individuals shall not be considered to be Federal employees while performing such service, except for purposes of injury compensation or tort claims liability as provided in chapter 81 of title 5 and chapter 171 of title 28.

(d) Consultation with other parties

In carrying out their functions under the Convention, the Commissioners may consult with the appropriate Regional Fishery Management Councils established by section 302 of the Act of 1976 (16 U.S.C. 1852), and may consult with such other interested parties as they consider appropriate. The Federal Advisory Committee Act (5 U.S.C. App. et seq.) shall not apply to consultations described in this subsection.

§ 3703. Rights and obligations of Foundation**(a) In general**

The Foundation—

(1) shall have perpetual succession;

(2) may conduct business throughout the several States, territories, and possessions of the United States and abroad;

(3) shall have its principal offices in the District of Columbia; and

(4) shall at all times maintain a designated agent authorized to accept service of process for the Foundation.

The serving of notice to, or service of process upon, the agent required under paragraph (4), or mailed to the business address of such agent, shall be deemed as service upon or notice to the Foundation.

(b) Seal

The Foundation shall have an official seal selected by the Board which shall be judicially noticed.

(c) Powers

To carry out its purposes under section 3701 of this title, the Foundation shall have, in addition

to the powers otherwise given it under this chapter, the usual powers of a corporation acting as a trustee in the District of Columbia, including the power—

(1) to accept, receive, solicit, hold, administer and use any gift, devise, or bequest, either absolutely or in trust, of real or personal property or any income therefrom or other interest therein;

(2) to acquire by purchase or exchange any real or personal property or interest therein, subject to subsection (e) of this section;

(3) unless otherwise required by the instrument of transfer, to sell, donate, lease, invest, reinvest, retain or otherwise dispose of any property or income therefrom;

(4) to borrow money and issue bonds, debentures, or other debt instruments;

(5) to sue and be sued, and complain and defend itself in any court of competent jurisdiction, except that the Directors of the Board shall not be personally liable, except for gross negligence;

(6) to enter into contracts or other arrangements with public agencies and private organizations and persons and to make such payments as may be necessary to carry out its function; and

(7) to do any and all acts necessary and proper to carry out the purposes of the Foundation.

For purposes of this chapter, an interest in real property shall be treated as including, among other things, easements or other rights for preservation, conservation, protection, or enhancement by and for the public of natural, scenic, historic, scientific, educational, inspirational, or recreational resources. A gift, devise, or bequest may be accepted by the Foundation even though it is encumbered, restricted, or subject to beneficial interests of private persons if any current or future interest therein is for the benefit of the Foundation.

(d) Certain lands, waters, and interests not subject to condemnation

No lands or waters, or interests therein, that are owned by the Foundation and are determined by the Director of the United States Fish and Wildlife Service or the Migratory Bird Conservation Commission, as the case may be, to be valuable for purposes of fish and wildlife conservation or management shall be subject to condemnation by any State or political subdivision, or any agent or instrumentality thereof.

(e) Acquisition, management, and disposal of real property

(1) The Foundation may only use Federal funds for the acquisition of interests in real property if—

(A) the interest is a long-term property interest, and

(B) the Director of the United States Fish and Wildlife Service (hereafter in this subsection referred to as the “Director”) consents to the acquisition in writing.

(2) The Foundation shall convey to the United States Fish and Wildlife Service for inclusion within the National Wildlife Refuge System any real property acquired by the Foundation in

whole or in part with Federal funds if the Director, within one year after the date on which the property was acquired by the Foundation, requests the conveyance in writing.

(3)(A) Subject to subparagraph (B), the Foundation may—

(i) convey to another person any real property acquired in whole or in part with Federal funds and not conveyed under paragraph (2); and

(ii) grant or otherwise provide Federal funds to another person for purposes of assisting that person to acquire real property in whole or in part with such funds.

(B) The Foundation may only make a conveyance or provide Federal funds under subparagraph (A) if—

(i) the conveyance or provision is subject to terms and conditions that will ensure that the real property will be administered for the long-term conservation and management of fish and wildlife and in a manner that will provide for appropriate public access and use; and

(ii) the Director finds that conveyance or provision of Federal funds meets the requirements of clause (i) and consents to it in writing.

(4) All real property acquired by the Foundation in whole or in part with Federal funds and held by it shall be administered for the conservation and management of fish and wildlife and in a manner that will provide for appropriate public access and use.

(5) The Foundation shall convey at not less than fair-market value any real property acquired by it in whole or in part with Federal funds if the Foundation and the Director determine, in writing, that—

(A) the land is no longer valuable for the purposes of fish and wildlife conservation or management, and

(B) the purposes of the Foundation would be better served by the use of the Federal funds for other authorized activities of the Foundation.

(f) Establishment of national whale conservation endowment fund

(1) In carrying out the purposes under section 3701(b) of this title, the Foundation may establish a national whale conservation endowment fund, to be used by the Foundation to support research, management activities, or educational programs that contribute to the protection, conservation, or recovery of whale populations in waters of the United States.

(2)(A) In a manner consistent with subsection (c)(1) of this section, the Foundation may—

(i) accept, receive, solicit, hold, administer, and use any gift, devise, or bequest made to the Foundation for the express purpose of supporting whale conservation; and

(ii) deposit in the endowment fund under paragraph (1) any funds made available to the Foundation under this subparagraph, including any income or interest earned from a gift, devise, or bequest received by the Foundation under this subparagraph.

(B) To raise funds to be deposited in the endowment fund under paragraph (1), the Founda-

tion may enter into appropriate arrangements to provide for the design, copyright, production, marketing, or licensing, of logos, seals, decals, stamps, or any other item that the Foundation determines to be appropriate.

(C)(i) The Secretary of Commerce may transfer to the Foundation for deposit in the endowment fund under paragraph (1) any amount (or portion thereof) received by the Secretary under section 1375(a)(1) of this title as a civil penalty assessed by the Secretary under that section.

(ii) The Directors of the Board shall ensure that any amounts transferred to the Foundation under clause (i) for the endowment fund under paragraph (1) are deposited in that fund in accordance with this subparagraph.

(3) It is the intent of Congress that in making expenditures from the endowment fund under paragraph (1) to carry out activities specified in that paragraph, the Foundation should give priority to funding projects that address the conservation of populations of whales that the Foundation determines—

(A) are the most endangered (including the northern right whale (*Eubaleana glacialis*)); or

(B) most warrant, and are most likely to benefit from, research management, or educational activities that may be funded with amounts made available from the fund.

(g) Consultation

In carrying out any action on the part of the Foundation under subsection (f) of this section, the Directors of the Board shall consult with the Administrator of the National Oceanic and Atmospheric Administration and the Marine Mammal Commission.

CONGRESSIONAL FINDINGS—NATIONAL WHALE CONSERVATION

Pub. L. 105-277, div. A, § 101(b) [title IX, § 902], Oct. 21, 1998, 112 Stat. 2681-50, 2681-119, provided that: “Congress finds that—

“(1) the populations of whales that occur in waters of the United States are resources of substantial ecological, scientific, socioeconomic, and esthetic value;

“(2) whale populations—

“(A) form a significant component of marine ecosystems;

“(B) are the subject of intense research;

“(C) provide for a multimillion dollar whale watching tourist industry that provides the public an opportunity to enjoy and learn about great whales and the ecosystems of which the whales are a part; and

“(D) are of importance to Native Americans for cultural and subsistence purposes;

“(3) whale populations are in various stages of recovery, and some whale populations, such as the

northern right whale (*Eubaleana glacialis*) remain perilously close to extinction;

“(4) the interactions that occur between ship traffic, commercial fishing, whale watching vessels, and other recreational vessels and whale populations may affect whale populations adversely;

“(5) the exploration and development of oil, gas, and hard mineral resources, marine debris, chemical pollutants, noise, and other anthropogenic sources of change in the habitat of whales may affect whale populations adversely;

“(6) the conservation of whale populations is subject to difficult challenges related to—

“(A) the migration of whale populations across international boundaries;

“(B) the size of individual whales, as that size precludes certain conservation research procedures that may be used for other animal species, such as captive research and breeding;

“(C) the low reproductive rates of whales that require long-term conservation programs to ensure recovery of whale populations; and

“(D) the occurrence of whale populations in off-shore waters where undertaking research, monitoring, and conservation measures is difficult and costly;

“(7)(A) the Secretary of Commerce, through the Administrator of the National Oceanic and Atmospheric Administration, has research and regulatory responsibility for the conservation of whales under the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.); and

“(B) the heads of other Federal agencies and the Marine Mammal Commission established under section 201 of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1401) have related research and management activities under the Marine Mammal Protection Act of 1972 or the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.);

“(8) the funding available for the activities described in paragraph (8) [(7)] is insufficient to support all necessary whale conservation and recovery activities; and

“(9) there is a need to facilitate the use of funds from non-Federal sources to carry out the conservation of whales.”

L. 102-440, title III, § 304, Oct. 23, 1992, 106 Stat. 2235, provided that: “Beginning in fiscal year 1993 and hereafter, the National Fish and Wildlife Foundation may continue to draw down Federal funds when matching requirements have been met: *Provided*, That interest earned by the Foundation and its subgrantees on funds drawn down to date, but not immediately disbursed, shall be used to fund all activities as approved by the Board of Directors: *Provided further*, That the Foundation’s subgrantees shall be exempt from the audit reporting and compliance requirements of OMB Circular A-133, for all grants of \$100,000 or less. The Foundation shall amend its grant contracts to ensure that its subgrantees are advised and certify that they will comply with all applicable Federal laws and regulations imposed on individuals or organizations receiving Federal funds.”

CHAPTER 57A—PARTNERSHIPS FOR WILDLIFE

Sec.	
3741.	Findings.
3742.	Purposes.
3743.	Definitions.
3744.	Wildlife partnership program.
	(a) In general.
	(b) Eligible projects.
	(c) Project standards.
	(d) Limitations on Federal payment.
	(e) Non-Federal share of projects.
	(f) Eligibility of designated State agencies.
	(g) Establishment of Fund.
	(h) Authorization of appropriations.

§ 3741. Findings

The Congress finds the following:

(1) Three-fourths of all American children and adults participate in wildlife-related recreational activities other than hunting, fishing and trapping.

(2) In 1985, Americans spent over \$14 billion on non-consumptive wildlife-related recreation.

(3) The United States and Canada are inhabited by approximately two thousand six hundred vertebrate species of native fish and wildlife, which have provided food, clothing, and other essentials to a rapidly expanding human population.

(4) Over 80 percent of vertebrate fish and wildlife species in North America are not harvested for human use.

(5) The continued well-being of this once-abundant fish and wildlife resource, and even the very existence of many species, is in peril.

(6) In 1967, the United States Fish and Wildlife Service reported that forty-five common migratory bird species, which are not hunted, had exhibited significant declines in abundance, and that thirteen of these species have experienced widespread, systematic declines of 46.9 percent during a twenty-year study period.

(7) There have been nationwide declines in frogs and other amphibians.

(8) Over two hundred and seventy-five of vertebrate fish and wildlife species in the United States are now officially classified as threatened or endangered by the Federal Government.

(9) During the past decade, fish and wildlife species, including invertebrates, were added to the rapidly growing list of threatened and endangered species in North America at the average rate of over one per month.

(10) Currently, eighty-two species of invertebrates in the United States are listed as threatened or endangered under the Endangered Species Act [16 U.S.C. 1531 et seq.], and another nine hundred and fifty-one United States invertebrate species are candidates for listing under that Act.

(11) Proper management of fish and wildlife, before species become threatened or endangered with extinction, is the key to reversing the increasingly desperate status of fish and wildlife.

(12) Proper fish and wildlife conservation includes not only management of fish and wildlife species taken for recreation and protection of endangered and threatened species, but also management of the vast majority of species which fall into neither category.

(13) Partnerships in fish and wildlife conservation, such as the Federal Aid in Wildlife Restoration Program, the Federal Aid in Sport Fish Restoration Program, and the North American Wetlands Conservation Act [16 U.S.C. 4401 et seq.] have benefitted greatly the conservation of fish and wildlife and their habitats.

(14) A program that encourages partnerships among Federal and State governments and private entities to carry out wildlife conservation and appreciation projects would benefit all species of fish and wildlife through such activities as management, research, and inter-agency coordination.

(15) Many States, which are experiencing declining revenues, are finding it increasingly difficult to carry out projects to conserve the entire array of diverse fish and wildlife species and to provide opportunities for the public to associate with, enjoy, and appreciate fish and wildlife through nonconsumptive activities.

(Pub. L. 102-587, title VII, §7102, Nov. 4, 1992, 106 Stat. 5094.)

§ 3744. Wildlife partnership program

(a) In general

The Secretary shall provide the amounts available in the Fund to designated State agencies on a matching basis to assist in carrying out wildlife conservation and appreciation projects that are eligible under subsection (b) of this section.

(b) Eligible projects

The following wildlife conservation and appreciation projects shall be eligible for matching funds from the Fund:

- (1) inventory of fish and wildlife species;
- (2) determination and monitoring of the size, range and distribution of populations of fish and wildlife species;
- (3) identification of the extent, condition, and location of the significant habitats of fish and wildlife species;
- (4) identification of the significant problems that may adversely affect fish and wildlife species and their significant habitats;
- (5) actions to conserve fish and wildlife species and their habitats; and
- (6) actions of which the principal purpose is to provide opportunities for the public to use and enjoy fish and wildlife through non-consumptive activities.

(c) Project standards

The Secretary shall not provide funding to carry out an eligible wildlife conservation and appreciation project unless the Secretary determines that such a project—

- (1) is planned adequately to accomplish the stated objective or objectives;
- (2) utilizes accepted fish and wildlife management principles, sound design and appropriate procedures;
- (3) will yield benefits pertinent to the identified need at a level commensurate with project costs;
- (4) provides for the tracking of costs and accomplishments related to the project;
- (5) provides for monitoring, evaluating, and reporting of the accomplishment of project objectives; and
- (6) complies with all applicable Federal environmental laws and regulations.

(d) Limitations on Federal payment

The amount of appropriated Federal funds provided from the Fund by the Secretary to any designated State Agency with respect to any fiscal year to carry out an eligible wildlife conservation and appreciation project under this section—

- (1) may not exceed \$250,000;
- (2) may not exceed one third of the total project cost for that fiscal year;
- (3) may not exceed 40 percent of the total project cost for that fiscal year if designated State agencies from two or more States cooperate in implementing such a project; and
- (4) may not be used to defray the administrative cost of State programs.

(e) Non-Federal share of projects

(1) State share

Of the total cost each fiscal year of each project carried out with amounts provided by

the Secretary under subsection (a) of this section, at least $\frac{1}{3}$ shall be paid with amounts from State, non-Federal sources, except that if designated State agencies from 2 or more States cooperate in implementing such a project at least 30 percent shall be paid with amounts from such State, non-Federal sources. Payments required by this paragraph may not be in the form of an in-kind contribution.

Subject to the approval of the Secretary, such contributions for a project may be in the form of, but are not required to be limited to, private cash donations, and the contribution of materials, equipment, or services necessary for the project.

(f) Eligibility of designated State agencies

No designated State agency shall be eligible to receive matching funds from the Wildlife Conservation and Appreciation Fund if revenue derived from activities regulated by such an agency is diverted for any purpose other than the management and conservation of fish and wildlife. Such revenue shall include, but not be limited to, all income from the sale of hunting, fishing and trapping licenses; all income from nongame checkoff systems; all income from the sale of waterfowl, habitat conservation, and other stamps that are requisite for engaging in certain activities regulated by the designated State agency; all income from the sale of any commodities and products by the designated State agency from lands and waters administered by the State for fish and wildlife purposes; and all funds apportioned to the designated State agency under the Federal Aid in Wildlife and Sport Fish Restoration Programs.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 7 sections 1308-3, 1308-4, 1463, 6932, 6962, 7334.

SUBCHAPTER I—DEFINITIONS

§ 3801. Definitions

(a) For purposes of subchapters I through V of this chapter:

(1) The term “agricultural commodity” means—

(A) any agricultural commodity planted and produced in a State by annual tilling of the soil, including tilling by one-trip planters; or

(B) sugarcane planted and produced in a State.

(2) CONSERVATION PLAN.—The term “conservation plan” means the document that—

(A) applies to highly erodible cropland;

(B) describes the conservation system applicable to the highly erodible cropland and describes the decisions of the person with respect to location, land use, tillage systems, and conservation treatment measures and schedule; and

(C) is approved by the local soil conservation district, in consultation with the local committees established under section 590h(b)(5) of this title and the Secretary, or by the Secretary.

(3) CONSERVATION SYSTEM.—The term “conservation system” means a combination of 1 or more conservation measures or management practices that—

(A) are based on local resource conditions, available conservation technology, and the standards and guidelines contained in the Natural Resources Conservation Service field office technical guides; and

(B) are designed to achieve, in a cost effective and technically practicable manner, a substantial reduction in soil erosion or a substantial improvement in soil conditions on a field or group of fields containing highly erodible cropland when compared to the level of erosion or soil conditions that existed before the application of the conservation measures and management practices.

(4) The term “conservation district” means any district or unit of State or local government formed under State or territorial law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of government may be referred to as a “conservation district”, “soil conservation district”, “soil and water conservation district”, “resource conservation district”, “natural resource dis-

trict”, “land conservation committee”, or a similar name.

(5) The term “cost sharing payment” means a payment made by the Secretary to an owner or operator of a farm or ranch containing highly erodible cropland under the provisions of section 3834(b) of this title.

(6)(A) The term “converted wetland” means wetland that has been drained, dredged, filled, leveled, or otherwise manipulated (including any activity that results in impairing or reducing the flow, circulation, or reach of water) for the purpose or to have the effect of making the production of an agricultural commodity possible if—

(i) such production would not have been possible but for such action; and

(ii) before such action—

(I) such land was wetland; and

(II) such land was neither highly erodible land nor highly erodible cropland.

(B) Wetland shall not be considered converted wetland if production of an agricultural commodity on such land during a crop year—

(i) is possible as a result of a natural condition, such as drought; and

(ii) is not assisted by an action of the producer that destroys natural wetland characteristics.

(7) FIELD.—The term “field” means a part of a farm that is separated from the balance of the farm by permanent boundaries such as fences, roads, permanent waterways, or other similar features. At the option of the owner or operator of the farm, croplines may also be used to delineate a field if farming practices make it probable that the croplines are not subject to change. Any highly erodible land on which an agricultural commodity is produced after December 23, 1985, and that is not exempt under section 3812 of this title, shall be considered as part of the field in which the land was included on December 23, 1985, unless the owner and Secretary agree to modification of the boundaries of the field to carry out this chapter.

(8) The term “highly erodible cropland” means highly erodible land that is in cropland use, as determined by the Secretary.

(9)(A) The term “highly erodible land” means land—

(i) that is classified by the Soil Conservation Service as class IV, VI, VII, or VIII land under the land capability classification system in effect on December 23, 1985; or

(ii) that has, or that if used to produce an agricultural commodity, would have an excessive average annual rate of erosion in relation to the soil loss tolerance level, as established by the Secretary, and as determined by the Secretary through application of factors from the universal soil loss equation and the wind erosion equation, including factors for climate, soil erodibility, and field slope.

(B) For purposes of this paragraph, the land capability class or rate of erosion for a field shall be that determined by the Secretary to be the predominant class or rate of erosion under regulations issued by the Secretary.

(C) EQUATIONS.—Not later than 60 days after the date of enactment of this subparagraph, the Secretary shall publish in the Federal Register the universal soil loss equation and wind erosion equation used by the Department of Agriculture as of that date. The Secretary may not change the equations after that date except following notice and comment in a manner consistent with section 553 of title 5.

(10) The term “hydric soil” means soil that, in its undrained condition, is saturated, flooded, or ponded long enough during a growing season to develop an anaerobic condition that supports the growth and regeneration of hydrophytic vegetation.

(11) The term “hydrophytic vegetation” means a plant growing in—

(A) water; or

(B) a substrate that is at least periodically deficient in oxygen during a growing season as a result of excessive water content.

(12) The term “in-kind commodities” means commodities that are normally produced on land that is the subject of an agreement entered into under subchapter IV of this chapter.

(13) The term “rental payment” means a payment made by the Secretary to an owner or operator of a farm or ranch containing highly erodible cropland to compensate the owner or operator for retiring such land from crop production and placing such land in the conservation reserve in accordance with subchapter IV of this chapter.

(14) The term “Secretary” means the Secretary of Agriculture.

(15) The term “shelterbelt” means a vegetative barrier with a linear configuration composed of trees, shrubs, and other approved perennial vegetation.

(16) The term “State” means each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

(17) The term “vegetative cover” means—

(A) perennial grasses, legumes, forbs, or shrubs with an expected life span of 5 or more years; or

(B) trees.

(18) The term “wetland”, except when such term is part of the term “converted wetland”, means land that—

(A) has a predominance of hydric soils;

(B) is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions; and

(C) under normal circumstances does support a prevalence of such vegetation.

For purposes of this Act, and any other Act, this term shall not include lands in Alaska identified as having high potential for agricultural development which have a predominance of permafrost soils.

(b) The Secretary shall develop—

(1) criteria for the identification of hydric soils and hydrophytic vegetation; and

(2) lists of such soils and such vegetation.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 3812, 3812a, 3836 of this title; title 7 section 7251.

§ 3812. Exemptions

(a) Persons eligible for program benefits in connection with production or reduced production of crops on certain lands; eligibility based upon compliance with conservation plan by January 1, 1995; minimization of documentation

(1) During the period beginning on December 23, 1985, and ending on the later of January 1, 1990, or the date that is 2 years after the date land on which a crop of an agricultural commodity is produced was mapped by the Soil Conservation Service for purposes of classifying such land under the land capability classification system in effect on December 23, 1985, except as provided in paragraph (2), no person shall become ineligible under section 3811 of this title for program loans, payments, and benefits as the result of the production of a crop of an agricultural commodity on any land that was—

(A) cultivated to produce any of the 1981 through 1985 crops of an agricultural commodity; or

(B) set aside, diverted or otherwise not cultivated under a program administered by the Secretary for any such crops to reduce production of an agricultural commodity.

(2) If, as of January 1, 1990, or 2 years after the Soil Conservation Service has completed a soil survey for the farm, whichever is later, a person is actively applying a conservation plan, such person shall have until January 1, 1995, to comply with the plan without being subject to program ineligibility. In carrying out this subsection, the Secretary, Soil Conservation Service, and local soil conservation districts shall minimize the quantity of documentation a person must submit to comply with this paragraph.

(3) Any person who owns or operates highly erodible land that was the subject of a contract entered into under subpart B of part I of subchapter IV of this chapter shall only be required to apply a conservation plan established under this subchapter. The person shall not be required to meet a higher conservation standard than the standard applied to other highly erodible cropland located within the same area. If the person's conservation plan requires structures to be constructed, the person shall have until 2 years after the expiration of such contract to comply with the conservation plan, or a longer period of time if the Secretary determines compliance is otherwise technically or economically not feasible, or such longer period is otherwise appropriate, before such person will be subject to program ineligibility with respect to such land under section 3811 of this title.

(4) On the expiration of a contract entered into under subpart B of part I of subchapter IV of this chapter, the provisions of this subchapter shall apply to the acreage that was the subject of such contract.

(b) Persons eligible for program benefits in connection with production of certain planted crops or production of crops on highly erodible land

No person shall become ineligible under section 3811 of this title for program loans, payments, and benefits as the result of the production of a crop of an agricultural commodity—

(1) planted before December 23, 1985; or

(2) planted during any crop year beginning before December 23, 1985.

(c) Ineligibility for loans and payments under section 3811

No person shall become ineligible under section 3811 of this title for program loans, payments, and benefits as the result of the production of a crop of an agricultural commodity or the designation of land to be set aside, diverted, devoted to conservation uses, or otherwise not cultivated under a program administered by the Secretary to reduce production of an agricultural commodity (hereafter in this subsection referred to as “set aside”)—

(1) on highly erodible land in an area—

(A) within a conservation district, under a conservation system that has been approved by a conservation district after the district

has determined that the conservation system is in conformity with technical standards set forth in the Soil Conservation Service technical guide for such district; or

(B) not within a conservation district, under a conservation system determined by the Secretary to be adequate for the protection of highly erodible land that has been set aside or for the production of such agricultural commodity on any highly erodible land subject to this chapter; or

(2) on highly erodible land that is planted or set aside in reliance on a determination by the Soil Conservation Service that such land was not highly erodible land, except that this paragraph shall not apply to any agricultural commodity that was planted or set aside on any land after the Soil Conservation Service determines that such land is highly erodible land; or

(3) on highly erodible land planted to alfalfa during each of the 1981 through 1985 crop years as part of a rotation practice approved by the Secretary, if the person has submitted a conservation plan, in which case, such person shall have until June 1, 1988, to comply with the plan without being subject to program ineligibility under section 3811 of this title.

(d) Program ineligibility inapplicable to pre-December 23, 1985, section 3811 loans

Section 3811 of this title shall not apply to a loan described in section 3811 of this title made before December 23, 1985.

(e) Limitations on ineligibility for tenants

If a tenant is determined to be ineligible for payments and other benefits under section 3811 of this title, the Secretary may limit such ineligibility only to the farm which is the basis for such ineligibility determination if—

(1) the tenant has established to the satisfaction of the Secretary that—

(A) the tenant has made a good faith effort to meet the requirements of this section, including enlisting the assistance of the Secretary to obtain a reasonable conservation plan for such farm; and

(B) the landlord on the farm refuses to comply with such plan on such farm; and

(2) the Secretary determines that such lack of compliance is not a part of a scheme or device to avoid such compliance.

The Secretary shall provide an annual report to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate concerning the ineligibility determinations limited during the previous 12-month period under this subsection.

(f) Graduated sanctions

(1) No person shall become ineligible under section 3811 of this title for program loans, payments, and benefits as a result of the failure of such person to actively apply a conservation plan, if the Secretary determines that the person has acted in good faith and without an intent to violate this subchapter. A person who meets the requirements of this paragraph shall be allowed a reasonable period of time, as deter-

mined by the Secretary, but not to exceed 1 year, during which to implement the measures and practices necessary to be considered to be actively applying the person's conservation plan.

(2) If the Secretary determines that a person who has failed to comply with the provisions of section 3811 of this title with respect to highly erodible cropland that was not in production prior to December 23, 1985, and has acted in good faith and without an intent to violate the provisions, the Secretary shall, in lieu of applying the ineligibility provisions in section 3811 of this title, reduce by not less than \$500 nor more than \$5,000, depending on the seriousness of the violation as determined by the Secretary, program benefits described in section 3811 of this title that such producer would otherwise be eligible to receive in a crop year.

(3) Any person whose benefits are reduced in any crop year under this subsection shall continue to be eligible for all of the benefits described in section 3811 of this title for any subsequent crop year if, prior to the beginning of such subsequent crop year, the Secretary determines that such person is actively applying a conservation plan according to the schedule set forth in such plan.

(4) Notwithstanding any other provision of this subchapter, no person shall become ineligible under section 3811 of this title for program loans, payments, and benefits as a result of the failure of such person to actively apply a conservation plan, if the Secretary—

(A) determines that such failure results in a violation of section 3811 of this title that is technical and minor in nature and that such violation has a minimal effect on the erosion control purposes of the conservation plan applicable to the land on which such violation has occurred;

(B) determines that such failure is due to circumstances beyond the control of the person; or

(C) grants the person a temporary variance from the practices specified in the plan for the purpose of handling a specific problem, including weather, pest, and disease problems.

(5) **EXPEDITED PROCEDURES FOR TEMPORARY VARIANCES.**—After consultation with local conservation districts, the Secretary shall establish expedited procedures for the consideration and granting of temporary variances under paragraph (4)(C). If the request for a temporary variance under paragraph (4)(C) involves the use of practices or measures to address weather, pest, or disease problems, the Secretary shall make a decision on whether to grant the variance during the 30-day period beginning on the date of receipt of the request. If the Secretary fails to render a decision during the period, the temporary variance shall be considered granted.

