It is hereby declared that the prompt and early completion of The Dwight D. Eisenhower System of Interstate and Defense Highways, so named because of its primary importance to the national defense and hereafter referred to as the “Interstate System”, is essential to the national interest and is one of the most important objectives of this Act. It is the intent of Congress that the Interstate System be completed as nearly as practicable over the period of availability of the forty years’ appropriations authorized for the purpose of expediting its construction, reconstruction, or improvement, inclusive of necessary tunnels and bridges, through the fiscal year ending September 30, 1996, under section 108(b) of the Federal-Aid Highway Act of 1956 (70 Stat. 374), and that the entire system in all States be brought to simultaneous completion. Insofar as possible in consonance with this objective, existing highways located on an interstate route shall be used to the extent that such use is practicable, suitable, and feasible, it being the intent that local needs, to the extent practicable, suitable, and feasible, shall be given equal consideration with the needs of interstate commerce.

It is further declared that since the Interstate System is now in the final phase of completion it shall be the national policy that increased emphasis be placed on the construction and reconstruction of the other Federal-aid systems in accordance with the first paragraph of this subsection, in order to bring all of the Federal-aid systems up to standards and to increase the safety of these systems to the maximum extent.

(c) It is the sense of Congress that under existing law no part of any sums authorized to be appropriated for expenditure upon any Federal-aid

system which has been apportioned pursuant to the provisions of this title shall be impounded or withheld from obligation, for purposes and projects as provided in this title, by any officer or employee in the executive branch of the Federal Government, except such specific sums as may be determined by the Secretary of the Treasury, after consultation with the Secretary of Transportation, are necessary to be withheld from obligation for specific periods of time to assure that sufficient amounts will be available in the Highway Trust Fund to defray the expenditures which will be required to be made from such fund.

(d) No funds authorized to be appropriated from the Highway Trust Fund shall be expended by or on behalf of any Federal department, agency, or instrumentality other than the Federal Highway Administration unless funds for such expenditure are identified and included as a line item in an appropriation Act and are to meet obligations of the United States heretofore or hereafter incurred under this title attributable to the construction of Federal-aid highways or highway planning, research, or development, or as otherwise specifically authorized to be appropriated from the Highway Trust Fund by Federal-aid highway legislation.

(e) It is the national policy that to the maximum extent possible the procedures to be utilized by the Secretary and all other affected heads of Federal departments, agencies, and instrumentalities for carrying out this title and any other provision of law relating to the Federal highway programs shall encourage the substantial minimization of paperwork and inter-agency decision procedures and the best use of available manpower and funds so as to prevent needless duplication and unnecessary delays at all levels of government.

The obligation of funds authorized by this subsection shall be further limited to the actual costs of only those design concepts, locations, geometrics, and other construction features included in the 1981 interstate cost estimate, except in any case where the Secretary of Transportation determines that a provision of Federal law requires a different design, location, geometric, or other construction feature of a type authorized by this subsection. Notwithstanding any other provision of law, including any other provision of this subsection, where a project is to be constructed (1) to provide parking garage ramps in conjunction with high occupancy vehicle lanes which flow into a distributor system emptying directly into ramps for off-street parking with preferential parking for carpools, vanpools, and buses and the ramps are part of an environmental mitigation effort and are designed to feed into an aerial walkway system, or (2) to provide a parking lot near the terminus of an Interstate System spur route which radiates from an Interstate System beltway which will be used as an intermodal transfer facility for a light rail transit project to be constructed in the median of the spur route and the parking lot is part of an environmental mitigation effort, or (3) to provide a parking garage and associated facilities as part of an intermodal transfer facility with a transit system near or within an Interstate System route right-of-way which will have direct and indirect access to the facility by way of local streets and the parking garage and associated facilities are part of an environmental mitigation effort, or (4) to provide for the comprehensive upgrading of existing high occupancy vehicle lanes, new ramps and parking facilities at mass

transit intermodal transfer points on an existing Interstate System route which has temporary high occupancy vehicle lanes in the median and the parking facilities and ramps are part of an environmental mitigation effort, the costs of such parking garage ramps, parking lots, parking garages, associated interchange ramps, high occupancy vehicle lanes, and other associated work eligible under title 23, United States Code, shall be eligible for funds authorized by this subsection as if the costs for these projects were included in the 1981 interstate cost estimate and shall be included as eligible projects in any future interstate cost estimate. For purposes of this subsection, construction necessary to provide a minimum level of acceptable service on the Interstate System shall include, but not be limited to, any construction on the Interstate System which is required under a court order issued before the date of enactment of this sentence. Notwithstanding the fifth sentence of this subsection, the costs of a project which will upgrade an interstate route and will complete a gap on the Interstate System providing access to an international airport and which was described as the preferred alternative in a final environmental impact statement submitted to the Secretary of Transportation on September 30, 1983, shall be eligible for funds authorized by this subsection as if such costs were included in the 1981 interstate cost estimate and shall be included as eligible costs in any future interstate cost estimate, except that (1) such costs may be further developed in the design and environmental process under normal Federal-aid interstate procedures, and (2) the amount of such costs shall not include the portion of the project between High Street and Causeway Street."

Section 127(b) of Pub. L. 97-424 provided that: "Notwithstanding the provisions of section 108(b) of the Federal-Aid Highway Act of 1956, as amended [set out above], the Secretary of Transportation may approve the expenditure of funds authorized under such section for the construction of a previously approved project which provides for improvements to and reconstruction of ramps and service roads which are being developed as part of a roadway system to relieve a severely congested segment on an Interstate route. Such expenditures shall be limited (1) to work necessary to provide more effective and safe operation of such Interstate route, and (2) to a section of an Interstate route which proceeded to construction contract prior to the date of enactment of such Act and which Interstate route, together with service roads, was constructed without the expenditure of any funds authorized by such section."

§ 102. Program efficiencies

(a) HOV PASSENGER REQUIREMENTS.—

(1) IN GENERAL.—A State transportation department shall establish the occupancy requirements of vehicles operating in high occupancy vehicle lanes; except that no fewer than 2 occupants per vehicle may be required and, subject to section 163 of the Surface Transportation Assistance Act of 1982, motorcycles and bicycles shall not be considered single occupant vehicles.

(2) EXCEPTION FOR INHERENTLY LOW-EMISSION VEHICLES.—Notwithstanding paragraph (1), before September 30, 2003, a State may permit a vehicle with fewer than 2 occupants to operate in high occupancy vehicle lanes if the vehicle is certified as an Inherently Low-Emission Vehicle pursuant to title 40, Code of Federal Regulations, and is labeled in accordance with section 88.312-93(c) of such title. Such permission may be revoked by the State should the State determine it necessary.

Nothing in this subsection shall affect the authority of a State or political subdivision of a State to regulate motorcycles for safety.

(c) ENGINEERING COST REIMBURSEMENT.—If on-site construction of, or acquisition of right-of-way for, a highway project is not commenced within 10 years (or such longer period as the State requests and the Secretary determines to be reasonable) after the date on which Federal funds are first made available, out of the Highway Trust Fund (other than Mass Transit Account), for preliminary engineering of such project, the State shall pay an amount equal to the amount of Federal funds made available for such engineering. (D) A strategic highway network consisting of a network of highways that are important to the United States strategic defense policy and that provide defense access, continuity, and emergency capabilities for the movement of personnel, materials, and equipment in both peacetime and wartime. The highways may be highways on or off the Interstate System and shall be designated by the Secretary in consultation with appropriate Federal agencies and the States.

(E) Major strategic highway network connectors consisting of highways that provide motor vehicle access between major military installations and highways that are part of the strategic highway network. The highways shall be designated by the Secretary in consultation with appropriate Federal agencies and the States.

(3) MAXIMUM MILEAGE.—The mileage of highways on the National Highway System shall not exceed 178,250 miles.

(4) MODIFICATIONS TO NHS.—

(A) IN GENERAL.—The Secretary may make any modification, including any modification consisting of a connector to a major intermodal terminal, to the National Highway System that is proposed by a State or that is proposed by a State and revised by the Secretary if the Secretary determines that the modification—

(i) meets the criteria established for the National Highway System under this title; and

(ii) enhances the national transportation characteristics of the National Highway System.

(A) Construction, reconstruction, resurfacing, restoration, and rehabilitation of segments of the National Highway System.

(B) Operational improvements for segments of the National Highway System.

(C) Construction of, and operational improvements for, a Federal-aid highway not on the National Highway System, and construction of a transit project eligible for assistance under chapter 53 of title 49, if—

(i) the highway or transit project is in the same corridor as, and in proximity to, a fully access-controlled highway designated as a part of the National Highway System;

(ii) the construction or improvements will improve the level of service on the fully access-controlled highway described in clause (i) and improve regional traffic flow; and

(iii) the construction or improvements are more cost-effective than an improve-

ment to the fully access-controlled highway described in clause (i).

(D) Highway safety improvements for segments of the National Highway System.

(E) Transportation planning in accordance with sections 134 and 135.

(F) Highway research and planning in accordance with chapter 5.

Contributions to the mitigation efforts described in the preceding sentence may take place concurrent with or in advance of project construction; except that contributions in advance of project construction may occur only if the efforts are consistent with all applicable requirements of Federal law (including regulations) and State transportation planning processes. With respect to participation in a natural habitat or wetland mitigation effort related to a project funded under this title that has an impact that occurs within the service area of a mitigation bank, preference shall be given, to the maximum extent practicable, to the use of the mitigation bank if the bank contains sufficient available credits to offset the impact and the bank is approved in accordance with the Federal Guidance for the Establishment, Use and Operation of Mitigation Banks (60 Fed. Reg. 58605 (November 28, 1995)) or other applicable Federal law (including regulations).

(1) DESCRIPTION.—

(A) IN GENERAL.—The Dwight D. Eisenhower National System of Interstate and De-

fense Highways within the United States (including the District of Columbia and Puerto Rico) consists of highways designed, located, and selected in accordance with this paragraph.

(B) DESIGN.—

(i) IN GENERAL.—Except as provided in clause (ii), highways on the Interstate System shall be designed in accordance with the standards of section 109(b).

(C) LOCATION.—Highways on the Interstate System shall be located so as—

(i) to connect by routes, as direct as practicable, the principal metropolitan areas, cities, and industrial centers;

(ii) to serve the national defense; and

(iii) to the maximum extent practicable, to connect at suitable border points with routes of continental importance in Canada and Mexico.

(D) SELECTION OF ROUTES.—To the maximum extent practicable, each route of the Interstate System shall be selected by joint action of the State transportation departments of the State in which the route is located and the adjoining States, in cooperation with local and regional officials, and subject to the approval of the Secretary.

(2) MAXIMUM MILEAGE.—The mileage of highways on the Interstate System shall not exceed 43,000 miles, exclusive of designations under paragraph (4).

(3) MODIFICATIONS.—The Secretary may approve or require modifications to the Interstate System in a manner consistent with the policies and procedures established under this subsection.

(4) INTERSTATE SYSTEM DESIGNATIONS.—

(A) ADDITIONS.—If the Secretary determines that a highway on the National Highway System meets all standards of a highway on the Interstate System and that the highway is a logical addition or connection to the Interstate System, the Secretary may, upon the affirmative recommendation of the State or States in which the highway is located, designate the highway as a route on the Interstate System.

(B) DESIGNATIONS AS FUTURE INTERSTATE SYSTEM ROUTES.—

(i) IN GENERAL.—If the Secretary determines that a highway on the National Highway System would be a logical addition or connection to the Interstate System and would qualify for designation as a route on the Interstate System under subparagraph (A) if the highway met all standards of a highway on the Interstate System, the Secretary may, upon the affirmative recommendation of the State or States in which the highway is located, designate the highway as a future Interstate System route.

(ii) WRITTEN AGREEMENT OF STATES.—A designation under clause (i) shall be made only upon the written agreement of the State or States described in such clause that the highway will be constructed to meet all standards of a highway on the Interstate System by the date that is 12 years after the date of the agreement.

(iii) REMOVAL OF DESIGNATION.—

(I) IN GENERAL.—If the State or States described in clause (i) have not substantially completed the construction of a highway designated under this subparagraph within the time provided for in the agreement between the Secretary and the State or States under clause (ii), the Secretary shall remove the designation of the highway as a future Interstate System route.

(II) EFFECT OF REMOVAL.—Removal of the designation of a highway under subclause (I) shall not preclude the Secretary from designating the highway as a route on the Interstate System under subparagraph (A) or under any other provision of law providing for addition to the Interstate System.

(iv) PROHIBITION ON REFERRAL AS INTERSTATE SYSTEM ROUTE.—No law, rule, regulation, map, document, or other record of the United States, or of any State or political subdivision of a State, shall refer to any highway designated as a future Interstate System route under this subparagraph, nor shall any such highway be signed or marked, as a highway on the Interstate System until such time as the highway is constructed to the geometric and construction standards for the Interstate System and has been designated as a route on the Interstate System.

(C) FINANCIAL RESPONSIBILITY.—Except as provided in this title, the designation of a highway under this paragraph shall create no additional Federal financial responsibility with respect to the highway.

(d) TRANSFER OF INTERSTATE CONSTRUCTION FUNDS.—

(1) INTERSTATE CONSTRUCTION FUNDS NOT IN SURPLUS.—

(A) IN GENERAL.—Upon application by a State and approval by the Secretary, the Secretary may transfer to the apportionment of the State under section 104(b)(1) any amount of funds apportioned to the State under section 104(b)(5)(A) (as in effect on the day before the date of enactment of the Transportation Equity Act for the 21st Century), if the amount does not exceed the Federal share of the costs of construction of segments of the Interstate System in the State included in the most recent Interstate System cost estimate.

(B) EFFECT OF TRANSFER.—Upon transfer of an amount under subparagraph (A), the construction on which the amount is based, as included in the most recent Interstate System cost estimate, shall not be eligible for funding under section 104(b)(5)(A) (as in effect on the day before the date of enactment

of the Transportation Equity Act for the 21st Century) or 118(c).

(2) SURPLUS INTERSTATE CONSTRUCTION FUNDS.—Upon application by a State and approval by the Secretary, the Secretary may transfer to the apportionment of the State under section 104(b)(1) any amount of surplus funds apportioned to the State under section 104(b)(5)(A) (as in effect on the day before the date of enactment of the Transportation Equity Act for the 21st Century), if the State has fully financed all work eligible under the most recent Interstate System cost estimate.

(3) APPLICABILITY OF CERTAIN LAWS.—Funds transferred under this subsection shall be subject to the laws (including regulations, policies, and procedures) relating to the apportionment to which the funds are transferred.

(e)(2) of this section] shall be applicable to each route on the Interstate System approval of which was withdrawn or is hereafter withdrawn by the Secretary of Transportation in accordance with the provisions of section 103(e)(2) of title 23, United States Code, including any route on the Interstate System approval of which was withdrawn by the Secretary of Transportation in accordance with the provisions of title 23, United States Code, on August 30,

L. 94-280, §110; ROUTE WITHDRAWALS WITHIN URBANIZED AREAS; AVAILABILITY OF MILEAGE IN OTHER STATES; PUBLIC MASS TRANSIT NONHIGHWAY PROJECTS; GENERAL FUNDS UNAVAILABLE FOR OBLIGATION AFTER JUNE 30, 1981; SUPPLEMENTARY FUNDS; URBAN MASS TRANSPORTATION PROVISIONS APPLICABLE

Section 103(e)(4) of this title, as added Pub. L. 93-87, title I, §137(b), Aug. 13, 1973, 87 Stat. 269, and amended Pub. L. 93-643, §125(b), Jan. 4, 1975, 88 Stat. 2290, read prior to amendment by section 110 of Pub. L. 94-280 [set out in the text] as follows: “Upon the joint request of a State Governor and the local governments concerned, the Secretary may withdraw his approval of any route or portion thereof on the Interstate System within any urbanized area in that State selected and approved in accordance with this title prior to the enactment of this paragraph, if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System or will no longer be essential by reason of the application of this paragraph and will not be constructed as a part of the Interstate System, and if he receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by such route or portion thereof. The mileage of the route or portion thereof of approval of which is withdrawn under this paragraph shall be available for designation on the Interstate System in any other State in accordance with paragraph (1) of this subsection. After the Secretary has withdrawn his approval of any such route or portion thereof, whenever responsible local officials of such urbanized area notify the State highway department that, in lieu of a route or portion thereof approval for which is withdrawn under this paragraph, their needs require a nonhighway public mass transit project involving the construction of fixed rail facilities, or the purchase of passenger equipment, including rolling stock for any mode of mass transit, or both, and the State highway department determines that such public mass transit project is in accordance with the planning process under section 134 of this title and is entitled to priority under such planning process, such public mass transit project shall be submitted for approval to the Secretary. Approval of the plans, specifications, and estimates for such project by the Secretary shall be deemed a contractual obligation of the United States for payment out of the general funds in the Treasury of its proportional share of the cost of such project in an amount equal to the Federal share which would be paid for such a project under the Urban Mass Transportation Act of 1964 [section 1601 et seq. of Title 49, Transportation], except that the total Federal cost of all such projects under this paragraph with respect to such route or portion thereof approval of which is withdrawn under this paragraph, shall not exceed the Federal share of the cost which would have been paid for such route or portion thereof, as such cost is included in the 1972 Interstate System cost estimate set forth in table 5 of House Public Works Committee Print Numbered 92-29, as revised in House Report Numbered 92-1443, increased or decreased, as the case may be, as determined by the Secretary, based on changes in construction costs of such route or portion thereof as of the date of withdrawal of approval under this paragraph and in accordance with that design of such route or portion thereof which is the basis of such 1972 cost estimate. Funds apportioned to such State for the Interstate System, which apportionment is based upon an Interstate System cost estimate that includes a route or portion thereof approval of which is withdrawn under this paragraph, shall be reduced by an amount equal to the Federal share of such project as such share becomes a contractual obligation of the United States. No general funds shall be obligated under authority of this paragraph after June 30, 1981. No nonhighway public mass

transit project shall be approved under this paragraph unless the Secretary has received assurances satisfactory to him from the State that public mass transportation systems will fully utilize the proposed project. The provision of assistance under this paragraph shall not be construed as bringing within the application of chapter 15 of title 5, United States Code [section 1501 et seq. of Title 5, Government Organization and Employees], any nonsupervisory employee of an urban mass transportation system (or of any other agency or entity performing related functions) to whom such chapter is otherwise inapplicable. Funds available for expenditure to carry out the purposes of this paragraph shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964, as amended [section 1601 et seq. of Title 49, Transportation]. The provisions of section 3(e)(4) of the Urban Mass Transportation Act of 1964, as amended, [section 1602 (e)(4) of Title 49], shall apply in carrying out this paragraph.”

BASIS OF FEDERAL-AID SYSTEMS REALIGNMENT

Section 148(d) of Pub. L. 93-87 provided that: “Federal-aid systems realignment shall be based upon anticipated functional usage in the year 1980 or a planned connected system.”

(ii) CARBON MONOXIDE MAINTENANCE AREAS.—If, in addition to being classified as a nonattainment or maintenance area for ozone, the area was at one time also classified under subpart 3 of part D of title I of such Act (42 U.S.C. 7512 et seq.) as a nonattainment area described in section

149(b) for carbon monoxide but has been redesignated as a maintenance area, the weighted nonattainment or maintenance area population of the area, as determined under clauses (i) through (vi) of subparagraph (B), shall be further multiplied by a factor of 1.1.