(g) Preparation or revision of conservation plan

The Secretary, in providing assistance to an individual in the preparation or revision of a conservation plan under this section, shall provide such individual with information—

(1) concerning cost effective and applicable erosion control measures that may be available to such individual to meet the requirements of this section; and

(2) concerning crop flexibility, base adjustment, and conservation assistance options that may be available to such individual to meet the requirements of this section, including the provisions of titles X, XII, and XIII of the Food, Agriculture, Conservation, and Trade Act of 1990 (or the amendments made by such titles).

(h) Noncommercial production of agricultural commodities

Section 3811 of this title shall not apply to the noncommercial production of agricultural commodities on a farm if such production is limited to two acres or less and if the Secretary determines that such production is not intended to circumvent the conservation requirements otherwise applicable to lands under this subchapter.

(a) Technical requirements

In connection with the standards and guidelines contained in Natural Resources Conservation Service field office technical guides applicable to the development and use of conservation measures and management practices as part of a conservation system, the Secretary shall ensure that the standards and guidelines permit a person to use a conservation system that—

- (1) is technically and economically feasible;
- (2) is based on local resource conditions and available conservation technology;
- (3) is cost-effective; and
- (4) does not cause undue economic hardship on the person applying the conservation system under the person's conservation plan.

(b) Measurement of erosion reduction

For the purpose of determining whether there is a substantial reduction in soil erosion on a field containing highly erodible cropland, the measurement of erosion reduction achieved by the application of a conservation system under a person's conservation plan shall be based on the estimated annual level of erosion at the time of the measurement compared to the estimated annual level of erosion that existed before the implementation of the conservation measures and management practices provided for in the conservation system.

(c) Residue measurement

(1) Responsibilities of Secretary

For the purpose of measuring the level of residue on a field, the Secretary shall—

- (A) take into account any residue incorporated into the top 2 inches of soil, as well as the growing crop, in the measurement;
- (B) provide technical guidelines for acceptable residue measurement methods;
- (C) provide a certification system for third parties to perform residue measurements; and
- (D) provide for the acceptance and use of information and data voluntarily provided by the producer regarding the field.

(2) Acceptance of producer measurements

Annual residue measurements supplied by a producer (including measurements performed by a certified third party) shall be used by the Secretary if the Secretary determines that the measurements indicate that the residue level for the field meets the level required under the conservation plan.

(d) Certification of compliance

(1) In general

For the purpose of determining the eligibility of a person for program benefits speci-

fied in section 3811 of this title at the time application is made for the benefits, the Secretary shall permit the person to certify that the person is complying with the person's conservation plan.

(2) Status reviews

If a person makes a certification under paragraph (1), the Secretary shall not be required to carry out a review of the status of compliance of the person with the conservation plan under which the conservation system is being applied.

(3) Revisions and modifications

The Secretary shall permit a person who makes a certification under paragraph (1) with respect to a conservation plan to revise the conservation plan in any manner, if the same level of conservation treatment provided for by the conservation system under the person's conservation plan is maintained. The Secretary may not revise the person's conservation plan without the concurrence of the person.

(e) Technical assistance

The Secretary shall, using available resources and consistent with the Secretary's other conservation responsibilities and objectives, provide technical assistance to a person throughout the development, revision, and application of the conservation plan and any conservation system of the person. At the request of the person, the Secretary may provide technical assistance regarding conservation measures and management practices for other lands of the person that do not contain highly erodible cropland.

(f) Encouragement of on-farm research

To encourage on-farm conservation research, the Secretary may allow a person to include in the person's conservation plan or a conservation system under the plan, on a field trial basis, practices that are not currently approved but that the Secretary considers have a reasonable likelihood of success.

§ 3813. Soil surveys

The Secretary shall, as soon as is practicable after December 23, 1985, complete soil surveys on those private lands that do not have a soil survey suitable for use in determining the land capability class for purposes of this subchapter. § 3814. Notice and investigation of possible compliance deficiencies

(a) In general

An employee of the Department of Agriculture who observes a possible compliance deficiency or other potential violation of a conservation plan or this subchapter while providing on-site technical assistance shall provide to the responsible persons, not later than 45 days after observing the possible violation, information regarding actions needed to comply with the plan and this subchapter. The employee shall provide the information in lieu of reporting the observation as a compliance violation.

(b) Corrective action

The responsible persons shall attempt to correct the deficiencies as soon as practicable after receiving the information.

(c) Review

If the corrective action is not fully implemented not later than 1 year after the responsible persons receive the information, the Secretary may conduct a review of the status of compliance of the persons with the conservation plan and this subchapter.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 3822, 3823, 3836 of this title; title 7 section 7251.

§ 3822. Delineation of wetlands; exemptions

(a) Delineation by Secretary

(1) In general

Subject to subsection (b) of this section and paragraph (6), the Secretary shall delineate, determine, and certify all wetlands located on subject land on a farm.

(2) Wetland delineation maps

The Secretary shall delineate wetlands on wetland delineation maps. On the request of a person, the Secretary shall make a reasonable effort to make an on-site wetland determination prior to delineation.

(3) Certification

On providing notice to affected persons, the Secretary shall—

(A) certify whether a map is sufficient for the purpose of making a determination of ineligibility for program benefits under section 3821 of this title; and

(B) provide an opportunity to appeal the certification prior to the certification becoming final.

(4) Duration of certification

A final certification made under paragraph (3) shall remain valid and in effect as long as the area is devoted to an agricultural use or until such time as the person affected by the certification requests review of the certification by the Secretary.

(5) Review of mapping on appeal

In the case of an appeal of the Secretary's certification, the Secretary shall review and certify the accuracy of the mapping of all land subject to the appeal to ensure that the subject land has been accurately delineated. Prior to rendering a decision on the appeal, the Sec-

retary shall conduct an on-site inspection of the subject land on a farm.

(6) Reliance on prior certified delineation

No person shall be adversely affected because of having taken an action based on a previous certified wetland delineation by the Secretary. The delineation shall not be subject to a subsequent wetland certification or delineation by the Secretary, unless requested by the person under paragraph (4).

(b) Exemptions

No person shall become ineligible under section 3821 of this title for program loans or payments under the following circumstances:

(1) As the result of the production of an agricultural commodity on the following lands:

(A) A converted wetland if the conversion of the wetland was commenced before December 23, 1985.

(B) Land that is a nontidal drainage or irrigation ditch excavated in upland.

(C) A wet area created by a water delivery system, irrigation, irrigation system, or application of water for irrigation.

(D) A wetland on which the owner or operator of a farm or ranch uses normal cropping or ranching practices to produce an agricultural commodity in a manner that is consistent for the area where the production is possible as a result of a natural condition, such as drought, and is without action by the producer that destroys a natural wetland characteristic.

(E) Land that is an artificial lake or pond created by excavating or diking land (that is not a wetland) to collect and retain water and that is used primarily for livestock watering, fish production, irrigation, wildlife, fire control, flood control, cranberry growing, or rice production, or as a settling pond.

(F) A wetland that is temporarily or incidentally created as a result of adjacent development activity.

(G) A converted wetland if the original conversion of the wetland was commenced before December 23, 1985, and the Secretary determines the wetland characteristics returned after that date as a result of—

(i) the lack of maintenance of drainage, dikes, levees, or similar structures;

(ii) a lack of management of the lands containing the wetland; or

(iii) circumstances beyond the control of the person.

(H) A converted wetland, if—

(i) the converted wetland was determined by the Natural Resources Conservation Service to have been manipulated for the production of an agricultural commodity or forage prior to December 23, 1985, and was returned to wetland conditions through a voluntary restoration, enhancement, or creation action subsequent to that determination;

(ii) technical determinations regarding the prior site conditions and the restoration, enhancement, or creation action have been adequately documented by the Natural Resources Conservation Service;

(iii) the proposed conversion action is approved by the Natural Resources Conservation Service prior to implementation; and

(iv) the extent of the proposed conversion is limited so that the conditions will be at least equivalent to the wetland functions and values that existed prior to implementation of the voluntary wetland restoration, enhancement, or creation action.

(2) For the conversion of the following:

(A) An artificial lake or pond created by excavating or diking land that is not a wetland to collect and retain water and that is used primarily for livestock watering, fish production, irrigation, wildlife, fire control, flood control, cranberry growing, rice production, or as a settling pond.

(B) A wetland that is temporarily or incidentally created as a result of adjacent development activity.

(C) A wetland on which the owner or operator of a farm or ranch uses normal cropping or ranching practices to produce an agricultural commodity in a manner that is consistent for the area where the production is possible as a result of a natural condition, such as drought, and is without action by the producer that destroys a natural wetland characteristic.

(D) A wetland previously identified as a converted wetland (if the original conversion of the wetland was commenced before December 23, 1985), but that the Secretary determines returned to wetland status after that date as a result of—

(i) the lack of maintenance of drainage, dikes, levees, or similar structures;

(ii) a lack of management of the lands containing the wetland; or

(iii) circumstances beyond the control of the person.

(E) A wetland, if—

(i) the wetland was determined by the Natural Resources Conservation Service to have been manipulated for the production of an agricultural commodity or forage prior to December 23, 1985, and was returned to wetland conditions through a voluntary restoration, enhancement, or creation action subsequent to that determination;

(ii) technical determinations regarding the prior site conditions and the restoration, enhancement, or creation action have been adequately documented by the Natural Resources Conservation Service;

(iii) the proposed conversion action is approved by the Natural Resources Conservation Service prior to implementation; and

(iv) the extent of the proposed conversion is limited so that the conditions will be at least equivalent to the wetland functions and values that existed prior to implementation of the voluntary wetland restoration, enhancement, or creation action.

(c) On-site inspection requirement

No program loans, payments, or benefits shall be withheld from a person under this subchapter unless the Secretary has conducted an on-site visit of the subject land.

(d) Identification of minimal effect exemptions

For purposes of applying the minimal effect exemption under subsection (f)(1) of this section, the Secretary shall identify by regulation categorical minimal effect exemptions on a regional basis to assist persons in avoiding a violation of the ineligibility provisions of section 3821 of this title. The Secretary shall ensure that employees of the Department of Agriculture who administer this subchapter receive appropriate training to properly apply the minimal effect exemptions determined by the Secretary.

(e) Nonwetlands

The Secretary shall exempt from the ineligibility provisions of section 3821 of this title any action by a person upon lands in any case in which the Secretary determines that any one of the following does not apply with respect to such lands:

(1) Such lands have a predominance of hydric soils.

(2) Such lands are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions.

(3) Such lands, under normal circumstances, support a prevalence of such vegetation.

(f) Minimal effect; mitigation

The Secretary shall exempt a person from the ineligibility provisions of section 3821 of this title for any action associated with the production of an agricultural commodity on a converted wetland, or the conversion of a wetland, if 1 or more of the following conditions apply, as determined by the Secretary:

(1) The action, individually and in connection with all other similar actions authorized by the Secretary in the area, will have a minimal effect on the functional hydrological and biological value of the wetlands in the area, including the value to waterfowl and wildlife.

(2) The wetland and the wetland values, acreage, and functions are mitigated by the person through the restoration of a converted wetland, the enhancement of an existing wetland, or the creation of a new wetland, and the restoration, enhancement, or creation is—

(A) in accordance with a wetland conservation plan;

(B) in advance of, or concurrent with, the action;

(C) not at the expense of the Federal Government;

(D) in the case of enhancement or restoration of wetlands, on not greater than a 1-for-1 acreage basis unless more acreage is needed to provide equivalent functions and values that will be lost as a result of the wetland conversion to be mitigated;

(E) in the case of creation of wetlands, on greater than a 1-for-1 acreage basis if more acreage is needed to provide equivalent func-

tions and values that will be lost as a result of the wetland conversion that is mitigated;

(F) on lands in the same general area of the local watershed as the converted wetland; and

(G) with respect to the restored, enhanced, or created wetland, made subject to an easement that—

(i) is recorded on public land records;

(ii) remains in force for as long as the converted wetland for which the restoration, enhancement, or creation to be mitigated remains in agricultural use or is not returned to its original wetland classification with equivalent functions and values; and

(iii) prohibits making alterations to the restored, enhanced, or created wetland that lower the wetland's functions and values.

(3) The wetland was converted after December 23, 1985, but before November 28, 1990, and the wetland values, acreage, and functions are mitigated by the producer through the requirements of subparagraphs (A), (B), (C), (D), (F), and (G) of paragraph (2).

(4) The action was authorized by a permit issued under section 1344 of title 33 and the wetland values, acreage, and functions of the converted wetland were adequately mitigated for the purposes of this subchapter.

(g) Mitigation appeals

A person shall be afforded the right to appeal, under section 3843¹ of this title, the imposition of a mitigation agreement requiring greater than one-to-one acreage mitigation to which the person is subject.

(h) Good faith exemption

(1) Exemption described

The Secretary may waive a person's ineligibility under section 3821 of this title for program loans, payments, and benefits as the result of the conversion of a wetland subsequent to November 28, 1990, or the production of an agricultural commodity on a converted wetland, if the Secretary determines that the person has acted in good faith and without intent to violate this subchapter.

(2) Period for compliance

The Secretary shall provide a person who the Secretary determines has acted in good faith and without intent to violate this subchapter with a reasonable period, but not to exceed 1 year, during which to implement the measures and practices necessary to be considered to² actively restoring the subject wetland.

(i) Restoration

Any person who is determined to be ineligible for program benefits under section 3821 of this title for any crop year shall not be ineligible for such program benefits under such section for any subsequent crop year if, prior to the beginning of such subsequent crop year, the person has fully restored the characteristics of the con-

verted wetland to its prior wetland state or has otherwise mitigated for the loss of wetland values, as determined by the Secretary, through the restoration, enhancement, or creation of wetland values in the same general area of the local watershed as the converted wetland.

(j) Determinations; restoration and mitigation plans; monitoring activities

Technical determinations, the development of restoration and mitigation plans, and monitoring activities under this section shall be made by the National³ Resources Conservation Service.

(k) Mitigation banking program

Using authorities available to the Secretary, the Secretary may operate a pilot program for mitigation banking of wetlands to assist persons to increase the efficiency of agricultural operations while protecting wetland functions and values. Subsection (f)(2)(C) of this section shall not apply to this subsection.

§ 3830. Environmental conservation acreage reserve program

(a) Establishment

(1) In general

During the 1996 through 2002 calendar years, the Secretary shall establish an environmental conservation acreage reserve program (referred to in this section as “ECARP”) to be implemented through contracts and the acquisition of easements to assist owners and operators of farms and ranches to conserve and enhance soil, water, and related natural resources, including grazing land, wetland, and wildlife habitat.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3839aa-3 of this title.

SUBPART B—CONSERVATION RESERVE

SUBPART REFERRED TO IN OTHER SECTIONS

This subpart is referred to in sections 3812, 3830, 3836a, 3837, 3839bb, 3841, 3843 of this title; title 7 sections 6932, 6962.

§ 3831. Conservation reserve**(a) In general**

Through the 2002 calendar year, the Secretary shall formulate and carry out the enrollment of lands in a conservation reserve program through the use of contracts to assist owners and operators of lands specified in subsection (b) of this section to conserve and improve the soil and water resources of such lands.

(b) Eligible lands

The Secretary may include in the program established under this subpart—

(1) highly erodible croplands that—

(A) if permitted to remain untreated could substantially reduce the production capability for future generations; or

(B) can not be farmed in accordance with a plan under section 3812 of this title;

(2) marginal pasture lands converted to wetland or established as wildlife habitat prior to November 28, 1990;

(3) marginal pasture lands to be devoted to trees in or near riparian areas or for similar water quality purposes, not to exceed 10 percent of the number of acres of land that is placed in the conservation reserve under this subpart in each of the 1991 through 2002 calendar years;

(4) croplands that are otherwise not eligible—

(A) if the Secretary determines that (i) such lands contribute to the degradation of water quality or would pose an on-site or off-site environmental threat to water quality if permitted to remain in agricultural production, and (ii) water quality objectives with respect to such land cannot be achieved under the water quality incentives program established under part II of this subchapter; (B) if such croplands are newly-created, permanent grass sod waterways, or are contour grass sod strips established and maintained as part of an approved conservation plan;

(C) that will be devoted to newly established living snow fences, permanent wildlife habitat, windbreaks, shelterbelts, or filterstrips devoted to trees or shrubs; or

(D) if the Secretary determines that such lands pose an off-farm environmental threat, or pose a threat of continued degradation of productivity due to soil salinity, if permitted to remain in production.

(c) Certain land affected by secretarial action

For purposes of determining the eligibility of land to be placed in the conservation reserve established under this subpart, land shall be considered planted to an agricultural commodity during a crop year if an action of the Secretary prevented land from being planted to the commodity during the crop year.

(d) Maximum enrollment

The Secretary may maintain up to 36,400,000 acres in the conservation reserve at any one time during the 1986 through 2002 calendar years (including contracts extended by the Secretary pursuant to section 1437(c) of the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101-624; 16 U.S.C. 3831 note)).

(e) Duration of contract**(1) In general**

For the purpose of carrying out this subpart, the Secretary shall enter into contracts of not less than 10, nor more than 15, years.

(2) Certain lands

In the case of land devoted to hardwood trees, shelterbelts, windbreaks, or wildlife corridors under a contract entered into under this subpart after October 1, 1990, and land devoted to such uses under contracts modified under section 3835A of this title, the owner or operator of such land may, within the limitations prescribed under this section, specify the duration of the contract. The Secretary may, in the case of land that is devoted to hardwood trees under a contract entered into under this subpart prior to October 1, 1990, extend such contract for not to exceed 5 years, as agreed to by the owner or operator of such land and the Secretary.

(f) Conservation priority areas**(1) Designation**

Upon application by the appropriate State agency, the Secretary shall designate watershed areas of the Chesapeake Bay Region (Pennsylvania, Maryland, and Virginia), the Great Lakes Region, the Long Island Sound Region, and other areas of special environmental sensitivity as conservation priority areas.

(2) Eligible watersheds

Watersheds eligible for designation under this subsection shall include areas with actual and significant adverse water quality or habitat impacts related to agricultural production activities.

(3) Expiration

Conservation priority area designation under this subsection shall expire after 5 years, subject to redesignation, except that the Secretary may withdraw a watershed's designation—

(A) upon application by the appropriate State agency; or

(B) in the case of areas specified in this subsection, if the Secretary finds that such areas no longer contain actual and significant adverse water quality or habitat impacts related to agricultural production activities.

(4) Duty of Secretary

In utilizing the authority granted under this subsection, the Secretary shall attempt to maximize water quality and habitat benefits in such watersheds by promoting a significant level of enrollment of lands within such watersheds in the program under this subpart by whatever means the Secretary determines appropriate and consistent with the purposes of this subpart.

(g) Multi-year grasses and legumes

For purposes of this subpart, alfalfa and other multi-year grasses and legumes in a rotation practice, approved by the Secretary, shall be considered agricultural commodities.

STUDY OF LAND USE FOR EXPIRING CONTRACTS AND EXTENSION OF AUTHORITY

Section 1437 of Pub. L. 101-624 provided that:

“(a) IN GENERAL.—The Secretary of Agriculture shall conduct a study of cropland subject to expiring conservation reserve contracts entered into prior to the date of enactment of this Act [Nov. 28, 1990] under subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.). Such study shall include the consideration of—

“(1) the environmental benefits of such lands that remain out of crop production as compared to the economic benefits that would result from returning such lands to production under adequate stewardship and management;

“(2) the renewal of the contracts in a manner that allows for certain sustainable economic uses of cropland in return for lower rental payments;

“(3) the purchase of permanent easements permitting specified economic uses of cropland subject to the contracts;

“(4) the purchase of the cropland subject to the contracts;

“(5) the preservation of crop acreage bases associated with cropland subject to the contracts if the owner or operator continues to devote the cropland to conserving uses;

“(6) the purchase of crop acreage bases associated with cropland subject to the contracts; and

“(7) the expiration of the contracts.

“(b) REPORT.—Not later than December 31, 1993, the Secretary of Agriculture shall prepare and submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report concerning the results of the study conducted under subsection (a) and recommendations concerning the treatment of lands subject to expiring contracts under subtitle D of title XII of the Food Security Act of 1985 [16 U.S.C. 3831 et seq.], proposed legislation addressing the treatment of such lands, and the projected cost of such treatment.

“(c) EXTENSIONS.—During the 1996 through 2000 calendar years, the Secretary of Agriculture may—

“(1) extend up to 10 years contracts entered into under subchapter B of chapter 1 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831) [16 U.S.C. 3831 et seq.] prior to the date of enactment of this Act [Nov. 28, 1990]; or

“(2) purchase long-term or permanent easements as provided for in chapter 3 [16 U.S.C. 3839 et seq.]; at the option of the owner or operator on land that the Secretary has determined under the study conducted under subsection (a) should remain in conserving uses.”

EXISTING CONSERVATION PROGRAMS

Pub. L. 99-263, Mar. 24, 1986, 100 Stat. 59, provided: “That the conservation reserve program shall not replace or reduce any existing conservation program.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 3837, 3839 of this title; title 7 sections 7211, 7212.

§ 3832. Duties of owners and operators

(a) Terms of contract

Under the terms of a contract entered into under this subpart, during the term of such contract, an owner or operator of a farm or ranch must agree—

(1) to implement a plan approved by the local conservation district (or in an area not located within a conservation district, a plan approved by the Secretary) for converting eligible lands normally devoted to the production of an agricultural commodity on the farm or ranch to a less intensive use (as defined by the Secretary), such as pasture, permanent grass, legumes, forbs, shrubs, or trees, substantially in accordance with a schedule outlined in the plan;

(2) to place highly erodible cropland subject to the contract in the conservation reserve established under this subpart;

(3) not to use such land for agricultural purposes, except as permitted by the Secretary;

(4) to establish approved vegetative cover, or water cover for the enhancement of wildlife, on such land, except that such water cover shall not include ponds for the purpose of watering livestock, irrigating crops, or raising fish for commercial purposes;

(5) in addition to the remedies provided under section 3836(d) of this title, on the violation of a term or condition of the contract at any time the owner or operator has control of such land—

(A) to forfeit all rights to receive rental payments and cost sharing payments under the contract and to refund to the Secretary any rental payments and cost sharing payments received by the owner or operator under the contract, together with interest thereon as determined by the Secretary, if

the Secretary, after considering the recommendations of the soil conservation district and the Soil Conservation Service, determines that such violation is of such nature as to warrant termination of the contract; or

(B) to refund to the Secretary, or accept adjustments to, the rental payments and cost sharing payments provided to the owner or operator, as the Secretary considers appropriate, if the Secretary determines that such violation does not warrant termination of the contract;

(6) on the transfer of the right and interest of the owner or operator in land subject to the contract—

(A) to forfeit all rights to rental payments and cost sharing payments under the contract; and

(B) to refund to the United States all rental payments and cost sharing payments received by the owner or operator, or accept such payment adjustments or make such refunds as the Secretary considers appropriate and consistent with the objectives of this subpart;

unless the transferee of such land agrees with the Secretary to assume all obligations of the contract, or the transferee and the Secretary agree to modifications to such contract, where such modifications are consistent with the objectives of the program as determined by the Secretary; *Provided however*, no refund of rental payments and cost sharing payments shall be required when the land is purchased by or for the United States Fish and Wildlife Service;

(7) not to conduct any harvesting or grazing, nor otherwise make commercial use of the forage, on land that is subject to the contract, nor adopt any similar practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract, except that the Secretary may permit harvesting or grazing or other commercial use of the forage on land that is subject to the contract in response to a drought or other similar emergency, and the Secretary may permit limited grazing on such land where such grazing is incidental to the gleaning of crop residues on the fields in which such land is located and occurs during the 7-month period in which grazing of conserving use acreage is allowed in a State under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) or after the producer harvests the grain crop of the surrounding field for a reduction in rental payment commensurate with the limited economic value of such incidental grazing;

(8) not to conduct any planting of trees on land that is subject to the contract unless the contract specifies that the harvesting and commercial sale of trees such as Christmas trees are prohibited, nor otherwise make commercial use of trees on land that is subject to the contract unless it is expressly permitted in the contract, nor adopt any similar practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract, except that no contract

shall prohibit activities consistent with customary forestry practice, such as pruning, thinning, or stand improvement of trees, on lands converted to forestry use;

(9) not to adopt any practice specified by the Secretary in the contract as a practice that would tend to defeat the purposes of this subpart; and

(10) to comply with such additional provisions as the Secretary determines are desirable and are included in the contract to carry out this subpart or to facilitate the practical administration thereof; and

(11) with respect to any contract entered into after November 28, 1990, concerning highly erodible land in a county that has not reached the limitation established by section 3843(f)¹ of this title—

(A) not to produce an agricultural commodity for the duration of the contract on any other highly erodible land that such owner or operator has purchased after November 28, 1990, and that does not have a history of being used to produce an agricultural commodity other than forage crops; and

(B) on the violation of a contract described in subparagraph (A), to be subject to the sanctions described in paragraph (5).

(b) Conversion plan provisions

The plan referred to in subsection (a)(1) of this section—

(1) shall set forth—

(A) the conservation measures and practices to be carried out by the owner or operator during the term of the contract; and

(B) the commercial use, if any, to be permitted on the land during such term; and

(2) may provide for the permanent retirement of any existing cropland base and allotment history for the land.

(c) Environmental use

To the extent practicable, not less than one-eighth of land that is placed in the conservation reserve under this subpart during the 1991 through 2002 calendar years shall be devoted to trees, or devoted to shrubs or other noncrop vegetation or water that may provide a permanent habitat for wildlife including migratory waterfowl.

(d) Alley cropping

(1) The Secretary may permit alley cropping of agricultural commodities on land that is subject to contracts entered into under this subpart, if—

(A) such land is planted to hardwood trees;

(B) such agricultural commodities will be produced in conjunction with, and in close proximity to, such hardwood trees; and

(C) the owner or operator of such land agrees to implement appropriate conservation practices concerning such land.

(2) The Secretary shall develop a bid system by which owners and operators may offer to reduce their annual rental payments in exchange for permission to produce agricultural commodities on such land in accordance with this sub-

section. The Secretary shall not accept offers under this paragraph that provide for less than a 50 percent reduction in such annual payments.

(3) The Secretary shall ensure that the total annual rental payments over the term of any contract modified under this subsection are not in excess of that specified in the original contract.

(4) For the purposes of this subsection, the term “alley cropping” means the practice of planting rows of trees bordered on each side by a narrow strip of groundcover, alternated with wider strips of row crops or grain.

(e) Foreclosure

Notwithstanding any other provision of law, an owner or operator who is a party to a contract entered into under this subpart may not be required to make repayments to the Secretary of amounts received under such contract if the land that is subject to such contract has been foreclosed upon and the Secretary determines that forgiving such repayments is appropriate in order to provide fair and equitable treatment. This subsection shall not void the responsibilities of such an owner or operator under the contract if such owner or operator resumes control over the property that is subject to the contract within the period specified in the contract. Upon the resumption of such control over the property by the owner or operator, the provisions of the contract in effect on the date of the foreclosure shall apply.

(b) Federal percentage of cost sharing payments

(1) In making cost sharing payments to an owner or operator under a contract entered into under this subpart, the Secretary shall pay 50 percent of the cost of establishing water quality and conservation measures and practices required under such contracts for which the Secretary determines that cost-sharing is appropriate and in the public interest.

(2) The Secretary shall not make any payment under this subpart to the extent that the total amount of cost sharing payments provided to such owners and operators from all sources would exceed 100 percent of the total establishment costs.

(3) In the case of land devoted to the production of hardwood trees, windbreaks, shelterbelts, or wildlife corridors under a contract entered into under this subpart after November 28, 1990, or in the case of land converted to such production under section 3835a of this title, the Secretary, in making cost share payments to an owner or operator of such land, shall pay 50 percent of the reasonable and necessary costs, as determined by the Secretary, incurred by such owner or operator for maintaining such plantings that are trees or shrubs, including the cost of replanting (if the trees or shrubs were lost due to conditions beyond the control of the owner or operator), during not less than the 2-year, and not more than the 4-year, period beginning on the date of such plantings, as determined appropriate by the Secretary.

(4) The Secretary may permit owners or operators who contract to devote at least 10 acres of land to the production of hardwood trees under this subpart to extend the planting of such trees over a 3-year period if at least one-third of such trees are planted in each of the first 2 years.

(5) An owner or operator shall not be eligible to receive or retain cost share assistance under this subsection if such owner or operator receives any other Federal cost share assistance with respect to such land under any other provision of law.

(c) Annual rental payments; encouragement factor; method of determination; acceptance of contract offers

(1) In determining the amount of annual rental payments to be paid to owners and operators for converting highly erodible cropland normally devoted to the production of an agricultural commodity to less intensive use, the Secretary may consider, among other things, the amount necessary to encourage owners or operators of highly erodible cropland to participate in the program established by this subpart.

(2) The amounts payable to owners or operators in the form of rental payments under contracts entered into under this subpart may be determined through—

(A) the submission of bids for such contracts by owners and operators in such manner as the Secretary may prescribe; or

(B) such other means as the Secretary determines are appropriate.

(3) In determining the acceptability of contract offers, the Secretary may—

(A) take into consideration the extent to which enrollment of the land that is the subject of the contract offer would improve soil resources, water quality, wildlife habitat, or provide other environmental benefits; and

(B) establish different criteria in various States and regions of the United States based upon the extent to which water quality or wildlife habitat may be improved or erosion may be abated.

(4) In the case of acreage enrolled in the conservation reserve established under this subpart that is to be devoted to hardwood trees, the Secretary may consider bids for contracts under this subsection on a continuous basis.

(d) Cash or in-kind payments

(1) Except as otherwise provided in this section, payments under this subpart—

(A) shall be made in cash or in commodities in such amount and on such time schedule as is agreed on and specified in the contract; and

(B) may be made in advance of determination of performance.

(2) If such payment is made with in-kind commodities, such payment shall be made by the Commodity Credit Corporation—

(A) by delivery of the commodity involved to the owner or operator at a warehouse or other similar facility located in the county in which the highly erodible cropland is located or at such other location as is agreed to by the Secretary and the owner or operator;

(B) by the transfer of negotiable warehouse receipts; or

(C) by such other method, including the sale of the commodity in commercial markets, as is determined by the Secretary to be appropriate to enable the owner or operator to receive efficient and expeditious possession of the commodity.

(3) If stocks of a commodity acquired by the Commodity Credit Corporation are not readily available to make full payment in kind to the owner or operator, the Secretary may substitute full or partial payment in cash for payment in kind.

(4) Payments to a producer under a special conservation reserve enhancement program described in subsection (f)(4) of this section shall be in the form of cash only.

(e) Regulations: payments upon death, disability, or succession

If an owner or operator who is entitled to a payment under a contract entered into under this subpart dies, becomes incompetent, is otherwise unable to receive such payment, or is succeeded by another person who renders or completes the required performance, the Secretary shall make such payment, in accordance with regulations prescribed by the Secretary and without regard to any other provision of law, in such manner as the Secretary determines is fair and reasonable in light of all of the circumstances.

(f) Rental payments fiscal year limitation; regulations; receipt of other payments unaffected; application of limit to payments received by a State, political subdivision, or agency

(1) The total amount of rental payments, including rental payments made in the form of in-kind commodities, made to an owner or operator under this subpart for any fiscal year may not exceed \$50,000.

(2)(A) The Secretary shall issue regulations—

(i) defining the term “person” as used in this subsection; and

(ii) prescribing such rules as the Secretary determines necessary to ensure a fair and reasonable application of the limitation contained in this subsection.

(B) The regulations issued by the Secretary on December 18, 1970, under section 1307 of this title, shall be used to determine whether corporations and their stockholders may be considered as separate persons under this subsection.

(3) Rental payments received by an owner or operator shall be in addition to, and not affect, the total amount of payments that such owner or operator is otherwise eligible to receive under this Act, the Food, Agriculture, Conservation, and Trade Act of 1990, or the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).

(4) The provisions of this subsection that limit payments to any person, and section 1305(d) of the Agricultural Reconciliation Act of 1987, shall not be applicable to payments received by a State, political subdivision, or agency thereof in connection with agreements entered into under a special conservation reserve enhancement program carried out by that entity that has been approved by the Secretary. The Secretary may enter into such agreements for payments to States, political subdivisions, or agencies thereof that the Secretary determines will advance the purposes of this subpart.

(g) Contracts unaffected by certain Presidential orders

Notwithstanding any other provision of law, no order issued for any fiscal year under section 902 of title 2 shall affect any payment under any contract entered into at any time that is subject to this subpart, including contracts entered into prior to November 28, 1990.

(h) Cost share assistance

In addition to any payment under this subpart, an owner or operator may receive cost

share assistance, rental payments, or tax benefits from a State or subdivision thereof for enrolling lands in the conservation reserve program.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3801 of this title.

§ 3835. Contracts

(a) Ownership or operation requirement

(1) No contract shall be entered into under this subpart concerning land with respect to which the ownership has changed in the 1-year period preceding the first year of the contract period unless—

(A) the new ownership was acquired by will or succession as a result of the death of the previous owner;

(B) the new ownership was acquired before January 1, 1985;

(C) the Secretary determines that the land was acquired under circumstances that give adequate assurance that such land was not acquired for the purpose of placing it in the program established by this subpart; or

(D) the ownership change occurred due to foreclosure on the land and the owner of the land immediately before the foreclosure exercises a right of redemption from the mortgage holder in accordance with State law.

(2) Paragraph (1) shall not—

(A) prohibit the continuation of an agreement by a new owner after an agreement has been entered into under this subpart; or

(B) require a person to own the land as a condition of eligibility for entering into the contract if the person—

(i) has operated the land to be covered by a contract under this section for at least 1 year preceding the date of the contract or since January 1, 1985, whichever is later; and

(ii) controls the land for the contract period.

(b) Sales or transfers; options

If during the term of a contract entered into under this subpart an owner or operator of land

subject to such contract sells or otherwise transfers the ownership or right of occupancy of such land, the new owner or operator of such land may—

- (1) continue such contract under the same terms or conditions;
- (2) enter into a new contract in accordance with this subpart; or
- (3) elect not to participate in the program established by this subpart.

(c) Modification; waiver

(1) The Secretary may modify a contract entered into with an owner or operator under this subpart if—

- (A) the owner or operator agrees to such modification; and
- (B) the Secretary determines that such modification is desirable—
 - (i) to carry out this subpart;
 - (ii) to facilitate the practical administration of this subpart; or
 - (iii) to achieve such other goals as the Secretary determines are appropriate, consistent with this subpart.

(2) The Secretary may modify or waive a term or condition of a contract entered into under this subpart in order to permit all or part of the land subject to such contract to be devoted to the production of an agricultural commodity during a crop year, subject to such conditions as the Secretary determines are appropriate.

(d) Termination; notice to Congressional Committees

(1) The Secretary may terminate a contract entered into with an owner or operator under this subpart if—

- (A) the owner or operator agrees to such termination; and
- (B) the Secretary determines that such termination would be in the public interest.

(2) At least 90 days before taking any action to terminate under paragraph (1) all conservation reserve contracts entered into under this subpart, the Secretary shall provide written notice of such action to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(e) Termination by owner or operator

(1) Early termination authorized

Subject to the other provisions of this subsection, the Secretary shall allow a participant who entered into a contract before January 1, 1995, to terminate the contract at any time if the contract has been in effect for at least 5 years. The termination shall not relieve the participant of liability for a contract violation occurring before the date of the termination. The participant shall provide the Secretary with reasonable notice of the participant's desire to terminate the contract.

(2) Certain lands excepted

The following lands shall not be subject to an early termination of contract under this subsection:

- (A) Filterstrips, waterways, strips adjacent to riparian areas, windbreaks, and shelterbelts.

(B) Land with an erodibility index of more than 15.

(C) Other lands of high environmental value (including wetlands), as determined by the Secretary.

(3) Effective date

The contract termination shall become effective 60 days after the date on which the owner or operator submits the notice required under paragraph (1).

(4) Prorated rental payment

If a contract entered into under this subpart is terminated under this subsection before the end of the fiscal year for which a rental payment is due, the Secretary shall provide a prorated rental payment covering the portion of the fiscal year during which the contract was in effect.

(5) Renewed enrollment

The termination of a contract entered into under this subpart shall not affect the ability of the owner or operator who requested the termination to submit a subsequent bid to enroll the land that was subject to the contract into the conservation reserve.

(6) Conservation requirements

If land that was subject to a contract is returned to production of an agricultural commodity, the conservation requirements under subchapters II and III of this chapter shall apply to the use of the land to the extent that the requirements are similar to those requirements imposed on other similar lands in the area, except that the requirements may not be more onerous than the requirements imposed on other lands.

CONSERVATION RESERVE

Pub. L. 100-45, § 10, May 27, 1987, 101 Stat. 323, provided that: “Section 1235(a) of the Food Security Act of 1985 [16 U.S.C. 3835(a)] should be reviewed by the Secretary of Agriculture to ensure that the provisions thereof relating to exceptions to the three-year ownership requirement with respect to eligibility for the conservation reserve are being implemented in a manner to encourage inclusion of producer-owned land in the conservation reserve. However, any such exception to the three-year requirement should be made only if the Secretary determines that the land involved (1) was not acquired for the purpose of placing the land in the conservation reserve or (2) otherwise meets the criteria for exceptions made under section 1235(a).”

§ 3835a. Conversion of land subject to contract to other conserving uses

(a) Conversion to trees

(1) In general

The Secretary shall permit an owner or operator who has entered into a contract under this subpart that is in effect on November 28, 1990, to convert areas of highly erodible cropland that are subject to such contract, and that are devoted to vegetative cover, from such use to hardwood trees, windbreaks, shelterbelts, or wildlife corridors.

(2) Terms

(A) Extension of contract

With respect to a contract that is modified under this section that provides for the planting of hardwood trees, windbreaks, shelterbelts, or wildlife corridors, if the original term of the contract was less than 15 years, the owner or operator may extend the contract to a term of not to exceed 15 years.

(B) Cost share assistance

The Secretary shall pay 50 percent of the cost of establishing conservation measures and practices authorized under this subsection for which the Secretary determines the cost sharing is appropriate and in the public interest.

(b) Conversion to wetlands

The Secretary shall permit an owner or operator who has entered into a contract under this subpart that is in effect on November 28, 1990, to restore areas of highly erodible cropland that are devoted to vegetative cover under such contract to wetlands if—

- (1) such areas are prior converted wetlands;
- (2) the owner or operator of such areas enters into an agreement to provide the Secretary with a long-term or permanent easement under subpart C covering such areas;
- (3) there is a high probability that the prior converted area can be successfully restored to wetland status; and
- (4) the restoration of such areas otherwise meets the requirements of subpart C.

(c) Limitation

The Secretary shall not incur, through a conversion under this section, any additional expense on such acres, including the expense involved in the original establishment of the vegetative cover, that would result in cost share for costs in excess of the costs that would have been subject to cost share for the new practice had that practice been the original practice.

(d) Condition of contract

An owner or operator shall as a condition of entering into a contract under subsection (a) of this section participate in the Forest Stewardship Program established under section 2103a of this title.

(Pub. L. 99-198, title XII, §1235A, as added Pub. L. 101-624, title XIV, §1435, Nov. 28, 1990, 104 Stat. 3582; amended Pub. L. 102-324, §1(b), July 22, 1992, 106 Stat. 447.)

AMENDMENTS

1992—Subsec. (a)(2). Pub. L. 102-324 added subpar. (A), redesignated subpar. (C) as (B), and struck out former

subpars. (A) and (B). Prior to amendment, subpars. (A) and (B) read as follows:

“(A) EXTENSION OF CONTRACT.—With respect to any contract on land to be devoted to hardwood trees, windbreaks, shelterbelts, or wildlife corridors under this section, if the original term of such contract was less than 15 years, the owner or operator may extend such contract to a term of not to exceed 15 years.

“(B) EASEMENTS.—If such areas are converted to windbreaks, shelterbelts, or wildlife corridors under this section, the owner of such land shall enter into an agreement to provide a conservation easement to the Secretary for the useful life of such plantings.”

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 3831, 3834 of this title.

§ 3836. Base history

(a) Reductions

A reduction, based on a ratio between the total cropland acreage on the farm and the acreage placed in the conservation reserve authorized by this subpart, as determined by the Secretary, shall be made during the period of the contract, in the aggregate, in crop bases, quotas, and allotments on the farm with respect to crops for which there is a production adjustment program.

(b) Basis for participation in other Federal programs

Notwithstanding sections 3811 and 3821 of this title, the Secretary, by appropriate regulation, may provide for preservation of cropland base and allotment history applicable to acreage converted from the production of agricultural commodities under this section, for the purpose of any Federal program under which the history is used as a basis for participation in the program or for an allotment or other limitation in the program, unless the owner and operator agree under the contract to retire permanently that cropland base and allotment history.

(c) Extension of preservation of cropland base and allotment history

The Secretary shall offer the owner or operator of a farm or ranch an opportunity to extend the preservation of cropland base and allotment history pursuant to subsection (b) of this section for such time as the Secretary determines to be appropriate after the expiration date of a contract under this subpart at the request of such owner or operator. In return for such extension, the owner or operator shall agree to continue to abide by the terms and conditions of the original contract, except that—

(1) such owner or operator shall receive no additional cost share, annual rental, or bonus payment; and

(2) the Secretary may permit, subject to such terms and conditions as the Secretary may impose, haying and grazing of acreage subject to such agreement, except during any consecutive 5 month period that is established by the State committee. Each 5 month period shall be established during the period beginning April 1 and ending October 31 of a year. In the case of a natural disaster, the Secretary may permit unlimited haying and grazing on such acreage.

(d) Additional remedy for violations

In addition to any other remedy prescribed by law, the Secretary may reduce or terminate the amount of cropland base and allotment history preserved pursuant to subsection (c) of this section for acreage with respect to which a violation of a term or condition occurs.

(Pub. L. 99-198, title XII, §1236, Dec. 23, 1985, 99 Stat. 1514; Pub. L. 101-624, title XIV, §§1436, 1447(a), Nov. 28, 1990, 104 Stat. 3583, 3605.)

AMENDMENTS

1990—Subsec. (a). Pub. L. 101-624, §1447(a), substituted reference to this subpart for reference to this subchapter.

Subsecs. (c), (d). Pub. L. 101-624, §1436, added subsecs. (c) and (d).

§ 3836a. Wildlife Habitat Incentive Program**(a) In general**

The Secretary of Agriculture, in consultation with the State technical committees established under section 1261 of the Food Security Act of 1985 (16 U.S.C. 3861), shall establish a program under the Natural Resources Conservation Service to be known as the “Wildlife Habitat Incentive Program”.

(b) Cost-share payments

Under the program, the Secretary shall make cost-share payments to landowners to develop upland wildlife, wetland wildlife, threatened and endangered species, fish, and other types of wildlife habitat approved by the Secretary.

(c) Funding

To carry out this section, a total of \$50,000,000 shall be made available for fiscal years 1996 through 2002 from funds made available to carry out subchapter B of chapter 1 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3831 et seq.).

SUBPART C—WETLANDS RESERVE PROGRAM

SUBPART REFERRED TO IN OTHER SECTIONS

This subpart is referred to in sections 3830, 3835a, 3839bb, 3841, 3843 of this title; title 7 section 6962.

§ 3837. Wetlands reserve program**(a) Establishment**

The Secretary shall establish a wetlands reserve program to assist owners of eligible lands in restoring and protecting wetlands.

(b) Enrollment conditions**(1) Maximum enrollment**

The total number of acres enrolled in the wetlands reserve program shall not exceed 975,000 acres.

(2) Methods of enrollment**(A) In general**

Subject to subparagraph (B), effective beginning October 1, 1996, to the maximum extent practicable, the Secretary shall enroll into the wetlands reserve program—

- (i) $\frac{1}{3}$ of the acres through the use of permanent easements;
- (ii) $\frac{1}{3}$ of the acres through the use of 30-year easements; and
- (iii) $\frac{1}{3}$ of the acres through the use of restoration cost-share agreements.

(B) Temporary easements

Effective beginning October 1, 1996, the Secretary shall not enroll acres in the wetlands reserve program through the use of new permanent easements until the Secretary has enrolled at least 75,000 acres in the program through the use of temporary easements.

(C) Construction

For purposes of subparagraph (A), to the maximum extent practicable should be interpreted to mean that acceptance of wetlands reserve program bids may be in proportion to landowner interest expressed in program options.

(c) Eligibility

For purposes of enrolling land in the wetland reserve established under this subpart during the 1991 through 2002 calendar years, land shall be eligible to be placed into such reserve if the Secretary, in consultation with the Secretary of the Interior at the local level, determines that—

- (1) such land maximizes wildlife benefits and wetland values and functions;
- (2) such land is farmed wetland or converted wetland, together with adjacent lands that are functionally dependent on such wetlands, except that converted wetlands where the conversion was not commenced prior to December 23, 1985, shall not be eligible to be enrolled in the program under this section; and
- (3) the likelihood of the successful restoration of such land and the resultant wetland values merit inclusion of such land in the program taking into consideration the cost of such restoration.

(d) Other eligible land

The Secretary may include in the wetland reserve established under this subpart, together with land that is eligible under subsection (c) of this section, land that maximizes wildlife benefits and that is—

- (1) farmed wetland and adjoining lands, enrolled in the conservation reserve, with the highest wetland functions and values, and that are likely to return to production after they leave the conservation reserve;
- (2) other wetland of an owner that would not otherwise be eligible if the Secretary determines that the inclusion of such wetland in

such easement would significantly add to the functional value of the easement; or

(3) riparian areas that link wetlands that are protected by easements or some other device or circumstance that achieves the same purpose as an easement.

(e) Ineligible land

The Secretary may not acquire easements on—

(1) land that contains timber stands established under the conservation reserve under subpart B; or

(2) pasture land established to trees under the conservation reserve under subpart B.

(f) Termination of existing contract

The Secretary may terminate or modify an existing contract entered into under section 3831(a) of this title if eligible land that is subject to such contract is transferred into the program established by this subpart.

(g) Easements

The Secretary shall enroll lands in the wetland reserve through the purchase of easements as provided for in section 3837a of this title.

§ 3837a. Easements and agreements

(a) In general

To be eligible to place land into the wetland reserve under this subpart, the owner of such land shall enter into an agreement with the Secretary—

(1) to grant an easement on such land to the Secretary;

(3) to create and record an appropriate deed restriction in accordance with applicable State law to reflect the easement agreed to under this subpart with respect to such lands; and

(4) to provide a written statement of consent to such easement signed by those holding a security interest in the land.

(b) Terms of easement

An owner granting an easement under subsection (a) of this section shall be required to provide for the restoration and protection of the functional values of wetland pursuant to a wetland easement conservation plan that—

(1) permits—

(A) repairs, improvements, and inspections on such land that are necessary to maintain existing public drainage systems if such land is subsequently restored to the condition required by the terms of the easement; and

(B) landowners to control public access on the easement areas while identifying access routes to be used for wetland restoration activities and management and easement monitoring;

(2) prohibits—

(A) the alteration of wildlife habitat and other natural features of such land, unless specifically permitted by the plan;

(B) the spraying of such land with chemicals or the mowing of such land, except where such spraying or mowing is permitted by the plan or is necessary—

(i) to comply with Federal or State noxious weed control laws; or

(ii) to comply with a Federal or State emergency pest treatment program; and

(C) any activities to be carried out on such participating landowner’s or successor’s land that is immediately adjacent to, and functionally related to, the land that is subject to the easement if such activities will alter, degrade, or otherwise diminish the functional value of the eligible land; and

(D) the adoption of any other practice that would tend to defeat the purposes of this subpart, as determined by the Secretary;

(3) provides for the efficient and effective restoration of the functional values of wetlands; and

(4) includes such additional provisions as the Secretary determines are desirable to carry out this subpart or to facilitate the practical administration thereof.

(c) Restoration plans

The development of a restoration plan, including any compatible use, under this section shall be made through the local Natural Resources Conservation Service representative, in consultation with the State technical committee.

(d) Compatible uses

Wetland reserve program lands may be used for compatible economic uses, including such activities as hunting and fishing, managed timber harvest, or periodic haying or grazing, if such use is specifically permitted by the plan and consistent with the long-term protection and enhancement of the wetlands resources for which the easement was established.

(e) Type and length of easement

A conservation easement granted under this section—

- (1) shall be in a recordable form; and
- (2) shall be for 30 years, permanent, or the maximum duration allowed under applicable State laws.

Compensation for easements acquired by the Secretary under this subpart shall be made in cash in such amount as is agreed to and specified in the easement agreement, but not to exceed the fair market value of the land less the fair market value of such land encumbered by the easement. Lands may be enrolled through the submission of bids under a procedure established by the Secretary. Compensation may be provided in not less than 5, nor more than 30, annual payments of equal or unequal size, as agreed to by the owner and the Secretary.

(g) Violation

On the violation of the terms or conditions of the easement or related agreement entered into under subsection (a) of this section, the easement shall remain in force and the Secretary may require the owner to refund all or part of any payments received by the owner under this subpart, together with interest thereon as determined appropriate by the Secretary.

(h) Restoration cost-share agreements

The Secretary may enroll land into the wetlands reserve program through an agreement that requires the landowner to restore wetlands on the land, if the agreement does not provide the Secretary with an easement.

(d) Easement priority

In carrying out this subpart, to the extent practicable, taking into consideration costs and future agricultural and food needs, the Secretary shall give priority to obtaining permanent conservation easements before shorter term conservation easements and, in consultation with the Secretary of the Interior, shall place priority on acquiring easements based on the value of the easement for protecting and enhancing habitat for migratory birds and other wildlife.

§ 3839. Environmental easement program

(a) Establishment

The Secretary shall, during the 1991 through 1995 calendar years, formulate and carry out an

environmental easement program (hereafter in this part referred to as the “easement program”) in accordance with this part, through the acquisition of permanent easements or easements for the maximum term permitted under applicable State law from willing owners of eligible farms or ranches in order to ensure the continued long-term protection of environmentally sensitive lands or reduction in the degradation of water quality on such farms or ranches through the continued conservation and improvement of soil and water resources.

(b) Eligibility; termination

(1) In general

The Secretary may acquire easements under this section on land placed in the conservation reserve under this subchapter (other than such land that is likely to continue to remain out of production and that does not pose an off-farm environmental threat), land under the Water Bank Act [16 U.S.C. 1301 et seq.], or other cropland that—

- (A) contains riparian corridors;
- (B) is an area of critical habitat for wildlife, especially threatened or endangered species; or
- (C) contains other environmentally sensitive areas, as determined by the Secretary, that would prevent a producer from complying with other Federal, State, or local environmental goals if commodities were to be produced on such land.

(2) Ineligible land

The Secretary may not acquire easements on—

- (A) land that contains timber stands established under the conservation reserve under this subchapter; or
- (B) pasture land established to trees under the conservation reserve under this subchapter.

(3) Termination of existing contract

The Secretary may terminate or modify any existing contract entered into under section 3831(a) of this title if eligible land that is subject to such contract is transferred into the program established by this part.

(c) Easement payments; acceptability of offers

(1) Determination of amount

The Secretary shall determine the amount payable to owners in the form of easement payments under this part, and in making such determination may consider, among other things, the amount necessary to encourage owners to participate in the easement program.

(2) Acceptability of offers

In determining the acceptability of easement offers, the Secretary may take into consideration—

(A) the extent to which the purposes of the easement program would be achieved on the land;

(B) the productivity of the land; and

(C) the on-farm and off-farm environmental threats if the land is used for the production of agricultural commodities.

(d) Form of payment

Except as otherwise provided in this section, payments under this part—

(1) shall be made in cash in such amount and at such time as is agreed on and specified in the easement or related agreement; and

(2) may be made in advance of a determination of performance.

(e) Payments to others

If an owner who is entitled to a payment under this part dies, becomes incompetent, is otherwise unable to receive such payment, or is succeeded by another person who renders or completes the required performance, the Secretary shall make such payment, in accordance with regulations prescribed by the Secretary and without regard to any other provision of law, in such manner as the Secretary determines is fair and reasonable in light of all of the circumstances.

(f) Payment limitation

(1) In general

The total amount of easement payments made to a person under this part for any year may not exceed \$50,000.

(2) Regulations

The Secretary shall issue regulations prescribing such rules as the Secretary determines necessary to ensure a fair and reasonable application of the limitation contained in this subsection.

(3) Other payments

Easement payments received by an owner shall be in addition to, and not affect, the total amount of payments that such owner is otherwise eligible to receive under this Act, the Food, Agriculture, Conservation, and Trade Act of 1990, or the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).

(4) State environmental enhancement

The provisions of this subsection that limit payments to any person, and section 1305(d) of the Agricultural Reconciliation Act of 1987 (7 U.S.C. 1308 note), shall not be applicable to payments received by a State, political subdivision, or agency thereof in connection with agreements entered into under an environmental easement enhancement program carried out by that entity that has been approved by the Secretary. The Secretary may enter into such agreements for payments to States, political subdivisions, or agencies thereof that the Secretary determines will advance the purposes of this part.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 3839aa-7 of this title.

§ 3839aa-1. Definitions

In this part:

(1) Eligible land

The term “eligible land” means agricultural land (including cropland, rangeland, pasture, and other land on which crops or livestock are produced), including agricultural land that the Secretary determines poses a serious threat to soil, water, or related resources by reason of the soil types, terrain, climatic, soil, topographic, flood, or saline characteristics, or other factors or natural hazards.

(2) Land management practice

The term “land management practice” means a site-specific nutrient or manure management, integrated pest management, irrigation management, tillage or residue management, grazing management, or other land management practice carried out on eligible land that the Secretary determines is needed to protect, in the most cost-effective manner, water, soil, or related resources from degradation.

(3) Livestock

The term “livestock” means dairy cattle, beef cattle, laying hens, broilers, turkeys, swine, sheep, and such other animals as determined by the Secretary.

(4) Producer

The term “producer” means a person who is engaged in livestock or agricultural production (as defined by the Secretary).

(5) Structural practice

The term “structural practice” means—

(A) the establishment on eligible land of a site-specific animal waste management facility, terrace, grassed waterway, contour grass strip, filterstrip, tailwater pit, permanent wildlife habitat, or other structural practice that the Secretary determines is needed to protect, in the most cost-effective manner, water, soil, or related resources from degradation; and

(B) the capping of abandoned wells on eligible land.

(Pub. L. 99-198, title XII, §1240A, as added Pub. L. 104-127, title III, §334, Apr. 4, 1996, 110 Stat. 997.)

§ 3839aa-2. Establishment and administration of environmental quality incentives program**(a) Establishment****(1) In general**

During the 1996 through 2002 fiscal years, the Secretary shall provide technical assistance, cost-share payments, incentive payments, and education to producers, who enter into contracts with the Secretary, through an environmental quality incentives program in accordance with this part.

(2) Eligible practices**(A) Structural practices**

A producer who implements a structural practice shall be eligible for any combina-

tion of technical assistance, cost-share payments, and education.

(B) Land management practices

A producer who performs a land management practice shall be eligible for any combination of technical assistance, incentive payments, and education.

(b) Application and term

A contract between a producer and the Secretary under this part may—

(1) apply to 1 or more structural practices or 1 or more land management practices, or both; and

(2) have a term of not less than 5, nor more than 10, years, as determined appropriate by the Secretary, depending on the practice or practices that are the basis of the contract.

(c) Structural practices**(1) Offer selection process**

The Secretary shall, to the maximum extent practicable, establish a process for selecting applications for financial assistance if there are numerous applications for assistance for structural practices that would provide substantially the same level of environmental benefits. The process shall be based on—

(A) a reasonable estimate of the projected cost of the proposals and other factors identified by the Secretary for determining which applications will result in the least cost to the program authorized by this part; and

(B) the priorities established under this subchapter and such other factors determined by the Secretary that maximize environmental benefits per dollar expended.

(2) Concurrence of owner

If the producer making an offer to implement a structural practice is a tenant of the land involved in agricultural production, for the offer to be acceptable, the producer shall obtain the concurrence of the owner of the land with respect to the offer.

(d) Land management practices

The Secretary shall establish an application and evaluation process for awarding technical assistance or incentive payments, or both, to a producer in exchange for the performance of 1 or more land management practices by the producer.