(D) MINIMUM APPORTIONMENT.—Notwithstanding any other provision of this paragraph, each State shall receive a minimum of $\frac{1}{2}$ of 1 percent of the funds apportioned under this paragraph.

(ii) 40 percent of the apportionments in the ratio that—

(I) the total vehicle miles traveled on lanes on Federal-aid highways in each State; bears to

(II) the total vehicle miles traveled on lanes on Federal-aid highways in all States.

(iii) 35 percent of the apportionments in the ratio that—

(I) the estimated tax payments attributable to highway users in each State paid into the Highway Trust Fund (other than the Mass Transit Account) in the latest fiscal year for which data are available; bears to

Section 133(d) shall not apply to funds transferred under this subsection.

(d) OPERATION LIFESAVER AND HIGH SPEED RAIL CORRIDORS.—

(1) OPERATION LIFESAVER.—Before making an apportionment under subsection (b)(3) of this section for a fiscal year, the Secretary shall set aside \$500,000 for such fiscal year for carrying out a public information and education program to help prevent and reduce motor vehicle accidents, injuries, and fatalities and to improve driver performance at railway-highway crossings.

(g) Not more than 40 per centum of the amount apportioned in any fiscal year to each State in accordance with sections 130, 144, and 152 of this title may be transferred from the apportionment under one section to the apportionment under any other of such sections if such a transfer is requested by the State transportation department and is approved by the Secretary as being in the public interest. The Secretary may approve the transfer of 100 per centum of the apportionment under one such section to the apportionment under any other of such sections if such transfer is requested by the State transportation department, and is approved by the Secretary as being in the public interest, if he has received satisfactory assurances from such State transportation department that the purposes of the program from which such funds are to be transferred have been met. A State may transfer not to exceed 50 percent of the State's apportionment under section 144 in any fiscal year to the apportionment of such State under subsection (b)(1) or subsection (b)(3) of this section. Any transfer to subsection (b)(3) shall not be subject to section 133(d). Nothing in this subsection authorizes the transfer of any amount apportioned from the Highway Trust Fund to any apportionment the funds for which were not from the Highway Trust Fund, and nothing in this subsection authorizes the transfer of any amount apportioned from funds not from the Highway Trust Fund to any appor-

“(a) Notwithstanding section 104(b)(1) of title 23, United States Code, and any other provision of law, amounts authorized for fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991 for the Federal-aid primary system (including extensions in urban areas and priority primary routes) shall be apportioned in accordance with this section. The Secretary of Transportation shall determine for each State the higher of (1) the amount which would be apportioned to such State under section 104(b)(1) of title 23, United States Code, and (2) the amount which would be apportioned to such State under the following formula:

“One-half in the ratio which the population of rural areas of each State bears to the total population of rural areas of all the States as shown by the latest available Federal census and one-half in the ratio which the population in urban areas in each State bears to the total population in urban areas in all the States as shown by the latest Federal census.

“(b) The Secretary of Transportation shall, for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991, determine the total of the amounts determined for each State under subsection (a) and shall determine the ratio which the total amount authorized for such fiscal year for the Federal-aid primary system bears to the total of such amounts determined under subsection (a) for such fiscal year.

“(c) The amount which shall be apportioned to each State for the Federal-aid primary system (including extensions in urban areas and priority primary routes) for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, and 1991 shall be the amount determined for such State under subsection (a), multiplied by the ratio determined under subsection (b).

“(d) Notwithstanding any other provision of law, no State shall receive an apportionment under this section for any fiscal year which is less than the lower of (1) the amount which the State would be apportioned for such fiscal year under section 104(b)(1) of title 23, United States Code, and (2) the amount which would be determined under the formula set forth in subsection (a). Notwithstanding any other provision of law, no State shall receive for any such fiscal year less than one-half of 1 per centum of the total apportionment under this section for such fiscal year. For purposes of this paragraph and subsection (b) of section 103 of title 23, United States Code, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall be considered together as one State. The State consisting of the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Mariana Islands shall not receive less than one-half of 1 per centum of each year's apportionment. There are authorized to be appropriated such sums as may be necessary out of the Highway Trust Fund to carry out this subsection. Funds authorized by this subsection shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code.

“(e) Amounts apportioned under this section shall be deemed to be amounts apportioned under section 104(b)(1) of title 23, United States Code, for purposes of such title and all other provisions of law. Terms used in this section shall have the same meaning such terms have in chapter 1 of title 23, United States Code.”

THROUGH SEPTEMBER 30, 1984

Pub. L. 97-424, title I, §145, Jan. 6, 1983, 96 Stat. 2130, provided that:

“(a) Notwithstanding any other provision of law, the Federal share of any qualifying project approved by the Secretary of Transportation under section 106(a) [section 106(a) of this title], and of any qualifying project for which the United States becomes obligated to pay under section 117, of title 23, United States Code, during the period beginning on the date of enactment of this Act [Jan. 6, 1983] and ending September 30, 1984, shall be such percentage of the construction cost as the State highway department requests, up to and including 100 per centum.

“(b) For purposes of this section, the term ‘qualifying project’ means a project approved by the Secretary of Transportation under section 106(a) of title 23, United States Code, or a project for which the United States becomes obligated to pay under section 117 of title 23, United States Code, for which the Governor of the State submitting the project has certified, in accordance with regulations established by the Secretary of Transportation, that sufficient funds are not available to pay the cost of the non-Federal share of the project.

“(c) The total amount which may be obligated for qualifying projects in any State under subsection (a) shall not be greater than the excess of—

“(1) the sum of the amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act [set out above], plus the amount, if any, available to such State under section 150 of this Act [enacting section 157 of this title], pertaining to minimum allocation, over

“(2) the amount of obligation authority distributed to such State for fiscal year 1982 under section 3(b) of the Federal-Aid Highway Act of 1981 [set out below].

“(d) The total amount of such increases in the Federal share as are made pursuant to subsection (a) for any State shall be repaid to the United States by such State on or before September 30, 1984. Such payments shall be deposited in the Highway Trust Fund and such repaid amounts shall be credited to the appropriate apportionment accounts of such State.

“(e) If a State has not made the repayment as required by subsection (d) of this section, the Secretary shall deduct from funds apportioned to such State under section 104(b) of title 23, United States Code, except for paragraph (5)(A), in each of the fiscal years ending September 30, 1985, and September 30, 1986, a pro rata share of each category of such apportioned funds, the total amount of which shall be equal to 50 per centum of the amount needed for repayment. Any amount deducted under this subsection shall be reapportioned for the fiscal years 1985 and 1986 in accordance with section 104(b)(1) of title 23, United States Code, to those States which have not received a higher Federal share under this section and to those States which have made the repayment required by subsection (d).”

The funds so distributed shall be available for any purposes described in section 133(b) of title 23, United States Code.

“(g) SPECIAL RULE.—Obligation authority distributed for a fiscal year under subsection (c)(4) for a section set forth in subsection (c)(4) shall remain available until used for obligation of funds for such section and shall be in addition to the amount of any limitation imposed on obligations for Federal-aid highway and highway safety construction programs for future fiscal years.

“(h) INCREASE IN OBLIGATION LIMIT.—Limitations on obligations imposed by subsection (a) for a fiscal year shall be increased by an amount equal to the amount determined pursuant to section 251(b)(1)(B)(ii)(I)(cc) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901(b)(2)(B)(ii)(I)(cc)) [901(b)(1)(B)(ii)(I)(cc)] for such fiscal year. (c) TREATMENT OF FUNDS.—

(1) PROGRAMMATIC DISTRIBUTION.—The Secretary shall apportion the amounts made available under this section that exceed \$2,800,000,000 so that the amount apportioned to each State under this paragraph for each program referred to in subsection (a) (other than metropolitan planning, minimum guarantee, high priority projects, Appalachian development highway system, and recreational trails programs) is equal to the amount determined by multiplying the amount to be apportioned under this paragraph by the ratio that—

(A) the amount of funds apportioned to each State for each program referred to in subsection (a) (other than metropolitan planning, minimum guarantee, high priority projects, Appalachian development highway

system, and recreational trails programs) for a fiscal year; bears to

(B) the total amount of funds apportioned to each State for such program for such fiscal year.

(2) REMAINING DISTRIBUTION.—The Secretary shall administer the remainder of funds made available under this section to the States in accordance with section 104(b)(3); except that requirements of paragraphs (1), (2), and (3) of section 133(d) shall not apply to amounts administered pursuant to this paragraph.

(d) AUTHORIZATION.—There are authorized to be appropriated out of the Highway Trust Fund (other than the Mass Transit Account) such sums as may be necessary to carry out this section for each of fiscal years 1998 through 2003.

(e) SPECIAL RULE.—If in any of fiscal years 1999 through 2003, the amount authorized under subsection (d) is more than 30 percent higher than the amount authorized under subsection (d) in fiscal year 1998, the Secretary shall use the apportionment factors under sections 104 and 144 as in effect on the date of enactment of this section.

(f) GUARANTEE OF 90.5 RETURN.—

(1) IN GENERAL.—Before making any apportionment under this title for each of fiscal years 1999 through 2003, the Secretary, subject to paragraph (2), shall adjust the percentages in the table in subsection (b) to reflect the estimated percentage of estimated tax payments attributable to highway users in each State paid into the Highway Trust Fund (other than the Mass Transit Account) in the latest fiscal year for which data is available, to ensure that no State's percentage return from such Trust Fund is less than 90.5 percent.

(2) ELIGIBILITY THRESHOLD FOR INITIAL ADJUSTMENT.—The Secretary may make an adjustment under paragraph (1) for a State for a fiscal year only if the State's percentage return from the Highway Trust Fund (other than the Mass Transit Account) in the table in subsection (b) was equal to 90.5 percent.

(3) CONFORMING ADJUSTMENTS.—After making any adjustments under paragraph (1) for a fiscal year, the Secretary shall proportionately adjust the remaining percentages in the table in subsection (b) to ensure that the total of the percentages in the table is equal to 100 percent for such fiscal year.

(4) LIMITATION ON ADJUSTMENTS.—After making any adjustments under paragraph (3) for a fiscal year, the Secretary shall determine whether or not any State's percentage return from the Highway Trust Fund (other than the Mass Transit Account) is less than 90.5 percent as a result of such adjustments and shall adjust the percentages in the table for such fiscal year accordingly. Adjustments of the percentages in the table under this paragraph may not result in the total of such percentages exceeding 100 percent.

(2) PROJECT AGREEMENT.—The Secretary shall act on the plans, specifications, and estimates as soon as practicable after the date of their submission and shall enter into a formal project agreement with the State transportation department formalizing the conditions of the project approval.

(3) CONTRACTUAL OBLIGATION.—The execution of the project agreement shall be deemed a contractual obligation of the Federal Government for the payment of the Federal share of the cost of the project.

(4) GUIDANCE.—In taking action under this subsection, the Secretary shall be guided by section 109.

(b) PROJECT AGREEMENT.—

(1) PROVISION OF STATE FUNDS.—The project agreement shall make provision for State funds required to pay the State's non-Federal share of the cost of construction of the project and to pay for maintenance of the project after completion of construction.

(2) REPRESENTATIONS OF STATE.—If a part of the project is to be constructed at the expense

of, or in cooperation with, political subdivisions of the State, the Secretary may rely on representations made by the State transportation department with respect to the arrangements or agreements made by the State transportation department and appropriate local officials for ensuring that the non-Federal contribution will be provided under paragraph (1).

(c) ASSUMPTION BY STATES OF RESPONSIBILITIES OF THE SECRETARY.—

(1) NON-INTERSTATE NHS PROJECTS.—For projects under this title that are on the National Highway System but not on the Interstate System, the State may assume the responsibilities of the Secretary under this title for design, plans, specifications, estimates, contract awards, and inspections of projects unless the State or the Secretary determines that such assumption is not appropriate.

(2) NON-NHS PROJECTS.—For projects under this title that are not on the National Highway System, the State shall assume the responsibilities of the Secretary under this title for design, plans, specifications, estimates, contract awards, and inspection of projects, unless the State determines that such assumption is not appropriate.

(1) USE OF LIFE-CYCLE COST ANALYSIS.—The Secretary shall develop recommendations for the States to conduct life-cycle cost analyses. The recommendations shall be based on the principles contained in section 2 of Executive Order No. 12893 and shall be developed in consultation with the American Association of State Highway and Transportation Officials. (2) VALUE ENGINEERING DEFINED.—In this subsection, the term “value engineering analysis” means a systematic process of review and analysis of a project during its design phase by a multidisciplinary team of persons not involved in the project in order to provide suggestions for reducing the total cost of the project and providing a project of equal or better quality. Such suggestions may include combining or eliminating otherwise inefficient or expensive parts of the original proposed design for the project and total redesign of the proposed project using different technologies, materials, or methods so as to accomplish the original purpose of the project.

(h) FINANCIAL PLAN.—A recipient of Federal financial assistance for a project under this title with an estimated total cost of \$1,000,000,000 or more shall submit to the Secretary an annual financial plan for the project. The plan shall be based on detailed annual estimates of the cost to complete the remaining elements of the project and on reasonable assumptions, as determined by the Secretary, of future increases in the cost to complete the project.

§ 107. Acquisition of rights-of-way—Interstate System

(a) In any case in which the Secretary is requested by a State to acquire lands or interests in lands (including within the term “interests in lands”, the control of access thereto from adjoining lands) required by such State for right-of-way or other purposes in connection with the prosecution of any project for the construction, reconstruction, or improvement of any section of the Interstate System, the Secretary is authorized, in the name of the United States and prior to the approval of title by the Attorney General, to acquire, enter upon, and take possession of such lands or interests in lands by purchase, donation, condemnation, or otherwise in accordance with the laws of the United States (including the Act of February 26, 1931, 46 Stat. 1421),¹ if—

(1) the Secretary has determined either that the State is unable to acquire necessary lands or interests in lands, or is unable to acquire such lands or interests in lands with sufficient promptness; and

(2) the State has agreed with the Secretary to pay, at such time as may be specified by the Secretary an amount equal to 10 per centum of the costs incurred by the Secretary, in acquiring such lands or interests in lands, or such lesser percentage which represents the State's pro rata share of project costs as determined in accordance with subsection (c)¹ of section 120 of this title.

The authority granted by this section shall also apply to lands and interests in lands received as grants of land from the United States and owned or held by railroads or other corporations.

(b) The costs incurred by the Secretary in acquiring any such lands or interests in lands may include the cost of examination and abstract of title, certificate of title, advertising, and any fees incidental to such acquisition. All costs incurred by the Secretary in connection with the

acquisition of any such lands or interests in lands shall be paid from the funds for construction, reconstruction, or improvement of the Interstate System apportioned to the State upon the request of which such lands or interests in lands are acquired, and any sums paid to the Secretary by such State as its share of the costs of acquisition of such lands or interests in lands shall be deposited in the Treasury to the credit of the appropriation for Federal-aid highways and shall be credited to the amount apportioned to such State as its apportionment of funds for construction, reconstruction, or improvement of the Interstate System, or shall be deducted from other moneys due the State for reimbursement from funds authorized to be appropriated under section 108(b) of the Federal-Aid Highway Act of 1956.

(c) The Secretary is further authorized and directed by proper deed, executed in the name of the United States, to convey any such lands or interests in lands acquired in any State under the provisions of this section, except the outside five feet of any such right-of-way in any State which does not provide control of access, to the State transportation department of such State or such political subdivision thereof as its laws may provide, upon such terms and conditions as to such lands or interests in lands as may be agreed upon by the Secretary and the State transportation department or political subdivisions to which the conveyance is to be made. Whenever the State makes provision for control of access satisfactory to the Secretary, the outside five feet then shall be conveyed to the State by the Secretary, as herein provided.

(d) Whenever rights-of-way, including control of access, on the Interstate System are required over lands or interests in lands owned by the United States, the Secretary may make such arrangements with the agency having jurisdiction over such lands as may be necessary to give the State or other person constructing the projects on such lands adequate rights-of-way and control of access thereto from adjoining lands, and any such agency is directed to cooperate with the Secretary in this connection.

(B) the requirements of title VI of the Civil Rights Act of 1964 have been complied with;

(C) the State has a mandatory comprehensive and coordinated land use, environment, and transportation planning process under State law and the acquisition is certified by the Governor as consistent with the State plans before the acquisition;

(E) the alternative for which the right-of-way is acquired is selected by the State pursuant to regulations to be issued by the Secretary which provide for the consideration of the environmental impacts of various alternatives;

(F) before the time that the cost incurred by a State is approved for Federal participation, environmental compliance pursuant to the National Environmental Policy Act has been completed for the project for which the right-of-way was acquired by the State, and the acquisition has been approved by the Secretary under this Act,¹ and in compliance with section 303 of title 49, section 7 of the Endangered Species Act, and all other applicable environmental laws shall be identified by the Secretary in regulations; and

(G) before the time that the cost incurred by a State is approved for Federal participation, both the Secretary and the Administrator of the Environmental Protection Agency have concurred that the property acquired in advance of Federal approval or authorization did not influence the environmental assessment of the project, the decision relative to the need to construct the project, or the selection of the project design or location.

Such standards, as applied to each actual construction project, shall be adequate to enable such project to accommodate the types and volumes of traffic anticipated for such project for the twenty-year period commencing on the date of approval by the Secretary, under section 106 of this title, of the plans, specifications, and estimates for actual construction of such project. Such standards shall in all cases provide for at least four lanes of traffic. The right-of-way width of the Interstate System shall be adequate to permit construction of projects on the Interstate System to such standards. The Secretary shall apply such standards uniformly throughout all the States.

(c) DESIGN CRITERIA FOR NATIONAL HIGHWAY SYSTEM.—

(1) **IN GENERAL.**—A design for new construction, reconstruction, resurfacing (except for maintenance resurfacing), restoration, or rehabilitation of a highway on the National Highway System (other than a highway also on the Interstate System) may take into account, in addition to the criteria described in subsection (a)—

(A) the constructed and natural environment of the area;

(B) the environmental, scenic, aesthetic, historic, community, and preservation impacts of the activity; and

(C) access for other modes of transportation.

(2) **DEVELOPMENT OF CRITERIA.**—The Secretary, in cooperation with State transportation departments, may develop criteria to implement paragraph (1). In developing criteria under this paragraph, the Secretary shall consider the results of the committee process of the American Association of State Highway and Transportation Officials as used in adopting and publishing “A Policy on Geometric Design of Highways and Streets”, including comments submitted by interested parties as part of such process.

(d) On any highway project in which Federal funds hereafter participate, or on any such project constructed since December 20, 1944, the location, form and character of informational, regulatory and warning signs, curb and pavement or other markings, and traffic signals installed or placed by any public authority or other agency, shall be subject to the approval of the State transportation department with the concurrence of the Secretary, who is directed to concur only in such installations as will promote the safe and efficient utilization of the highways.

(e) No funds shall be approved for expenditure on any Federal-aid highway, or highway affected under chapter 2 of this title, unless proper safety protective devices complying with safety standards determined by the Secretary at that time as being adequate shall be installed or be in operation at any highway and railroad grade crossing or drawbridge on that portion of the highway with respect to which such expenditures are to be made.

(f) The Secretary shall not, as a condition precedent to his approval under section 106 of this title, require any State to acquire title to, or control of, any marginal land along the proposed highway in addition to that reasonably necessary for road surfaces, median strips, bike-ways, gutters, ditches, and side slopes, and of sufficient width to provide service roads for adjacent property to permit safe access at controlled locations in order to expedite traffic, promote safety, and minimize roadside parking.

(g) The Secretary shall issue within 30 days after the day of enactment of the Federal-Aid Highway Act of 1970 guidelines for minimizing possible soil erosion from highway construction. Such guidelines shall apply to all proposed projects with respect to which plans, specifications, and estimates are approved by the Secretary after the issuance of such guidelines.

(h) Not later than July 1, 1972, the Secretary, after consultation with appropriate Federal and State officials, shall submit to Congress, and not later than 90 days after such submission, promulgate guidelines designed to assure that possible adverse economic, social, and environmental effects relating to any proposed project on any Federal-aid system have been fully considered in developing such project, and that the final decisions on the project are made in the best overall public interest, taking into consideration the need for fast, safe and efficient transportation, public services, and the costs of eliminating or minimizing such adverse effects and the following:

- (1) air, noise, and water pollution;
- (2) destruction or disruption of man-made and natural resources, aesthetic values, community cohesion and the availability of public facilities and services;
- (3) adverse employment effects, and tax and property value losses;
- (4) injurious displacement of people, businesses and farms; and
- (5) disruption of desirable community and regional growth.

Such guidelines shall apply to all proposed projects with respect to which plans, specifications, and estimates are approved by the Secretary after the issuance of such guidelines.

(i) The Secretary, after consultation with appropriate Federal, State, and local officials, shall develop and promulgate standards for highway noise levels compatible with different land uses and after July 1, 1972, shall not approve plans and specifications for any proposed project on any Federal-aid system for which location approval has not yet been secured unless he determines that such plans and specifications include adequate measures to implement the appropriate noise level standards. The Secretary, after consultation with the Administrator of the Environmental Protection Agency and appropriate Federal, State, and local officials, may promulgate standards for the control of highway noise levels for highways on any Federal-aid system for which project approval has been secured prior to July 1, 1972. The Secretary may approve any project on a Federal-aid system to which noise-level standards are made applicable under the preceding sentence for the purpose of carrying out such standards. Such project may include, but is not limited to, the acquisition of additional rights-of-way, the construction of physical barriers, and landscaping. Sums apportioned for the Federal-aid system on which such project will be located shall be available to finance the Federal share of such project. Such project shall be deemed a highway project for all purposes of this title.

(j) The Secretary, after consultation with the Administrator of the Environmental Protection Agency, shall develop and promulgate guidelines to assure that highways constructed pursuant to this title are consistent with any approved plan for—

- (1) the implementation of a national ambient air quality standard for each pollutant for which an area is designated as a nonattainment area under section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)); or
- (2) the maintenance of a national ambient air quality standard in an area that was designated as a nonattainment area but that was later redesignated by the Administrator as an attainment area for the standard and that is required to develop a maintenance plan under section 175A of the Clean Air Act (42 U.S.C. 7505a).

(k) The Secretary shall not approve any project involving approaches to a bridge under this title, if such project and bridge will significantly affect the traffic volume and the highway system of a contiguous State without first taking into full consideration the views of that State.

(l)(1) In determining whether any right-of-way on any Federal-aid highway should be used for accommodating any utility facility, the Secretary shall—

(A) first ascertain the effect such use will have on highway and traffic safety, since in no case shall any use be authorized or otherwise permitted, under this or any other provision of law, which would adversely affect safety;

(B) evaluate the direct and indirect environmental and economic effects of any loss of productive agricultural land or any impairment of the productivity of any agricultural land which would result from the disapproval of the use of such right-of-way for the accommodation of such utility facility; and

(C) consider such environmental and economic effects together with any interference with or impairment of the use of the highway in such right-of-way which would result from the use of such right-of-way for the accommodation of such utility facility.

(2) For the purpose of this subsection—

(A) the term “utility facility” means any privately, publicly, or cooperatively owned line, facility, or system for producing, transmitting, or distributing communications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, or any other similar commodity, including any fire or police signal system or street lighting system, which directly or indirectly serves the public; and

(B) the term “right-of-way” means any real property, or interest therein, acquired, dedicated, or reserved for the construction, operation, and maintenance of a highway.

(m) PROTECTION OF NONMOTORIZED TRANSPORTATION TRAFFIC.—The Secretary shall not approve any project or take any regulatory action under this title that will result in the severance of an existing major route or have significant adverse impact on the safety for nonmotorized transportation traffic and light motorcycles, unless such project or regulatory action provides for a reasonable alternate route or such a route exists.

(n) It is the intent of Congress that any project for resurfacing, restoring, or rehabilitating any highway, other than a highway access to which is fully controlled, in which Federal funds participate shall be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.

(o) COMPLIANCE WITH STATE LAWS FOR NON-NHS PROJECTS.—Projects (other than highway projects on the National Highway System) shall be designed, constructed, operated, and maintained in accordance with State laws, regulations, directives, safety standards, design standards, and construction standards.

(p) SCENIC AND HISTORIC VALUES.—Notwithstanding subsections (b) and (c), the Secretary may approve a project for the National Highway System if the project is designed to—

- (1) allow for the preservation of environmental, scenic, or historic values;
- (2) ensure safe use of the facility; and
- (3) comply with subsection (a).

(q) PHASE CONSTRUCTION.—Safety considerations for a project under this title may be met by phase construction consistent with the operative safety management system established in accordance with section 303 or in accordance with a statewide transportation improvement program approved by the Secretary.

ENVIRONMENTAL STREAMLINING

Pub. L. 105-178, title I, § 1309, June 9, 1998, 112 Stat. 232, as amended by Pub. L. 105-206, title IX, § 9004(c), July 22, 1998, 112 Stat. 843, provided that:

“(a) COORDINATED ENVIRONMENTAL REVIEW PROCESS.—

“(1) DEVELOPMENT AND IMPLEMENTATION.—The Secretary shall develop and implement a coordinated environmental review process for highway construction and mass transit projects that require—

“(A) the preparation of an environmental impact statement or environmental assessment under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), except that the Secretary may decide not to apply this section to the preparation of an environmental assessment under such Act; or

“(B) the conduct of any other environmental review, analysis, opinion, or issuance of an environmental permit, license, or approval by operation of Federal law.

“(2) MEMORANDUM OF UNDERSTANDING.—

“(A) IN GENERAL.—The coordinated environmental review process for each project shall ensure that, whenever practicable (as specified in this section), all environmental reviews, analyses, opinions, and any permits, licenses, or approvals that must be issued or made by any Federal agency for the project concerned shall be conducted concurrently and completed within a cooperatively determined time period. Such process for a project or class of project may be incorporated into a memorandum of understanding between the Department of Transportation and Federal agencies (and, where appropriate, State agencies).

“(B) ESTABLISHMENT OF TIME PERIODS.—In establishing the time period referred to in subparagraph (A), and any time periods for review within such period, the Department and all such agencies shall take into account their respective resources and statutory commitments.

“(b) ELEMENTS OF COORDINATED ENVIRONMENTAL REVIEW PROCESS.—For each project, the coordinated environmental review process established under this section shall provide, at a minimum, for the following elements:

“(1) FEDERAL AGENCY IDENTIFICATION.—The Secretary shall, at the earliest possible time, identify all potential Federal agencies that—

“(A) have jurisdiction by law over environmental-related issues that may be affected by the project and the analysis of which would be part of any environmental document required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.); or

“(B) may be required by Federal law to independently—

“(i) conduct an environmental-related review or analysis; or

“(ii) determine whether to issue a permit, license, or approval or render an opinion on the environmental impact of the project.

“(2) TIME LIMITATIONS AND CONCURRENT REVIEW.—The Secretary and the head of each Federal agency identified under paragraph (1)—

“(A)(i) shall jointly develop and establish time periods for review for—

“(I) all Federal agency comments with respect to any environmental review documents required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) for the project; and

“(II) all other independent Federal agency environmental analyses, reviews, opinions, and decisions on any permits, licenses, and approvals that must be issued or made for the project;

whereby each such Federal agency’s review shall be undertaken and completed within such established time periods for review; or

“(ii) may enter into an agreement to establish such time periods for review with respect to a class of project; and

“(B) shall ensure, in establishing such time periods for review, that the conduct of any such analysis, review, opinion, and decision is undertaken concurrently with all other environmental reviews for the project, including the reviews required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.); except that such review may not be concurrent if the affected Federal agency can demonstrate that such concurrent review would result in a significant adverse impact to the environment or substantively alter the operation of Federal law or would not be possible without information developed as part of the environmental review process.

“(3) FACTORS TO BE CONSIDERED.—Time periods for review established under this section shall be consistent with the time periods established by the Council on Environmental Quality under sections 1501.8 and 1506.10 of title 40, Code of Federal Regulations.

“(4) EXTENSIONS.—The Secretary shall extend any time periods for review under this section if, upon good cause shown, the Secretary and any Federal agency concerned determine that additional time for analysis and review is needed as a result of new information that has been discovered that could not reasonably have been anticipated when the Federal agency’s time periods for review were established. Any memorandum of understanding shall be modified to incorporate any mutually agreed-upon extensions.

“(c) DISPUTE RESOLUTION.—When the Secretary determines that a Federal agency which is subject to a time period for its environmental review or analysis under this section has failed to complete such review, analysis, opinion, or decision on issuing any permit, license,

or approval within the established time period or within any agreed-upon extension to such time period, the Secretary may, after notice and consultation with such agency, close the record on the matter before the Secretary. If the Secretary finds, after timely compliance with this section, that an environmental issue related to the project that an affected Federal agency has jurisdiction over by operation of Federal law has not been resolved, the Secretary and the head of the Federal agency shall resolve the matter not later than 30 days after the date of the finding by the Secretary.

“(d) PARTICIPATION OF STATE AGENCIES.—For any project eligible for assistance under chapter 1 of title 23, United States Code, or chapter 53 of title 49, United States Code, a State, by operation of State law, may require that all State agencies that have jurisdiction by State or Federal law over environmental-related issues that may be affected by the project, or that are required to issue any environmental-related reviews, analyses, opinions, or determinations on issuing any permits, licenses, or approvals for the project, be subject to the coordinated environmental review process established under this section unless the Secretary determines that a State’s participation would not be in the public interest. For a State to require State agencies to participate in the review process, all affected agencies of the State shall be subject to the review process.

“(e) ASSISTANCE TO AFFECTED FEDERAL AGENCIES.—

“(1) IN GENERAL.—The Secretary may approve a request by a State or recipient to provide funds for a highway project made available under chapter 1 of title 23, United States Code, or for a mass transit project made available under chapter 53 of title 49, United States Code, to the State for the project subject to the coordinated environmental review process established under this section to affected Federal agencies to provide the resources necessary to meet any time limits established under this section.

“(2) AMOUNTS.—Such requests under paragraph (1) shall be approved only—

“(A) for the additional amounts that the Secretary determines are necessary for the affected Federal agencies to meet the time limits for environmental review; and

“(B) if such time limits are less than the customary time necessary for such review.

“(f) JUDICIAL REVIEW AND SAVINGS CLAUSE.—

“(1) JUDICIAL REVIEW.—Nothing in this section shall affect the reviewability of any final Federal agency action in a district court of the United States or in the court of any State.

“(2) SAVINGS CLAUSE.—Nothing in this section shall affect the applicability of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) or any other Federal environmental statute or affect the responsibility of any Federal officer to comply with or enforce any such statute.

“(g) FEDERAL AGENCY DEFINED.—In this section, the term ‘Federal agency’ means any Federal agency or any State agency carrying out affected responsibilities required by operation of Federal law.”

ROADSIDE SAFETY TECHNOLOGIES

Pub. L. 105-178, title I, §1402, June 9, 1998, 112 Stat. 236, as amended by Pub. L. 105-206, title IX, §9005(c), July 22, 1998, 112 Stat. 848, provided that:

“(a) CRASH CUSHIONS.—

“(1) GUIDANCE.—Not later than 18 months after the date of enactment of this Act [June 9, 1998], the Secretary shall issue guidance regarding the benefits and safety performance of redirective and nonredirective crash cushions in different road applications, taking into consideration roadway conditions, operating speed limits, the location of the crash cushion in the right-of-way, and any other relevant factors. The guidance shall include recommendations on the most appropriate circumstances for utilization of redirective and nonredirective crash cushions.

“(2) USE OF GUIDANCE.—States shall use the guidance issued under this subsection in evaluating the

safety and cost-effectiveness of utilizing different crash cushion designs and determining whether redirective or nonredirective crash cushions or other safety appurtenances should be installed at specific highway locations.

“(b) TRAFFIC FLOW AND SAFETY APPLICATIONS OF ROAD BARRIERS.—

“(1) STUDY.—The Secretary shall conduct a study on the technologies and methods to enhance safety, streamline construction, and improve capacity by providing positive separation at all times between traffic, equipment, and workers on highway construction projects. The study shall also address how such technologies can be used to improve capacity and safety at those specific highway, bridge, and other appropriate locations where reversible lane, contraflow, and high occupancy vehicle lane operations are implemented during peak traffic periods.

“(2) USES TO CONSIDER.—In conducting the study, the Secretary shall consider, at a minimum, uses of positive separation technologies related to—

“(A) separating workers from traffic flow when work is in progress;

“(B) providing additional safe work space by utilizing adjacent and available traffic lanes during off-peak hours;

“(C) rapid deployment to allow for daily or periodic restoration of lanes for use by traffic during peak hours as needed;

“(D) mitigating congestion caused by construction by—

“(i) opening all adjacent and available lanes to traffic during peak traffic hours; or

“(ii) using reversible lanes to optimize capacity of the highway by adjusting to directional traffic flow; and

“(E) permanent use of positive separation technologies to create contraflow or reversible lanes to increase the capacity of congested highways, bridges, and tunnels.

“(3) REPORT.—Not later than 18 months after the date of enactment of this Act [June 9, 1998], the Secretary shall submit to Congress a report on the results of the study. The report shall include findings and recommendations for the use of the technologies referred to in paragraph (2) to provide positive separation on appropriate projects.”

METRIC REQUIREMENTS

“(1) PLACEMENT AND MODIFICATION OF SIGNS.—The Secretary shall not require the States to expend any Federal or State funds to construct, erect, or otherwise place or to modify any sign relating to a speed limit, distance, or other measurement on a highway for the purpose of having such sign establish such speed limit, distance, or other measurement using the metric system.

“(2) OTHER ACTIONS.—The Secretary shall not require that any State use or plan to use the metric system with respect to designing or advertising, or preparing plans, specifications, estimates, or other documents, for a Federal-aid highway project eligible for assistance under title 23, United States Code.

“(3) DEFINITIONS.—In this subsection, the following definitions apply:

“(A) HIGHWAY.—The term ‘highway’ has the meaning such term has under section 101 of title 23, United States Code.

“(B) METRIC SYSTEM.—The term ‘metric system’ has the meaning the term ‘metric system of measurement’ has under section 4 of the Metric Conversion Act of 1975 (15 U.S.C. 205c).”

TYPE II NOISE BARRIERS

The testing procedures and performance grade classifications should be developed in consultation with representatives of the crumb rubber modifier industry and other interested parties (including the asphalt paving industry) with experience in the development of the procedures and classifications.

“(2) CRUMB RUBBER MODIFIER PROGRAM DEVELOPMENT.—

“(A) IN GENERAL.—The Secretary may make grants to States to develop programs to use crumb rubber from scrap tires to modify asphalt pavements.

“(B) USE OF GRANT FUNDS.—Grant funds made available to States under this paragraph shall be used—

“(i) to develop mix designs for crumb rubber modified asphalt pavements;

“(ii) for the placement and evaluation of crumb rubber modified asphalt pavement field tests; and

“(iii) for the expansion of State crumb rubber modifier programs in existence on the date the grant is made available.

“(e) DEFINITIONS.—For purpose of this section—

“(1) the term ‘asphalt pavement containing recycled rubber’ means any mixture of asphalt and crumb rubber derived from whole scrap tires, such that the physical properties of the asphalt are modified through the mixture, for use in pavement maintenance, rehabilitation, or construction applications; and

“(2) the term ‘recycled rubber’ is any crumb rubber derived from processing whole scrap tires or shredded tire material taken from automobiles, trucks, or other equipment owned and operated in the United States.”

SURVEY AND REPORT ON UPGRADING OF DESIGN STANDARDS

Section 1049 of Pub. L. 102-240 directed Secretary to conduct a survey to identify current State standards relating to geometric design, traffic control devices, roadside safety, safety appurtenance design, uniform

traffic control devices, and sign legibility and directional clarity for all Federal-aid highways and, not later than 2 years after Dec. 18, 1991, to transmit to Congress a report on the results of the survey and the crashworthiness of traffic lights, traffic signs, guardrails, impact attenuators, concrete barrier treatments, and breakaway utility poles for bridges and roadways currently used by States.

§ 111. Agreements relating to use of and access to rights-of-way—Interstate System

(a) IN GENERAL.—All agreements between the Secretary and the State transportation department for the construction of projects on the Interstate System shall contain a clause providing that the State will not add any points of access to, or exit from, the project in addition to those approved by the Secretary in the plans for such project, without the prior approval of the Secretary. Such agreements shall also contain a clause providing that the State will not permit automotive service stations or other commercial establishments for serving motor vehicle users to be constructed or located on the rights-of-way of the Interstate System. Such agreements may, however, authorize a State or political subdivision thereof to use or permit the use of the airspace above and below the established grade line of the highway pavement for such purposes as will not impair the full use and safety of the highway, as will not require or permit vehicular access to such space directly from such established grade line of the highway, or otherwise interfere in any way with the free flow of traffic on the Interstate System. Nothing in this section, or in any agreement entered into under this section, shall require the discontinuance, obstruction, or removal of any es-

tablishment for serving motor vehicle users on any highway which has been, or is hereafter, designated as a highway or route on the Interstate System (1) if such establishment (A) was in existence before January 1, 1960, (B) is owned by a State, and (C) is operated through concessionaries or otherwise, and (2) if all access to, and exits from, such establishment conform to the standards established for such a highway under this title.

(b) VENDING MACHINES.—Notwithstanding subsection (a), any State may permit the placement of vending machines in rest and recreation areas, and in safety rest areas, constructed or located on rights-of-way of the Interstate System in such State. Such vending machines may only dispense such food, drink, and other articles as the State transportation department determines are appropriate and desirable. Such vending machines may only be operated by the State. In permitting the placement of vending machines, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the “Randolph-Sheppard Act” (20 U.S.C. 107a(a)(5)). The costs of installation, operation, and maintenance of vending machines shall not be eligible for Federal assistance under this title.

(c) MOTORIST CALL BOXES.—

(1) IN GENERAL.—Notwithstanding subsection (a), a State may permit the placement of motorist call boxes on rights-of-way of the National Highway System. Such motorist call boxes may include the identification and sponsorship logos of such call boxes.

(2) SPONSORSHIP LOGOS.—

(A) APPROVAL BY STATE AND LOCAL AGENCIES.—All call box installations displaying sponsorship logos under this subsection shall be approved by the highway agencies having jurisdiction of the highway on which they are located.

(B) SIZE ON BOX.—A sponsorship logo may be placed on the call box in a dimension not to exceed the size of the call box or a total dimension in excess of 12 inches by 18 inches.

(C) SIZE ON IDENTIFICATION SIGN.—Sponsorship logos in a dimension not to exceed 12 inches by 30 inches may be displayed on a call box identification sign affixed to the call box post.