(e) Cost-share payments, incentive payments, and technical assistance**(1) Cost-share payments****(A) In general**

The Federal share of cost-share payments to a producer proposing to implement 1 or more structural practices shall be not more than 75 percent of the projected cost of the practice, as determined by the Secretary, taking into consideration any payment received by the producer from a State or local government.

(B) Limitation

A producer who owns or operates a large confined livestock operation (as defined by

the Secretary) shall not be eligible for cost-share payments to construct an animal waste management facility.

(C) Other payments

A producer shall not be eligible for cost-share payments for structural practices on eligible land under this part if the producer receives cost-share payments or other benefits for the same land under part I or III of this subchapter.

(2) Incentive payments

The Secretary shall make incentive payments in an amount and at a rate determined by the Secretary to be necessary to encourage a producer to perform 1 or more land management practices.

(3) Technical assistance

(A) Funding

The Secretary shall allocate funding under this part for the provision of technical assistance according to the purpose and projected cost for which the technical assistance is provided for a fiscal year. The allocated amount may vary according to the type of expertise required, quantity of time involved, and other factors as determined appropriate by the Secretary. Funding shall not exceed the projected cost to the Secretary of the technical assistance provided for a fiscal year.

(B) Other authorities

The receipt of technical assistance under this part shall not affect the eligibility of the producer to receive technical assistance under other authorities of law available to the Secretary.

(C) Private sources

The Secretary shall ensure that the processes of writing and developing proposals and plans for contracts under this part, and of assisting in the implementation of structural practices and land management practices covered by the contracts, are open to individuals in agribusiness, including agricultural producers, representatives from agricultural cooperatives, agricultural input retail dealers, and certified crop advisers. The requirements of this subparagraph shall also apply to any other conservation program of the Department of Agriculture that provides incentive payments, technical assistance, or cost-share payments.

(f) Modification or termination of contracts

(1) Voluntary modification or termination

The Secretary may modify or terminate a contract entered into with a producer under this part if—

(A) the producer agrees to the modification or termination; and

(1) are provided in conservation priority areas established under section 3830(c) of this title;

(2) maximize environmental benefits per dollar expended; or

(3) are provided in watersheds, regions, or conservation priority areas in which State or local governments have provided, or will provide, financial or technical assistance to producers for the same conservation or environmental purposes.

(Pub. L. 99-198, title XII, §1240C, as added Pub. L. 104-127, title III, §334, Apr. 4, 1996, 110 Stat. 1000.)

(2) not to conduct any practices on the farm or ranch that would tend to defeat the purposes of this part;

(3) on the violation of a term or condition of the contract at any time the producer has control of the land, to refund any cost-share or incentive payment received with interest, and forfeit any future payments under this part, as determined by the Secretary;

(4) on the transfer of the right and interest of the producer in land subject to the contract, unless the transferee of the right and interest agrees with the Secretary to assume all obligations of the contract, to refund all cost-share payments and incentive payments received under this part, as determined by the Secretary;

(5) to supply information as required by the Secretary to determine compliance with the environmental quality incentives program plan and requirements of the program; and

(6) to comply with such additional provisions as the Secretary determines are necessary to carry out the environmental quality incentives program plan.

(Pub. L. 99-198, title XII, §1240D, as added Pub. L. 104-127, title III, §334, Apr. 4, 1996, 110 Stat. 1000.)

§ 3839aa-5. Environmental quality incentives program plan

(a) In general

To be eligible to enter into a contract under the environmental quality incentives program, an owner or producer of a livestock or agricultural operation must submit to the Secretary for approval a plan of operations that incorporates such conservation practices, and is based on such principles, as the Secretary considers necessary to carry out the program, including a description of structural practices and land management practices to be implemented and the objectives to be met by the plan's implementation.

- (3) providing technical assistance, cost-share payments, or incentive payments for developing and implementing 1 or more structural practices or 1 or more land management practices, as appropriate;
- (4) providing the producer with information, education, and training to aid in implementation of the plan; and
- (5) encouraging the producer to obtain technical assistance, cost-share payments, or grants from other Federal, State, local, or private sources.

(Pub. L. 99-198, title XII, §1240F, as added Pub. L. 104-127, title III, §334, Apr. 4, 1996, 110 Stat. 1001.)

§ 3839aa-7. Limitation on payments

(a) In general

The total amount of cost-share and incentive payments paid to a producer under this part may not exceed—

- (1) \$10,000 for any fiscal year; or
- (2) \$50,000 for any multiyear contract.

(b) Exception to annual limit

The Secretary may exceed the limitation on the annual amount of a payment under subsection (a)(1) of this section on a case-by-case basis if the Secretary determines that a larger payment is—

- (1) essential to accomplish the land management practice or structural practice for which the payment is made; and

(2) consistent with the maximization of environmental benefits per dollar expended and the purposes of this part specified in section 3839aa of this title.

(c) Timing of expenditures

Expenditures under a contract entered into under this part during a fiscal year may not be made by the Secretary until the subsequent fiscal year.

(Pub. L. 99-198, title XII, §1240G, as added Pub. L. 104-127, title III, §334, Apr. 4, 1996, 110 Stat. 1001.)

§ 3839aa-8. Temporary administration of environmental quality incentives program

(a) Interim administration

(1) In general

During the period beginning on April 4, 1996, and ending on the termination date provided under paragraph (2), to ensure that technical assistance, cost-share payments, and incentive payments continue to be administered in an orderly manner until such time as assistance can be provided through final regulations issued to implement the environmental quality incentives program established under this part, the Secretary shall continue to—

- (A) provide technical assistance, cost-share payments, and incentive payments under the terms and conditions of the agricultural conservation program, the Great Plains conservation program, the water quality incentives program, and the Colorado River Basin salinity control program, to the extent the terms and conditions of the program are consistent with the environmental quality incentives program; and

(B) use for those purposes—

- (i) any funds remaining available for the agricultural conservation program, the Great Plains conservation program, the water quality incentives program, and the Colorado River Basin salinity control program; and

- (ii) as the Secretary determines to be necessary, any funds authorized to be used to carry out the environmental quality incentives program.

SUBCHAPTER I—GENERAL PROVISIONS

§ 3901. Findings and statement of purpose

(a) Findings

The Congress finds that—

(1) wetlands play an integral role in maintaining the quality of life through material contributions to our national economy, food supply, water supply and quality, flood control, and fish, wildlife, and plant resources, and thus to the health, safety, recreation, and economic well-being of all our citizens of the Nation;

(2) wetlands provide habitat essential for the breeding, spawning, nesting, migration, wintering and ultimate survival of a major portion of the migratory and resident fish and wildlife of the Nation; including migratory birds, endangered species, commercially and recreationally important finfish, shellfish and other aquatic organisms, and contain many unique species and communities of wild plants;

(3) the migratory bird treaty obligations of the Nation with Canada, Mexico, Japan, the Union of Soviet Socialist Republics, and with various countries in the Western Hemisphere require Federal protection of wetlands that are used by migratory birds for breeding, wintering or migration and needed to achieve and to maintain optimum population levels, distributions, and patterns of migration;

(4) wetlands, and the fish, wildlife, and plants dependent on wetlands, provide significant recreational and commercial benefits, including—

(A) contributions to a commercial marine harvest valued at over \$10,000,000,000 annually;

(B) support for a major portion of the Nation's multimillion dollar annual fur and hide harvest; and

(C) fishing, hunting, birdwatching, nature observation and other wetland-related recreational activities that generate billions of dollars annually;

(5) wetlands enhance the water quality and water supply of the Nation by serving as groundwater recharge areas, nutrient traps, and chemical sinks;

(6) wetlands provide a natural means of flood and erosion control by retaining water during

periods of high runoff, thereby protecting against loss of life and property;

(7) wetlands constitute only a small percentage of the land area of the United States, are estimated to have been reduced by half in the contiguous States since the founding of our Nation, and continue to disappear by hundreds of thousands of acres each year;

(8) certain activities of the Federal Government have inappropriately altered or assisted in the alteration of wetlands, thereby unnecessarily stimulating and accelerating the loss of these valuable resources and the environmental and economic benefits that they provide; and

(9) the existing Federal, State, and private cooperation in wetlands conservation should be strengthened in order to minimize further losses of these valuable areas and to assure their management in the public interest for this and future generations.

(b) Purpose

It is the purpose of this chapter to promote, in concert with other Federal and State statutes and programs, the conservation of the wetlands of the Nation in order to maintain the public benefits they provide and to help fulfill international obligations contained in various migratory bird treaties and conventions with Canada, Mexico, Japan, the Union of Soviet Socialist Republics, and with various countries in the Western Hemisphere by—

(1) intensifying cooperative efforts among private interests and local, State, and Federal governments for the management and conservation of wetlands; and

(2) intensifying efforts to protect the wetlands of the Nation through acquisition in fee, easements or other interests and methods by local, State, and Federal governments and the private sector.

SUBCHAPTER II—REVENUES FOR REFUGE OPERATIONS AND THE MIGRATORY BIRD CONSERVATION FUND

§ 3911. Sale of admission permit at certain refuge units

(a) Sale of admission permits

(1) Notwithstanding the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4 et seq.), in order to provide additional revenues for the conservation of wetland resources of the Nation and for the operation and maintenance of refuges—

(A) the Secretary of the Interior may, at units of the National Wildlife Refuge System designated by the Secretary under paragraph (2)—

- (i) charge fees for admission permits;
- (ii) sell Golden Eagle passports and Golden Age passports;¹
- (iii) issue at no charge lifetime admission permits as authorized in section 4(a)(5) of the Land and Water Conservation Fund Act of 1965 [16 U.S.C. 460l-6a(a)(5)];¹

(B) the amounts collected by the Secretary as a result of the activities described in subparagraph (A) shall be distributed as provided in subsection (c) of this section.

(2) The Secretary shall designate a unit of the National Wildlife Refuge System for purposes of this chapter if the Secretary determines, with respect to such unit, that—

(A) The level of visitation for recreational purposes is high enough to justify the collection of fees for admission permits for economic reasons.

(B) There is a practical mechanism in existence for implementing and operating a system of collecting fees for admission permits.

(C) Imposition of a fee for admission permits is not likely to result in undue economic hardship for a significant number of visitors to the unit.

(b) Exceptions

(1) The Secretary may not require an admission permit under subsection (a)(1) of this section for entry by a person into a designated unit if such person is the holder of—

(A) a valid migratory bird hunting and conservation stamp issued under section 718b of this title;

(B) a valid Golden Eagle Passport issued under section 4(a)(1) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l-6a(a)(1));

(C) a valid Golden Age Passport issued under section 4(a)(4) of such Act [16 U.S.C. 460l-6a(a)(4)]; or

(2) Permits for a single visit to any designated unit shall be made available by the Secretary of the Interior for a reasonable fee, but not to exceed \$3 for individuals or \$7.50 per vehicle. For purposes of this subsection, the term “single visit” means a more or less continuous stay within a designated unit by a person or group described in subsection (d) of this section. Payment of a single visit fee and issuance of a single visit permit shall authorize exits from and re-entries to a single designated unit for a period of from one to fifteen days. Such period shall be defined for each designated unit by the Secretary based upon a determination of the period of time reasonably and ordinarily necessary for such a single visit.

(3) Special admission permits for uses such as group activities may be issued in accordance with procedures and at fees established by the Secretary.

(4) A person may not be required to purchase an admission permit under subsection (a)(1) of this section in order to travel by private non-commercial vehicle over any road or highway—

(A)(i) established as part of the National Federal Aid System (as defined in section 101 of title 23); and

(ii) commonly used by the public as a means of travel between two places which are outside the designated unit; or

(B) to any land in which such person has a property interest if such land is within any designated unit.

(5) A person may not be required to purchase an admission permit under subsection (a)(1) of this section for entrance or admission to a unit of the National Wildlife Refuge System created, expanded, or modified by Public Law 96-487.

(iii) next, for operation and maintenance of all units within the National Wildlife Refuge System, except those units created, expanded, or modified by Public Law 96-487.

(B) Seventy percent shall be deposited into the migratory bird conservation fund established under section 718d of this title.

(d) Persons accompanying permittees

A person who holds a stamp, passport, or permit described in subsection (b) of this section shall be entitled to general entrance into any designated unit, along with—

(1) any persons accompanying such person in a single, private, noncommercial vehicle; or

(2) where entry to the area is by any means other than single, private, noncommercial vehicle, the person and any accompanying spouse, children, or parents.

(e) Restrictions

A permit issued under this section is non-transferable. Such a permit may not authorize any uses for which fees are charged under the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l-4 et seq.).

(f) Establishment of fees; posting of notices

(1) All fees established pursuant to this section shall be fair and equitable. In establishing such fees, the Secretary shall consider the following:

(B) to the extent practicable, be included in publications distributed at such units.

(g) Volunteers

The Director of the United States Fish and Wildlife Service may accept services of volunteers to sell admission permits under this section or to sell Golden Eagle and Golden Age Passports or Migratory Bird Hunting and Conservation Stamps. § 3952. Priority Louisiana coastal wetlands restoration projects

(a) Priority project list

(1) Preparation of list

Within forty-five days after November 29, 1990, the Secretary shall convene the Task Force to initiate a process to identify and prepare a list of coastal wetlands restoration projects in Louisiana to provide for the long-term conservation of such wetlands and dependent fish and wildlife populations in order of priority, based on the cost-effectiveness of such projects in creating, restoring, protecting, or enhancing coastal wetlands, taking into account the quality of such coastal wetlands, with due allowance for small-scale projects necessary to demonstrate the use of new techniques or materials for coastal wetlands restoration.

(2) Task Force procedures

The Secretary shall convene meetings of the Task Force as appropriate to ensure that the list is produced and transmitted annually to

the Congress as required by this subsection. If necessary to ensure transmittal of the list on a timely basis, the Task Force shall produce the list by a majority vote of those Task Force members who are present and voting; except that no coastal wetlands restoration project shall be placed on the list without the concurrence of the lead Task Force member that the project is cost effective and sound from an engineering perspective. Those projects which potentially impact navigation or flood control on the lower Mississippi River System shall be constructed consistent with section 3953 of this title.

(3) Transmittal of list

No later than one year after November 29, 1990, the Secretary shall transmit to the Congress the list of priority coastal wetlands restoration projects required by paragraph (1) of this subsection. Thereafter, the list shall be updated annually by the Task Force members and transmitted by the Secretary to the Congress as part of the President's annual budget submission. Annual transmittals of the list to the Congress shall include a status report on each project and a statement from the Secretary of the Treasury indicating the amounts available for expenditure to carry out this chapter.

(4) List of contents

(A) AREA IDENTIFICATION; PROJECT DESCRIPTION.—The list of priority coastal wetlands restoration projects shall include, but not be limited to—

(i) identification, by map or other means, of the coastal area to be covered by the coastal wetlands restoration project; and

(ii) a detailed description of each proposed coastal wetlands restoration project including a justification for including such project on the list, the proposed activities to be carried out pursuant to each coastal wetlands restoration project, the benefits to be realized by such project, the identification of the lead Task Force member to undertake each proposed coastal wetlands restoration project and the responsibilities of each other participating Task Force member, an estimated timetable for the completion of each coastal wetlands restoration project, and the estimated cost of each project.

(B) PRE-PLAN.—Prior to the date on which the plan required by subsection (b) of this section becomes effective, such list shall include only those coastal wetlands restoration projects that can be substantially completed during a five-year period commencing on the date the project is placed on the list.

(C) Subsequent to the date on which the plan required by subsection (b) of this section becomes effective, such list shall include only those coastal wetlands restoration projects that have been identified in such plan.

(5) Funding

The Secretary shall, with the funds made available in accordance with section 3955 of this title, allocate funds among the members of the Task Force based on the need for such funds and such other factors as the Task Force

deems appropriate to carry out the purposes of this subsection.

(b) Federal and State project planning

(1) Plan preparation

The Task Force shall prepare a plan to identify coastal wetlands restoration projects, in order of priority, based on the cost-effectiveness of such projects in creating, restoring, protecting, or enhancing the long-term conservation of coastal wetlands, taking into account the quality of such coastal wetlands, with due allowance for small-scale projects necessary to demonstrate the use of new techniques or materials for coastal wetlands restoration. Such restoration plan shall be completed within three years from November 29, 1990.

(2) Purpose of the plan

The purpose of the restoration plan is to develop a comprehensive approach to restore and prevent the loss of, coastal wetlands in Louisiana. Such plan shall coordinate and integrate coastal wetlands restoration projects in a manner that will ensure the long-term conservation of the coastal wetlands of Louisiana.

(3) Integration of existing plans

In developing the restoration plan, the Task Force shall seek to integrate the "Louisiana Comprehensive Coastal Wetlands Feasibility Study" conducted by the Secretary of the Army and the "Coastal Wetlands Conservation and Restoration Plan" prepared by the State of Louisiana's Wetlands Conservation and Restoration Task Force.

(4) Elements of the plan

The restoration plan developed pursuant to this subsection shall include—

(A) identification of the entire area in the State that contains coastal wetlands;

(B) identification, by map or other means, of coastal areas in Louisiana in need of coastal wetlands restoration projects;

(C) identification of high priority coastal wetlands restoration projects in Louisiana needed to address the areas identified in subparagraph (B) and that would provide for the long-term conservation of restored wetlands and dependent fish and wildlife populations;

(D) a listing of such coastal wetlands restoration projects, in order of priority, to be submitted annually, incorporating any project identified previously in lists produced and submitted under subsection (a) of this section;

(E) a detailed description of each proposed coastal wetlands restoration project, including a justification for including such project on the list;

(F) the proposed activities to be carried out pursuant to each coastal wetlands restoration project;

(G) the benefits to be realized by each such project;

(H) an estimated timetable for completion of each coastal wetlands restoration project;

(I) an estimate of the cost of each coastal wetlands restoration project;

(J) identification of a lead Task Force member to undertake each proposed coastal

wetlands restoration project listed in the plan;

(K) consultation with the public and provision for public review during development of the plan; and

(L) evaluation of the effectiveness of each coastal wetlands restoration project in achieving long-term solutions to arresting coastal wetlands loss in Louisiana.

(5) Plan modification

The Task Force may modify the restoration plan from time to time as necessary to carry out the purposes of this section.

(6) Plan submission

Upon completion of the restoration plan, the Secretary shall submit the plan to the Congress. The restoration plan shall become effective ninety days after the date of its submission to the Congress.

(7) Plan evaluation

Not less than three years after the completion and submission of the restoration plan required by this subsection and at least every three years thereafter, the Task Force shall provide a report to the Congress containing a scientific evaluation of the effectiveness of the coastal wetlands restoration projects carried out under the plan in creating, restoring, protecting and enhancing coastal wetlands in Louisiana.

(c) Coastal wetlands restoration project benefits

Where such a determination is required under applicable law, the net ecological, aesthetic, and cultural benefits, together with the economic benefits, shall be deemed to exceed the costs of any coastal wetlands restoration project within the State which the Task Force finds to contribute significantly to wetlands restoration.

(d) Consistency

(1) In implementing, maintaining, modifying, or rehabilitating navigation, flood control or irrigation projects, other than emergency actions, under other authorities, the Secretary, in consultation with the Director and the Administrator, shall ensure that such actions are consistent with the purposes of the restoration plan submitted pursuant to this section.

(2) At the request of the Governor of the State of Louisiana, the Secretary of Commerce shall approve the plan as an amendment to the State's coastal zone management program approved under section 1455 of this title.

(e) Funding of wetlands restoration projects

The Secretary shall, with the funds made available in accordance with this chapter, allocate such funds among the members of the Task Force to carry out coastal wetlands restoration projects in accordance with the priorities set forth in the list transmitted in accordance with this section. The Secretary shall not fund a coastal wetlands restoration project unless that project is subject to such terms and conditions as necessary to ensure that wetlands restored, enhanced or managed through that project will be administered for the long-term conservation of such lands and waters and dependent fish and wildlife populations.

(f) Cost-sharing**(1) Federal share**

Amounts made available in accordance with section 3955 of this title to carry out coastal wetlands restoration projects under this chapter shall provide 75 percent of the cost of such projects.

(2) Federal share upon conservation plan approval

Notwithstanding the previous paragraph, if the State develops a Coastal Wetlands Conservation Plan pursuant to this chapter, and such conservation plan is approved pursuant to section 3953 of this title, amounts made available in accordance with section 3955 of this title for any coastal wetlands restoration project under this section shall be 85 percent of the cost of the project. In the event that the Secretary, the Director, and the Administrator jointly determine that the State is not taking reasonable steps to implement and administer a conservation plan developed and approved pursuant to this chapter, amounts made available in accordance with section 3955 of this title for any coastal wetlands restoration project shall revert to 75 percent of the cost of the project: *Provided, however*, that¹ such reversion to the lower cost share level shall not occur until the Governor has been provided notice of, and opportunity for hearing on, any such determination by the Secretary, the Director, and Administrator, and the State has been given ninety days from such notice or hearing to take corrective action.

(3) Form of State share

The share of the cost required of the State shall be from a non-Federal source. Such State share shall consist of a cash contribution of not less than 5 percent of the cost of the project. The balance of such State share may take the form of lands, easements, or right-of-way, or any other form of in-kind contribution determined to be appropriate by the lead Task Force member.

(4) Existing cost-sharing agreements

Paragraphs (1), (2), (3), and (5) of this subsection shall not affect the existing cost-sharing agreements for the following projects: Caernarvon Freshwater Diversion, Davis Pond Freshwater Diversion, and Bonnet Carre Freshwater Diversion.

(5) Federal share in calendar years 1996 and 1997

Notwithstanding paragraphs (1) and (2), upon approval of the conservation plan under section 3953 of this title and a determination by the Secretary that a reduction in the non-Federal share is warranted, amounts made available in accordance with section 3955 of this title to carry out coastal wetlands restoration projects under this section in calendar years 1996 and 1997 shall provide 90 percent of the cost of such projects.

(Pub. L. 101-646, title III, §303, Nov. 29, 1990, 104 Stat. 4779; Pub. L. 104-303, title V, §532, Oct. 12, 1996, 110 Stat. 3774.)

§ 4001. Congressional findings

The Congress finds that—

(1) the commercial fishing industry of the United States significantly contributes to the

national economy, and could make a greater contribution if fish resources within the United States Exclusive Economic Zone were more fully utilized;

(2) the commercial fisheries of the United States provide significant employment in coastal areas and in processing and distribution centers;

(3) fish contribute an important nutritional component to the American diet;

(4) increased consumption of seafood in the United States could significantly lower the risk of many cardiovascular diseases;

(5) Federally supported development programs for commercial fisheries are unable to meet present and future marketing needs;

(6) many fish species are underutilized by the United States fishing industry because of underdeveloped markets; and

(7) the United States fishing industry has the potential to expand greatly its contribution to interstate and foreign commerce, favorably affecting the balance of trade.

(a) Application

An application for a charter for a seafood marketing council for one or more species of fish and fish products of that species may be filed by persons who meet the requirements specified in accordance with subsection (b)(6) of this section.

(b) Form of application

An application for a charter for a council shall be made by filing with the Secretary the text of a proposed charter in such form as shall be prescribed by regulation by the Secretary. The text of a proposed charter must contain such information as the Secretary considers necessary or appropriate for carrying out the provisions of this chapter, including—

- (1) the name of the council and a provision proclaiming its establishment;
- (2) a declaration of the purposes and objectives of the council;
- (3) a description of the species of fish and fish products for which the council will implement marketing and promotion plans under section 4010 of this title;
- (4) the identification of each sector and the number and terms of representatives of each sector that will be represented as voting members of the council;
- (5) the identification of those sectors (including the sector consisting of harvesters, the sector consisting of receivers, and, if subject to assessment, the sector consisting of importers) subject to a referendum to establish a council under subsection (e) of this section;
- (6) a specification for each sector described under paragraph (5) of this subsection of the minimum requirements, as measured by income, volume, or other relevant factors, that a person engaging in business in the sector must meet in order to participate in a referendum;

(7)(A) a description of the procedures for determining assessment rates under section 4012 of this title;

(B) the proposed rate or rates that will be imposed by the council on receivers and, if subject to assessment, importers during its first year of operation;

(C) the maximum amount an assessment rate for any period may be raised above the rate applicable for the immediately preceding period; and

(D) the maximum rate or rates that can be imposed by a council on receivers or importers during the operation of the council;

(8) a provision setting forth the definition of a quorum for making decisions on council business and the procedures for selecting a chairman of the council;

(9) a provision setting forth the voting procedures by which votes may be cast by proxy; and

(10) such other provisions relating to administration of the council as the Secretary considers necessary.

The text of a proposed charter shall be accompanied by a document identifying, to the extent practicable by address of place of business, the persons (hereinafter referred to as “sector participants”) that are considered by the applicants to meet the requirements specified in paragraph (6) of this subsection. The text of a proposed charter shall include provisions setting forth procedures for providing refunds to those sector participants subject to assessment under section 4012 of this title, and may also include provisions which establish a maximum limit on the amount that any one sector participant may be required to pay under an assessment for any period.

(c) Contents of charter

The Secretary may not approve a proposed charter filed under subsection (a) of this section unless such charter provides that—

- (1) the council will have voting members representing the harvesting, receiving and, if subject to assessment, importing sectors; and
- (2) the members of the council shall serve without compensation, but shall be reimbursed for their reasonable expenses incurred in performing their duties as members of the council.

(d) Review of charter

(1) Within 180 days of the receipt of an application to establish a council, the Secretary shall—

(A) identify, to the extent practicable, those sector participants that meet the requirements for eligibility to participate in the referendum under subsection (e) of this section;

(B) determine, to the extent practicable, if the charter is accompanied by a petition comprised of the signatures or corporate certifications, as the case may be, of no less than three sector participants in each sector identified in accordance with subsection (b)(5) of this section who collectively accounted for, in the twelve-month period immediately preceding the month in which the application was filed, not less than 10 percent of the value of the fish or fish products described in accordance with subsection (b)(3) of this section that were handled by each such sector during that period; and

(C) determine if the proposed charter is consistent with the provisions of this chapter and any other applicable law.

(2) If any negative determination is made under paragraph (1) of this subsection regarding a proposed charter, the Secretary shall advise in writing the sector participants who made the application of the reasons for such determination. A corrected application may be submitted thereafter to the Secretary for approval.

(e) Conduct of referendum

(1) Upon making affirmative determinations under subsection (d)(1) of this section regarding a proposed charter, the Secretary, within 90 days after the date of the last of such determinations, shall conduct a referendum on the adoption of the proposed charter among all sec-

tor participants identified in accordance with subsection (d)(1)(A) of this section. The Secretary shall by order establish the council and approve the proposed charter, if the referendum votes which are cast in favor of the proposed charter constitute a majority of the sector participants voting in each sector and the majority collectively accounts for, in the twelve-month period immediately preceding the month in which the proposed charter was filed under subsection (a) of this section, at least sixty-six percent of the value of the fish and fish products described in accordance with subsection (b)(3) of this section that were handled by that sector during such period.

(2) Not less than thirty days prior to holding a referendum under this subsection, the Secretary shall—

(A) publish (by such means as will result in wide publicity in regions affected by the proposed charter) the text of the proposed charter and a list of those sector participants eligible to vote in the referendum; and

(B) provide for public comment, including the opportunity for a public meeting.

(3)(A) The Secretary shall pay all costs of a referendum which establishes a council under this subsection. Within two years after a council is established the council shall reimburse the Secretary for any expenses incurred for the conduct of the referendum from assessments collected by the council. Prior to the holding of a referendum under this subsection, the Secretary shall require the applicants to post a bond or other security acceptable to the Secretary, in an amount which the Secretary determines to be sufficient to pay any expenses incurred for the conduct of the referendum, and shall immediately recover such amount if a referendum fails to result in the establishment of a council.

(B) As used in this paragraph, the term “expenses incurred for the conduct of the referendum” does not include salaries of Government employees or other administrative overhead, but is limited to those additional direct costs incurred in connection with conduct of the referendum.

(f) Nominations

(1) Within thirty days after a council is established under subsection (e) of this section, the Secretary shall solicit from the sectors represented on the council nominations for members of the council. If the harvesters and receivers represented on the council are engaged in business in two or more regions of the United States, the nominations made under this paragraph, and the appointments to the council made under paragraph (3) of this subsection, must, to the extent practicable, result in equitable representation for the constituent regions.