(D) SPACING OF SIGNS.—Sponsorship logos affixed to an identification sign on a call box post may be located on the rights-of-way at intervals not more frequently than 1 per every 5 miles.

(E) DISTRIBUTION THROUGHOUT STATE.—Within a State, at least 20 percent of the call boxes displaying sponsorship logos shall be located on highways outside of urbanized areas with a population greater than 50,000.

(3) NONSAFETY HAZARDS.—The call boxes and their location, posts, foundations, and mountings shall be consistent with requirements of the Manual on Uniform Traffic Control Devices or any requirements deemed necessary by the Secretary to assure that the call boxes shall not be a safety hazard to motorists.

1978—Pub. L. 95-599 inserted provision listing situations which would not require the discontinuance, obstruction, or removal of any establishment for serving motor vehicle users.

1961—Pub. L. 87-61 substituted “to use or permit the use of the airspace above and below the established grade line of the highway pavement for such purposes as will not impair the full use and safety of the highway, as will not require or permit vehicular access to such space directly from such established grade line of the highway, or otherwise interfere” for “to use the airspace above and below the established grade line of the highway pavement for the parking of motor vehicles provided such use does not interfere”.

VENDING MACHINES; PLACEMENT IN REST, RECREATION, AND SAFETY REST AREAS; STATE OPERATION OF MACHINES

Pub. L. 97-424, title I, §111, Jan. 6, 1983, 96 Stat. 2106, provided that notwithstanding section 111 of this title before Oct. 1, 1983, any State could permit placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of National System of Interstate and Defense Highways [now Dwight D. Eisenhower System of Interstate and Defense Highways] in such State. Such vending machines could only dispense such food, drink, and other articles as the State highway department determined were appropriate and desirable. Such vending machines could only be operated by the State. In permitting the placement of vending machines under this section, the State had to give priority to vending machines which were operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, known as the Randolph-Sheppard Act (20 U.S.C. 107a(a)(5)).

DEMONSTRATION PROJECT FOR VENDING MACHINES IN REST AND RECREATION AREAS

Section 153 of Pub. L. 95-599 authorized Secretary of Transportation to implement a demonstration project respecting placement of vending machines in rest and recreation areas and to report not later than two years after Nov. 6, 1978, on results of such project.

REVISION OF AGREEMENTS RELATING TO UTILIZATION OF SPACE ON RIGHTS-OF-WAY

Section 104(b) of Pub. L. 87-61 authorized Secretary of Commerce [now Transportation], on application, to revise any agreement made prior to June 29, 1961, to extent that such agreement relates to utilization of space on rights-of-way on National System of Interstate and Defense Highways [now Dwight D. Eisenhower System of Interstate and Defense Highways] to conform to section 111 of this title as amended by subsection (a).

§ 112. Letting of contracts

(a) In all cases where the construction is to be performed by the State transportation department or under its supervision, a request for submission of bids shall be made by advertisement

unless some other method is approved by the Secretary. The Secretary shall require such plans and specifications and such methods of bidding as shall be effective in securing competition.

(b) BIDDING REQUIREMENTS.—

(1) IN GENERAL.—Subject to paragraphs (2) and (3), construction of each project, subject to the provisions of subsection (a) of this section, shall be performed by contract awarded by competitive bidding, unless the State transportation department demonstrates, to the satisfaction of the Secretary, that some other method is more cost effective or that an emergency exists. Contracts for the construction of each project shall be awarded only on the basis of the lowest responsive bid submitted by a bidder meeting established criteria of responsibility. No requirement or obligation shall be imposed as a condition precedent to the award of a contract to such bidder for a project, or to the Secretary's concurrence in the award of a contract to such bidder, unless such requirement or obligation is otherwise lawful and is specifically set forth in the advertised specifications.

(2) CONTRACTING FOR ENGINEERING AND DESIGN SERVICES.—

(A) GENERAL RULE.—Subject to paragraph (3), each contract for program management, construction management, feasibility studies, preliminary engineering, design, engineering, surveying, mapping, or architectural related services with respect to a project subject to the provisions of subsection (a) of this section shall be awarded in the same manner as a contract for architectural and engineering services is negotiated under chapter 11 of title 40 or equivalent State qualifications-based requirements.

(B) APPLICABILITY.—

(i) IN A COMPLYING STATE.—If, on the date of the enactment of this paragraph, the services described in subparagraph (A) may be awarded in a State in the manner described in subparagraph (A), subparagraph (A) shall apply in such State beginning on such date of enactment.

(ii) IN A NONCOMPLYING STATE.—In the case of any other State, subparagraph (A) shall apply in such State beginning on the earlier of (I) August 1, 1989, or (II) the 10th day following the close of the 1st regular session of the legislature of a State which begins after the date of the enactment of this paragraph.

If the Secretary determines that the legislature of the State did not convene and adjourn a full regular session during such 1-year period, the Secretary may extend such 1-year period until the adjournment of the next regular session of the legislature.

(d) No contract awarded by competitive bidding pursuant to subsection (b) of this section, and subject to the provisions of this section, shall be entered into by any State transportation department or local subdivision of the State without compliance with the provisions of this section, and without the prior concurrence of the Secretary in the award thereof.

(B) the applicant is willing and able to—

(i) obligate the funds within 1 year of the date the funds are made available;

(C) any segments that become part of the Interstate System under section 1105(e)(5) of the Intermodal Surface Transportation Efficiency Act of 1991.

(2) TOLL ROADS.—The Secretary may approve a project pursuant to this subsection on a toll road only if such road is subject to a Secretarial agreement provided for in section 129 or continued in effect by section 1012(d) of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1939) and not voided by the Secretary under section 120(c) of the Surface Transportation and Uniform Relocation Assistance Act of 1987 (101 Stat. 159).

“(1) STUDY.—The Secretary shall conduct, in cooperation with States and affected metropolitan planning organizations, a study to determine—

“(A) the expected condition of the Interstate System over the next 10 years and the needs of States and metropolitan planning organizations to reconstruct and improve the Interstate System;

“(B) the resources necessary to maintain and improve the Interstate System; and

“(C) the means to ensure that the Nation’s surface transportation program can—

“(i) address the needs identified in subparagraph (A); and

“(ii) allow for States to address any extraordinary needs.

“(2) REPORT.—Not later than January 1, 2000, the Secretary shall transmit to Congress a report on the results of the study.”

GUIDANCE TO STATES

Section 1009(c) of Pub. L. 102-240 provided that: "The Secretary shall develop and make available to the States criteria for determining—

"(1) what share of any project funded under section 119 of title 23, United States Code, is attributable to the expansion of the capacity of an Interstate highway or bridge; and

"(2) what constitutes adequate maintenance of the Interstate System for the purposes of section 119(f)(1) of title 23, United States Code."

INNOVATIVE TECHNOLOGIES

Section 142 of Pub. L. 97-424 provided that:

"(a) The Congress hereby finds and declares that it is in the national interest to encourage and promote utilization by the States of highway and bridge surfacing, resurfacing, or restoration materials which are produced from recycled materials or which contain asphalt additives to strengthen the materials. Such materials conserve energy and reduce the cost of resurfacing or restoring our highways.

"(b) The Secretary of Transportation is hereby authorized for each of the fiscal years through September 30, 1985, to increase the Federal share as provided in sections 119, 120, and 144 of title 23, United States Code, by 5 per centum of any project submitted by the State highway departments which contains in the plans, specifications, and estimates submitted pursuant to section 106, of title 23, United States Code, the use of the materials described in subsection (a). To be eligible for such supplemental Federal assistance, significant amounts of asphalt additives or recycled materials must be used in each project approved by the Secretary.

"(c) The Secretary shall establish a procedure within ninety days of the date of enactment of this Act [Jan. 6, 1983] for increasing the Federal share under this section."

§ 120. Federal share payable

(a) INTERSTATE SYSTEM PROJECTS.—

(1) IN GENERAL.—Except as otherwise provided in this chapter, the Federal share payable on account of any project on the Interstate System (including a project to add high occupancy vehicle lanes and a project to add auxiliary lanes but excluding a project to add any other lanes) shall be 90 percent of the total cost thereof, plus a percentage of the remaining 10 percent of such cost in any State containing unappropriated and unreserved public lands and nontaxable Indian lands, individual and tribal, exceeding 5 percent of the total area of all lands therein, equal to the percentage that the area of such lands in such State is of its total area; except that such Federal share payable on any project in any State shall not exceed 95 percent of the total cost of such project.

(2) STATE-DETERMINED LOWER FEDERAL SHARE.—In the case of any project subject to paragraph (1), a State may determine a lower Federal share than the Federal share determined under such paragraph.

(b) OTHER PROJECTS.—Except as otherwise provided in this title, the Federal share payable on account of any project or activity carried out under this title (other than a project subject to subsection (a)) shall be—

(1) 80 percent of the cost thereof, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved)

exclusive of national forests and national parks and monuments, exceeding 5 percent of the total area of all lands therein, the Federal share, for purposes of this chapter, shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State, is of its total area; or

(2) 80 percent of the cost thereof, except that in the case of any State containing nontaxable Indian lands, individual and tribal, public domain lands (both reserved and unreserved), national forests, and national parks and monuments, the Federal share, for purposes of this chapter, shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area;

except that the Federal share payable on any project in a State shall not exceed 95 percent of the total cost of any such project. In any case where a State elects to have the Federal share provided in paragraph (2) of this subsection, the State must enter into an agreement with the Secretary covering a period of not less than 1 year, requiring such State to use solely for purposes eligible for assistance under this title (other than paying its share of projects approved under this title) during the period covered by such agreement the difference between the State's share as provided in paragraph (2) and what its share would be if it elected to pay the share provided in paragraph (1) for all projects subject to such agreement. In the case of any project subject to this subsection, a State may determine a lower Federal share than the Federal share determined under the preceding sentences of this subsection.

(c) INCREASED FEDERAL SHARE FOR CERTAIN SAFETY PROJECTS.—The Federal share payable on account of any project for traffic control signalization, safety rest areas, pavement marking, commuter carpooling and vanpooling, rail-highway crossing closure, or installation of traffic signs, traffic lights, guardrails, impact attenuators, concrete barrier endtreatments, break-away utility poles, or priority control systems for emergency vehicles or transit vehicles at signalized intersections may amount to 100 percent of the cost of construction of such projects; except that not more than 10 percent of all sums apportioned for all the Federal-aid systems for any fiscal year in accordance with section 104 of this title shall be used under this subsection. In this subsection, the term "safety rest area" means an area where motor vehicle operators can park their vehicles and rest, where food, fuel, and lodging services are not available, and that is located on a segment of highway with respect to which the Secretary determines there is a shortage of public and private areas at which motor vehicle operators can park their vehicles and rest.

(d) The Secretary may rely on a statement from the Secretary of the Interior as to the area of the lands referred to in subsections (a) and (b) of this section. The Secretary of the Interior is authorized and directed to provide such statement annually.

(e) EMERGENCY RELIEF.—The Federal share payable on account of any repair or reconstruc-

tion provided for by funds made available under section 125 of this title on account of any project on a Federal-aid highway, including the Interstate System, shall not exceed the Federal share payable on a project on such system¹ as provided in subsections (a) and (b) of this section; except that (1) the Federal share payable for eligible emergency repairs to minimize damage, protect facilities, or restore essential traffic accomplished within 180 days after the actual occurrence of the natural disaster or catastrophic failure may amount to 100 percent of the costs thereof; and (2) the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 percent of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, "a comparable facility" shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.

(f) The Secretary is authorized to cooperate with the State transportation departments and with the Department of the Interior in the construction of Federal-aid highways within Indian reservations and national parks and monuments under the jurisdiction of the Department of the Interior and to pay the amount assumed therefor from the funds apportioned in accordance with section 104 of this title to the State wherein the reservations and national parks and monuments are located.

(g) At the request of any State, the Secretary may from time to time enter into agreements with such State to reimburse the State for the Federal share of the costs of preliminary and construction engineering at an agreed percentage of actual construction costs for each project, in lieu of the actual engineering costs for such project. The Secretary shall annually review each such agreement to insure that such percentage reasonably represents the engineering costs actually incurred by such State.

(h) Notwithstanding any other provision of this section or of this title, the Federal share payable on account of any project under this title in the Virgin Islands, Guam, American Samoa, or the Commonwealth of the Northern Mariana Islands shall be 100 per centum of the total cost of the project.

(i) INCREASED NON-FEDERAL SHARE.—Notwithstanding any other provision of this title and subject to such criteria as the Secretary may establish, a State may contribute an amount in excess of the non-Federal share of a project under this title so as to decrease the Federal share payable on such project.

(j) CREDIT FOR NON-FEDERAL SHARE.—

(1) ELIGIBILITY.—A State may use as a credit toward the non-Federal share requirement for any funds made available to carry out this title (other than the emergency relief program

authorized by section 125) or chapter 53 of title 49 toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi-public, or private agencies shall have built, improved, or maintained such facilities without Federal funds.

(2) MAINTENANCE OF EFFORT.—

(A) IN GENERAL.—The credit for any non-Federal share provided under this subsection shall not reduce nor replace State funds required to match Federal funds for any program under this title.

(B) CONDITION ON RECEIPT OF CREDIT.—To receive a credit under paragraph (1) for a fiscal year, a State shall enter into such agreement as the Secretary may require to ensure that the State will maintain its non-Federal transportation capital expenditures in such fiscal year at or above the average level of such expenditures for the preceding 3 fiscal years; except that if, for any 1 of the preceding 3 fiscal years, the non-Federal transportation capital expenditures of the State were at a level that was greater than 130 percent of the average level of such expenditures for the other 2 of the preceding 3 fiscal years, the agreement shall ensure that the State will maintain its non-Federal transportation capital expenditures in the fiscal year of the credit at or above the average level of such expenditures for the other 2 fiscal years.

(C) TRANSPORTATION CAPITAL EXPENDITURES DEFINED.—In subparagraph (B), the term "non-Federal transportation capital expenditures" includes any payments made by the State for issuance of transportation-related bonds.

(3) TREATMENT.—

(A) LIMITATION ON LIABILITY.—Use of a credit for a non-Federal share under this subsection that is received from a public, quasi-public, or private agency—

(i) shall not expose the agency to additional liability, additional regulation, or additional administrative oversight; and

(ii) shall not subject the agency to any additional Federal design standards or laws (including regulations) as a result of providing the non-Federal share other than those to which the agency is already subject.

(B) CHARTERED MULTISTATE AGENCIES.—When a credit that is received from a chartered multistate agency is applied to a non-Federal share under this subsection, such credit shall be applied equally to all charter States.

(k) USE OF FEDERAL LAND MANAGEMENT AGENCY FUNDS.—Notwithstanding any other provision of law, the funds appropriated to any Federal land management agency may be used to pay the non-Federal share of the cost of any Federal-aid highway project the Federal share of which is funded under section 104.

(l) USE OF FEDERAL LANDS HIGHWAYS PROGRAM FUNDS.—Notwithstanding any other provision of law, the funds authorized to be appropriated to

carry out the Federal lands highways program under section 204 may be used to pay the non-Federal share of the cost of any project that is funded under section 104 and that provides access to or within Federal or Indian lands.

Eisenhower System of Interstate and Defense Highways within its boundaries by vehicles with a weight of twenty thousand pounds carried on any one axle, including enforcement tolerances, or with a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances, or a gross weight of at least eighty thousand pounds for vehicle combinations of five axles or more. However, the maximum gross weight to be allowed by any State for vehicles using The Dwight D. Eisenhower System of Interstate and Defense Highways shall be twenty thousand pounds carried on one axle, including enforcement tolerances, and a tandem axle weight of thirty-four thousand pounds, including enforcement tolerances and with an overall maximum gross weight, including enforcement tolerances, on a group of two or more consecutive axles produced by application of the following formula:

$$W=500 \left(\frac{LN}{N-1} + 12N + 36 \right)$$

where W equals overall gross weight on any group of two or more consecutive axles to the nearest five hundred pounds, L equals distance in feet between the extreme of any group of two or more consecutive axles, and N equals number of axles in group under consideration, except that two consecutive sets of tandem axles may carry a gross load of thirty-four thousand pounds each providing the overall distance between the first and last axles of such consecutive sets of tandem axles (1) is thirty-six feet or more, or (2) in the case of a motor vehicle hauling any tank trailer, dump trailer, or ocean transport container before September 1, 1989, is 30 feet or more: *Provided*, That such overall gross weight may not exceed eighty thousand pounds, including all enforcement tolerances, except for vehicles using Interstate Route 29 between Sioux City, Iowa, and the border between Iowa and South Dakota or vehicles using Interstate Route 129 between Sioux City, Iowa, and the border between Iowa and Nebraska, and except for those vehicles and loads which cannot be easily dismantled or divided and which have been issued special permits in accordance with applicable State laws, or the corresponding maximum weights permitted for vehicles using the public highways of such State under laws or regulations established by appropriate State authority in effect on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles on any vehicle (other than a vehicle comprised of a motor vehicle hauling any tank trailer, dump trailer, or ocean transport container on or after September 1, 1989), on the date of enactment of the Federal-Aid Highway Amendments of 1974, whichever is the greater. Any amount which is withheld from apportionment to any State pursuant to the foregoing provisions shall lapse if not released and obligated within the availability period specified in section 118(b)(1)¹ of this title. This section shall not be construed to deny apportionment to any State allowing the operation within such State of any vehicles or combina-

tions thereof, other than vehicles or combinations subject to subsection (d) of this section, which the State determines could be lawfully operated within such State on July 1, 1956, except in the case of the overall gross weight of any group of two or more consecutive axles, on the date of enactment of the Federal-Aid Highway Amendments of 1974. With respect to the State of Hawaii, laws or regulations in effect on February 1, 1960, shall be applicable for the purposes of this section in lieu of those in effect on July 1, 1956. With respect to Interstate Routes 89, 93, and 95 in the State of New Hampshire, State laws (including regulations) concerning vehicle weight limitations that were in effect on January 1, 1987, and are applicable to State highways other than the Interstate System, shall be applicable in lieu of the requirements of this subsection. With respect to that portion of the Maine Turnpike designated Interstate Route 95 and 495, and that portion of Interstate Route 95 from the southern terminus of the Maine Turnpike to the New Hampshire State line, laws (including regulations) of the State of Maine concerning vehicle weight limitations that were in effect on October 1, 1995, and are applicable to State highways other than the Interstate System, shall be applicable in lieu of the requirements of this subsection.

have been put forth with respect to each issue and best estimates of effects on pavement, bridges, highway revenue and cost responsibility, and highway safety, and changes in transportation costs and other measures of productivity for various segments of the trucking industry resulting from adoption of each of the positions: (1) elimination of existing, grandfather provisions of 23 U.S.C. 127 which allow higher axle loads and gross vehicle weights than the 20,000-pound single axle load limit, 34,000-pound tandem axle load limit, and 80,000-pound gross vehicle weight limit maximums authorized by Pub. L. 93-643, (2) analysis of alternative methods of determining gross vehicle weight limit and axle loadings for all types of motor carrier vehicles, (3) analysis of the bridge formula contained in 23 U.S.C. 127 in view of current vehicle configurations, pavement and bridge stresses in accord with 1986 design and construction practices, and existing bridges on and off the Interstate System, (4) establishment of nationwide policy regarding the provisions of 'reasonable access' to the National Network for combination vehicles established pursuant to Pub. L. 97-424, and (5) recommendation of appropriate treatment for specialized hauling vehicles which do not comply with the existing Federal bridge formula and submit a final report to Secretary and Congress, not later than 30 months after appropriate arrangements were entered into.

§ 128. Public hearings

(a) Any State transportation department which submits plans for a Federal-aid highway project involving the by passing of or, going through any city, town, or village, either incorporated or unincorporated, shall certify to the Secretary that it has had public hearings, or has afforded the opportunity for such hearings, and has considered the economic and social effects of such a location, its impact on the environment, and its consistency with the goals and objectives of such urban planning as has been promulgated by the community. Any State transportation department which submits plans for an Interstate System project shall certify to the Secretary that it has had public hearings at a convenient location, or has afforded the opportunity for such hearings for the purpose of enabling persons in rural areas through or contiguous to whose property the highway will pass to express any objections they may have to the proposed locations of such highway. Such certification shall be accompanied by a report which indicates the consideration given to the economic, social, environmental and other effects of the plan or highway location or design and various alternatives which were raised during the hearing or which were otherwise considered.

(b) When hearings have been held under subsection (a), the State transportation department shall submit a copy of the transcript of said hearings to the Secretary, together with the certification and report.

EFFECTIVE DATE OF 1968 AMENDMENT

Amendment by Pub. L. 90-495 effective Aug. 23, 1968, see section 37 of Pub. L. 90-495, set out as a note under section 101 of this title.

§ 129. Toll roads, bridges, tunnels, and ferries

(a) BASIC PROGRAM.—

(1) AUTHORIZATION FOR FEDERAL PARTICIPATION.—Notwithstanding section 301 of this title and subject to the provisions of this section, the Secretary shall permit Federal participation in—

(A) initial construction of a toll highway, bridge, or tunnel (other than a highway, bridge, or tunnel on the Interstate System) or approach thereto;

(B) reconstructing, resurfacing, restoring, and rehabilitating a toll highway, bridge, or tunnel (including a toll highway, bridge, or tunnel subject to an agreement entered into under this section or section 119(e) as in effect on the day before the date of the enactment of the Intermodal Surface Transportation Efficiency Act of 1991) or approach thereto;

(C) reconstruction or replacement of a toll-free bridge or tunnel and conversion of the bridge or tunnel to a toll facility;

(D) reconstruction of a toll-free Federal-aid highway (other than a highway on the Interstate System) and conversion of the highway to a toll facility; and

(E) preliminary studies to determine the feasibility of a toll facility for which Federal participation is authorized under subparagraph (A), (B), (C), or (D);

on the same basis and in the same manner as in the construction of free highways under this chapter.

(2) OWNERSHIP.—Each highway, bridge, tunnel, or approach thereto constructed under this subsection must—

(A) be publicly owned, or

(B) be privately owned if the public authority having jurisdiction over the highway, bridge, tunnel, or approach has entered into a contract with a private person or persons to design, finance, construct, and operate the facility and the public authority will be responsible for complying with all applicable requirements of this title with respect to the facility.

(3) LIMITATIONS ON USE OF REVENUES.—Before the Secretary may permit Federal participation under this subsection in construction of a highway, bridge, or tunnel located in a State, the public authority (including the State transportation department) having jurisdiction over the highway, bridge, or tunnel must enter into an agreement with the Secretary which provides that all toll revenues received from operation of the toll facility will be used first for debt service, for reasonable return on investment of any private person financing the project, and for the costs necessary for the proper operation and maintenance of the toll facility, including reconstruction, resurfacing, restoration, and rehabilitation. If the State certifies annually that the tolled facility is being adequately maintained, the State may use any toll revenues in excess of amounts required under the preceding sentence for any purpose for which Federal funds may be obligated by a State under this title.

(4) SPECIAL RULE FOR FUNDING.—In the case of a toll highway, bridge, or tunnel under the jurisdiction of a public authority of a State (other than the State transportation department), upon request of the State transportation department and subject to such terms and conditions as such department and public authority may agree, the Secretary shall reimburse such public authority for the Federal share of the costs of construction of the project carried out on the toll facility under this subsection in the same manner and to the same extent as such department would be reimbursed if such project was being carried out by such department. The reimbursement of funds under this paragraph shall be from sums apportioned to the State under this chapter and available for obligations on projects on the Federal-aid system in such State on which the project is being carried out.

(5) LIMITATION ON FEDERAL SHARE.—The Federal share payable for a project described in paragraph (1) shall be a percentage determined by the State but not to exceed 80 percent.

(6) MODIFICATIONS.—If a public authority (including a State transportation department) having jurisdiction over a toll highway, bridge, or tunnel subject to an agreement under this section or section 119(e), as in effect on the day before the effective date of title I of the Intermodal Surface Transportation Efficiency Act of 1991, requests modification of such agreement, the Secretary shall modify such agreement to allow the continuation of tolls in accordance with paragraph (3) without repayment of Federal funds.

(7) LOANS.—

(A) IN GENERAL.—A State may loan to a public or private entity constructing or pro-

posing to construct under this section a toll facility or non-toll facility with a dedicated revenue source an amount equal to all or part of the Federal share of the cost of the project if the project has a revenue source specifically dedicated to it. Dedicated revenue sources for non-toll facilities include excise taxes, sales taxes, motor vehicle use fees, tax on real property, tax increment financing, and such other dedicated revenue sources as the Secretary determines appropriate.

(B) COMPLIANCE WITH FEDERAL LAWS.—As a condition of receiving a loan under this paragraph, the public or private entity that receives the loan shall ensure that the project will be carried out in accordance with this title and any other applicable Federal law, including any applicable provision of a Federal environmental law.

(C) SUBORDINATION OF DEBT.—The amount of any loan received for a project under this paragraph may be subordinated to any other debt financing for the project.

(D) OBLIGATION OF FUNDS LOANED.—Funds loaned under this paragraph may only be obligated for projects under this paragraph.

(E) REPAYMENT.—The repayment of a loan made under this paragraph shall commence not later than 5 years after date on which the facility that is the subject of the loan is open to traffic.

(F) TERM OF LOAN.—The term of a loan made under this paragraph shall not exceed 30 years from the date on which the loan funds are obligated.

(G) INTEREST.—A loan made under this paragraph shall bear interest at or below market interest rates, as determined by the State, to make the project that is the subject of the loan feasible.

(H) REUSE OF FUNDS.—Amounts repaid to a State from a loan made under this paragraph may be obligated—

(i) for any purpose for which the loan funds were available under this title; and

(ii) for the purchase of insurance or for use as a capital reserve for other forms of credit enhancement for project debt in order to improve credit market access or to lower interest rates for projects eligible for assistance under this title.

(I) GUIDELINES.—The Secretary shall establish procedures and guidelines for making loans under this paragraph.

(8) INITIAL CONSTRUCTION DEFINED.—For purposes of this subsection, the term “initial construction” means the construction of a highway, bridge, or tunnel at any time before it is open to traffic and does not include any improvement to a highway, bridge, or tunnel after it is open to traffic.

(b) Notwithstanding the provisions of section 301 of this title, the Secretary may permit Federal participation under this title in the construction of a project constituting an approach to a ferry, whether toll or free, the route of which is a public road and has not been designated as a route on the Interstate System. Such ferry may be either publicly or privately

owned and operated, but the operating authority and the amount of fares charged for passage shall be under the control of a State agency or official, and all revenues derived from publicly owned or operated ferries shall be applied to payment of the cost of construction or acquisition thereof, including debt service, and to actual and necessary costs of operation, maintenance, repair, and replacement.

(c) Notwithstanding section 301 of this title, the Secretary may permit Federal participation under this title in the construction of ferry boats and ferry terminal facilities, whether toll or free, subject to the following conditions:

(1) It is not feasible to build a bridge, tunnel, combination thereof, or other normal highway structure in lieu of the use of such ferry.

(2) The operation of the ferry shall be on a route classified as a public road within the State and which has not been designated as a route on the Interstate System. Projects under this subsection may be eligible for both ferry boats carrying cars and passengers and ferry boats carrying passengers only.

(3) Such ferry boat or ferry terminal facility shall be publicly owned or operated or majority publicly owned if the Secretary determines with respect to a majority publicly owned ferry or ferry terminal facility that such ferry boat or ferry terminal facility provides substantial public benefits.

(4) The operating authority and the amount of fares charged for passage on such ferry shall be under the control of the State or other public entity, and all revenues derived therefrom shall be applied to actual and necessary costs of operation, maintenance, and¹ repair, debt service, negotiated management fees, and, in the case of a privately operated toll ferry, for a reasonable rate of return.

(5) Such ferry may be operated only within the State (including the islands which comprise the State of Hawaii and the islands which comprise the Commonwealth of Puerto Rico) or between adjoining States or between a point in a State and a point in the Dominion of Canada. Except with respect to operations between the islands which comprise the State of Hawaii, operations between the islands which comprise the Commonwealth of Puerto Rico, operations between a point in a State and a point in the Dominion of Canada, and operations between any two points in Alaska and between Alaska and Washington, including stops at appropriate points in the Dominion of Canada, no part of such ferry operation shall be in any foreign or international waters.

(6) No such ferry shall be sold, leased, or otherwise disposed of without the approval of the Secretary. The Federal share of any proceeds from such a disposition shall be credited to the unprogrammed balance of Federal-aid highway funds of the same class last apportioned to such State. Any amount so credited shall be in addition to all other funds then apportioned to such State and available for expenditure in accordance with the provisions of this title.

Subsec. (e). Pub. L. 102-240, §1012(c)(1), struck out subsec. (e) which authorized Secretary to permit Federal participation in reconstruction and improvement of two-lane toll road designated as part of the Interstate System before June 30, 1973, as necessary to bring such road to standards of Interstate System, provided that toll road authority agreed that no new indebtedness to be liquidated by tolls was to be incurred, that all tolls be used for operation and maintenance and to repay outstanding bonds, and that, upon liquidation of such bonds, the road was to become free to public.

Subsec. (k). Pub. L. 102-240, §1012(c)(1), struck out subsec. (k) which required operators of toll roads, tunnels, ferries and bridges on Federal-aid highway system to biennially certify to Governor of State that facilities were adequately maintained and that operator had ability to fund such facilities that were not adequately maintained without using Federal-aid highway funds, and which required Governor of each State to report biennially to Secretary on facilities required to so certify.

STUDY TO DETERMINE EXTENT OF BONDED INDEBTEDNESS OF STATES FOR CONSTRUCTION OF TOLL ROADS INCORPORATED INTO INTERSTATE SYSTEM

Section 164 of Pub. L. 95-599, as amended by Pub. L. 96-106, §16, Nov. 19, 1979, 93 Stat. 798, directed Secretary of Transportation to report not later than July 1, 1980, respecting extent of outstanding bonded indebtedness for each State as of Jan. 1, 1979, incurred by each State or public authority prior to June 29, 1956, for road construction or portions incorporated within Interstate System, and methods of allocating bonded indebtedness and removal of toll provisions.

costs, but in no event shall tolls be collected after date of maturity of those bonds outstanding on the date of enactment of this section [Dec. 31, 1970] issued for construction of such turnpike having the latest maturity date.”

§ 130. Railway-highway crossings

(a) Subject to section 120 and subsection (b) of this section, the entire cost of construction of projects for the elimination of hazards of railway-highway crossings, including the separation or protection of grades at crossings, the reconstruction of existing railroad grade crossing structures, and the relocation of highways to eliminate grade crossings, may be paid from sums apportioned in accordance with section 104 of this title. In any case when the elimination of the hazards of a railway-highway crossing can be effected by the relocation of a portion of a railway at a cost estimated by the Secretary to be less than the cost of such elimination by one of the methods mentioned in the first sentence of this section, then the entire cost of such relocation project, subject to section 120 and subsection (b) of this section, may be paid from sums apportioned in accordance with section 104 of this title.

(b) The Secretary may classify the various types of projects involved in the elimination of hazards of railway-highway crossings, and may set for each such classification a percentage of the costs of construction which shall be deemed to represent the net benefit to the railroad or railroads for the purpose of determining the railroad's share of the cost of construction. The percentage so determined shall in no case exceed 10 per centum. The Secretary shall determine the appropriate classification of each project.

(c) Any railroad involved in a project for the elimination of hazards of railway-highway crossings paid for in whole or in part from sums made available for expenditure under this title, or prior Acts, shall be liable to the United States for the net benefit to the railroad determined under the classification of such project made pursuant to subsection (b) of this section. Such liability to the United States may be discharged by direct payment to the State transportation department of the State in which the project is located, in which case such payment shall be credited to the cost of the project. Such payment may consist in whole or in part of materials and labor furnished by the railroad in connection with the construction of such project. If any such railroad fails to discharge such liability within a six-month period after completion of the project, it shall be liable to the United States for its share of the cost, and the Secretary shall request the Attorney General to institute proceedings against such railroad for the recovery of the amount for which it is liable under this subsection. The Attorney General is authorized to bring such proceedings on behalf of the United States, in the appropriate district court of the United States, and the United States shall be entitled in such proceedings to recover such sums as it is considered and adjudged by the court that such railroad is liable for in the premises. Any amounts recovered by the United States under this subsection shall be credited to miscellaneous receipts.

(d) SURVEY AND SCHEDULE OF PROJECTS.—Each State shall conduct and systematically maintain a survey of all highways to identify those railroad crossings which may require separation, relocation, or protective devices, and establish and implement a schedule of projects for this purpose. At a minimum, such a schedule shall provide signs for all railway-highway crossings.

(e) FUNDS FOR PROTECTIVE DEVICES.—At least $\frac{1}{2}$ of the funds authorized for and expended under this section shall be available for the installation of protective devices at railway-highway crossings. Sums authorized to be appropriated to carry out this section shall be available for obligation in the same manner as funds apportioned under section 104(b)(1) of this title.

(f) APPORTIONMENT.—Twenty-five percent of the funds authorized to be appropriated to carry out this section shall be apportioned to the States in the same manner as sums are apportioned under section 104(b)(2) of this title, 25 percent of such funds shall be apportioned to the States in the same manner as sums are apportioned under section 104(b)(6)¹ of this title, and 50 percent of such funds shall be apportioned to the States in the ratio that total railway-highway crossings in each State bears to the total of such crossings in all States. The Federal share payable on account of any project financed with funds authorized to be appropriated to carry out this section shall be 90 percent of the cost thereof.

(g) ANNUAL REPORT.—Each State shall report to the Secretary not later than December 30 of each year on the progress being made to implement the railway-highway crossings program authorized by this section and the effectiveness of such improvements. Each State report shall contain an assessment of the costs of the various treatments employed and subsequent accident experience at improved locations. The Secretary shall submit a report to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives not later than April 1 of each year, on the progress being made by the State in implementing projects to improve railway-highway crossings. The report shall include, but not be limited to, the number of projects undertaken, their distribution by cost range, road system, nature of treatment, and subsequent accident experience at improved locations. In addition, the Secretary's report shall analyze and evaluate each State program, identify any State found not to be in compliance with the schedule of improvements required by subsection (d) and include recommendations for future implementation of the railroad highway² crossings program.

(h) USE OF FUNDS FOR MATCHING.—Funds authorized to be appropriated to carry out this section may be used to provide a local government with funds to be used on a matching basis when State funds are available which may only be spent when the local government produces matching funds for the improvement of railway-highway crossings.

(i) INCENTIVE PAYMENTS FOR AT-GRADE CROSSING CLOSURES.—

(1) IN GENERAL.—Notwithstanding any other provision of this section and subject to paragraphs (2) and (3), a State may, from sums available to the State under this section, make incentive payments to local governments in the State upon the permanent closure by such governments of public at-grade railway-highway crossings under the jurisdiction of such governments.

(2) INCENTIVE PAYMENTS BY RAILROADS.—A State may not make an incentive payment under paragraph (1) to a local government with respect to the closure of a crossing unless the railroad owning the tracks on which the crossing is located makes an incentive payment to the government with respect to the closure.

(3) AMOUNT OF STATE PAYMENT.—The amount of the incentive payment payable to a local government by a State under paragraph (1) with respect to a crossing may not exceed the lesser of—

- (A) the amount of the incentive payment paid to the government with respect to the crossing by the railroad concerned under paragraph (2); or
- (B) \$7,500.

(4) USE OF STATE PAYMENTS.—A local government receiving an incentive payment from a State under paragraph (1) shall use the amount of the incentive payment for transportation safety improvements.

(j) BICYCLE SAFETY.—In carrying out projects under this section, a State shall take into account bicycle safety.

§ 131. Control of outdoor advertising

(a) The Congress hereby finds and declares that the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System and the primary system should be controlled in order to protect the public investment in such highways, to promote the safety and recreational value of public travel, and to preserve natural beauty.

(b) Federal-aid highway funds apportioned on or after January 1, 1968, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the primary system of outdoor advertising signs, displays, and devices which are within six hundred and sixty feet of the nearest edge of the right-of-way and visible from the main traveled way of the system, and Federal-aid highway funds apportioned on or after January 1, 1975, or after the expiration of the next regular session of the State legislature, whichever is later, to any State which the Secretary determines has not made provision for effective control of the erection and maintenance along the Interstate System and the primary system of those additional outdoor advertising signs, displays, and devices which are more than six hundred and sixty feet off the nearest edge of the right-of-way, located outside of urban areas, visible from the main traveled way of the system, and erected with the purpose of their message being read from such main traveled way, shall be reduced by amounts equal to 10 per centum of the amounts which would otherwise be apportioned to such State under section 104 of this title, until such time as such State shall provide for such effective control. Any amount which is withheld from apportionment to any State hereunder shall be re-apportioned to the other States. Whenever he determines it to be in the public interest, the Secretary may suspend, for such periods as he deems necessary, the application of this subsection to a State.

(c) Effective control means that such signs, displays, or devices after January 1, 1968, if located within six hundred and sixty feet of the right-of-way and, on or after July 1, 1975, or after the expiration of the next regular session of the State legislature, whichever is later, if located beyond six hundred and sixty feet of the right-of-way located outside of urban areas, visible from the main traveled way of the system, and erected with the purpose of their message being read from such main traveled way, shall, pursuant to this section, be limited to (1) directional and official signs and notices, which signs and notices shall include, but not be limited to, signs and notices pertaining to natural wonders, scenic and historical attractions, which are required or authorized by law, which shall conform to national standards hereby authorized to be promulgated by the Secretary hereunder, which standards shall contain provisions concerning lighting, size, number, and spacing of signs, and such other requirements as may be appropriate to implement this section, (2) signs, displays, and devices advertising the sale or lease of property upon which they are located, (3) signs, displays, and devices, including those which may be changed at reasonable intervals by electronic process or by remote control, advertising activities conducted on the property on which they are located, (4) signs lawfully in existence on October 22, 1965, determined by the State, subject to the approval of the Secretary, to be landmark signs, including signs on farm structures or natural surfaces, or historic or artistic significance the preservation of which would be consistent with the purposes of this section, and (5) signs, displays, and devices advertising the distribution by nonprofit organizations of free coffee to individuals traveling on the Interstate System or the primary system. For the purposes of this subsection, the term "free coffee" shall include coffee for which a donation may be made, but is not required.