(2) No person is eligible for nomination or appointment as a member of a council unless such person is knowledgeable and experienced with regard to the activities of, and is or has been actively engaged in the business of, the sector which such person will represent on the council.

(3) The Secretary shall, within sixty days after the end of the thirty-day period referred to in paragraph (1) of this subsection, appoint the members of the council from among the nominees.

(4) A vacancy on a council shall be filled, within sixty days after the vacancy occurs, in the same manner in which the original appointment was made. A member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of such term.

(5) The Secretary shall remove any member of a council if the council concerned first recommends, by not less than two-thirds of its members, removal for cause. Such a recommendation of a council must be in writing and accompanied by a statement of the reasons upon which the recommendation is based.

(g) Nature of a council

A council is not an instrumentality of the United States Government.

(1) A petition to terminate a council may be filed with the Secretary by no less than three sector participants in any one sector. Any petition filed under this subsection shall be accompanied by a written document explaining the reasons for such petition.

(2) If the Secretary determines that a petition filed under paragraph (1) of this subsection is accompanied by the signatures, or corporate certifications, as the case may be, of no less than three sector participants in a sector referred to in paragraph (1) of this subsection who collectively accounted for, in the twelve-month period immediately preceding the month in which such petition was filed, not less than 20 percent of the value of the fish or fish products described in accordance with section 4009(b)(3) of this title that were handled by that sector during such period, the Secretary, within 90 days after such determination, shall conduct a referendum for termination of the council among all sector participants in that sector.

(3) Not less than 30 days prior to holding a referendum under this subsection, the Secretary shall publish a notice of such referendum, including the document explaining the reasons for the petition filed under paragraph (1) of this subsection and any other relevant information the Secretary considers appropriate.

If the amount remaining in such account is insufficient for the Secretary to recover all expenses incurred for the conduct of the referendum, the Secretary shall recover the balance of such expenses from the petitioners that posted a bond under paragraph (5) of this subsection.

(b) Payment of remaining funds

If a council is terminated under subsection (a) of this section, the Secretary, after recovering

(C) If the Secretary believes that the administration and enforcement of the provisions of this chapter would be adequately served by taking administrative action under subsection (b) of this section or by providing written notice or warning to any person committing a violation of this chapter, the Secretary is not required to refer such violation to the Attorney General.

(D) Whenever a matter has been referred by a council under subparagraph (A) of this paragraph and the Secretary or the Attorney General fails within 60 days of such referral to take appropriate action, the council may, upon filing notice with the Secretary or Attorney General, as appropriate, and other interested parties, bring an action in its own name.

(b) Recovery of costs

(1)(A) When a council brings an action under subsection (a)(2) of this section, the council may recover costs of litigation and, where the action is brought to collect an unpaid assessment, interest from the date the amount became due and payable.

Each violation shall be a separate offense. In addition to, or in lieu of, a civil penalty under this subparagraph, the Secretary may issue an order requiring such person to cease and desist from continuing such violation.

(C) No penalty shall be assessed, or cease and desist order issued, under this paragraph unless the affected person is given notice and opportunity for a hearing before the Secretary with respect to such violation.

(D) Any order of the Secretary under this paragraph assessing a penalty or imposing a cease and desist order shall be final and conclusive, unless the affected person files an appeal from the Secretary's order with the appropriate United States court of appeals.

(2)(A) Any person against whom a violation is found under paragraph (1) of this subsection may obtain review of such action in the United States court of appeals for the circuit in which such person resides or has his place of business, or in the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days after the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary.

(B) The Secretary shall promptly file in the court a certified copy of the record upon which such violation was found.

(C) The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence or not in accordance with law.

(3)(A) If any person fails to pay a civil penalty under this subsection after it has become final, the Secretary shall refer the matter to the Attorney General.

(B) The Attorney General shall institute appropriate action to recover the amount assessed under this subsection in a district court of the United States.

(C) If, within sixty days after such referral, the Attorney General fails to institute such appropriate action, the council to whose programs the assessment, order or regulation relates may institute an action in its own name.

Section 301 of title III of Pub. L. 99-659 provided that: "This title [enacting this chapter and repealing chapter 10D (§779 et seq.) of this title] may be cited as the 'Interjurisdictional Fisheries Act of 1986'."

SECTION REFERRED TO IN OTHER SECTIONS

§ 4102. Definitions

For the purposes of this chapter:

(1) The term “Federal fishery management plan” means a plan developed under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.).

(2) The term “fishery resource” means finfish, mollusks, crustaceans, and any other form of marine animal or plant life, other than marine mammals and birds.

(3) The term “interjurisdictional fishery resource” means—

(A) a fishery resource for which a fishery occurs in waters under the jurisdiction of one or more States and the exclusive economic zone established by Proclamation Numbered 5030, dated March 10, 1983;

(B) a fishery resource for which there exists an interstate fishery management plan; or

For purposes of applying section 4104(a)(3) of this title during fiscal year 1987, a Federal fishery management plan or an interstate fishery management plan for the fishery resource need not be in existence, but a plan of either kind for that resource must be in the development process during that year.

(5) The term “interstate commission” means a commission or other administrative body established by an interstate compact.

(6) The term “interstate compact” means a compact that has been entered into by two or more States, established for the purposes of conserving and managing interjurisdictional fishery resources throughout their range, and consented to and approved by Congress.

(7) The term “project” means a program for research in support of the management of an interjurisdictional fishery resource or an interstate cooperative fishery management agreement.

(8) The term “Secretary” means the Secretary of Commerce.

(9) The term “State” means any of the several States of the United States, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, or the Northern Mariana Islands.

(10) The term “State agency” means any department, agency, commission, or official of a State authorized under the laws of the State to regulate commercial fisheries or enforce laws relating to commercial fisheries.

§ 4103. Apportionment

(a) Time when apportionments made

Funds appropriated under section 4107(a) of this title shall be apportioned by the Secretary among the States on October 1 of each fiscal year, or as soon thereafter as practicable.

(b) Apportionment formula

The amount of funds apportioned to each State shall be determined by the Secretary as the ratio which the equally weighted average of the volume and value of fishery resources harvested by domestic commercial fishermen and received within such State during the 3 most recent calendar years for which data satisfactory to the Secretary are available bears to the total equally weighted average of the volume and value of all fishery resources harvested by domestic commercial fishermen received within all of the States during those calendar years.

(c) Limitations

(1) No State may receive an apportionment under subsection (b) of this section for either fiscal year 1987 or fiscal year 1988 which is less than one-half of one percent of the total amount of funds available for that fiscal year.

(2) For any fiscal year after fiscal year 1988, no State that, under the apportionment formula in subsection (b) of this section, has a ratio of one-third of one percent or higher may receive an apportionment for any fiscal year which is less than one percent of the total amount of funds available for that fiscal year.

(3) For any fiscal year after fiscal year 1988, no State may receive an apportionment under this section for any fiscal year if that State’s ratio under the apportionment formula in subsection (b) of this section is less than one-third of one percent, unless the State—

(A) is signatory to an interstate fishery compact;

(B) has entered into an agreement with the Secretary or the Secretary of the Interior under which the personnel, services, and equipment of the State and the Federal agency concerned will be made mutually available for the enforcement of Federal and State laws pertaining to the protection of fishery resources which are managed under an interstate fishery management plan;

(C) borders one or more of the Great Lakes; or

(D) has entered into an interstate cooperative fishery management agreement and has in effect an interstate fisheries management or interstate fisheries research program.

(4) No State that, under the apportionment formula in subsection (b) of this section, has a

ratio of less than one-third of one percent and meets any of the requirements set forth in paragraph (1)(A), (B), (C), or (D) may receive an apportionment for any fiscal year which is less than one-half of one percent of the total amount of funds available for apportionment for such fiscal year.

(5) No State may receive an apportionment for any fiscal year under this section which is more than 6 percent of the total amount of funds available for apportionment for such fiscal year.

(d) Unused apportionments

Any part of an apportionment for any fiscal year to any State—

- (1) that is not obligated during that year;
- (2) with respect to which the State notifies the Secretary that it does not wish to receive that part; or
- (3) that is returned to the Secretary by the State,

may not be considered to be apportioned to that State and shall be added to such funds as are appropriated pursuant to section 4107(a) of this title for the next fiscal year (and shall be treated as having been appropriated for such next year) for apportionment under subsection (a) of this section. Any notification or return of funds referred to in paragraph (2) or (3) by a State is irrevocable.

§ 4104. State projects

(a) In general

(1) Any State may, through its State agency or an interstate commission, submit to the Secretary a proposal for a project which includes full plans, specifications, and cost estimates for such project. The total cost of all items included for engineering, planning, inspection, and unforeseen contingencies in connection with any works to be constructed as part of such a proposed project shall not exceed 10 percent of the total cost of such works, and shall be paid by the State as a part of its contribution to the total cost of the works.

(2) No part of any funds appropriated under any authorization contained in section 4107 of this title may be obligated with respect to any project until the proposal for such project has been submitted under paragraph (1) and approved by the Secretary. The Secretary, before approving any proposal for a project, must evaluate the proposal as to—

- (A) the soundness of design;
- (B) the possibilities of securing productive results;
- (C) the minimization of duplication with other research projects in support of the management of interjurisdictional fishery resources and carried out under this chapter or under any other law or regulation;
- (D) the organization and management of the project;

(E) the methods proposed for monitoring and evaluating the success or failure of the project;

(F) the consistency of the project with the purposes of this chapter specified in section 4101 of this title; and

(G) such other criteria as the Secretary may prescribe.

(3) The Federal share of the cost of any project conducted under this chapter shall not exceed 75 percent of the total estimated cost of the project, unless—

(A) the State has adopted an interstate fishery management plan for the resource to which the project applies; or

(B) the State has adopted fishery regulations which the Secretary has determined are consistent with any Federal fishery management plan for the species to which the project applies;

in which case the Federal share shall not exceed 90 percent of the total estimated cost of the project.

(4)(A) If the Secretary approves or disapproves a proposal for a project, the Secretary shall promptly give written notification, including, if disapproved, a detailed explanation of the reasons for the disapproval, to the State agency submitting the proposal or, if the proposal is submitted through an interstate commission, such commission and the State.

(B) For the purposes of this chapter, funds apportioned under this section to any State shall be treated as having been obligated with respect to a project during the fiscal year in which the written notification of approval required under subparagraph (A) for the project proposal is made.

(b) Restriction

The expenditure of funds under this chapter shall be applied only to projects for which a proposal has been approved under subsection (a) of this section, except that up to \$25,000 each fiscal year may be obligated for a State to carry out an agreement with the Secretary or the Secretary of the Interior under which the personnel, services and equipment of the State and the Federal agency concerned will be made mutually available for the enforcement of Federal and State laws pertaining to the protection of fishery resources. If otherwise applied, such funds shall be replaced by the State before the State may receive any additional funds under this chapter.

(c) Payment

When the Secretary determines that a project carried out under a proposal approved by the Secretary has been completed, or where the Secretary otherwise deems it appropriate, the Secretary shall cause to be paid to the proper authority of the State, or to the official or depository designated by the interstate commission if the State agency specifies that payment is to be made to the interstate commission, the Federal share of the project. Any payment made to an interstate commission shall be charged against the apportionment of the State concerned.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 4102, 4106 of this title.

§ 4105. Property**(a) Application of Federal and State laws**

All work, including the furnishing of labor and materials, needed to complete any project approved by the Secretary shall be performed in accordance with applicable Federal and State laws under the direct supervision of the State agency, and in accordance with regulations as the Secretary may prescribe.

(b) Title

Title to all property, real and personal, acquired for the purposes of completing any project approved by the Secretary vests in the State.

(c) Disposal

If a State disposes of any real or personal property acquired under this chapter, the State shall pay into the Treasury of the United States the amount of any proceeds resulting from the property disposed to the extent of and in the same ratio that funds provided under this chapter were used in the acquisition of the property. In no case shall the amount paid into the Treasury of the United States under this section exceed the amount of funds provided by this chapter for the acquisition of the property involved.

(Pub. L. 99-659, title III, §306, Nov. 14, 1986, 100 Stat. 3735.)

§ 4106. Reports to Congress

After consultation with the States receiving funds under this chapter and with any interstate commission involved in carrying out a project under this chapter, the Secretary shall submit to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than 90 days after the end of the fiscal year 1988, and each second fiscal year occurring after that fiscal year, a report which contains—

(1) a description of each project and law enforcement effort receiving funds under this chapter during the last 2 fiscal years ending before such report is submitted;

(2) a specification of the total amount of funds from the Federal Government and the total amount of funds from each State spent on each project and a law enforcement effort receiving funds under this chapter during the last 2 fiscal years ending before such report is submitted;

(3) an assessment of each project and law enforcement effort receiving funds under this chapter during the last 2 fiscal years ending before such report is submitted to determine whether such project is furthering the purposes of this chapter; and

(4) a statement specifying all funds which have been apportioned pursuant to section 4104(a) of this title and are available for obligation by a State or the Secretary but which have not been obligated.

(Pub. L. 99-659, title III, §307, Nov. 14, 1986, 100 Stat. 3735.)

ABOLITION OF HOUSE COMMITTEE ON MERCHANT MARINE AND FISHERIES

Committee on Merchant Marine and Fisheries of House of Representatives treated as referring to Committee on Resources of House of Representatives in case of provisions relating to fisheries, wildlife, international fishing agreements, marine affairs (including coastal zone management) except for measures relating to oil and other pollution of navigable waters, or oceanography by section 1(b)(3) of Pub. L. 104-14, set out as a note preceding section 21 of Title 2, The Congress.

§ 4107. Authorization of appropriations**(a) General appropriations**

There are authorized to be appropriated to the Department of Commerce for apportionment to carry out the purposes of this chapter—

- (1) \$3,400,000 for fiscal year 1996;
- (2) \$3,900,000 for fiscal year 1997;
- (3) \$4,400,000 for each of the fiscal years 1998, 1999, and 2000.

(1) in providing funds to States under this subsection, the Secretary shall give a preference to those States regarding which the Secretary determines there is a commercial fishery failure or serious disruption affecting future production due to a fishery resource disaster arising from natural or undetermined causes, and any sums made available under this subsection may be used either by the States or directly by the Secretary in cooperation with the States for any purpose that the Secretary determines is appropriate to restore the fishery affected by such a failure or to prevent a similar failure in the future;

(2) the funds authorized to be appropriated under this subsection shall not be available to the Secretary for use as grants for chartering fishing vessels; and

(3) the Federal share of the cost of any activity carried out with an amount appropriated under the authority of this subsection shall be 75 percent of the cost of that activity.

Amounts appropriated under this subsection shall remain available until expended.

(c) Development of management plans

In addition to the amounts authorized under subsections (a) and (b) of this section, there are authorized to be appropriated to the Department of Commerce \$700,000 for fiscal year 1997, and \$750,000 for each of the fiscal years 1998, 1999, and 2000, to support the efforts of the following interstate commissions to develop interstate fishery management plans for interjurisdictional fishery resources:

(1) The commission established by the Atlantic States Marine Fisheries Compact, as

consented to and approved by Public Law 77-539 (56 Stat. 267), approved May 4, 1942.

(1) In addition to the amounts authorized under subsections (a), (b), and (c) of this section, there are authorized to be appropriated to the Department of Commerce \$65,000,000 for fiscal year 1992 to enable the Secretary to help persons engaged in commercial fisheries, either by providing assistance directly to those persons or by providing assistance indirectly through States and local government agencies and nonprofit organizations, for projects or other measures to alleviate harm determined by the Secretary to have been incurred as a direct result of a fishery resource disaster arising from Hurricane Hugo, Hurricane Andrew, Hurricane Iniki, or any other natural disaster. Amounts appropriated under this subsection shall remain available until expended.

(2) The Secretary shall determine the extent, and the beginning and ending dates, of any fishery resource disaster under this subsection.

(3) Eligibility for direct assistance to a person under this subsection shall be limited to any person that has less than \$2,000,000 in net revenues annually from commercial fishing, as determined by the Secretary.

(4)(A) Assistance may not be provided under this subsection as part of a fishing capacity reduction program in a fishery unless the Secretary determines that adequate conservation and management measures are in place in that fishery.

(B) As a condition of awarding assistance with respect to a vessel under a fishing capacity reduction program, the Secretary shall—

(i) prohibit the vessel from being used for fishing; and

(ii) require that the vessel be—

(I) scrapped or otherwise disposed of in a manner approved by the Secretary; or

(II) donated to a nonprofit organization and thereafter used only for purposes of research, education, or training; or

(III) used for another non-fishing purpose provided the Secretary determines that adequate measures are in place to ensure that the vessel cannot reenter any fishery.

(C) A vessel that is prohibited from fishing under subparagraph (B) shall not be eligible for a fishery endorsement under section 12108(a) of title 46 and any such endorsement for the vessel shall not be effective.

(5) The Secretary shall establish, after notice and opportunity for public comment, appropriate limitations, terms, and conditions for receiving assistance under this subsection.

(6) As used in this subsection, the term “person” means any individual or any corporation, partnership, trust, association, or other non-governmental entity.

(7) With respect to funds available for the New England region, the Secretary shall submit to the Congress by January 1, 1997, with annual updates thereafter as appropriate, a report on the New England fishing capacity reduction initiative which provides—

(A) the total number of Northeast multispecies permits in each permit category and calculates the maximum potential fishing capacity of vessels holding such permits based on the principal gear, gross registered tonnage, engine horsepower, length, age, and other relevant characteristics;

(B) the total number of days at sea available to the permitted Northeast multispecies fishing fleet and the total days at sea weighted by the maximum potential fishing capacity of the fleet;

(C) an analysis of the extent to which the weighted days at sea are used by the active participants in the fishery and of the reduction in such days as a result of the fishing capacity reduction program; and

(D) an estimate of conservation benefits (such as reduction in fishing mortality) directly attributable to the fishing capacity reduction program.

The purpose of this chapter is to perpetuate healthy populations of African elephants.

(Pub. L. 100-478, title II, §2002, Oct. 7, 1988, 102 Stat. 2315.)

SHORT TITLE OF 1998 AMENDMENT

Pub. L. 105-217, §1, Aug. 5, 1998, 112 Stat. 911, provided that: “This Act [amending section 4245 of this title] may be cited as the ‘African Elephant Conservation Reauthorization Act of 1998.’”

SHORT TITLE

Section 2001 of title II of Pub. L. 100-478 provided that: “This title [enacting this chapter and amending section 1538 of this title] may be cited as the ‘African Elephant Conservation Act.’”

§ 4202. Findings

The Congress finds the following:

- (1) Elephant populations in Africa have declined at an alarming rate since the mid-1970’s.
- (2) The large illegal trade in African elephant ivory is the major cause of this decline and threatens the continued existence of the African elephant.
- (3) The African elephant is listed as threatened under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) and its continued existence will be further jeopardized if this decline is not reversed.
- (4) Because African elephant ivory is indistinguishable from Asian elephant ivory, there is a need to ensure that the trade in African elephant ivory does not further endanger the Asian elephant, which is listed as endangered under section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) and under Appendix I of CITES.
- (5) In response to the significant illegal trade in African elephant ivory, the parties to CITES established the CITES Ivory Control System to curtail the illegal trade and to encourage African countries to manage, conserve, and protect their African elephant populations.
- (6) The CITES Ivory Control System entered into force recently and should be allowed to

continue in force for a reasonable period of time to assess its effectiveness in curtailing the illegal trade in African elephant ivory.

(7) Although some African countries have effective African elephant conservation programs, many do not have sufficient resources to properly manage, conserve, and protect their elephant populations.

(8) The United States, as a party to CITES and a large market for worked ivory, shares responsibility for supporting and implementing measures to stop the illegal trade in African elephant ivory and to provide for the conservation of the African elephant.

(9) There is no evidence that sport hunting is part of the poaching that contributes to the illegal trade in African elephant ivory, and there is evidence that the proper utilization of well-managed elephant populations provides an important source of funding for African elephant conservation programs.

SUBCHAPTER II—MORATORIA AND PROHIBITED ACTS

§ 4221. Review of African elephant conservation programs

(a) In general

Within one month after October 7, 1988, the Secretary shall issue a call for information on the African elephant conservation program of each ivory producing country by—

(1) publishing a notice in the Federal Register requesting submission of such informa-

tion to the Secretary by all interested parties; and

(2) submitting a written request for such information through the Secretary of State to each ivory producing country.

(b) Review and determination

(1) In general

The Secretary shall review the African elephant conservation program of each ivory producing country and, not later than one year after October 7, 1988, shall issue and publish in the Federal Register a determination of whether or not the country meets the following criteria:

(A) The country is a party to CITES and adheres to the CITES Ivory Control System.

(B) The country's elephant conservation program is based on the best available information, and the country is making expeditious progress in compiling information on the elephant habitat condition and carrying capacity, total population and population trends, and the annual reproduction and mortality of the elephant populations within the country.

(C) The taking of elephants in the country is effectively controlled and monitored.

(D) The country's ivory quota is determined on the basis of information referred to in subparagraph (B) and reflects the amount of ivory which is confiscated or consumed domestically by the country.

(E) The country has not authorized or allowed the export of amounts of raw ivory which exceed its ivory quota under the CITES Ivory Control System.

(2) Delay in issuing determination

If the Secretary finds within one year after October 7, 1988, that there is insufficient information upon which to make the determination under paragraph (1), the Secretary may delay issuing the determination until no later than December 31, 1989. The Secretary shall issue and publish in the Federal Register at the time of the finding a statement explaining the reasons for any such delay.

(Pub. L. 100-478, title II, §2201, Oct. 7, 1988, 102 Stat. 2318.)

§ 4222. Moratoria

(a) Ivory producing countries

(1) In general

The Secretary shall establish a moratorium on the importation of raw and worked ivory from an ivory producing country immediately upon making a determination that the country does not meet all the criteria set forth in section 4221(b)(1) of this title.

(2) Later establishment

With regard to any ivory producing country for which the Secretary has insufficient information to make a determination pursuant to section 4221(b) of this title, the Secretary shall establish a moratorium on the importation of

raw and worked ivory from such country not later than January 1, 1990, unless, based on new information, the Secretary concludes before that date that the country meets all of the criteria set forth in section 4221(b)(1) of this title.

(b) Intermediary countries

The Secretary shall establish a moratorium on the importation of raw and worked ivory from an intermediary country immediately upon making a determination that the country—

- (1) is not a party to CITES;
- (2) does not adhere to the CITES Ivory Control System;
- (3) imports raw ivory from a country that is not an ivory producing country;
- (4) imports raw or worked ivory from a country that is not a party to CITES;
- (5) imports raw or worked ivory that originates in an ivory producing country in violation of the laws of that ivory producing country;
- (6) substantially increases its imports of raw or worked ivory from a country that is subject to a moratorium under this chapter during the first three months of that moratorium; or
- (7) imports raw or worked ivory from a country that is subject to a moratorium under this chapter after the first three months of that moratorium, unless the ivory is imported by vessel during the first six months of that moratorium and is accompanied by shipping documents which show that it was exported before the establishment of the moratorium.

(c) Suspension of moratorium

The Secretary shall suspend a moratorium established under this section if, after notice and public comment, the Secretary determines that the reasons for establishing the moratorium no longer exist.

(d) Petition

(1) In general

(e) Sport-hunted trophies

Individuals may import sport-hunted elephant trophies that they have legally taken in an ivory producing country that has submitted an ivory quota. The Secretary shall not establish any moratorium under this section, pursuant to a petition or otherwise, which prohibits the importation into the United States of sport-hunted trophies from elephants that are legally taken by the importer or the importer's principal in an

ivory producing country that has submitted an ivory quota.

(f) Confiscated ivory

Trade in raw or worked ivory that is confiscated by an ivory producing country or an intermediary country and is disposed of pursuant to the CITES Ivory Control System shall not be the sole cause for the establishment of a moratorium under this subchapter if all proceeds from the disposal of the confiscated ivory are used solely to enhance wildlife conservation programs or conservation purposes of CITES. With respect to any country that was not a party to CITES at the time of such confiscation, this subsection shall not apply until such country develops appropriate measures to assure that persons with a history of illegal dealings in ivory shall not benefit from the disposal of confiscated ivory.

§ 4261. Findings

The Congress finds the following:

(1) Asian elephant populations in nations within the range of Asian elephants have continued to decline to the point that the long-term survival of the species in the wild is in serious jeopardy.

(2) The Asian elephant is listed as an endangered species under section 1533 of this title and under appendix I of the Convention on International Trade of Endangered Species of Wild Fauna and Flora.

(3) Because the challenges facing the conservation of Asian elephants are so great, resources to date have not been sufficient to cope with the continued loss of habitat and the consequent diminution of Asian elephant populations.

(4) The Asian elephant is a flagship species for the conservation of tropical forest habitats in which it is found and provides the consequent benefit from such conservation to numerous other species of wildlife including many other endangered species.

(5) Among the threats to the Asian elephant in addition to habitat loss are population fragmentation, human-elephant conflict, poaching for ivory, meat, hide, bones and teeth, and capture for domestication.

(6) To reduce, remove, or otherwise effectively address these threats to the long-term viability of populations of Asian elephants in the wild will require the joint commitment and effort of nations within the range of Asian elephants, the United States and other countries, and the private sector.

(Pub. L. 105-96, § 2, Nov. 19, 1997, 111 Stat. 2150.)

The Secretary, subject to the availability of funds and in consultation with the Administrator, shall use amounts in the Fund to provide financial assistance for projects for the conservation of Asian elephants for which final project proposals are approved by the Secretary in accordance with this section.

(b) Project proposal

Any relevant wildlife management authority of a nation within the range of Asian elephants whose activities directly or indirectly affect Asian elephant populations, the CITES Secretariat, or any person with demonstrated expertise in the conservation of Asian elephants, may submit to the Secretary a project proposal

under this section. Each proposal shall include the following:

(1) The name of the individual responsible for conducting the project.

(2) A succinct statement of the purposes of the project.

(3) A description of the qualifications of the individuals who will conduct the project.

(5) promote cooperative projects on those topics with other foreign governments, affected local communities, nongovernmental organizations, or others in the private sector.

(e) Project sustainability

To the maximum extent practical, in determining whether to approve project proposals

under this section, the Secretary shall give consideration to projects which will enhance sustainable integrated conservation development programs to ensure effective, long-term conservation of Asian elephants.

(f) Project reporting

§ 4301. Findings, purposes, and policy

(a) Findings

The Congress finds and declares that—

- (1) significant caves on Federal lands are an invaluable and irreplaceable part of the Nation's natural heritage; and
- (2) in some instances, these significant caves are threatened due to improper use, increased recreational demand, urban spread, and a lack of specific statutory protection.

(b) Purposes

The purposes of this chapter are—

- (1) to secure, protect, and preserve significant caves on Federal lands for the perpetual use, enjoyment, and benefit of all people; and
- (2) to foster increased cooperation and exchange of information between governmental authorities and those who utilize caves located on Federal lands for scientific, education, or recreational purposes.

(c) Policy

It is the policy of the United States that Federal lands be managed in a manner which pro-

fects and maintains, to the extent practical, significant caves.

(1) identification of significant caves on Federal lands:

(A) The Secretary shall prepare an initial list of significant caves for lands under his jurisdiction not later than one year after the publication of final regulations using the significance criteria defined in such regulations. Such a list shall be developed after consultation with appropriate private sector interests, including cavers.

(B) The initial list of significant caves shall be updated periodically, after consultation with appropriate private sector interests, including cavers. The Secretary shall prescribe by policy or regulation the requirements and process by which the initial

list will be updated, including management measures to assure that caves under consideration for the list are protected during the period of consideration. (2) regulation or restriction of use of significant caves, as appropriate;

(3) entering into volunteer management agreements with persons of the scientific and recreational caving community; and

(4) appointment of appropriate advisory committees.

(c) Planning and public participation

The Secretary shall—

(1) ensure that significant caves are considered in the preparation or implementation of any land management plan if the preparation or revision of the plan began after November 18, 1988; and

Information concerning the specific location of any significant cave may not be made available to the public under section 552 of title 5 unless the Secretary determines that disclosure of such information would further the purposes of this chapter and would not create a substantial risk of harm, theft, or destruction of such cave.