(d) In order to promote the reasonable, orderly and effective display of outdoor advertising while remaining consistent with the purposes of this section, signs, displays, and devices whose size, lighting and spacing, consistent with customary use is to be determined by agreement between the several States and the Secretary, may be erected and maintained within six hundred and sixty feet of the nearest edge of the right-of-way within areas adjacent to the Interstate and primary systems which are zoned industrial or commercial under authority of State law, or in unzoned commercial or industrial areas as may be determined by agreement between the several States and the Secretary. The States shall have full authority under their own zoning laws to zone areas for commercial or industrial purposes, and the actions of the States in this regard will be accepted for the purposes of this Act. Whenever a bona fide State, county, or local zoning authority has made a determination of customary use, such determination will be accepted in lieu of controls by agreement in the zoned commercial and industrial areas within the geographical jurisdiction of such authority. Nothing in this subsection shall apply to signs, displays, and devices referred to in clauses (2) and (3) of subsection (c) of this section.

(e) Any sign, display, or device lawfully in existence along the Interstate System or the Federal-aid primary system on September 1, 1965, which does not conform to this section shall not be required to be removed until July 1, 1970. Any other sign, display, or device lawfully erected which does not conform to this section shall not be required to be removed until the end of the fifth year after it becomes nonconforming.

(f) The Secretary shall, in consultation with the States, provide within the rights-of-way for areas at appropriate distances from interchanges on the Interstate System, on which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. The Secretary may also, in consultation with the States, provide within the rights-of-way of the primary system for areas in which signs, displays, and devices giving specific information in the interest of the traveling public may be erected and maintained. Such signs shall conform to national standards to be promulgated by the Secretary.

(g) Just compensation shall be paid upon the removal of any outdoor advertising sign, display, or device lawfully erected under State law and not permitted under subsection (c) of this section, whether or not removed pursuant to or because of this section. The Federal share of such compensation shall be 75 per centum. Such compensation shall be paid for the following:

(A) The taking from the owner of such sign, display, or device of all right, title, leasehold, and interest in such sign, display, or device; and

(B) The taking from the owner of the real property on which the sign, display, or device is located, of the right to erect and maintain such signs, displays, and devices thereon.

(h) All public lands or reservations of the United States which are adjacent to any portion of the Interstate System and the primary system shall be controlled in accordance with the provisions of this section and the national standards promulgated by the Secretary.

(i) In order to provide information in the specific interest of the traveling public, the State transportation departments are authorized to maintain maps and to permit information directories and advertising pamphlets to be made available at safety rest areas. Subject to the approval of the Secretary, a State may also establish information centers at safety rest areas and other travel information systems within the rights-of-way for the purpose of informing the public of places of interest within the State and providing such other information as a State may consider desirable. The Federal share of the cost of establishing such an information center or travel information system shall be that which is provided in section 120 for a highway project on that Federal-aid system to be served by such center or system.

(j) Any State transportation department which has, under this section as in effect on June 30, 1965, entered into an agreement with the Secretary to control the erection and maintenance of outdoor advertising signs, displays, and devices in areas adjacent to the Interstate System shall be entitled to receive the bonus

payments as set forth in the agreement, but no such State transportation department shall be entitled to such payments unless the State maintains the control required under such agreement: *Provided*, That permission by a State to erect and maintain information displays which may be changed at reasonable intervals by electronic process or remote control and which provide public service information or advertise activities conducted on the property on which they are located shall not be considered a breach of such agreement or the control required thereunder. Such payments shall be paid only from appropriations made to carry out this section. The provisions of this subsection shall not be construed to exempt any State from controlling outdoor advertising as otherwise provided in this section.

(k) Subject to compliance with subsection (g) of this section for the payment of just compensation, nothing in this section shall prohibit a State from establishing standards imposing stricter limitations with respect to signs, displays, and devices on the Federal-aid highway systems than those established under this section.

(l) Not less than sixty days before making a final determination to withhold funds from a State under subsection (b) of this section, or to do so under subsection (b) of section 136, or with respect to failing to agree as to the size, lighting, and spacing of signs, displays, and devices or as to unzoned commercial or industrial areas in which signs, displays, and devices may be erected and maintained under subsection (d) of this section, or with respect to failure to approve under subsection (g) of section 136, the Secretary shall give written notice to the State of his proposed determination and a statement of the reasons therefor, and during such period shall give the State an opportunity for a hearing on such determination. Following such hearing the Secretary shall issue a written order setting forth his final determination and shall furnish a copy of such order to the State. Within forty-five days of receipt of such order, the State may appeal such order to any United States district court for such State, and upon the filing of such appeal such order shall be stayed until final judgment has been entered on such appeal. Summons may be served at any place in the United States. The court shall have jurisdiction to affirm the determination of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the United States court of appeals for the circuit in which the State is located and to the Supreme Court of the United States upon certiorari or certification as provided in title 28, United States Code, section 1254. If any part of an apportionment to a State is withheld by the Secretary under subsection (b) of this section or subsection (b) of section 136, the amount so withheld shall not be reapportioned to the other States as long as a suit brought by such State under this subsection is pending. Such amount shall remain available for apportionment in accordance with the final judgment and this subsection. Funds withheld from apportionment and subsequently apportioned or reapportioned under this section shall be available for expendi-

ture for three full fiscal years after the date of such apportionment or reapportionment as the case may be.

(m) There is authorized to be appropriated to carry out the provisions of this section, out of any money in the Treasury not otherwise appropriated, not to exceed \$20,000,000 for the fiscal year ending June 30, 1966, not to exceed \$20,000,000 for the fiscal year ending June 30, 1967, not to exceed \$2,000,000 for the fiscal year ending June 30, 1970, not to exceed \$27,000,000 for the fiscal year ending June 30, 1971, not to exceed \$20,500,000 for the fiscal year ending June 30, 1972, and not to exceed \$50,000,000 for the fiscal year ending June 30, 1973. The provisions of this chapter relating to the obligation, period of availability and expenditure of Federal-aid primary highway funds shall apply to the funds authorized to be appropriated to carry out this section after June 30, 1967. Subject to approval by the Secretary in accordance with the program of projects approval process of section 105,¹ a State may use any funds apportioned to it under section 104 of this title for removal of any sign, display, or device lawfully erected which does not conform to this section.

(n) No sign, display, or device shall be required to be removed under this section if the Federal share of the just compensation to be paid upon removal of such sign, display, or device is not available to make such payment. Funds apportioned to a State under section 104 of this title shall not be treated for purposes of the preceding sentence as being available to the State for making such a payment except to the extent that the State, in its discretion, expends such funds for such a payment.

(o) The Secretary may approve the request of a State to permit retention in specific areas defined by such State of directional signs, displays, and devices lawfully erected under State law in force at the time of their erection which do not conform to the requirements of subsection (c), where such signs, displays, and devices are in existence on the date of enactment of this subsection and where the State demonstrates that such signs, displays, and devices (1) provide directional information about goods and services in the interest of the traveling public, and (2) are such that removal would work a substantial economic hardship in such defined area.

(p) In the case of any sign, display, or device required to be removed under this section prior to the date of enactment of the Federal-Aid Highway Act of 1974, which sign, display, or device was after its removal lawfully relocated and which as a result of the amendments made to this section by such Act is required to be removed, the United States shall pay 100 per centum of the just compensation for such removal (including all relocation costs).

(q)(1) During the implementation of State laws enacted to comply with this section, the Secretary shall encourage and assist the States to develop sign controls and programs which will assure that necessary directional information about facilities providing goods and services in the interest of the traveling public will continue

To this end the Secretary shall restudy and revise as appropriate existing standards for directional signs authorized under subsections 131(c)(1) and 131(f) to develop signs which are functional and esthetically compatible with their surroundings. He shall employ the resources of other Federal departments and agencies, including the National Endowment for the Arts, and employ maximum participation of private industry in the development of standards and systems of signs developed for those purposes.

(2) Among other things the Secretary shall encourage States to adopt programs to assure that removal of signs providing necessary directional information, which also were providing directional information on June 1, 1972, about facilities in the interest of the traveling public, be deferred until all other nonconforming signs are removed.

(r) REMOVAL OF ILLEGAL SIGNS.—

(1) BY OWNERS.—Any sign, display, or device along the Interstate System or the Federal-aid primary system which was not lawfully erected, shall be removed by the owner of such sign, display, or device not later than the 90th day following the effective date of this subsection.

(2) BY STATES.—If any owner does not remove a sign, display, or device in accordance with paragraph (1), the State within the borders of which the sign, display, or device is located shall remove the sign, display, or device. The owner of the removed sign, display, or device shall be liable to the State for the costs of such removal. Effective control under this section includes compliance with the first sentence of this paragraph.

Control of any sign, display, or device on such a highway shall be in accordance with this section. In designating a scenic byway for purposes of this section and section 1047 of the Intermodal Surface Transportation Efficiency Act of 1991, a State may exclude from such designation any segment of a highway that is inconsistent with the State's criteria for designating State scenic byways. Nothing in the preceding sentence shall preclude a State from signing any such excluded segment, including such segment on a map, or carrying out similar activities, solely for purposes of system continuity.

(t) PRIMARY SYSTEM DEFINED.—For purposes of this section, the terms "primary system" and "Federal-aid primary system" mean the Federal-aid primary system in existence on June 1, 1991, and any highway which is not on such system but which is on the National Highway System.

§ 134. Metropolitan planning

(a) GENERAL REQUIREMENTS.—

(1) FINDINGS.—It is in the national interest to encourage and promote the safe and efficient management, operation, and development of surface transportation systems that will serve the mobility needs of people and freight and foster economic growth and development within and through urbanized areas, while minimizing transportation-related fuel consumption and air pollution.

(2) DEVELOPMENT OF PLANS AND PROGRAMS.—To accomplish the objective stated in paragraph (1), metropolitan planning organizations designated under subsection (b), in cooperation with the State and public transit operators, shall develop transportation plans and programs for urbanized areas of the State.

(3) CONTENTS.—The plans and programs for each metropolitan area shall provide for the development and integrated management and operation of transportation systems and facilities (including pedestrian walkways and bicycle transportation facilities) that will function as an intermodal transportation system for the metropolitan area and as an integral part of an intermodal transportation system for the State and the United States.

(4) PROCESS OF DEVELOPMENT.—The process for developing the plans and programs shall provide for consideration of all modes of transportation and shall be continuing, cooperative, and comprehensive to the degree appropriate, based on the complexity of the transportation problems to be addressed.

(b) DESIGNATION OF METROPOLITAN PLANNING ORGANIZATIONS.—

(1) IN GENERAL.—To carry out the transportation planning process required by this section, a metropolitan planning organization shall be designated for each urbanized area with a population of more than 50,000 individuals—

He shall require that each State shall include in the advertised specifications, notification of the specific equal employment opportunity responsibilities of the successful bidder. The provisions of section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary. Notwithstanding any other provision of law, not to exceed ½ of 1 percent of funds apportioned to a State for the surface transportation program under section 104(b) and the bridge program under section 144 may be available to carry out this subsection upon request of the State transportation department to the Secretary.

§ 144. Highway bridge replacement and rehabilitation program

(a) Congress hereby finds and declares it to be in the vital interest of the Nation that a highway bridge replacement and rehabilitation program be established to enable the several States to replace or rehabilitate highway bridges over waterways, other topographical barriers, other highways, or railroads when the States and the Secretary finds that a bridge is significantly important and is unsafe because of structural deficiencies, physical deterioration, or functional obsolescence.

(b) The Secretary, in consultation with the States, shall (1) inventory all those highway bridges on any Federal-aid system which are bridges over waterways, other topographical barriers, other highways, and railroads; (2) classify them according to serviceability, safety, and essentiality for public use; (3) based on that classification, assign each a priority for replacement or rehabilitation; and (4) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(c)(1) The Secretary, in consultation with the States, shall (1) inventory all those highway bridges on public roads, other than those on any Federal-aid system, which are bridges over waterways, other topographical barriers, other highways, and railroads, (2) classify them according to serviceability, safety, and essentiality for public use, (3) based on the classification, assign each a priority for replacement or rehabilitation and (4) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(2) The Secretary may, at the request of a State, inventory bridges, on and off the Federal-aid system, for historic significance.

(3) INVENTORY OF INDIAN RESERVATION AND PARK BRIDGES.—As part of the activities carried out under paragraph (1), the Secretary, in consultation with the Secretary of the Interior, shall (A) inventory all those highway bridges on Indian reservation roads and park roads which are bridges over waterways, other topographical barriers, other highways, and railroads, (B) classify them according to serviceability, safety, and essentiality for public use, (C) based on the classification, assign each a priority for replacement or rehabilitation, and (D) determine the cost of replacing each such bridge with a comparable facility or of rehabilitating such bridge.

(d) Whenever any State or States make application to the Secretary for assistance in replacing or rehabilitating a highway bridge which the priority system established under subsection (b) and (c) of this section shows to be eligible, the Secretary may approve Federal participation in replacing such bridge with a comparable facility

or in rehabilitating such bridge. Whenever any State makes application to the Secretary for assistance in painting and seismic retrofit, or applying calcium magnesium acetate, sodium acetate/formate, or other environmentally acceptable, minimally corrosive anti-icing and de-icing compositions or installing scour countermeasures to, the structure of a highway bridge, the Secretary may approve Federal participation in the painting or seismic retrofit of, or application of such acetate or sodium acetate/formate or such anti-icing or de-icing composition or installation of such countermeasures to, such structure. The Secretary shall determine the eligibility of highway bridges for replacement or rehabilitation for each State based upon the unsafe highway bridges in such State, except that a State may carry out a project for seismic retrofit of a bridge under this section without regard to whether the bridge is eligible for replacement or rehabilitation under this section. In approving projects (other than projects for bridge structure painting or seismic retrofit or application of such acetate or sodium acetate/formate or such anti-icing or de-icing composition or installation of such countermeasures) under this section, the Secretary shall give consideration to those projects which will remove from service those highway bridges most in danger of failure.

(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized in accordance with this subsection. Each deficient bridge shall be placed into one of the following categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid system bridges eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by the respective unit price on a State-by-State basis, as determined by the Secretary; and the total cost in each State divided by the total cost of the deficient bridges in all States shall determine the apportionment factors. For purposes of the preceding sentence, the total cost of deficient bridges in a State and in all States shall be reduced by the total cost of any highway bridges constructed under subsection (m) in such State, relating to replacement of destroyed bridges and ferryboat services, and, if a State transfers funds apportioned to the State under this section in a fiscal year beginning after September 30, 1997, to any other apportionment of funds to such State under this title, the total cost of deficient bridges in such State and in all States to be determined for the succeeding fiscal year shall be reduced by the amount of such transferred funds. No State shall receive more than 10 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds apportioned under this section shall be available for expenditure for the same period as funds apportioned for projects on the Federal-aid primary system under this title. Any funds not obligated at the expiration of such period shall be reapportioned

by the Secretary to the other States in accordance with this subsection. The use of funds authorized under this section to carry out a project for the seismic retrofit of a bridge shall not affect the apportionment of funds under this section.

(f) The Federal share payable on account of any project under this section shall be 80 per centum of the cost thereof.

(g) SET ASIDES.—

(1) DISCRETIONARY BRIDGE PROGRAM.—

(A) FISCAL YEARS 1992 THROUGH 1997.—Of the amounts authorized for each of fiscal years 1992, 1993, 1994, 1995, 1996, and 1997 by section 103 of the Intermodal Surface Transportation Efficiency Act of 1991, all but \$57,000,000 in the case of fiscal year 1992, \$68,000,000 in the case of fiscal years 1993 and 1994, and \$69,000,000 in the case of fiscal years 1995, 1996, and 1997 shall be apportioned as provided in subsection (e) of this section. \$49,000,000 in the case of fiscal year 1992, \$59,500,000 in the case of fiscal years 1993 and 1994, and \$60,500,000 in the case of fiscal years 1995, 1996, and 1997 of the amount authorized for each of such fiscal years shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date, except that the obligation of \$49,000,000 in the case of fiscal year 1992, \$59,500,000 in the case of fiscal years 1993 and 1994, and \$60,500,000 in the case of fiscal years 1995, 1996, and 1997 shall be at the discretion of the Secretary, and \$8,500,000 per fiscal year (\$8,000,000 in the case of fiscal year 1992) of the amount authorized for each of such fiscal years shall be available in accordance with section 1039 of the Intermodal Surface Transportation Efficiency Act of 1991, relating to highway timber bridges.

(B) FISCAL YEAR 1998.—Of the amounts authorized to be appropriated to carry out the bridge program under this section for fiscal year 1998, all but \$25,000,000 shall be apportioned as provided in subsection (e) of this section. Such \$25,000,000 shall be available only for projects for the seismic retrofit of a bridge described in subsection (l).

(C) FISCAL YEARS 1999 THROUGH 2003.—Of the amounts authorized to be appropriated to carry out the bridge program under this section for each of fiscal years 1999 through 2003, all but \$100,000,000 shall be apportioned as provided in subsection (e). Such \$100,000,000 shall be available at the discretion of the Secretary; except that not to exceed \$25,000,000 shall be available only for projects for the seismic retrofit of bridges, including projects in the New Madrid fault region.

(2) ELIGIBLE DISCRETIONARY PROJECTS.—Subject to section 149(d) of the Federal-Aid Highway Act of 1987, amounts made available by paragraph (1) for obligation at the discretion of the Secretary may be obligated only—

(A) for a project for a highway bridge the replacement or rehabilitation cost of which is more than \$10,000,000, and

(B) for a project for a highway bridge the replacement or rehabilitation cost of which

is less than \$10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) for the fiscal year in which application is made for a grant for such bridge.

(3) OFF-SYSTEM BRIDGES.—Not less than 15 percent nor more than 35 percent of the amount apportioned to each State in each of fiscal years 1987 through 2004 and in the period of October 1, 2004, through May 31, 2005, shall be expended for projects to replace, rehabilitate, paint or seismic retrofit, or apply calcium magnesium acetate, sodium acetate/formate, or other environmentally acceptable, minimally corrosive anti-icing and de-icing compositions or install scour countermeasures to highway bridges located on public roads, other than those on a Federal-aid highway. The Secretary, after consultation with State and local officials, may, with respect to such State, reduce the requirement for expenditure for bridges not on a Federal-aid highway when the Secretary determines that such State has inadequate needs to justify such expenditure.

(h) Notwithstanding any other provision of law, the General Bridge Act of 1946 (33 U.S.C. 525–533) shall apply to bridges authorized to be replaced, in whole or in part, by this section, except that subsection (b) of section 502 of such Act of 1946 and section 9 of the Act of March 3, 1899 (30 Stat. 1151) shall not apply to any bridge constructed, reconstructed, rehabilitated, or replaced with assistance under this title, if such bridge is over waters (1) which are not used and are not susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce, and (2) which are (a) not tidal, or (b) if tidal, used only by recreational boating, fishing, and other small vessels less than 21 feet in length.

(i) INVENTORIES AND REPORTS.—The Secretary shall—

(1) report to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives on projects approved under this section;

(2) annually revise the current inventories authorized by subsections (b) and (c) of this section;

(3) report to such committees on such inventories; and

(4) report to such committees such recommendations as the Secretary may have for improvements of the program authorized by this section.

Such reports shall be submitted to such committees biennially at the same time as the report required by section 307(f)¹ of this title is submitted to Congress.

(j) Sums apportioned to a State under this section shall be made available for obligation throughout such State on a fair and equitable basis.

(k) Not later than six months after the date of enactment of this subsection, and periodically thereafter, the Secretary shall review the procedure used in approving or disapproving applica-

¹ See References in Text note below.

tions submitted under this section to determine what changes, if any, may be made to expedite such procedure. Any such changes shall be implemented by the Secretary as soon as possible. Not later than nine months after the date of enactment of this subsection, the Secretary shall submit a report to Congress which describes such review and such changes, including any recommendations for legislative changes.

(l) Notwithstanding any other provision of law, any bridge which is owned and operated by an agency (1) which does not have taxing powers, (2) whose functions include operating a federally assisted public transit system subsidized by toll revenues, shall be eligible for assistance under this section but the amount of such assistance shall in no event exceed the cumulative amount which such agency has expended for capital and operating costs to subsidize such transit system. Before authorizing an expenditure of funds under this subsection, the Secretary shall determine that the applicant agency has insufficient reserves, surpluses, and projected revenues (over and above those required for bridge and transit capital and operating costs) to fund the necessary bridge replacement or rehabilitation project. Any non-Federal funds expended for the seismic retrofit of the bridge may be credited toward the non-Federal share required as a condition of receipt of any Federal funds for seismic retrofit of the bridge made available after the date of the expenditure.

(m) REPLACEMENT OF DESTROYED BRIDGES AND FERRYBOAT SERVICE.—

(1) GENERAL RULE.—Notwithstanding any other provision of this section or of any other provision of law, a State may utilize any of the funds provided under this section to construct any bridge which—

(A) replaces any low water crossing (regardless of the length of such low water crossing),

(B) replaces any bridge which was destroyed prior to 1965,

(C) replaces any ferry which was in existence on January 1, 1984, or

(D) replaces any road bridges rendered obsolete as a result of United States Corps of Engineers flood control or channelization projects and not rebuilt with funds from the United States Corps of Engineers.

(2) FEDERAL SHARE.—The Federal share payable on any bridge construction carried out under paragraph (1) shall be 80 percent of the cost of such construction.

(n) OFF-SYSTEM BRIDGE PROGRAM.—Notwithstanding any other provision of law, with respect to any project not on a Federal-aid highway for the replacement of a bridge or rehabilitation of a bridge which is wholly funded from State and local sources, is eligible for Federal funds under this section, is noncontroversial, is certified by the State to have been carried out in accordance with all standards applicable to such projects under this section, and is determined by the Secretary upon completion to be no longer a deficient bridge, any amount expended after the date of the enactment of this subsection from State and local sources for such project in excess of 20 percent of the cost of con-

struction thereof may be credited to the non-Federal share of the cost of the projects in such State which are eligible for Federal funds under this section. Such crediting shall be in accordance with such procedures as the Secretary may establish.

(o) HISTORIC BRIDGE PROGRAM.—

(1) COORDINATION.—The Secretary shall, in cooperation with the States, implement the programs described in this section in a manner that encourages the inventory, retention, rehabilitation, adaptive reuse, and future study of historic bridges.

(2) STATE INVENTORY.—The Secretary shall require each State to complete an inventory of all bridges on and off the Federal-aid system to determine their historic significance.

(3) ELIGIBILITY.—Reasonable costs associated with actions to preserve, or reduce the impact of a project under this chapter on, the historic integrity of historic bridges shall be eligible as reimbursable project costs under this title (including this section) if the load capacity and safety features of the bridge are adequate to serve the intended use for the life of the bridge; except that in the case of a bridge which is no longer used for motorized vehicular traffic, the costs eligible as reimbursable project costs pursuant to this subsection shall not exceed the estimated cost of demolition of such bridge.

(4) PRESERVATION.—Any State which proposes to demolish a historic bridge for a replacement project with funds made available to carry out this section shall first make the bridge available for donation to a State, locality, or responsible private entity if such State, locality, or responsible entity enters into an agreement to—

(A) maintain the bridge and the features that give it its historic significance; and

(B) assume all future legal and financial responsibility for the bridge, which may include an agreement to hold the State highway agency harmless in any liability action.

Costs incurred by the State to preserve the historic bridge, including funds made available to the State, locality, or private entity to enable it to accept the bridge, shall be eligible as reimbursable project costs under this chapter up to an amount not to exceed the cost of demolition. Any bridge preserved pursuant to this paragraph shall thereafter not be eligible for any other funds authorized pursuant to this title.

(5) HISTORIC BRIDGE DEFINED.—As used in this subsection, “historic bridge” means any bridge that is listed on, or eligible for listing on, the National Register of Historic Places.

(p) APPLICABILITY OF STATE STANDARDS FOR PROJECTS.—A project not on a Federal-aid highway under this section shall be designed, constructed, operated, and maintained in accordance with State laws, regulations, directives, safety standards, design standards, and construction standards.

(q) As used in this section the term “rehabilitate” in any of its forms means major work necessary to restore the structural integrity of a bridge as well as work necessary to correct a major safety defect.

§ 149. Congestion mitigation and air quality improvement program

(a) ESTABLISHMENT.—The Secretary shall establish and implement a congestion mitigation and air quality improvement program in accordance with this section.

(b) ELIGIBLE PROJECTS.—Except as provided in subsection (c), a State may obligate funds apportioned to it under section 104(b)(2) for the congestion mitigation and air quality improvement program only for a transportation project or program if the project or program is for an area in the State that is or was designated as a nonattainment area for ozone, carbon monoxide, or particulate matter under section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)) and classified pursuant to section 181(a), 186(a), 188(a), or 188(b) of the Clean Air Act (42 U.S.C. 7511(a), 7512(a), 7513(a), or 7513(b)) or is or was designated as a nonattainment area under such section 107(d) after December 31, 1997, and—

(1)(A) if the Secretary, after consultation with the Administrator of the Environmental Protection Agency, determines, on the basis of information published by the Environmental Protection Agency pursuant to section 108(f)(1)(A) of the Clean Air Act (other than clause (xvi) of such section), that the project or program is likely to contribute to—

(i) the attainment of a national ambient air quality standard; or

(ii) the maintenance of a national ambient air quality standard in a maintenance area; or

(B) in any case in which such information is not available, if the Secretary, after such consultation, determines that the project or program is part of a program, method, or strategy described in such section;

(2) if the project or program is included in a State implementation plan that has been approved pursuant to the Clean Air Act and the project will have air quality benefits;

(3) the Secretary, after consultation with the Administrator of the Environmental Protection Agency, determines that the project or program is likely to contribute to the attainment of a national ambient air quality standard, whether through reductions in vehicle miles traveled, fuel consumption, or through other factors;

(4) to establish or operate a traffic monitoring, management, and control facility or program if the Secretary, after consultation with the Administrator of the Environmental Protection Agency, determines that the facility or program is likely to contribute to the at-

tainment of a national ambient air quality standard; or

(5) if the program or project improves traffic flow, including projects to improve signalization, construct high occupancy vehicle lanes, improve intersections, and implement intelligent transportation system strategies and such other projects that are eligible for assistance under this section on the day before the date of enactment of this paragraph.

No funds may be provided under this section for a project which will result in the construction of new capacity available to single occupant vehicles unless the project consists of a high occupancy vehicle facility available to single occupant vehicles only at other than peak travel times. In areas of a State which are nonattainment for ozone or carbon monoxide, or both, and for PM-10 resulting from transportation activities, the State may obligate such funds for any project or program under paragraph (1) or (2) without regard to any limitation of the Department of Transportation relating to the type of ambient air quality standard such project or program addresses.

(c) STATES RECEIVING MINIMUM APPORTIONMENT.—

(1) STATES WITHOUT A NONATTAINMENT AREA.—If a State does not have, and never has had, a nonattainment area designated under the Clean Air Act (42 U.S.C. 7401 et seq.), the State may use funds apportioned to the State under section 104(b)(2) for any project eligible under the surface transportation program under section 133.

(2) STATES WITH A NONATTAINMENT AREA.—If a State has a nonattainment area or maintenance area and receives funds under section 104(b)(2)(D) above the amount of funds that the State would have received based on its nonattainment and maintenance area population under subparagraphs (B) and (C) of section 104(b)(2), the State may use that portion of the funds not based on its nonattainment and maintenance area population under subparagraphs (B) and (C) of section 104(b)(2) for any project in the State eligible under section 133.

(d) APPLICABILITY OF PLANNING REQUIREMENTS.—Programming and expenditure of funds for projects under this section shall be consistent with the requirements of sections 134 and 135 of this title.

(e) PARTNERSHIPS WITH NONGOVERNMENTAL ENTITIES.—

(1) IN GENERAL.—Notwithstanding any other provision of this title and in accordance with this subsection, a metropolitan planning organization, State transportation department, or other project sponsor may enter into an agreement with any public, private, or nonprofit entity to cooperatively implement any project carried out under this section.

(2) FORMS OF PARTICIPATION BY ENTITIES.—Participation by an entity under paragraph (1) may consist of—

(A) ownership or operation of any land, facility, vehicle, or other physical asset associated with the project;

(B) cost sharing of any project expense;

(C) carrying out of administration, construction management, project manage-

ment, project operation, or any other management or operational duty associated with the project; and

(D) any other form of participation approved by the Secretary.

(3) ALLOCATION TO ENTITIES.—A State may allocate funds apportioned under section 104(b)(2) to an entity described in paragraph (1).

(4) ALTERNATIVE FUEL PROJECTS.—In the case of a project that will provide for the use of alternative fuels by privately owned vehicles or vehicle fleets, activities eligible for funding under this subsection—

(A) may include the costs of vehicle refueling infrastructure, including infrastructure that would support the development, production, and use of emerging technologies that reduce emissions of air pollutants from motor vehicles, and other capital investments associated with the project;

(B) shall include only the incremental cost of an alternative fueled vehicle, as compared to a conventionally fueled vehicle, that would otherwise be borne by a private party; and

(C) shall apply other governmental financial purchase contributions in the calculation of net incremental cost.

(5) PROHIBITION ON FEDERAL PARTICIPATION WITH RESPECT TO REQUIRED ACTIVITIES.—A Federal participation payment under this subsection may not be made to an entity to fund an obligation imposed under the Clean Air Act (42 U.S.C. 7401 et seq.) or any other Federal law.

CONGRESSIONAL FINDINGS

Pub. L. 105-178, title I, §1502, June 9, 1998, 112 Stat. 241, provided that: ‘‘Congress finds that—

‘‘(1) a well-developed system of transportation infrastructure is critical to the economic well-being, health, and welfare of the people of the United States;

‘‘(2) traditional public funding techniques such as grant programs are unable to keep pace with the infrastructure investment needs of the United States because of budgetary constraints at the Federal, State, and local levels of government;

‘‘(3) major transportation infrastructure facilities that address critical national needs, such as intermodal facilities, border crossings, and multistate trade corridors, are of a scale that exceeds the capacity of Federal and State assistance programs in effect on the date of enactment of this Act [June 9, 1998];

‘‘(4) new investment capital can be attracted to infrastructure projects that are capable of generating their own revenue streams through user charges or other dedicated funding sources; and

‘‘(5) a Federal credit program for projects of national significance can complement existing funding resources by filling market gaps, thereby leveraging substantial private co-investment.’’

§ 204. Federal Lands Highways Program

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Recognizing the need for all Federal roads that are public roads to be treated under uniform policies similar to the policies that apply to Federal-aid highways, there is established a coordinated Federal lands highways program that shall apply to public lands highways, park roads and parkways, and Indian reservation roads and bridges.

(2) TRANSPORTATION PLANNING PROCEDURES.—In consultation with the Secretary of each ap-

propriate Federal land management agency, the Secretary shall develop, by rule, transportation planning procedures that are consistent with the metropolitan and statewide planning processes required under sections 134 and 135.

(3) APPROVAL OF TRANSPORTATION IMPROVEMENT PROGRAM.—The transportation improvement program developed as a part of the transportation planning process under this section shall be approved by the Secretary.

§ 210. Defense access roads

(a) The Secretary is authorized, out of the funds appropriated for defense access roads, to provide for the construction and maintenance of

defense access roads (including bridges, tubes, and tunnels thereon) to military reservations, to defense industries and defense industry sites, and to the sources of raw materials when such roads are certified to the Secretary as important to the national defense by the Secretary of Defense or such other official as the President may designate, and for replacing existing highways and highway connections that are shut off from the general public use by necessary closures or restrictions at military reservations and defense industry sites.

(b) Funds appropriated for the purposes of this section shall be available, without regard to apportionment among the several States, for paying all or any part of the cost of the construction and maintenance of defense access roads.

(c) Funds appropriated for defense maneuvers and exercises, may be used by the Secretary in areas certified to him by the Secretary of Defense as maneuver areas for such construction, maintenance, and repair work as may be necessary to keep the highways therein, which have been or may be used for training of the Armed Forces, in suitable condition for such training purposes and for repairing the damage caused to such highways by the operations of men and equipment in such training.

(d) Whenever any project for the construction of a circumferential highway around a city or of a radial intracity route thereto submitted by any State is certified by the Secretary of Defense, or such other official as the President may designate, as being important for civilian or military defense, such project may be constructed out of the funds heretofore or hereafter authorized to be appropriated for defense access roads.

(e) If the Secretary shall determine that the State transportation department of any State is unable to obtain possession and the right to enter upon and use the required rights-of-way, lands, or interest in lands, improved or unimproved, required for any project authorized by this section with sufficient promptness, the Secretary is authorized to acquire, enter upon, take possession thereof, and expend funds for projects thereon, prior to approval of title by the Attorney General, in the name of the United States, such rights-of-way, lands, or interest in lands as may be required in such State for such projects by purchase, donation, condemnation, or otherwise in accordance with the laws of the United States (including the Act of February 26, 1931; 46 Stat. 1421).¹ The cost incurred by the Secretary in acquiring any such rights-of-way, lands, or interest in lands may include the cost of examination and abstract of title, certificate of title, advertising, and any fees incidental to such acquisition; and shall be payable out of the funds available for paying the cost or the Federal share of the cost of the project for which such rights-of-way, lands, or interests in lands are acquired. The Secretary is further authorized and directed by proper deed executed in the name of the United States to convey any lands or interests in lands acquired in any State under the provisions of prior Acts or of this section to the State transportation department of such State

or to such political subdivision thereof as its laws may provide, upon such terms and conditions as may be agreed upon by the Secretary and the State transportation department, or political subdivisions to which the conveyance is to be made.

(f) The provisions of section 112 of this title are applicable to defense access roads.

(g) If the Secretary shall determine that it is necessary for the expeditious completion of any defense access road project he may advance to any State out of funds appropriated for defense access roads transferred and available to the Department of Transportation the Federal share of the cost of construction thereof to enable the State transportation department to make prompt payments for acquisition of rights-of-way, and for the construction as it progresses. The sums so advanced shall be deposited in a special fund by the State official authorized by State law to receive such funds, to be disbursed solely upon vouchers approved by the State transportation department for rights-of-way which have been or are being acquired and for construction which has been actually performed under this section. Upon determination by the Secretary that funds advanced to any State under the provisions of this subsection are no longer required, the amount of the advance which is determined to be in excess of requirements for the project shall be repaid upon his demand, and such repayments shall be returned to the credit of the appropriation from which the funds were advanced.

(h) Funds appropriated for the purposes of this section shall be available to pay the cost of repairing damage caused to highways by the operation of vehicles and equipment in the construction of classified military installations and facilities for ballistic missiles if the Secretary shall determine that the State transportation department of any State is, or has been, unable to prevent such damage by restrictions upon the use of such highways without interference with, or delay in, the completion of a contract for the construction of such military reservations or installations. This subsection shall apply notwithstanding any provision of contract holding a party thereto responsible for such damage, if the Secretary of Defense or his designee shall determine, in fact, that construction estimates and the bid of such party did not include allowance for repairing such damage. This subsection shall apply to damage caused by construction work commenced prior to June 1, 1961, and still in progress on that date and construction work which is commenced or for which a contract is awarded on or after June 1, 1961.

§ 212. Inter-American Highway

(a) Funds appropriated for the Inter-American Highway shall be used to enable the United States to cooperate with the Governments of the American Republics situated in Central America—that is, with the Governments of the Republic of Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama—in the survey and construction of the Inter-American Highway within the borders of the aforesaid Republics, respectively. Not to exceed one-third of the appropriation authorized for each fiscal year may be expended without requiring the country or countries in which such funds may be expended to match any part thereof, if the Secretary of State shall find that the cost of constructing said highway in such country or countries will be beyond their reasonable capacity to bear. The remainder of such authorized appropriations shall be available for expenditure only when matched to the extent required by this section by the country in which such expenditure may be made. Expenditures from the funds available on a matching basis shall not be made for the survey and construction of any portion of said highway within the borders of any country named herein unless such country shall provide and make available for expenditure in conjunction therewith a sum equal to at least one-third of the expenditures that may be incurred by that Government and the United States on such portion of the highway. All expenditures by the United States under the provisions of this section for material, equipment, and supplies shall, whenever practicable, be made for products of the United States or of the country in which such survey or construction work is being carried on. Construction work to be performed under contract shall be advertised for a reasonable period by the Minister of Public Works, or other similar official, of the government concerned in each of the participating countries and contracts shall be awarded pursuant to such advertisements with the approval of the Secretary. No part of the appropriations authorized shall be available for obligation or expenditure for work on said highway in any cooperating country unless the government of said country shall

have assented to the provisions of this section; shall have furnished satisfactory assurances that it has an organization adequately qualified to administer the functions required of such country under the provisions hereof; and then only as such country may submit requests, from time to time, for the construction of any portion of the highway to standards adequate to meet present and future traffic needs. No part of said appropriations shall be available for obligation or expenditure in any such country until the government of that country shall have entered into an agreement with the United States which shall provide, in part, that said country—

(1) will provide, without participation of funds authorized, all necessary rights-of-way for the construction of said highway, which rights-of-way shall be of a minimum width where practicable of one hundred meters in rural areas and fifty meters in municipalities and shall forever be held inviolate as a part of the highway for public use;

(2) will not impose any highway toll, or permit any such toll to be charged, for use by vehicles or persons of any portion of said highway constructed under the provisions of this section;

(3) will not levy or assess, directly or indirectly, any fee, tax, or other charge for the use of said highway by vehicles or persons from the United States that does not apply equally to vehicles or persons of such country;

(4) will continue to grant reciprocal recognition of vehicle registration and drivers' licenses in accordance with the provisions of the Convention for the Regulation of Inter-American Automotive Traffic, which was opened for signature at the Pan American Union in Washington on December 15, 1943, and to which such country and the United States are parties, or of any other treaty or international convention establishing similar reciprocal recognition; and

(5) will provide for the maintenance of said highway after its completion in condition adequately to serve the needs of present and future traffic.

(b) The survey and construction work authorized by this section shall be under the administration of the Secretary, who shall consult with the appropriate officials of the Department of State with respect to matters involving the foreign relations of this Government, and such negotiations with the Governments of the American Republics named in subsection (a) of this section as may be required to carry out the purposes of this section shall be conducted through, or as authorized by, the Department of State.

(c) The provisions of this section shall not create nor authorize the creation of any obligations on the part of the Government of the United States with respect to any expenditures for highway construction or survey heretofore or hereafter undertaken in any of the countries enumerated in subsection (a) of this section, other than the expenditures authorized by the provisions of this section.

(d) Appropriations made pursuant to any authorizations heretofore, or hereafter enacted for the Inter-American Highway shall be considered available for expenditure by the Secretary for

necessary administrative and engineering expenses in connection with the Inter-American Highway program.