(b) Exceptions

Notwithstanding subsection (a) of this section, the Secretary may make available information regarding significant caves upon the written request by Federal and State governmental agencies or bona fide educational and research institutions. Any such written request shall, at a minimum—

(1) describe the specific site or area for which information is sought;

(2) explain the purpose for which such information is sought; and

“(1) The World’s most exposed fossil reef, Capitan Reef, in southern New Mexico that includes Carlsbad Caverns, contains over 300 caves, including 75 identified caves in Carlsbad Caverns National Park and 22 caves in Guadalupe Mountains National Park.

“(2) Recent explorations of Lechuguilla Cave at Carlsbad Caverns National Park have provided much new information about the wonders of this cave including the fact that it is the second deepest cave in the United States and contains outstanding world-class cave features such as gypsum crystal chandeliers and gypsum flowers.

“(3) The Lechuguilla Cave has been described by cave researchers as possibly the finest cave in America.

“(4) The interest and excitement of cave researchers throughout the world have been focused on Carlsbad Caverns National Park.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 3741 of this title.

§ 4401. Findings and statement of purpose

(a) Findings

The Congress finds and declares that—

(1) the maintenance of healthy populations of migratory birds in North America is dependent on the protection, restoration, and management of wetland ecosystems and other habitats in Canada, as well as in the United States and Mexico;

(2) wetland ecosystems provide essential and significant habitat for fish, shellfish, and other wildlife of commercial, recreational, scientific, and aesthetic values;

(3) almost 35 per centum of all rare, threatened, and endangered species of animals are dependent on wetland ecosystems;

(4) wetland ecosystems provide substantial flood and storm control values and can obviate the need for expensive manmade control measures;

(5) wetland ecosystems make a significant contribution to water availability and quality, recharging ground water, filtering surface runoff, and providing waste treatment;

(6) wetland ecosystems provide aquatic areas important for recreational and aesthetic purposes;

(7) more than 50 per centum of the original wetlands in the United States alone have been lost;

(8) wetlands destruction, loss of nesting cover, and degradation of migration and wintering habitat have contributed to long-term downward trends in populations of migratory bird species such as pintails, American bitterns, and black ducks;

(9) the migratory bird treaty obligations of the United States with Canada, Mexico, and other countries require protection of wetlands that are used by migratory birds for breeding, wintering, or migration and are needed to achieve and to maintain optimum population levels, distributions, and patterns of migration;

(10) the 1988 amendments to the Fish and Wildlife Conservation Act of 1980 require the Secretary of the Interior to identify conservation measures to assure that nongame migratory bird species do not reach the point at which measures of the Endangered Species Act [16 U.S.C. 1531 et seq.] are necessary;

(11) protection of migratory birds and their habitats requires long-term planning and the close cooperation and coordination of management activities by Canada, Mexico, and the United States within the framework of the 1916 and 1936 Migratory Bird Conventions and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere;

(12) the North American Waterfowl Management Plan, signed in 1986 by the Minister of Environment for Canada and the Secretary of the Interior for the United States, provides a framework for maintaining and restoring an adequate habitat base to ensure perpetuation of populations of North American waterfowl and other migratory bird species;

(13) a tripartite agreement signed in March 1988, by the Director General for Ecological Conservation of Natural Resources of Mexico, the Director of the Canadian Wildlife Service, and the Director of the United States Fish and Wildlife Service, provides for expanded cooperative efforts in Mexico to conserve wetlands for migratory birds that spend the winter there;

(14) the long-term conservation of migratory birds and habitat for these species will require the coordinated action of governments, private organizations, landowners, and other citizens; and

(15) the treaty obligations of the United States under the Convention on Wetlands of International Importance especially as waterfowl habitat requires promotion of conservation and wise use of wetlands.

(b) Purpose

The purposes of this chapter are to encourage partnership among public agencies and other interests—

(1) to protect, enhance, restore, and manage an appropriate distribution and diversity of wetland ecosystems and other habitats for migratory birds and other fish and wildlife in North America;

(2) to maintain current or improved distributions of migratory bird populations; and

(3) to sustain an abundance of waterfowl and other migratory birds consistent with the goals of the North American Waterfowl Management Plan and the international obligations contained in the migratory bird treaties and conventions and other agreements with Canada, Mexico, and other countries.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 941c of this title.

SUBCHAPTER I—GENERAL PROVISIONS

§ 4701. Findings and purposes

(a) Findings

The Congress finds that—

(1) the discharge of untreated water in the ballast tanks of vessels and through other means results in unintentional introductions of nonindigenous species to fresh, brackish, and saltwater environments;

(2) when environmental conditions are favorable, nonindigenous species become established, may compete with or prey upon native species of plants, fish, and wildlife, may carry diseases or parasites that affect native species, and may disrupt the aquatic environment and economy of affected nearshore areas;

(3) the zebra mussel was unintentionally introduced into the Great Lakes and has infested—

(A) waters south of the Great Lakes, into a good portion of the Mississippi River drainage;

(B) waters west of the Great Lakes, into the Arkansas River in Oklahoma; and

(C) waters east of the Great Lakes, into the Hudson River and Lake Champlain;

(4) the potential economic disruption to communities affected by the zebra mussel due to its colonization of water pipes, boat hulls and other hard surfaces has been estimated at \$5,000,000,000 by the year 2000, and the potential disruption to the diversity and abundance of native fish and other species by the zebra mussel and ruffe, round goby, and other nonindigenous species could be severe;

(5) the zebra mussel was discovered on Lake Champlain during 1993 and the opportunity exists to act quickly to establish zebra mussel controls before Lake Champlain is further infested and management costs escalate;

(6) in 1992, the zebra mussel was discovered at the northernmost reaches of the Chesapeake Bay watershed;

(7) the zebra mussel poses an imminent risk of invasion in the main waters of the Chesapeake Bay;

(8) since the Chesapeake Bay is the largest recipient of foreign ballast water on the East Coast, there is a risk of further invasions of other nonindigenous species;

(9) the zebra mussel is only one example of thousands of nonindigenous species that have become established in waters of the United States and may be causing economic and ecological degradation with respect to the natural resources of waters of the United States;

(10) since their introduction in the early 1980's in ballast water discharges, ruffe—

(A) have caused severe declines in populations of other species of fish in Duluth Harbor (in Minnesota and Wisconsin);

(B) have spread to Lake Huron; and

(C) are likely to spread quickly to most other waters in North America if action is not taken promptly to control their spread;

(11) examples of nonindigenous species that, as of October 26, 1996, infest coastal waters of the United States and that have the potential for causing adverse economic and ecological effects include—

(A) the mitten crab (*Eriocheir sinensis*) that has become established on the Pacific Coast;

(B) the green crab (*Carcinus maenas*) that has become established in the coastal waters of the Atlantic Ocean;

(C) the brown mussel (*Perna perna*) that has become established along the Gulf of Mexico; and

(D) certain shellfish pathogens;

(12) many aquatic nuisance vegetation species, such as Eurasian watermilfoil, hydrilla, water hyacinth, and water chestnut, have been introduced to waters of the United States from other parts of the world causing or having a potential to cause adverse environmental, ecological, and economic effects;

(13) if preventive management measures are not taken nationwide to prevent and control unintentionally introduced nonindigenous aquatic species in a timely manner, further introductions and infestations of species that are as destructive as, or more destructive than, the zebra mussel or the ruffe infestations may occur;

(14) once introduced into waters of the United States, aquatic nuisance species are unintentionally transported and introduced into inland lakes and rivers by recreational boaters, commercial barge traffic, and a variety of other pathways; and

(15) resolving the problems associated with aquatic nuisance species will require the participation and cooperation of the Federal Government and State governments, and invest-

ment in the development of prevention technologies.

(b) Purposes

The purposes of this chapter are—

(1) to prevent unintentional introduction and dispersal of nonindigenous species into waters of the United States through ballast water management and other requirements;

(2) to coordinate federally conducted, funded or authorized research, prevention¹ control, information dissemination and other activities regarding the zebra mussel and other aquatic nuisance species;

(3) to develop and carry out environmentally sound control methods to prevent, monitor and control unintentional introductions of nonindigenous species from pathways other than ballast water exchange;

(4) to understand and minimize economic and ecological impacts of nonindigenous aquatic nuisance species that become established, including the zebra mussel; and

(5) to establish a program of research and technology development and assistance to States in the management and removal of zebra mussels.

§ 4722. Aquatic nuisance species program

(a) In general

The Task Force shall develop and implement a program for waters of the United States to prevent introduction and dispersal of aquatic nuisance species; to monitor, control and study such species; and to disseminate related information.

(b) Content

The program developed under subsection (a) of this section shall—

- (1) identify the goals, priorities, and approaches for aquatic nuisance species prevention, monitoring, control, education and research to be conducted or funded by the Federal Government;
- (2) describe the specific prevention, monitoring, control, education and research activities to be conducted by each Task Force member;
- (3) coordinate aquatic nuisance species programs and activities of Task Force members and affected State agencies;
- (4) describe the role of each Task Force member in implementing the elements of the program as set forth in this subchapter;
- (5) include recommendations for funding to implement elements of the program; and

(6) develop a demonstration program of prevention, monitoring, control, education and research for the zebra mussel, to be implemented in the Great Lakes and any other waters infested, or likely to become infested in the near future, by the zebra mussel.

(c) Prevention

(1) In general

The Task Force shall establish and implement measures, within the program developed under subsection (a) of this section, to minimize the risk of introduction of aquatic nuisance species to waters of the United States, including—

(A) identification of pathways by which aquatic organisms are introduced to waters of the United States;

(B) assessment of the risk that an aquatic organism carried by an identified pathway may become an aquatic nuisance species; and

(C) evaluation of whether measures to prevent introductions of aquatic nuisance species are effective and environmentally sound.

(2) Implementation

Whenever the Task Force determines that there is a substantial risk of unintentional introduction of an aquatic nuisance species by an identified pathway and that the adverse consequences of such an introduction are likely to be substantial, the Task Force shall, acting through the appropriate Federal agency, and after an opportunity for public comment, carry out cooperative, environmentally sound efforts with regional, State and local entities to minimize the risk of such an introduction.

(d) Monitoring

The Task Force shall establish and implement monitoring measures, within the program developed under subsection (a) of this section, to—

(1) detect unintentional introductions of aquatic nuisance species;

(2) determine the dispersal of aquatic nuisance species after introduction; and

(3) provide for the early detection and prevention of infestations of aquatic nuisance species in unaffected drainage basins.

(e) Control

(1) In general

The Task Force may develop cooperative efforts, within the program established under subsection (a) of this section, to control established aquatic nuisance species to minimize the risk of harm to the environment and the public health and welfare. For purposes of this chapter, control efforts include eradication of infestations, reductions of populations, development of means of adapting human activities and public facilities to accommodate infestations, and prevention of the spread of aquatic nuisance species from infested areas. Such control efforts shall be developed in consultation with affected Federal agencies, States, Indian Tribes, local governments, interjurisdictional organizations, and other appropriate entities. Control actions authorized by this section shall be based on the best available

scientific information and shall be conducted in an environmentally sound manner.

(2) Decisions

The Task Force or any other affected agency or entity may recommend that the Task Force initiate a control effort. In determining whether a control program is warranted, the Task Force shall evaluate the need for control (including the projected consequences of no control and less than full control); the technical and biological feasibility and cost-effectiveness of alternative control strategies and actions; whether the benefits of control, including costs avoided, exceed the costs of the program; the risk of harm to non-target organisms and ecosystems, public health and welfare; and such other considerations the Task Force determines appropriate. The Task Force shall also determine the nature and extent of control of target aquatic nuisance species that is feasible and desirable.

(3) Programs

If the Task Force determines in accordance with paragraph (2) that control of an aquatic nuisance species is warranted, the Task Force shall develop a proposed control program to achieve the target level of control. A notice summarizing the proposed action and soliciting comments shall be published in the Federal Register, in major newspapers in the region affected, and in principal trade publications of the industries affected. Within 180 days of proposing a control program, and after consultation with affected governmental and other appropriate entities and taking into consideration other comments received, the Task Force shall complete development of the proposed control program.

(f) Research

(1) Priorities

The Task Force shall, within the program developed under subsection (a) of this section, conduct research concerning—

(A) the environmental and economic risks and impacts associated with the introduction of aquatic nuisance species into the waters of the United States;

(B) the principal pathways by which aquatic nuisance species are introduced and dispersed;

(C) possible methods for the prevention, monitoring and control of aquatic nuisance species; and

(D) the assessment of the effectiveness of prevention, monitoring and control methods.

(2) Protocol

Within 90 days of November 29, 1990, the Task Force shall establish and follow a protocol to ensure that research activities carried out under this subchapter do not result in the introduction of aquatic nuisance species to waters of the United States.

(3) Grants for research

The Task Force shall allocate funds authorized under this chapter for competitive research grants to study all aspects of aquatic

nuisance species, which shall be administered through the National Sea Grant College Program and the Cooperative Fishery and Wildlife Research Units. Grants shall be conditioned to ensure that any recipient of funds follows the protocol established under paragraph (2) of this subsection.

(g) Technical assistance

The Task Force shall, within the program developed under subsection (a) of this section, provide technical assistance to State and local governments and persons to minimize the environmental, public health, and safety risks associated with aquatic nuisance species, including an early warning system for advance notice of possible infestations and appropriate responses.

(h) Education

The Task Force shall, with the program developed under subsection (a) of this section, establish and implement educational programs through Sea Grant Marine Advisory Services and any other available resources that it determines to be appropriate to inform the general public, State governments, governments of political subdivisions of States, and industrial and recreational users of aquatic resources in connection with matters concerning the identification of aquatic nuisance species, and control methods for such species, including the prevention of the further distribution of such species.

(i) Zebra mussel demonstration program

(1) Zebra mussel

(A) In general

The Task Force shall, within the program developed under subsection (a) of this section, undertake a program of prevention, monitoring, control, education and research for the zebra mussel to be implemented in the Great Lakes and any other waters of the United States infested or likely to become infested by the zebra mussel, including—

- (i) research and development concerning the species life history, environmental tolerances and impacts on fisheries and other ecosystem components, and the efficacy of control mechanisms and means of avoiding or minimizing impacts;
- (ii) tracking the dispersal of the species and establishment of an early warning system to alert likely areas of future infestations;
- (iii) development of control plans in coordination with regional, State and local entities; and
- (iv) provision of technical assistance to regional, State and local entities to carry out this section.

(B) Public facility research and development

The Assistant Secretary, in consultation with the Task Force, shall develop a program of research, technology development, and demonstration for the environmentally sound control of zebra mussels in and around public facilities. The Assistant Secretary shall collect and make available, through publications and other appropriate means, information pertaining to such control methods.

(C) Voluntary guidelines

Not later than 1 year after October 26, 1996, the Task Force shall develop and submit to the Secretary voluntary guidelines for controlling the spread of the zebra mussel and, if appropriate, other aquatic nuisance species through recreational activities, including boating and fishing. Not later than 4 months after the date of such submission, and after providing notice and an opportunity for public comment, the Secretary shall issue voluntary guidelines that are based on the guidelines developed by the Task Force under this subparagraph.

(2) Dispersal containment analysis

(A) Research

The Administrator of the Environmental Protection Agency, in cooperation with the National Science Foundation and the Task Force, shall provide research grants on a competitive basis for projects that—

- (i) identify environmentally sound methods for controlling the dispersal of aquatic nuisance species, such as the zebra mussel; and

- (i) which of the methods that are identified under the study conducted under this paragraph are most promising with respect to preventing and reducing the dispersal of aquatic nuisance species; and
- (ii) ways to incorporate those methods into ongoing operations of the United States Army Corps of Engineers that are conducted at the Chicago River Ship and Sanitary Canal.

(C) Authorization of appropriations

There are authorized to be appropriated to the Department of the Army, to carry out this paragraph, \$750,000.

(4) Contributions

§ 4801. Findings, purposes, and definitions

(a) Findings

Congress finds the following:

(1) Over 12,000 women die each year from ovarian cancer and 44,500 women die from breast cancer.

(2) Taxol, a drug made from the Pacific yew (*Taxus brevifolia*), has been successful in treating ovarian cancer in clinical trials and shows promise in the treatment of breast cancer and other types of cancer.

(3) The production of small amounts of taxol currently requires the use of large numbers of Pacific yew.

(4) The Pacific yew is a slow-growing tree species found in the Western United States.

(5) Significant numbers of Pacific yew trees are found in old-growth forests on Federal lands in the Pacific Northwest.

(6) Before the importance of taxol was discovered, the Pacific yew was considered a trash tree and was often burned in slash piles after timber operations.

(7) Remaining Pacific yew resources must be carefully managed in order to ensure a steady supply of taxol for the treatment of cancer, while also providing for the long-term conservation of the species.

(8) Appropriate management guidelines must be implemented promptly in order to prevent any wasting of the Pacific yew in current and future timber sales on Federal lands, while successful and affordable alternative methods of manufacturing taxol are being developed.

(b) Purposes

The purposes of this chapter are to contribute to the successful treatment of cancer by ensur-

ing that Pacific yew trees located on lands of the National Forest System and on public lands administered by the Bureau of Land Management are managed to—

(1) provide for the efficient collection and utilization of those parts of the Pacific yew that can be used in the manufacture of taxol for the treatment of cancer;

(2) provide for the sale of Pacific yew from such lands for the commercial production and subsequent sale of taxol at a reasonable cost to cancer patients;

(3) ensure the long-term conservation of the Pacific yew; and

(4) prevent the wasting of Pacific yew resources while successful and affordable alternative methods of manufacturing taxol are being developed.

(c) “Secretary concerned” defined

For purposes of this chapter, the term “Secretary concerned” means—

(1) the Secretary of Agriculture, with respect to lands and interests in lands under the jurisdiction of the Forest Service; and

(2) the Secretary of the Interior, with respect to lands and interests in lands under the jurisdiction of the Bureau of Land Management.

(Pub. L. 102-335, §2, Aug. 7, 1992, 106 Stat. 859.)

SHORT TITLE

Section 1(a) of Pub. L. 102-335 provided that: “This Act [enacting this chapter] may be cited as the ‘Pacific Yew Act.’”

§ 4802. Pacific yew conservation and management

(a) Pacific yew policy

The Secretary of Agriculture and the Secretary of the Interior shall pursue a conservation and management policy with respect to lands and interests in lands under the jurisdiction of the Forest Service or the Bureau of Land Management, which contain the Pacific yew in order to—

(1) provide for the sustainable harvest of Pacific yew, or Pacific yew parts, in accordance with relevant land and resource management plans for the manufacture of taxol; and

(2) provide for the long-term conservation of the Pacific yew in the wild.

(b) Content of policy

The conservation and management policy required by subsection (a) of this section shall ensure that—

(1) in planning harvests of the Pacific yew, priority be given first to areas in which timber has been cut but Pacific yew trees have not been removed, second to areas in which timber is already sold but remains uncut, third to areas scheduled for timber sale in the near future, and fourth to those other areas where commercial and salvage timber sales are allowed under existing laws;

(2) individual Pacific yew trees are utilized with little or no waste;

(3) to the extent that timber harvesters’ health and safety will not be jeopardized, the bark is harvested from Pacific yew trees in

timber sale areas before the harvest of other timber resources;

(4) whenever Pacific yew trees are harvested, they are—

(A) cut using methods designed to allow for resprouting from the stump; and

(B) replanted where necessary to maintain the species in the ecosystem; and

(5) timber management and harvest activities are carried out in a manner that will minimize any adverse effects on the survival and regeneration of Pacific yew trees.

(c) Application of policy to timber harvesting

(1) Application

The Secretary concerned shall ensure that timber sales awarded after August 7, 1992, and timber sales completed before August 7, 1992, but still unharvested on August 7, 1992, are conducted in accordance with—

(A) the policy expressed in subsection (a) of this section; and

(B) the relevant land and resource management plans of the Secretary concerned.

(2) Consultation under Endangered Species Act

If the Secretary concerned foresees the need to harvest Pacific yew in an area for which an opinion issued under subsection (b)(3)(A) of section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) has concluded that a commercial timber sale is likely to jeopardize the continued existence of an endangered or threatened species or destroy or adversely modify critical habitat identified for the species under that Act [16 U.S.C. 1531 et seq.], the Secretary concerned shall immediately initiate consultation under that section to determine the effect on endangered and threatened species and critical habitat of harvesting only Pacific yew trees.

(d) Inventory of Pacific yew

Not later than 6 months after August 7, 1992, each Secretary concerned shall complete the ongoing inventory of Pacific yew on lands under the jurisdiction of the Secretary concerned.

(Pub. L. 102-335, § 3, Aug. 7, 1992, 106 Stat. 860.)

REFERENCES IN TEXT

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 4805 of this title.

§ 4803. Research

Each Secretary concerned shall encourage and, where appropriate, assist in research regarding—

(1) the ecology of the Pacific yew;

(2) the development of alternative methods of procuring taxol, including utilization of other yew parts in addition to bark, the sustainable harvest of yew needles, and the utilization of other yew species; and

(3) the propagation of Pacific yew and other yew species in agricultural or commercial settings.

(Pub. L. 102-335, § 4, Aug. 7, 1992, 106 Stat. 861.)

§ 4804. Collection and sale of Pacific yew resources

(a) Enforcement and access

The Secretary concerned shall ensure the development, implementation, and enforcement of processes for the collection and sale of Pacific yew resources that will minimize the illegal harvest and sale of such resources. The Secretary shall also ensure that access to Pacific yew resources is allowed in a timely manner such that collection of Pacific yew parts can occur before the taxol properties of such parts are degraded.

(b) Negotiated sales

(1) Forest Service sales

Notwithstanding section 472a of this title, the Secretary of Agriculture may negotiate sales of Pacific yew on lands under the jurisdiction of the Forest Service at not less than appraised value, to parties manufacturing taxol in the United States in accordance with section 355 of title 21 for use in humans.

(2) Bureau of Land Management sales

Notwithstanding the Materials Act of 1947 (30 U.S.C. 601-604), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and Act of August 28, 1937 (43 U.S.C. 1181a-1181f), the Secretary of the Interior may negotiate sales of Pacific yew on lands under the jurisdiction of the Bureau of Land Management at not less than appraised value, to parties manufacturing taxol in the United States in accordance with section 355 of title 21 for use in humans.

(3) Disposition of unutilized material

The Secretary concerned shall, to the extent practicable, make material unutilized by purchasers of Pacific yew available to others.

(4) Limits on other sales

Except as provided in paragraphs (1), (2), and (3), the Secretary concerned shall not sell Pacific yew for commercial use.

(5) Use of receipts

The Secretary concerned may use amounts received from the sale of Pacific yew under this section to pay the costs incurred by the Secretary concerned associated with the harvest and sale of Pacific yew.

(c) Record keeping

The Secretary concerned shall keep accurate records of all sales, bark removal, or other harvest of the Pacific yew. The records shall include the following information:

(1) The date of sale (where applicable) and the date of harvest.

(2) The names of the persons performing the harvest.

(3) The record of authorization for the harvest.

(4) The location and size of the area in which the harvest occurred.

(5) The quantity of Pacific yew harvested, including, to the extent practicable, the number of trees harvested, volume of bark harvested, and weight of bark harvested.

(d) Effect on prior sales

With respect to Pacific yew harvested before August 7, 1992, on lands under the jurisdiction of the Forest Service or the Bureau of Land Management, the Secretary concerned may permit taxol derived from that Pacific yew to be used for purposes other than research if the Secretary of Health and Human Services certifies to the Secretary concerned that such permission—

- (1) will increase patient access to taxol treatment; and
- (2) will not result in insufficient supplies of taxol for clinical research.

§ 4901. Findings

The Congress finds the following:

(1) In addition to habitat loss and local use, the international pet trade in wild-caught exotic birds is contributing to the decline of species in the wild, and the mortality associated with the trade remains unacceptably high.

(2) The United States, as the world's largest importer of exotic birds and as a Party to the Convention, should play a substantial role in finding effective solutions to these problems, including assisting countries of origin in implementing programs of wild bird conservation, and ensuring that the market in the United States for exotic birds does not operate to the detriment of the survival of species in the wild.

(3) Sustainable utilization of exotic birds has the potential to create economic value in them and their habitats, which will contribute to their conservation and promote the maintenance of biological diversity generally.

(4) Utilization of exotic birds that is not sustainable should not be allowed.

(5) Broad international attention has focused on the serious conservation and welfare problems which currently exist in the trade in wild-caught animals, including exotic birds.

(6) Many countries have chosen not to export their wild birds for the pet trade. Their decisions should be respected and their efforts should be supported.

(7) Several countries that allow for the export of their wild birds often lack the means to develop or effectively implement scientifically based management plans, and these countries should be assisted in developing and implementing management plans to enable them to ensure that their wild bird trade is conducted humanely and at sustainable levels.

(8) The major exotic bird exporting countries are Parties to the Convention.

(9) The Convention recognizes that trade in species that are threatened with extinction, or that may become so, should be subject to strict regulation.

(10) The necessary population assessments, monitoring programs, and appropriate remedial measures for species listed in Appendix II of the Convention are not always being undertaken in order to maintain species at levels above which they might become eligible for inclusion in Appendix I of the Convention.

(11) Resolutions adopted pursuant to the Convention recommend that the Parties to the Convention take appropriate measures regard-

ing trade in species of exotic birds that have significantly high mortality rates in transport, including suspension of trade for commercial purposes between Parties when appropriate.

(12) Article XIV provides that the Convention in no way affects the right of any Party to the Convention to adopt stricter domestic measures for the regulation of trade in all species, whether or not listed in an Appendix to the Convention.

(13) The United States prohibits the export of all birds native to the United States that are caught in the wild.

(14) This chapter provides a series of non-discriminatory measures that are necessary for the conservation of exotic birds, and furthers the obligations of the United States under the Convention.

§ 4904. Moratoria on imports of exotic birds covered by Convention

(a) Immediate moratorium

(1) Establishment of moratorium

The importation of any exotic bird of a species identified as a category B species in the report entitled “Report of the Animals Committee”, adopted by the 8th meeting of the Conference of the Parties to the Convention, is prohibited.

(2) Termination of moratorium

A species of exotic birds shall be subject to the prohibition on importation established by paragraph (1) until the Secretary, after notice and an opportunity for public comment—

(A) determines that appropriate remedial measures have been taken in the countries of origin for that species, so as to eliminate the threat of trade to the conservation of the species; and

(B) makes the findings described in section 4905(c) of this title for the species and includes the species in the list published under section 4905(a) of this title.

(b) Emergency authority to suspend imports of listed species

(1) Authority to suspend imports

The Secretary is authorized to suspend the importation of exotic birds of any species that is listed in any Appendix to the Convention, and if applicable remove the species from the list under section 4905(a) of this title, if the Secretary determines that—

(A)(i) trade in that species is detrimental to the species,

(ii) there is not sufficient information available on which to base a judgment that the species is not detrimentally affected by trade in that species, or

(iii) remedial measures have been recommended by the Standing Committee of the Convention that have not been implemented; and

(B) the suspension might be necessary for the conservation of the species.

(2) Termination of suspension

A species of exotic birds shall be subject to a suspension of importation under paragraph (1) until the Secretary, after notice and an opportunity for public comment, makes the findings described in section 4905(c) of this title and includes the species in the list published under section 4905(a) of this title.

(c) Moratorium after one year for other species listed in appendices

Effective on the date that is one year after October 23, 1992, the importation of any exotic bird of a species that is listed in any Appendix to the Convention is prohibited unless the Secretary makes the findings described in section 4905(c) of this title and includes the species in the list published under section 4905(a) of this title.

(d) Limitation on number imported during first year

Notwithstanding any other provision of this chapter, the Secretary shall prohibit the importation, during the 1-year period beginning on October 23, 1992, of exotic birds of each species that is listed under any Appendix to the Convention in excess of the number of that species that were imported during the most recent year for which the Secretary has complete import data.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 4905, 4910 of this title.

§ 4905. List of approved species

(a) Listing

(1) In general

One year after October 23, 1992, and periodically thereafter, the Secretary shall, after notice and an opportunity for public comment,

publish in the Federal Register a list of species of exotic birds that are listed in an Appendix to the Convention and that are not subject to a prohibition or suspension of importation otherwise applicable under section 4904(a), (b), or (c) of this title.

(2) Manner of listing

The Secretary shall list a species under paragraph (1) with respect to—

(A) the countries of origin from which the species may be imported; and

(B) if appropriate, the qualifying facilities in those countries from which the species may be imported.

(3) Bases for determinations

In making a determination required under this subsection, the Secretary shall—

(A) use the best scientific information available; and

(B) consider the adequacy of regulatory and enforcement mechanisms in all countries of origin for the species, including such mechanisms for control of illegal trade.

(b) Captive bred species

The Secretary shall include a species of exotic birds in the list under subsection (a) of this section if the Secretary determines that—

(1) the species is regularly bred in captivity and no wild-caught birds of the species are in trade; or

(2) the species is bred in a qualifying facility.

(c) Non-captive bred species

The Secretary shall include in the list under subsection (a) of this section a species of exotic birds that is listed in an Appendix to the Convention if the Secretary finds the Convention is being effectively implemented with respect to that species because of each of the following:

(1) Each country of origin for which the species is listed is effectively implementing the Convention, particularly with respect to—

(A) the establishment of a scientific authority or other equivalent authority;

(B) the requirements of Article IV of the Convention with respect to that species; and

(C) remedial measures recommended by the Parties to the Convention with respect to that species.

(2) A scientifically-based management plan for the species has been developed which—

(A) provides for the conservation of the species and its habitat and includes incentives for conservation;

(B) ensures that the use of the species is biologically sustainable and maintained throughout the range of the species in the country to which the plan applies at a level that is consistent with the role of the species in the ecosystem and is well above the level at which the species might become threatened with extinction; and

(C) addresses factors relevant to the conservation of the species, including illegal trade, domestic trade, subsistence use, disease, and habitat loss.

(3) The management plan is implemented and enforced.

(4) The methods of capture, transport, and maintenance of the species minimizes the risk of injury or damage to health, including inhumane treatment.

(Pub. L. 102-440, title I, §106, Oct. 23, 1992, 106 Stat. 2227.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 4904, 4907, 4909, 4910 of this title.

§ 4906. Qualifying facilities

(a) Determination

Upon submission of a petition under section 4909 of this title by any person, the Secretary shall determine whether an exotic bird breeding facility is a qualifying facility. Such determination shall be effective for a period specified by the Secretary, which may not exceed 3 years. The Secretary shall, from time to time, publish a list of qualifying facilities in the Federal Register.

(b) Criteria

The Secretary shall determine under subsection (a) of this section that a facility is a qualifying facility for a species of exotic birds if the Secretary finds each of the following:

(1) The facility has demonstrated the capability of producing captive bred birds of the species in the numbers to be imported into the United States from that facility.

(2) The facility is operated in a manner that is not detrimental to the survival of the species in the wild.

(3) The facility is operated in a humane manner.

(4) The appropriate governmental authority of the country in which the facility is located has certified in writing, and the Secretary is satisfied, that the facility has the capability of breeding the species in captivity.

(5) The country in which the facility is located is a Party to the Convention.

(6) All birds exported from the facility are bred at the facility.

§ 4907. Moratoria for species not covered by Convention

(a) In general

The Secretary shall—

(1) review periodically the trade in species of exotic birds that are not listed in any Appendix to the Convention; and

(2) after notice and an opportunity for public comment, establish a moratorium or quota on—

(A) importation of any species of exotic birds from one or more countries of origin for the species, if the Secretary determines that—

(i) the findings described in section 4905(c)(2), (3), and (4) of this title cannot be made with respect to the species; and

(ii) the moratorium or quota is necessary for the conservation of the species or is otherwise consistent with the purpose of this chapter; or

(B) the importation of all species of exotic birds from a particular country, if—

(i) the country has not developed and implemented a management program for exotic birds in trade generally, that ensures both the conservation and the humane treatment of exotic birds during capture, transport, and maintenance; and

(ii) the Secretary finds that the moratorium or quota is necessary for the conservation of the species or is otherwise consistent with the purpose of this chapter.

(b) Termination of quota or moratorium

The Secretary shall terminate a quota or moratorium established under subsection (a) of this section if the Secretary finds that the reasons for establishing the quota or moratorium no longer exist.

(Pub. L. 102-440, title I, §108, Oct. 23, 1992, 106 Stat. 2229.)

§ 4908. Call for information

Within one month after October 23, 1992, the Secretary shall issue a call for information on the wild bird conservation program of each country that exports exotic birds, by—

(1) publishing a notice in the Federal Register requesting submission of such information to the Secretary by all interested persons; and

(2) submitting a written request for such information through the Secretary of State to each country that exports exotic birds.

(Pub. L. 102-440, title I, §109, Oct. 23, 1992, 106 Stat. 2229.)

Any person may at any time submit to the Secretary a petition in writing requesting that the Secretary exercise authority of the Secretary under this chapter to—

(1) establish, modify, or terminate any prohibition, suspension, or quota under this chapter on importation of any species of exotic bird;

(2) add a species of exotic bird to, or remove such a species from, a list under section 4905 of this title; or

(3) determine under section 4906 of this title whether an exotic bird breeding facility is a qualifying facility.

(b) Consideration and ruling

For each petition submitted to the Secretary in accordance with subsection (a) of this section, the Secretary shall—

(1) within 90 days after receiving the petition, issue and publish in the Federal Register a preliminary ruling regarding whether the pe-

tion presents sufficient information indicating that the action requested in the petition might be warranted; and

(2) for each petition determined to present such sufficient information—

(A) provide an opportunity for the submission of public comment on the petition; and

(B) issue and publish in the Federal Register a final ruling on the petition, by not later than 90 days after the end of the period for public comment.

(B) import an exotic bird of a species that pursuant to section 4905(a)(2)(B) of this title is included in a list under section 4905 of this title, if the bird was not captive bred at a qualifying facility; or

(C) violate any regulation promulgated by the Secretary pursuant to authority provided by this chapter.

(2) Limitation

Paragraph (1)(A) and (B) does not apply to importations made incident to the transit of exotic birds through the United States to foreign countries if the applicable requirements of the Convention have been satisfied with respect to the trade in those exotic birds.

(b) Burden of proof for exemptions

Any person claiming the benefit of any exemption or permit under this chapter shall have the burden of proving that the exemption or permit is applicable or has been granted, and was valid and in force at the time of the alleged violation.

(Pub. L. 102-440, title I, §111, Oct. 23, 1992, 106 Stat. 2230.)

SECTION REFERRED TO IN OTHER SECTIONS

§ 4911. Exemptions

Notwithstanding any prohibition, suspension, or quota under this chapter on the importation of a species of exotic bird, the Secretary may, through the issuance of import permits, authorize the importation of a bird of the species if the Secretary determines that such importation is not detrimental to the survival of the species and the bird is being imported exclusively for any of the following purposes:

(1) Scientific research.

(2) As a personally owned pet of an individual who is returning to the United States after being continuously out of the country for a

minimum of one year, except that an individual may not import more than 2 exotic birds under this paragraph in any year.

(3) Zoological breeding or display programs.

(1) Any person who is found by the Secretary of Commerce, after notice and opportunity for a

hearing in accordance with section 554 of title 5, to have committed an act prohibited by section 5009 of this title shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$100,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary of Commerce, or the Secretary's designee, by written notice. In determining the amount of such penalty, the Secretary of Commerce shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violation, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.

(2) Any person against whom a civil penalty is assessed under paragraph (1) may obtain review thereof in the appropriate court of the United States by filing a complaint in such court within thirty days from the date of such order and by simultaneously serving a copy of such complaint by certified mail on the Secretary of Commerce, the Attorney General, and the appropriate United States Attorney. The Secretary of Commerce shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, as provided in section 2112 of title 28. The findings and order of the Secretary of Commerce shall be set aside by such court if they are not found to be supported by substantial evidence, as provided in section 706(2) of title 5.

(3) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court has entered final judgment in favor of the Secretary of Commerce, the matter shall be referred to the Attorney General, who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(4) A fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used in the commission of an act prohibited by section 5009 of this title shall be liable in rem for any civil penalty assessed for such violation under paragraph (1) and may be proceeded against in any district court of the United States having jurisdiction thereof. Such penalty shall constitute a maritime lien on such vessel that may be recovered in an action in rem in the district court of the United States having jurisdiction over the vessel.

(5) The Secretary of Commerce may compromise, modify, or remit, with or without conditions, any civil penalty that is subject to imposition or that has been imposed under this section.

(6) For the purposes of conducting any hearing under this section, the Secretary of Commerce may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt or refusal to obey a subpoena

(c) Forfeiture

(1) Any fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used, and any fish (or a fair market value thereof) taken or retained, in any manner, in connection with or as a result of the commission of any act prohibited by section 5009 of this title shall be subject to forfeiture to the United States. All or part of such vessel may, and all such fish shall, be forfeited to the United States pursuant to a civil proceeding under this section.

(2) Any district court of the United States shall have jurisdiction, upon application of the Attorney General on behalf of the United States, to order any forfeiture authorized under paragraph (1) and any action provided for under paragraph (4).

(3) If a judgment is entered for the United States in a civil forfeiture proceeding under this section, the Attorney General may seize any property or other interest declared forfeited to the United States, which has not previously been seized pursuant to this chapter or for which security has not previously been obtained. The provisions of the customs laws relating to—

(A) the seizure, forfeiture, and condemnation of property for violation of the customs law;

(B) the disposition of such property or the proceeds from the sale thereof; and

(C) the remission or mitigation of any such forfeiture;

(4)(A) Any officer authorized to serve any process in rem that is issued by a court having jurisdiction under section 5008(b) of this title shall—

(i) stay the execution of such process; or

(ii) discharge any fish seized pursuant to such process;

upon receipt of a satisfactory bond or other security from any person claiming such property. Such bond or other security shall be conditioned upon such person delivering such property to the appropriate court upon order thereof, without any impairment of its value, or paying the monetary value of such property pursuant to an order of such court. Judgment shall be recoverable on such bond or other security against both the principal and any sureties in the event that any condition thereof is breached, as determined by such court.

(B) Any fish seized pursuant to this chapter may be sold, subject to the approval and direction of the appropriate court, for not less than the fair market value thereof. The proceeds of any such sale shall be deposited with such court pending the disposition of the matter involved.

(5) For purposes of this section, it shall be a rebuttable presumption that all fish found on board a fishing vessel and which is seized in connection with an act prohibited by section 5009 of this title were taken or retained in violation of the Convention and this chapter.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 1857 of this title.

§ 5101. Findings and purpose**(a) Findings**

The Congress finds the following:

- (1) Coastal fishery resources that migrate, or are widely distributed, across the jurisdic-

tional boundaries of two or more of the Atlantic States and of the Federal Government are of substantial commercial and recreational importance and economic benefit to the Atlantic coastal region and the Nation.

(2) Increased fishing pressure, environmental pollution, and the loss and alteration of habitat have reduced severely certain Atlantic coastal fishery resources.

(3) Because no single governmental entity has exclusive management authority for Atlantic coastal fishery resources, harvesting of such resources in¹ frequently subject to disparate, inconsistent, and intermittent State and Federal regulation that has been detrimental to the conservation and sustainable use of such resources and to the interests of fishermen and the Nation as a whole.

(4) The responsibility for managing Atlantic coastal fisheries rests with the States, which carry out a cooperative program of fishery oversight and management through the Atlantic States Marine Fisheries Commission. It is the responsibility of the Federal Government to support such cooperative interstate management of coastal fishery resources.

(5) The failure by one or more Atlantic States to fully implement a coastal fishery management plan can affect the status of Atlantic coastal fisheries, and can discourage other States from fully implementing coastal fishery management plans.

(6) It is in the national interest to provide for more effective Atlantic State fishery resource conservation and management.

(b) Purpose

The purpose of this chapter is to support and encourage the development, implementation, and enforcement of effective interstate conservation and management of Atlantic coastal fishery resources.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 5107b of this title.

§ 5104. State implementation of coastal fishery management plans

(a) Coastal fishery management plans

(1) The Commission shall prepare and adopt coastal fishery management plans to provide for the conservation of coastal fishery resources. In preparing a coastal fishery management plan for a fishery that is located in both State waters and the exclusive economic zone, the Commission shall consult with appropriate Councils to determine areas where such coastal fishery management plan may complement Council fishery management plans. The coastal fishery management plan shall specify the requirements necessary for States to be in compliance with the

plan. Upon adoption of a coastal fishery management plan, the Commission shall identify each State that is required to implement and enforce that plan.

(2) Within 1 year after December 20, 1993, the Commission shall establish standards and procedures to govern the preparation of coastal fishery management plans under this chapter, including standards and procedures to ensure that—

(A) such plans promote the conservation of fish stocks throughout their ranges and are based on the best scientific information available; and

(B) the Commission provides adequate opportunity for public participation in the plan preparation process, including at least four public hearings and procedures for the submission of written comments to the Commission.

(b) State implementation and enforcement

(1) Each State identified under subsection (a) of this section with respect to a coastal fishery management plan shall implement and enforce the measures of such plan within the timeframe established in the plan.

(2) Within 90 days after December 20, 1993, the Commission shall establish a schedule of timeframes within which States shall implement and enforce the measures of coastal fishery management plans in existence before December 20, 1993. No such timeframe shall exceed 12 months after the date on which the schedule is adopted.

(c) Commission monitoring of State implementation and enforcement

The Commission shall, at least annually, review each State's implementation and enforcement of coastal fishery management plans for the purpose of determining whether such State is effectively implementing and enforcing each such plan. Upon completion of such reviews, the Commission shall report the results of the reviews to the Secretaries.

§ 5105. State noncompliance with coastal fishery management plans

(a) Noncompliance determination

The Commission shall determine that a State is not in compliance with the provisions of a coastal fishery management plan if it finds that the State has not implemented and enforced such plan within the timeframes established under the plan or under section 5104 of this title.

(b) Notification

Upon making any determination under subsection (a) of this section, the Commission shall within 10 working days notify the Secretaries of such determination. Such notification shall include the reasons for making the determination and an explicit list of actions that the affected State must take to comply with the coastal fishery management plan. The Commission shall provide a copy of the notification to the affected State.

(c) Withdrawal of noncompliance determination

After making a determination under subsection (a) of this section, the Commission shall continue to monitor State implementation and enforcement. Upon finding that a State has complied with the actions required under subsection (b) of this section, the Commission shall immediately withdraw its determination of noncompliance. The Commission shall promptly notify the Secretaries of such withdrawal.

Within 30 days after receiving a notification from the Commission under section 5105(b) of this title and after review of the Commission's determination of noncompliance, the Secretary shall make a finding on—

- (1) whether the State in question has failed to carry out its responsibility under section 5104 of this title; and

(b) Consideration of comments

In making a finding under subsection (a) of this section, the Secretary shall—

(A) give careful consideration to the comments of the State that the Commission has determined under section 5105(a) of this title is not in compliance with a coastal fishery management plan, and provide such State, upon request, with the opportunity to meet with and present its comments directly to the Secretary; and

The Secretary shall specify the moratorium's effective date, which shall be any date within 6 months after declaration of the moratorium.

(2) If after a moratorium is declared under paragraph (1) the Secretary is notified by the Commission that the Commission is withdrawing under section 5105(c) of this title the determination of noncompliance, the Secretary shall immediately determine whether the State is in compliance with the applicable plan. If so, the moratorium shall be terminated.

(f) Civil and criminal penalties

(1) Any person who commits any act that is unlawful under subsection (e) of this section shall be liable to the United States for a civil penalty as provided by section 308 of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1858).

(2) Any person who commits an act prohibited by paragraph (5), (6), (7), or (9) of subsection (e) of this section is guilty of an offense punishable

as provided by section 309(a)(1) and (b) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1859(a)(1) and (b)).

(2) Any fish seized pursuant to this chapter may be disposed of pursuant to the order of a court of competent jurisdiction or, if perishable, in a manner prescribed in regulation.

(h) Enforcement

A person authorized by the Secretary or the Secretary of the department in which the Coast Guard is operating may take any action to enforce a moratorium declared under subsection (c) of this section that an officer authorized by the Secretary under section 311(b) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1861(b)) may take to enforce that Act [16 U.S.C. 1801 et seq.]. § 5301. Findings

The Congress finds the following:

(1) The world’s rhinoceros population is declining at an alarming rate, a 90 percent decline since 1970.

(2) All 5 subspecies of tiger are currently threatened with extinction in the wild, with approximately 5,000 to 6,000 tigers remaining worldwide.

(3) All rhinoceros species have been listed on Appendix I of CITES since 1977.

(4) All tiger subspecies have been listed on Appendix I of CITES since 1987.

(5) The tiger and all rhinoceros species, except the southern subspecies of white rhinoceros,

are listed as endangered species under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

(6) In 1987, the parties to CITES adopted a resolution that urged all parties to establish a moratorium on the sale and trade in rhinoceros products (other than legally taken trophies), to destroy government stockpiles of rhinoceros horn, and to exert pressure on countries continuing to allow trade in rhinoceros products.

(7) On September 7, 1993, under section 1978 of title 22 the Secretary certified that the People’s Republic of China and Taiwan were engaged in trade of rhinoceros parts and tiger parts that diminished the effectiveness of an international conservation program for that endangered species.

(8) On September 9, 1993, the Standing Committee of CITES, in debating the continuing problem of trade in rhinoceros horn and tiger parts, adopted a resolution urging parties to CITES to implement stricter domestic measures, up to and including an immediate prohibition in trade in wildlife species.

(9) On November 8, 1993, under section 1978 of title 22, the President announced that the United States would impose trade sanctions against China and Taiwan unless substantial progress was made by March 1994 towards ending trade in rhinoceros and tiger products.

(10) On April 11, 1994, under section 1978 of title 22, the President—

(A) directed that imports of wildlife specimens and products from Taiwan be prohibited, in response to Taiwan’s failure to undertake sufficient actions to stop illegal rhinoceros and tiger trade; and

(B) indicated that the certification of China would remain in effect and directed that additional monitoring of China’s progress be undertaken.

L. 105-312, title IV, § 401, Oct. 30, 1998, 112 Stat. 2959, provided that: “This title [enacting sections 5305a and 5305b of this title, amending sections 5302, 5303, and 5306 of this title, and enacting provisions set out as a note below] may be cited as the ‘Rhinoceros and Tiger Conservation Act of 1998’.”

SHORT TITLE

Section 1 of Pub. L. 103-391 provided that: “This Act [enacting this chapter] may be cited as the ‘Rhinoceros and Tiger Conservation Act of 1994’.”

CONGRESSIONAL FINDINGS

Pub. L. 105-312, title IV, § 402, Oct. 30, 1998, 112 Stat. 2959, provided that: “Congress finds that—

“(1) the populations of all but 1 species of rhinoceros, and the tiger, have significantly declined in recent years and continue to decline;

“(2) these species of rhinoceros and tiger are listed as endangered species under the Endangered Species

Act of 1973 (16 U.S.C. 1531 et seq.) and listed on Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora, signed on March 3, 1973 (27 UST 1087; TIAS 8249) (referred to in this title as 'CITES');

“(3) the Parties to CITES have adopted several resolutions—

“(A) relating to the conservation of tigers (Conf. 9.13 (Rev.)) and rhinoceroses (Conf. 9.14), urging Parties to CITES to implement legislation to reduce illegal trade in parts and products of the species; and

“(B) relating to trade in readily recognizable parts and products of the species (Conf. 9.6), and trade in traditional medicines (Conf. 10.19), recommending that Parties ensure that their legislation controls trade in those parts and derivatives, and in medicines purporting to contain them;

“(4) a primary cause of the decline in the populations of tiger and most rhinoceros species is the poaching of the species for use of their parts and products in traditional medicines;

“(5) there are insufficient legal mechanisms enabling the United States Fish and Wildlife Service to interdict products that are labeled or advertised as containing substances derived from rhinoceros or tiger species and prosecute the merchandisers for sale or display of those products; and

“(6) legislation is required to ensure that—

“(A) products containing, or labeled or advertised as containing, rhinoceros parts or tiger parts are prohibited from importation into, or exportation from, the United States; and

“(B) efforts are made to educate persons regarding alternatives for traditional medicine products, the illegality of products containing, or labeled or advertised as containing, rhinoceros parts and tiger parts, and the need to conserve rhinoceros and tiger species generally.”

§ 5302. Purposes

The purposes of this chapter are the following:

(1) To assist in the conservation of rhinoceros and tigers by supporting the conservation programs of nations whose activities directly or indirectly affect rhinoceros and tiger populations, and the CITES Secretariat.

(2) To provide financial resources for those programs.

(3) To prohibit the sale, importation, and exportation of products intended for human consumption or application containing, or labeled or advertised as containing, any substance derived from any species of rhinoceros or tiger.

- (1) The United States is a nation with a rich maritime history, and it is desirable to foster in the American public a greater awareness and appreciation of the role of maritime endeavors in our Nation’s history and culture.
- (2) The maritime historical and cultural foundations of the Nation should be preserved as a part of our community life and development.
- (3) National, State, and local groups have been working independently to preserve the maritime heritage of the United States.
- (4) Historic resources significant to the Nation’s maritime heritage are being lost or substantially altered, often inadvertently, with increasing frequency.
- (5) The preservation of this irreplaceable maritime heritage is in the public interest so that its vital legacy of cultural, educational, aesthetic, inspirational, and economic benefits will be maintained and enriched for future generations of Americans.
- (6) The current governmental and non-governmental historic preservation programs

and activities are inadequate to ensure future generations a genuine opportunity to appreciate and enjoy the rich maritime heritage of our Nation.

(7) A coordinated national program is needed immediately to redress the adverse consequences of a period of indifference during which the maritime heritage of the United States has become endangered and to ensure the future preservation of the Nation's maritime heritage.

(8) A national maritime heritage policy would greatly increase public awareness of, and participation in, the preservation of the Nation's maritime heritage.

(Pub. L. 103-451, § 2, Nov. 2, 1994, 108 Stat. 4769.)

No high seas fishing vessel shall engage in harvesting operations on the high seas unless the vessel has on board a valid permit issued under this section.

(b) Eligibility

(1) Any vessel of the United States is eligible to receive a permit under this section, unless the vessel was previously authorized to be used for fishing on the high seas by a foreign nation, and

(A) the foreign nation suspended such authorization because the vessel undermined the effectiveness of international conservation and management measures, and the suspension has not expired; or

(2) The restriction in paragraph (1) does not apply if ownership of the vessel has changed since the vessel undermined the effectiveness of international conservation and management measures, and the new owner has provided sufficient evidence to the Secretary demonstrating that the previous owner or operator has no further legal, beneficial or financial interest in, or control of, the vessel.

(3) The restriction in paragraph (1) does not apply if the Secretary makes a determination that issuing a permit would not subvert the purposes of the Agreement.

(4) The Secretary may not issue a permit to a vessel unless the Secretary is satisfied that the United States will be able to exercise effectively its responsibilities under the Agreement with respect to that vessel.

(c) Application

(1) The owner or operator of a high seas fishing vessel may apply for a permit under this section by completing an application form prescribed by the Secretary.

(2) The application form shall contain—

The permitting fee may be in addition to any fee required under any regional permitting regime applicable to high seas fishing vessels.

(2) The fees authorized by paragraph (1) shall be collected and credited to the Operations, Research and Facilities account of the National Oceanic and Atmospheric Administration. Fees collected under this subsection shall be available for the necessary expenses of the National Oceanic and Atmospheric Administration in implementing this chapter, and shall remain available until expended.

(f) Duration

A permit issued under this section is valid for 5 years. A permit issued under this section is void in the event the vessel is no longer eligible for United States documentation, such documentation is revoked or denied, or the vessel is deleted from such documentation.

This section is referred to in sections 5506, 5507, 5508, 5509 of this title.

§ 5506. Enforcement provisions

(a) Duties of Secretaries

This chapter shall be enforced by the Secretary of Commerce and the Secretary of the department in which the Coast Guard is operating. Such Secretaries may by agreement utilize, on a reimbursable basis or otherwise, the personnel, services, equipment (including aircraft and vessels), and facilities of any other Federal agency, or of any State agency, in the performance of such duties. Such Secretaries shall, and the head of any Federal or State agency that has entered into an agreement with either such Secretary under this section may (if the agreement so provides), authorize officers to enforce the provisions of this chapter or any regulation or permit issued under this chapter.

(b) District court jurisdiction

The district courts of the United States shall have exclusive jurisdiction over any case or controversy arising under the provisions of this chapter. In the case of Guam, and any Commonwealth, territory, or possession of the United States in the Pacific Ocean, the appropriate court is the United States District Court for the District of Guam, except that in the case of American Samoa, the appropriate court is the United States District Court for the District of Hawaii.

(c) Powers of enforcement officers

(1) Any officer who is authorized under subsection (a) of this section to enforce the provisions of this chapter may—

(A) with or without a warrant or other process—

(i) arrest any person, if the officer has reasonable cause to believe that such person has committed an act prohibited by paragraph (6), (7), (8), or (9) of section 5505 of this title;

(ii) board, and search or inspect, any high seas fishing vessel;

(iii) seize any high seas fishing vessel (together with its fishing gear, furniture, appurtenances, stores, and cargo) used or employed in, or with respect to which it reasonably appears that such vessel was used or employed in, the violation of any provision of this chapter or any regulation or permit issued under this chapter;

(iv) seize any living marine resource (wherever found) taken or retained, in any manner, in connection with or as a result of the commission of any act prohibited by section 5505 of this title;

(v) seize any other evidence related to any violation of any provision of this chapter or any regulation or permit issued under this chapter;

(B) execute any warrant or other process issued by any court of competent jurisdiction; and

(C) exercise any other lawful authority.

(2) Subject to the direction of the Secretary, a person charged with law enforcement responsibilities by the Secretary who is performing a duty related to enforcement of a law regarding fisheries or other marine resources may make an arrest without a warrant for an offense against the United States committed in his presence, or for a felony cognizable under the laws of the United States, if he has reasonable grounds to believe that the person to be arrested has committed or is committing a felony.

(d) Issuance of citations

If any authorized officer finds that a high seas fishing vessel is operating or has been operated in violation of any provision of this chapter, such officer may issue a citation to the owner or operator of such vessel in lieu of proceeding under subsection (c) of this section. If a permit has been issued pursuant to this chapter for such vessel, such officer shall note the issuance of any citation under this subsection, including the date thereof and the reason therefor, on the permit. The Secretary shall maintain a record of all citations issued pursuant to this subsection.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 5509 of this title.

§ 5507. Civil penalties and permit sanctions

(a) Civil penalties

(1) Any person who is found by the Secretary, after notice and opportunity for a hearing in accordance with section 554 of title 5, to have committed an act prohibited by section 5505 of this title shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$100,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary by writ-

ten notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violation, the degree of culpability, any history of prior offenses, and such other matters as justice may require.

(2) The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty that is subject to imposition or that has been imposed under this section.

(b) Permit sanctions

(1) In any case in which—

(A) a vessel of the United States has been used in the commission of an act prohibited under section 5505 of this title;

(B) the owner or operator of a vessel or any other person who has been issued or has applied for a permit under section 5503 of this title has acted in violation of section 5505 of this title; or

(C) any amount in settlement of a civil forfeiture imposed on a high seas fishing vessel or other property, or any civil penalty or criminal fine imposed on a high seas fishing vessel or on an owner or operator of such a vessel or on any other person who has been issued or has applied for a permit under any fishery resource statute enforced by the Secretary, has not been paid and is overdue, the Secretary may—

(i) revoke any permit issued to or applied for by such vessel or person under this chapter, with or without prejudice to the issuance of subsequent permits;

(ii) suspend such permit for a period of time considered by the Secretary to be appropriate;

(iii) deny such permit; or

(iv) impose additional conditions and restrictions on such permit.

(2) In imposing a sanction under this subsection, the Secretary shall take into account—

(A) the nature, circumstances, extent, and gravity of the prohibited acts for which the sanction is imposed; and

(B) with respect to the violator, the degree of culpability, any history of prior offenses, and such other matters as justice may require.

(3) Transfer of ownership of a high seas fishing vessel, by sale or otherwise, shall not extinguish any permit sanction that is in effect or is pending at the time of transfer of ownership. Before executing the transfer of ownership of a vessel, by sale or otherwise, the owner shall disclose in writing to the prospective transferee the existence of any permit sanction that will be in effect or pending with respect to the vessel at the time of the transfer. The Secretary may waive or compromise a sanction in the case of a transfer pursuant to court order.

(4) In the case of any permit that is suspended under this subsection for nonpayment of a civil penalty or criminal fine, the Secretary shall reinstate the permit upon payment of the penalty or fine and interest thereon at the prevailing rate.

(5) No sanctions shall be imposed under this subsection unless there has been prior oppor-

tunity for a hearing on the facts underlying the violation for which the sanction is imposed, either in conjunction with a civil penalty proceeding under this section or otherwise.

(c) Hearing

For the purposes of conducting any hearing under this section, the Secretary may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt or refusal to obey a subpoena served upon any person pursuant to this subsection, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(d) Judicial review

Any person against whom a civil penalty is assessed under subsection (a) of this section or against whose vessel a permit sanction is imposed under subsection (b) of this section (other than a permit suspension for nonpayment of penalty or fine) may obtain review thereof in the United States district court for the appropriate district by filing a complaint against the Secretary in such court within 30 days from the date of such penalty or sanction. The Secretary shall promptly file in such court a certified copy of the record upon which such penalty or sanction was imposed, as provided in section 2112 of title 28. The findings and order of the Secretary shall be set aside by such court if they are not found to be supported by substantial evidence, as provided in section 706(2) of title 5.

(e) Collection

(1) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court has entered final judgment in favor of the Secretary, the matter shall be referred to the Attorney General, who shall recover the amount assessed in any appropriate district court of the United States. In such action the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(2) A high seas fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used in the commission of an act prohibited by section 5505 of this title shall be liable in rem for any civil penalty assessed for such violation under subsection (a) of this section and may be proceeded against in any district court of the United States having jurisdiction thereof. Such penalty shall constitute a maritime lien on such vessel that may be recovered in an action in rem in the district court of the United States having jurisdiction over the vessel.

(Pub. L. 104-43, title I, § 108, Nov. 3, 1995, 109 Stat. 373.)

§ 5508. Criminal offenses

(a) Offenses

A person is guilty of an offense if the person commits any act prohibited by paragraph (6), (7), (8), or (9) of section 5505 of this title.

(b) Punishment

Any offense described in subsection (a) of this section is a class A misdemeanor punishable by a fine under title 18, or imprisonment for not more than one year, or both; except that if in the commission of any offense the person uses a dangerous weapon, engages in conduct that causes bodily injury to any authorized officer, or places any such officer in fear of imminent bodily injury, the offense is a felony punishable by a fine under title 18, or imprisonment for not more than 10 years, or both.

(Pub. L. 104-43, title I, § 109, Nov. 3, 1995, 109 Stat. 375.)

§ 5509. Forfeitures

(a) In general

Any high seas fishing vessel (including its fishing gear, furniture, appurtenances, stores, and cargo) used, and any living marine resources (or the fair market value thereof) taken or retained, in any manner, in connection with or as a result of the commission of any act prohibited by section 5505 of this title (other than an act for which the issuance of a citation under section 5506 of this title is a sufficient sanction) shall be subject to forfeiture to the United States. All or part of such vessel may, and all such living marine resources (or the fair market value thereof) shall, be forfeited to the United States pursuant to a civil proceeding under this section.

(b) Jurisdiction of district courts

Any district court of the United States shall have jurisdiction, upon application of the Attorney General on behalf of the United States, to order any forfeiture authorized under subsection (a) of this section and any action provided for under subsection (d) of this section.

(c) Judgment

If a judgment is entered for the United States in a civil forfeiture proceeding under this section, the Attorney General may seize any property or other interest declared forfeited to the United States, which has not previously been seized pursuant to this chapter or for which security has not previously been obtained. The provisions of the customs laws relating to—

- (1) the seizure, forfeiture, and condemnation of property for violation of the customs law;
- (2) the disposition of such property or the proceeds from the sale thereof; and
- (3) the remission or mitigation of any such forfeiture;

shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this chapter, unless such provisions are inconsistent with the purposes, policy, and provisions of this chapter.

(d) Procedure

(1) Any officer authorized to serve any process in rem that is issued by a court under section 5506(b) of this title shall—

- (A) stay the execution of such process; or
- (B) discharge any living marine resources seized pursuant to such process;

upon receipt of a satisfactory bond or other security from any person claiming such property. Such bond or other security shall be conditioned upon such person delivering such property to the appropriate court upon order thereof, without any impairment of its value, or paying the monetary value of such property pursuant to an order of such court. Judgment shall be recoverable on such bond or other security against both the principal and any sureties in the event that any condition thereof is breached, as determined by such court.

(2) Any living marine resources seized pursuant to this chapter may be sold, subject to the approval of the appropriate court, for not less than the fair market value thereof. The proceeds of any such sale shall be deposited with such court pending the disposition of the matter involved.

(e) Rebuttable presumption

For purposes of this section, all living marine resources found on board a high seas fishing vessel and which are seized in connection with an act prohibited by section 5505 of this title are presumed to have been taken or retained in violation of this chapter, but the presumption can be rebutted by an appropriate showing of evidence to the contrary.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 5952 of this title.

§ 5952. Award of concessions contracts

In furtherance of the findings and policy stated in section 5951 of this title, and except as provided by this subchapter or otherwise authorized by law, the Secretary shall utilize concessions contracts to authorize a person, corporation, or other entity to provide accommodations, facilities, and services to visitors to units of the National Park System. Such concessions contracts shall be awarded as follows:

(1) Competitive selection process

Except as otherwise provided in this section, all proposed concessions contracts shall be awarded by the Secretary to the person, corporation, or other entity submitting the best proposal, as determined by the Secretary through a competitive selection process. Such competitive process shall include simplified procedures for small, individually-owned, concessions contracts.

(2) Solicitation of proposals

Except as otherwise provided in this section, prior to awarding a new concessions contract (including renewals or extensions of existing concessions contracts) the Secretary shall

publicly solicit proposals for the concessions contract and, in connection with such solicitation, the Secretary shall prepare a prospectus and shall publish notice of its availability at least once in local or national newspapers or trade publications, and/or the Commerce Business Daily, as appropriate, and shall make the prospectus available upon request to all interested parties.

(3) Prospectus

The prospectus shall include the following information:

(A) The minimum requirements for such contract as set forth in paragraph (4).

(B) The terms and conditions of any existing concessions contract relating to the services and facilities to be provided, including all fees and other forms of compensation provided to the United States by the concessioner.

(C) Other authorized facilities or services which may be provided in a proposal.

(D) Facilities and services to be provided by the Secretary to the concessioner, if any, including public access, utilities, and buildings.

(E) An estimate of the amount of compensation, if any, due an existing concessioner from a new concessioner under the terms of a prior concessions contract.

(F) A statement as to the weight to be given to each selection factor identified in the prospectus and the relative importance of such factors in the selection process.

(G) Such other information related to the proposed concessions operation as is provided to the Secretary pursuant to a concessions contract or is otherwise available to the Secretary, as the Secretary determines is necessary to allow for the submission of competitive proposals.

(H) Where applicable, a description of a preferential right to the renewal of the proposed concessions contract held by an existing concessioner as set forth in paragraph (7).

(4) Minimum requirements

(A) No proposal shall be considered which fails to meet the minimum requirements as determined by the Secretary. Such minimum requirements shall include the following:

(i) The minimum acceptable franchise fee or other forms of consideration to the Government.

(ii) Any facilities, services, or capital investment required to be provided by the concessioner.

(iii) Measures necessary to ensure the protection, conservation, and preservation of resources of the unit of the National Park System.

(B) The Secretary shall reject any proposal, regardless of the franchise fee offered, if the Secretary determines that the person, corporation, or entity is not qualified, is not likely to provide satisfactory service, or that the proposal is not responsive to the objectives of protecting and preserving resources of the unit of the National Park System and of pro-

viding necessary and appropriate facilities and services to the public at reasonable rates.

(C) If all proposals submitted to the Secretary either fail to meet the minimum requirements or are rejected by the Secretary, the Secretary shall establish new minimum contract requirements and re-initiate the competitive selection process pursuant to this section.

(D) The Secretary may not execute a concessions contract which materially amends or does not incorporate the proposed terms and conditions of the concessions contract as set forth in the applicable prospectus. If proposed material amendments or changes are considered appropriate by the Secretary, the Secretary shall resolicit offers for the concessions contract incorporating such material amendments or changes.

(5) Selection of the best proposal

(A) In selecting the best proposal, the Secretary shall consider the following principal factors:

(i) The responsiveness of the proposal to the objectives of protecting, conserving, and preserving resources of the unit of the National Park System and of providing necessary and appropriate facilities and services to the public at reasonable rates.

(ii) The experience and related background of the person, corporation, or entity submitting the proposal, including the past performance and expertise of such person, corporation or entity in providing the same or similar facilities or services.

(iii) The financial capability of the person, corporation, or entity submitting the proposal.

(iv) The proposed franchise fee, except that consideration of revenue to the United States shall be subordinate to the objectives of protecting, conserving, and preserving resources of the unit of the National Park System and of providing necessary and appropriate facilities to the public at reasonable rates.

(B) The Secretary may also consider such secondary factors as the Secretary deems appropriate.

(C) In developing regulations to implement this subchapter, the Secretary shall consider the extent to which plans for employment of Indians (including Native Alaskans) and involvement of businesses owned by Indians, Indian tribes, or Native Alaskans in the operation of a concession, contracts should be identified as a factor in the selection of a best proposal under this section.

(6) Congressional notification

The Secretary shall submit any proposed concessions contract with anticipated annual gross receipts in excess of \$5,000,000 or a duration of more than 10 years to the Committee on Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate. The Secretary shall not award any such proposed contract until at least 60 days subsequent to the notification of both committees.

(7) Preferential right of renewal

(A) Except as provided in subparagraph (B), the Secretary shall not grant a concessioner a preferential right to renew a concessions contract, or any other form of preference to a concessions contract.

(B) The Secretary shall grant a preferential right of renewal to an existing concessioner with respect to proposed renewals of the categories of concessions contracts described by paragraph (8), subject to the requirements of that paragraph.

(C) As used in this subchapter, the term “preferential right of renewal” means that the Secretary, subject to a determination by the Secretary that the facilities or services authorized by a prior contract continue to be necessary and appropriate within the meaning of section 5951 of this title, shall allow a concessioner qualifying for a preferential right of renewal the opportunity to match the terms and conditions of any competing proposal which the Secretary determines to be the best proposal for a proposed new concessions contract which authorizes the continuation of the facilities and services provided by the concessioner under its prior contract.

(D) A concessioner which successfully exercises a preferential right of renewal in accordance with the requirements of this subchapter shall be entitled to award of the proposed new concessions contract to which such preference applies.

(8) Outfitter and guide services and small contracts

(A) The provisions of paragraph (7) shall apply only to the following:

- (i) Subject to subparagraph (B), outfitting and guide concessions contracts.
- (ii) Subject to subparagraph (C), concessions contracts with anticipated annual gross receipts under \$500,000.

(B) For the purposes of this subchapter, an “outfitting and guide concessions contract” means a concessions contract which solely authorizes the provision of specialized backcountry outdoor recreation guide services which require the employment of specially trained and experienced guides to accompany park visitors in the backcountry so as to provide a safe and enjoyable experience for visitors who otherwise may not have the skills and equipment to engage in such activity. Outfitting and guide concessioners, where otherwise qualified, include concessioners which provide guided river running, hunting, fishing, horseback, camping, and mountaineering experiences. An outfitting and guide concessioner is entitled to a preferential right of renewal under this subchapter only if—

- (i) the contract with the outfitting and guide concessioner does not grant the concessioner any interest, including any leasehold surrender interest or possessory interest, in capital improvements on lands owned by the United States within a unit of the National Park System, other than a capital improvement constructed by a concessioner pursuant to the terms of a concessions contract prior to November 13, 1998, or con-

structed or owned by a concessioner or his or her predecessor before the subject land was incorporated into the National Park System;

(ii) the Secretary determines that the concessioner has operated satisfactorily during the term of the contract (including any extension thereof); and

(iii) the concessioner has submitted a responsive proposal for a proposed new contract which satisfies the minimum requirements established by the Secretary pursuant to paragraph (4).

(C) A concessioner that holds a concessions contract that the Secretary estimates will result in gross annual receipts of less than \$500,000 if renewed shall be entitled to a preferential right of renewal under this subchapter if—

(i) the Secretary has determined that the concessioner has operated satisfactorily during the term of the contract (including any extension thereof); and

(ii) the concessioner has submitted a responsive proposal for a proposed new concessions contract which satisfies the minimum requirements established by the Secretary pursuant to paragraph (4).

(9) New or additional services

The Secretary shall not grant a preferential right to a concessioner to provide new or additional services in a unit of the National Park System.

(10) Secretarial authority

Nothing in this subchapter shall be construed as limiting the authority of the Secretary to determine whether to issue a concessions contract or to establish its terms and conditions in furtherance of the policies expressed in this subchapter.

(11) Exceptions

Notwithstanding the provisions of this section, the Secretary may award, without public solicitation, the following:

(A) A temporary concessions contract or an extension of an existing concessions contract for a term not to exceed 3 years in order to avoid interruption of services to the public at a unit of the National Park System, except that prior to making such an award, the Secretary shall take all reasonable and appropriate steps to consider alternatives to avoid such interruption.

(B) A concessions contract in extraordinary circumstances where compelling and equitable considerations require the award of a concessions contract to a particular party in the public interest. Such award of a concessions contract shall not be made by the Secretary until at least 30 days after publication in the Federal Register of notice of the Secretary’s intention to do so and the reasons for such action, and submission of notice to the Committee on Energy and Natural Resources of the Senate and the Committee on Resources of the House of Representatives.

This subchapter, referred to in text, was in the original “this title”, meaning title IV of Pub. L. 105-391, Nov. 13, 1998, 112 Stat. 3503, which is classified principally to this subchapter. For complete classification of title IV to the Code, see Short Title note set out under section 5901 of this title and Tables.

§ 5953. Term of concessions contracts

A concessions contract entered into pursuant to this subchapter shall generally be awarded for a term of 10 years or less. However, the Secretary may award a contract for a term of up to 20 years if the Secretary determines that the contract terms and conditions, including the required construction of capital improvements, warrant a longer term.

(Pub. L. 105-391, title IV, § 404, Nov. 13, 1998, 112 Stat. 3508.)

§ 5954. Protection of concessioner investment**(a) Leasehold surrender interest under new concessions contracts**

On or after November 13, 1998, a concessioner that constructs a capital improvement upon land owned by the United States within a unit of the National Park System pursuant to a concessions contract shall have a leasehold surrender interest in such capital improvement subject to the following terms and conditions:

(1) A concessioner shall have a leasehold surrender interest in each capital improvement constructed by a concessioner under a concessions contract, consisting solely of a right to compensation for the capital improvement to the extent of the value of the concessioner's leasehold surrender interest in the capital improvement.

(2) A leasehold surrender interest—

(A) may be pledged as security for financing of a capital improvement or the acquisition of a concessions contract when approved by the Secretary pursuant to this subchapter;

(B) shall be transferred by the concessioner in connection with any transfer of the concessions contract and may be relinquished or waived by the concessioner; and

(C) shall not be extinguished by the expiration or other termination of a concessions contract and may not be taken for public use except on payment of just compensation.

(3) The value of a leasehold surrender interest in a capital improvement shall be an amount equal to the initial value (construction cost of the capital improvement), increased (or decreased) in the same percentage increase (or decrease) as the percentage increase (or decrease) in the Consumer Price Index, from the date of making the investment in the capital improvement by the concessioner to the date of payment of the value of the leasehold surrender interest, less depreciation of the capital improvement as evidenced by the condition and prospective serviceability in comparison with a new unit of like kind.

(4) Effective 9 years after November 13, 1998, the Secretary may provide, in any particular

new concession contract the Secretary estimates will have a leasehold surrender interest of more than \$10,000,000, that the value of any leasehold surrender interest in a capital improvement shall be based on either (A) a reduction on an annual basis, in equal portions, over the same number of years as the time period associated with the straight line depreciation of the initial value (construction cost of the capital improvement), as provided by applicable Federal income tax laws and regulations in effect on the day before November 13, 1998, or (B) such alternative formula that is consistent with the objectives of this subchapter. The Secretary may only use such an alternative formula if the Secretary determines, after scrutiny of the financial and other circumstances involved in this particular concession contract (including providing notice in the Federal Register and opportunity for comment), that such alternative formula is, compared to the standard method of determining value provided for in paragraph (3), necessary in order to provide a fair return to the Government and to foster competition for the new contract by providing a reasonable opportunity to make a profit under the new contract. If no responsive offers are received in response to a solicitation that includes such an alternative formula, the concession opportunity shall be resolicited with the leasehold surrender interest value as described in paragraph (3).

(5) Where a concessioner, pursuant to the terms of a concessions contract, makes a capital improvement to an existing capital improvement in which the concessioner has a leasehold surrender interest, the cost of such additional capital improvement shall be added to the then current value of the concessioner's leasehold surrender interest.

(b) Special rule for existing possessory interest

(1) A concessioner which has obtained a possessory interest as defined pursuant to Public Law 89-249 (commonly known as the National Park Service Concessions Policy Act; 16 U.S.C. 20 et seq.), as in effect on the day before November 13, 1998, under the terms of a concessions contract entered into before November 13, 1998, shall, upon the expiration or termination of such contract, be entitled to receive compensation for such possessory interest improvements in the amount and manner as described by such concessions contract. Where such a possessory interest is not described in the existing contract, compensation of possessory interest shall be determined in accordance with the laws in effect on the day before November 13, 1998.

(2) In the event such prior concessioner is awarded a new concessions contract after the effective date of this subchapter replacing an existing concessions contract, the existing concessioner shall, instead of directly receiving such possessory interest compensation, have a leasehold surrender interest in its existing possessory interest improvements under the terms of the new contract and shall carry over as the initial value of such leasehold surrender interest (instead of construction cost) an amount equal to the value of the existing possessory interest as

of the termination date of the previous contract. In the event of a dispute between the concessioner and the Secretary as to the value of such possessory interest, the matter shall be resolved through binding arbitration.

(3) In the event that a new concessioner is awarded a concessions contract and is required to pay a prior concessioner for possessory interest in prior improvements, the new concessioner shall have a leasehold surrender interest in such prior improvements and the initial value in such leasehold surrender interest (instead of construction cost), shall be an amount equal to the value of the existing possessory interest as of the termination date of the previous contract.

(c) Transition to successor concessioner

Upon expiration or termination of a concessions contract entered into after the effective date of this subchapter, a concessioner shall be entitled under the terms of the concessions contract to receive from the United States or a successor concessioner the value of any leasehold surrender interest in a capital improvement as of the date of such expiration or termination. A successor concessioner shall have a leasehold surrender interest in such capital improvement under the terms of a new contract and the initial value of the leasehold surrender interest in such capital improvement (instead of construction cost) shall be the amount of money the new concessioner is required to pay the prior concessioner for its leasehold surrender interest under the terms of the prior concessions contract.

(d) Title to improvements

Title to any capital improvement constructed by a concessioner on lands owned by the United States in a unit of the National Park System shall be vested in the United States.

(e) Definitions

For purposes of this section:

(1) Consumer Price Index

The term “Consumer Price Index” means the “Consumer Price Index—All Urban Consumers” published by the Bureau of Labor Statistics of the Department of Labor, unless such index is not published, in which case another regularly published cost-of-living index approximating the Consumer Price Index shall be utilized by the Secretary; and

(2) Capital improvement

The term “capital improvement” means a structure, fixture, or nonremovable equipment provided by a concessioner pursuant to the terms of a concessions contract and located on lands of the United States within a unit of the National Park System.

(f) Special reporting requirement

Not later than 7 years after November 13, 1998, the Secretary shall submit a report to the Committee on Energy and Natural Resources of the Senate and the Committee on Resources of the House of Representatives containing a complete analysis of the concession program as well as—

(1) an assessment of competition in the solicitation of prospectuses, fair and/or increased return to the Government, and improvement of concession facilities and infrastructure; and

(2) an assessment of any problems with the management and administration of the concession program that are a direct result of the implementation of the provisions of this subchapter.

§ 5955. Reasonableness of rates

(a) In general

Each concessions contract shall permit the concessioner to set reasonable and appropriate rates and charges for facilities, goods, and services provided to the public, subject to approval under subsection (b) of this section.

(b) Approval by Secretary required

A concessioner’s rates and charges to the public shall be subject to approval by the Secretary. The approval process utilized by the Secretary shall be as prompt and as unburdensome to the concessioner as possible and shall rely on market forces to establish reasonableness of rates and charges to the maximum extent practicable. The Secretary shall approve rates and charges that the Secretary determines to be reasonable and appropriate. Unless otherwise provided in the contract, the reasonableness and appropriateness of rates and charges shall be determined primarily by comparison with those rates and charges for facilities, goods, and services of comparable character under similar conditions, with due consideration to the following factors and other factors deemed relevant by the Secretary: length of season, peakloads, average percentage of occupancy, accessibility, availability and costs of labor and materials, and type of patronage. Such rates and charges may not exceed the market rates and charges for comparable facilities, goods, and services, after taking into account the factors referred to in the preceding sentence.

(c) Implementation of recommendations

Not later than 6 months after receiving recommendations from the Advisory Board established under section 5958(a) of this title regarding concessioner rates and charges to the public, the Secretary shall implement the recommendations or report to the Congress the reasons for not implementing the recommendations.

(Pub. L. 105–391, title IV, §406, Nov. 13, 1998, 112 Stat. 3510.)

§ 5956. Franchise fees

(a) In general

A concessions contract shall provide for payment to the government of a franchise fee or

such other monetary consideration as determined by the Secretary, upon consideration of the probable value to the concessioner of the privileges granted by the particular contract involved. Such probable value shall be based upon a reasonable opportunity for net profit in relation to capital invested and the obligations of the contract. Consideration of revenue to the United States shall be subordinate to the objectives of protecting and preserving park areas and of providing necessary and appropriate services for visitors at reasonable rates.

(b) Amount of franchise fee

The amount of the franchise fee or other monetary consideration paid to the United States for the term of the concessions contract shall be specified in the concessions contract and may only be modified to reflect extraordinary unanticipated changes from the conditions anticipated as of the effective date of the contract. The Secretary shall include in concessions contracts with a term of more than 5 years a provision which allows reconsideration of the franchise fee at the request of the Secretary or the concessioner in the event of such extraordinary unanticipated changes. Such provision shall provide for binding arbitration in the event that the Secretary and the concessioner are unable to agree upon an adjustment to the franchise fee in these circumstances.

(c) Special account

All franchise fees (and other monetary consideration) paid to the United States pursuant to concessions contracts shall be deposited into a special account established in the Treasury of the United States. Twenty percent of the funds deposited in the special account shall be available for expenditure by the Secretary, without further appropriation, to support activities throughout the National Park System regardless of the unit of the National Park System in which the funds were collected. The funds deposited into the special account shall remain available until expended.

(d) Subaccount for each unit

There shall be established within the special account required under subsection (c) of this section a subaccount for each unit of the National Park System. Each subaccount shall be credited with 80 percent of the franchise fees (and other monetary consideration) collected at a single unit of the National Park System under concessions contracts. The funds credited to the subaccount for a unit of the National Park System shall be available for expenditure by the Secretary, without further appropriation, for use at the unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The funds credited to a subaccount shall remain available until expended.

(Pub. L. 105-391, title IV, §407, Nov. 13, 1998, 112 Stat. 3511.)

§ 5957. Transfer of concessions contracts

(a) Approval of Secretary

No concessions contract or leasehold surrender interest may be transferred, assigned, sold,

or otherwise conveyed or pledged by a concessioner without prior written notification to, and approval by, the Secretary.

(b) Conditions

The Secretary shall approve a transfer or conveyance described in subsection (a) of this section unless the Secretary finds that—

(1) the individual, corporation or entity seeking to acquire a concessions contract is not qualified or able to satisfy the terms and conditions of the concessions contract;

(2) such transfer or conveyance would have an adverse impact on (A) the protection, conservation, or preservation of the resources of the unit of the National Park System or (B) the provision of necessary and appropriate facilities and services to visitors at reasonable rates and charges; and

(3) the terms of such transfer or conveyance are likely, directly or indirectly, to reduce the concessioner's opportunity for a reasonable profit over the remaining term of the contract, adversely affect the quality of facilities and services provided by the concessioner, or result in a need for increased rates and charges to the public to maintain the quality of such facilities and services.

(c) Transfer terms

The terms and conditions of any contract under this section shall not be subject to modification or open to renegotiation by the Secretary because of a transfer or conveyance described in subsection (a) of this section, unless such transfer or conveyance would have an adverse impact as described in paragraph (2) of subsection (b) of this section.

(e) Service on Advisory Board

Service of an individual as a member of the Advisory Board shall not be considered as service or employment bringing such individual within the provisions of any Federal law relating to conflicts of interest or otherwise impos-

ing restrictions, requirements, or penalties in relation to the employment of persons, the performance of services, or the payment or receipt of compensation in connection with claims, proceedings, or matters involving the United States. § 5966. Commercial use authorizations

(a) In general

To the extent specified in this section, the Secretary, upon request, may authorize a private person, corporation, or other entity to provide services to visitors to units of the National Park System through a commercial use authorization. Such authorizations shall not be considered as concessions contracts pursuant to this subchapter nor shall other sections of this subchapter be applicable to such authorizations except where expressly so stated.

(b) Criteria for issuance of authorizations

(1) Required determinations

The authority of this section may be used only to authorize provision of services that the Secretary determines will have minimal impact on resources and values of the unit of the National Park System and are consistent with the purpose for which the unit was estab-

lished and with all applicable management plans and park policies and regulations.

(2) Elements of authorization

The Secretary shall—

(A) require payment of a reasonable fee for issuance of an authorization under this section, such fees to remain available without further appropriation to be used, at a minimum, to recover associated management and administrative costs;

(B) require that the provision of services under such an authorization be accomplished in a manner consistent to the highest practicable degree with the preservation and conservation of park resources and values;

(C) take appropriate steps to limit the liability of the United States arising from the provision of services under such an authorization; and

(D) have no authority under this section to issue more authorizations than are consistent with the preservation and proper management of park resources and values, and shall establish such other conditions for issuance of such an authorization as the Secretary determines appropriate for the protection of visitors, provision of adequate and appropriate visitor services, and protection and proper management of the resources and values of the park.

(c) Limitations

Any authorization issued under this section shall be limited to—

(1) commercial operations with annual gross receipts of not more than \$25,000 resulting from services originating and provided solely within a unit of the National Park System pursuant to such authorization;

(2) the incidental use of resources of the unit by commercial operations which provide services originating and terminating outside of the boundaries of the unit; or

SUBCHAPTER IV—FEES FOR USE OF
NATIONAL PARK SYSTEM

§ 5981. Fees

Notwithstanding any other provision of law, where the National Park Service or an entity under a service contract with the National Park Service provides transportation to all or a portion of any unit of the National Park System, the Secretary may impose a reasonable and appropriate charge to the public for the use of such transportation services in addition to any admission fee required to be paid. Collection of both the transportation and admission fees may occur at the transportation staging area or any other reasonably convenient location determined by the Secretary. The Secretary may enter into agreements with public or private entities, who qualify to the Secretary's satisfaction, to collect the transportation and admission fee. Such transportation fees collected as per this section shall be retained by the unit of the National Park System at which the transportation fee was collected and the amount retained shall be expended only for costs associated with the transportation systems at the unit where the charge was imposed.

§ 5982. Distribution of Golden Eagle Passport sales

Not later than 6 months after November 13, 1998, the Secretary of the Interior and the Secretary of Agriculture shall enter into an agreement providing for an apportionment among each agency of all proceeds derived from the sale of Golden Eagle Passports by private vendors. Such proceeds shall be apportioned to each agency on the basis of the ratio of each agency's total revenue from admission fees collected during the previous fiscal year to the sum of all revenue from admission fees collected during the previous fiscal year for all agencies participating in the Golden Eagle Passport Program.