Federal financial assistance shall be granted under this subsection to such territories upon the basis of a Federal contribution of 100 per centum of the cost of any project.

(b) In order to establish a long-range highway development program, the Secretary is authorized to provide technical assistance for the establishment of an appropriate agency to administer on a continuing basis highway planning, design, construction and maintenance operations, the development of a system of arterial and collector highways, including necessary interisland connectors, and the establishment of advance acquisition of right-of-way and relocation assistance programs.

(c) No part of the appropriations authorized under this section shall be available for obligation or expenditure with respect to any territory until the Governor enters into an agreement with the Secretary providing that the government of such territory (1) will design and construct a system of arterial and collector highways, including necessary interisland connectors, built in accordance with standards approved by the Secretary; (2) will not impose any toll, or permit any such toll to be charged, for use by vehicles or persons of any portion of the

(d)(1) Three per centum of the sums authorized to be appropriated for each fiscal year for carrying out subsection (a) of this section shall be available for expenditure only for engineering and economic surveys and investigations, for the planning of future highway programs and the financing thereof, for studies of the economy, safety, and convenience of highway usage and the desirable regulation and equitable taxation thereof, and for research and development, necessary in connection with the planning, design, and maintenance of the highway system, and the regulation and taxation of their use.

(2) In addition to the percentage provided in paragraph (1) of the subsection, not to exceed 2 per centum of sums authorized to be appropriated for each fiscal year for carrying out subsection (a) of this section may be expended upon request of the Governor and with the approval of the Secretary for the purposes enumerated in paragraph (1) of this subsection.

§ 320. Bridges on Federal dams

(a) Each executive department, independent establishment, office, board, bureau, commission, authority, administration, corporation wholly owned or controlled by the United States, or other agency of the Government of the United States, hereinafter collectively and individually referred to as "agency", which on or after July 29, 1946, has jurisdiction over and custody of any dam constructed or to be constructed and owned by or for the United States, is authorized, with any funds available to it, to design and construct any such dam in such manner that it will constitute and serve as a suit-

able and adequate foundation to support a public highway bridge upon and across such dam, and to design and construct upon the foundation thus provided a public highway bridge upon and across such dam. The highway department of the State in which such dam shall be located, jointly with the Secretary, shall first determine and certify to such agency that such bridge is economically desirable and needed as a link in the State or Federal-aid highway systems, and shall request such agency to design and construct such dam so that it will serve as a suitable and adequate foundation for a public highway bridge and to design and construct such public highway bridge upon and across such dam, and shall agree to reimburse such agency pursuant to subsection (d) of this section for any additional costs which it may be required to incur because of the design and construction of such dam so that it will serve as a foundation for a public highway bridge and for expenditures which it may find it necessary to make in designing and constructing such public highway bridge upon and across such dam. In no case shall the design and construction of a bridge upon and across such dam be undertaken hereunder except by the agency having jurisdiction over and custody of the dam, acting directly or through contractors employed by it, and after such agency shall determine that it will be structurally feasible and will not interfere with the proper functioning and operation of the dam.

(b) Construction of any bridge upon and across any dam pursuant to this section shall not be commenced unless and until the State in which such bridge is to be located, or the appropriate subdivision of such State, shall enter into an agreement with such agency and with the Secretary to construct, or cause to be constructed, with or without the aid of Federal funds, the approach roads necessary to connect such bridge with existing public highways and to maintain, or cause to be maintained, such approach roads from and after their completion. Such agreement may also provide for the design and construction of such bridge upon and across the dam by such agency of the United States and for reimbursing such agency the costs incurred by it in the design and construction of the bridge as provided in subsection (d) of this section. Any such agency is hereby authorized to convey to the State, or to the appropriate subdivision thereof, without costs, such easements and rights-of-way in its custody or over lands of the United States in its custody and control as may be necessary, convenient, or proper for the location, construction, and maintenance of the approach roads referred to in this section including such roadside parks or recreational areas of limited size as may be deemed necessary for the accommodation of the traveling public. Any bridge constructed pursuant to this section upon and across a dam in the custody and jurisdiction of any agency of the United States, including such portion thereof, if any, as may extend beyond the physical limits of the dam, shall constitute and remain a part of said dam and be maintained by the agency. Any such agency may enter into any such contracts and agreements with the State or its subdivisions respect-

ing public use of any bridge so located and constructed as may be deemed appropriate, but no such bridge shall be closed to public use by the agency except in cases of emergency or when deemed necessary in the interest of national security.

(c) All costs and expenses incurred and expenditures made by any agency in the exercise of the powers and authority conferred by this section (but not including any costs, expenses, or expenditures which would have been required in any event to satisfy a legal road or bridge relocation obligation or to meet operating or other agency needs) shall be recorded and kept separate and apart from the other costs, expenses, and expenditures of such agency, and no portion thereof shall be charged or allocated to flood control, navigation, irrigation, fertilizer production, the national defense, the development of power, or other program, purpose, or function of such agency.

(d) Not to exceed \$65,000,000 of any money heretofore or hereafter appropriated for expenditure in accordance with the provisions of this title or prior Acts shall be available for expenditure by the Secretary in accordance with the provisions of this section, as an emergency fund, to reimburse any agency for any additional costs or expenditures which it may be required to incur because of the design and construction of any such dam so that it will constitute and serve as a foundation for a public highway bridge upon and across such dam and to reimburse any such agency for any costs, expenses, or expenditures which it may be required to make in designing and constructing any such bridge upon and across a dam in accordance with the provisions of this section, except such costs, expenses, or expenditures as would have been required of such agency in any event to satisfy a legal obligation to relocate a highway or bridge or to meet operating or other agency needs, and there is authorized to be appropriated any sum or sums necessary to reimburse the funds so expended by the Secretary from time to time under the authority of this section. Of each bridge constructed upon and across a dam under the provisions of this section, there may be financed wholly with Federal funds that portion thereof which is located within the physical limits of the masonry structure, or structures, of the dam, and the Secretary shall in his sole discretion determine what additional portion of the bridge, if any, may be so financed, such determination to be final and conclusive. The remainder of the bridge, and any necessary related approach roads, shall be financed by the State or its appropriate subdivision with or without the aid of Federal funds; but said portion of the bridge so financed by the State or its subdivisions, including such portion thereof, if any, as may extend beyond the physical limits of the dam, shall nevertheless be designed and constructed solely by the agency having custody and jurisdiction of the dam as provided in subsection (a) of this section.

(e) In making, reviewing, or approving the design of any bridge or approach structure to be constructed under this section, the agency shall, in matters relating to roadway design, loadings, clearances and widths, and traffic safeguards,

give full consideration to and be guided by the standards and advice of the Secretary.

(f) The authority conferred by this section shall be in addition to and not in limitation of authority conferred upon any agency by any other law, and nothing in this section contained shall affect or be deemed to relate to any bridge, approach structure, or highway constructed or to be constructed by any such agency in furtherance of its lawful purposes and requirements or to satisfy a legal obligation incurred independently of this section.

(a) DEFINITIONS.—In this section, the following definitions apply:

(1) ELIGIBLE PROJECT COSTS.—The term “eligible project costs”—

(A) means the capital cost of the fixed guideway infrastructure of a MAGLEV project, including land, piers, guideways, propulsion equipment and other components attached to guideways, power distribution facilities (including substations), control and communications facilities, access roads, and storage, repair, and maintenance facilities, but not including costs incurred for a new station; and

(B) includes the costs of preconstruction planning activities.

(2) FULL PROJECT COSTS.—The term “full project costs” means the total capital costs of a MAGLEV project, including eligible project costs and the costs of stations, vehicles, and equipment.

(3) MAGLEV.—The term “MAGLEV” means transportation systems employing magnetic levitation that would be capable of safe use by the public at a speed in excess of 240 miles per hour.

(4) PARTNERSHIP POTENTIAL.—The term “partnership potential” has the meaning given the term in the commercial feasibility study of high-speed ground transportation conducted under section 1036 of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1978).

(b) FINANCIAL ASSISTANCE.—

(1) IN GENERAL.—The Secretary shall make available financial assistance to pay the Federal share of full project costs of eligible projects selected under this section. Financial assistance made available under this section and projects assisted with the assistance shall be subject to section 5333(a) of title 49, United States Code.

(2) FEDERAL SHARE.—The Federal share of full project costs under paragraph (1) shall be not more than ⅓.

(3) USE OF ASSISTANCE.—Financial assistance provided under paragraph (1) shall be used only to pay eligible project costs of projects selected under this section.

(c) SOLICITATION OF APPLICATIONS FOR ASSISTANCE.—Not later than 180 days after the date of enactment of this subsection, the Secretary shall solicit applications from States, or authorities designated by 1 or more States, for financial assistance authorized by subsection (b) for planning, design, and construction of eligible MAGLEV projects.

(d) PROJECT ELIGIBILITY.—To be eligible to receive financial assistance under subsection (b), a project shall—

(1) involve a segment or segments of a high-speed ground transportation corridor that exhibit partnership potential;

(2) require an amount of Federal funds for project financing that will not exceed the sum of—

(A) the amounts made available under subsection (h)(1); and

(B) the amounts made available by States under subsection (h)(3);

(8) be carried out using materials at least 70 percent of which are manufactured in the United States.

(e) PROJECT SELECTION CRITERIA.—Prior to soliciting applications, the Secretary shall establish criteria for selecting which eligible projects under subsection (d) will receive financial assistance under subsection (b). The criteria shall include the extent to which—

(1) a project is nationally significant, including the extent to which the project will demonstrate the feasibility of deployment of MAGLEV technology throughout the United States;

(2) timely implementation of the project will reduce congestion in other modes of transportation and reduce the need for additional highway or airport construction;

(3) States, regions, and localities financially contribute to the project;

(4) implementation of the project will create new jobs in traditional and emerging industries;

(5) the project will augment MAGLEV networks identified as having partnership potential;

(6) financial assistance would foster public and private partnerships for infrastructure development and attract private debt or equity investment;

(7) financial assistance would foster the timely implementation of a project; and

(8) life-cycle costs in design and engineering are considered and enhanced.

(f) PROJECT SELECTION.—

(1) PRECONSTRUCTION PLANNING ACTIVITIES.—Not later than 90 days after a deadline established by the Secretary for the receipt of applications, the Secretary shall evaluate the eligible projects in accordance with the selection criteria and select 1 or more eligible projects to receive financial assistance for preconstruction planning activities, including—

(A) preparation of such feasibility studies, major investment studies, and environmental impact statements and assessments as are required under State law;

(B) pricing of the final design, engineering, and construction activities proposed to be assisted under paragraph (2); and

(C) such other activities as are necessary to provide the Secretary with sufficient information to evaluate whether a project should receive financial assistance for final design, engineering, and construction activities under paragraph (2).

(2) FINAL DESIGN, ENGINEERING, AND CONSTRUCTION ACTIVITIES.—After completion of preconstruction planning activities for all projects assisted under paragraph (1), the Secretary shall select 1 of the projects to receive financial assistance for final design, engineering, and construction activities.

(g) JOINT VENTURES.—A project undertaken by a joint venture of United States and non-United States persons (including a project involving the deployment of non-United States MAGLEV technology in the United States) shall be eligible for financial assistance under this section if the project is eligible under subsection (d) and selected under subsection (f).

(h) FUNDING.—

INTERSTATE COMPACTS FOR HIGHWAY SAFETY

Pub. L. 85-684, Aug. 20, 1958, 72 Stat. 635, as amended by Pub. L. 88-466, Aug. 20 1964, 78 Stat. 564, provided: “That the consent of Congress is hereby given to any two or more of the several States, and one or more of the several States and the District of Columbia, to enter into agreements or compacts—

“(1) for cooperative effort and mutual assistance in the establishment and carrying out of traffic safety programs, including, but not limited to, the enactment of uniform traffic laws, driver education and training, coordination of traffic law enforcement, research into safe automobile and highway design, and research programs of the human factors affecting traffic safety, and

“(2) for the establishment of such agencies, joint or otherwise, as they deem desirable for the establishment and carrying out of such traffic safety programs.”

§ 402. Highway safety programs

(a) Each State shall have a highway safety program approved by the Secretary, designed to reduce traffic accidents and deaths, injuries, and property damage resulting therefrom. Such programs shall be in accordance with uniform guidelines promulgated by the Secretary. Such uniform guidelines shall be expressed in terms of performance criteria. In addition, such uniform guidelines shall include programs (1) to reduce injuries and deaths resulting from motor vehicles being driven in excess of posted speed limits, (2) to encourage the proper use of occupant protection devices (including the use of safety belts and child restraint systems) by occupants of motor vehicles and to increase public awareness of the benefit of motor vehicles equipped with airbags, (3) to reduce deaths and injuries resulting from persons driving motor vehicles while impaired by alcohol or a controlled substance, (4) to prevent accidents and reduce deaths and injuries resulting from accidents involving motor vehicles and motorcycles, (5) to reduce injuries and deaths resulting from accidents involving school buses, and (6) to improve law enforcement services in motor vehicle accident prevention, traffic supervision, and post-accident procedures. The Secretary shall establish a highway safety program for the collection and reporting of data on traffic-related deaths and injuries by the States. Under such program, the States shall collect and report such data as the Secretary may require. The purposes of the program are to ensure national uniform data on such deaths and injuries and to allow the Secretary to make determinations for use in developing programs to reduce such deaths and injuries and making recommendations to Congress concerning legislation necessary to implement such programs. The program shall provide for annual reports to the Secretary on the efforts

being made by the States in reducing deaths and injuries occurring at highway construction sites and the effectiveness and results of such efforts. The Secretary shall establish minimum reporting criteria for the program. Such criteria shall include, but not be limited to, criteria on deaths and injuries resulting from police pursuits, school bus accidents, and speeding, on traffic-related deaths and injuries at highway construction sites and on the configuration of commercial motor vehicles involved in motor vehicle accidents. Such uniform guidelines shall be promulgated by the Secretary so as to improve driver performance (including, but not limited to, driver education, driver testing to determine proficiency to operate motor vehicles, driver examinations (both physical and mental) and driver licensing) and to improve pedestrian performance and bicycle safety. In addition such uniform guidelines shall include, but not be limited to, provisions for an effective record system of accidents (including injuries and deaths resulting therefrom), accident investigations to determine the probable causes of accidents, injuries, and deaths, vehicle registration, operation, and inspection, highway design and maintenance (including lighting, markings, and surface treatment), traffic control, vehicle codes and laws, surveillance of traffic for detection and correction of high or potentially high accident locations, enforcement of light transmission standards of window glazing for passenger motor vehicles and light trucks as necessary to improve highway safety, and emergency services. Such guidelines as are applicable to State highway safety programs shall, to the extent determined appropriate by the Secretary, be applicable to federally administered areas where a Federal department or agency controls the highways or supervises traffic operations.

(b) ADMINISTRATION OF STATE PROGRAMS.—

(1) ADMINISTRATIVE REQUIREMENTS.—The Secretary may not approve a State highway safety program under this section which does not—

(A) provide that the Governor of the State shall be responsible for the administration of the program through a State highway safety agency which shall have adequate powers and be suitably equipped and organized to carry out, to the satisfaction of the Secretary, such program;

(B) authorize political subdivisions of the State to carry out local highway safety programs within their jurisdictions as a part of the State highway safety program if such local highway safety programs are approved by the Governor and are in accordance with the minimum standards established by the Secretary under this section;

(C) except as provided in paragraph (3), provide that at least 40 percent of all Federal funds apportioned under this section to the State for any fiscal year will be expended by the political subdivisions of the State, including Indian tribal governments, in carrying out local highway safety programs authorized in accordance with subparagraph (B); and

(D) provide adequate and reasonable access for the safe and convenient movement of in-

dividuals with disabilities, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks throughout the State.

(2) WAIVER.—The Secretary may waive the requirement of paragraph (1)(C), in whole or in part, for a fiscal year for any State whenever the Secretary determines that there is an insufficient number of local highway safety programs to justify the expenditure in the State of such percentage of Federal funds during the fiscal year.

(3) USE OF TECHNOLOGY FOR TRAFFIC ENFORCEMENT.—The Secretary may encourage States to use technologically advanced traffic enforcement devices (including the use of automatic speed detection devices such as photoradar) by law enforcement officers.

(c) Funds authorized to be appropriated to carry out this section shall be used to aid the States to conduct the highway safety programs approved in accordance with subsection (a), including development and implementation of manpower training programs, and of demonstration programs that the Secretary determines will contribute directly to the reduction of accidents, and deaths and injuries resulting therefrom. Such funds shall be subject to a deduction not to exceed 5 per centum for the necessary costs of administering the provisions of this section, and the remainder shall be apportioned among the several States. Such funds shall be apportioned 75 per centum in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census, and 25 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. For the purposes of this subsection, a "public road" means any road under the jurisdiction of and maintained by a public authority and open to public travel. Public road mileage as used in this subsection shall be determined as of the end of the calendar year preceding the year in which the funds are apportioned and shall be certified to by the Governor of the State and subject to approval by the Secretary. The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment, except that the apportionment to the Secretary of the Interior shall not be less than three-fourths of 1 percent of the total apportionment and the apportionments to the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands shall not be less than one-quarter of 1 per centum of the total apportionment. The Secretary shall not apportion any funds under this subsection to any State which is not implementing a highway safety program approved by the Secretary in accordance with this section. For the purpose of the seventh sentence of this subsection, a highway safety program approved by the Secretary shall not include any requirement that a State implement such a program by adopting or enforcing any law, rule, or regulation based on a guideline promulgated by the Secretary under this section requiring any motorcycle operator eighteen years of age or older or passenger eighteen years of age or older to

wear a safety helmet when operating or riding a motorcycle on the streets and highways of that State. Implementation of a highway safety program under this section shall not be construed to require the Secretary to require compliance with every uniform guideline, or with every element of every uniform guideline, in every State. Funds apportioned under this section to any State, that does not have a highway safety program approved by the Secretary or that is not implementing an approved program, shall be reduced by amounts equal to not less than 50 per centum of the amounts that would otherwise be apportioned to the State under this section, until such time as the Secretary approves such program or determines that the State is implementing an approved program, as appropriate. The Secretary shall consider the gravity of the State's failure to have or implement an approved program in determining the amount of the reduction. The Secretary shall promptly apportion to the State the funds withheld from its apportionment if he approves the State's highway safety program or determines that the State has begun implementing an approved program, as appropriate, prior to the end of the fiscal year for which the funds were withheld. If the Secretary determines that the State did not correct its failure within such period, the Secretary shall reapportion the withheld funds to the other States in accordance with the formula specified in this subsection not later than 30 days after such determination.

(d) All provisions of chapter 1 of this title that are applicable to National Highway System highway funds other than provisions relating to the apportionment formula and provisions limiting the expenditure of such funds to the Federal-aid systems, shall apply to the highway safety funds authorized to be appropriated to carry out this section, except as determined by the Secretary to be inconsistent with this section, and except that the aggregate of all expenditures made during any fiscal year by a State and its political subdivisions (exclusive of Federal funds) for carrying out the State highway safety program (other than planning and administration) shall be available for the purpose of crediting such State during such fiscal year for the non-Federal share of the cost of any project under this section (other than one for planning or administration) without regard to whether such expenditures were actually made in connection with such project and except that, in the case of a local highway safety program carried out by an Indian tribe, if the Secretary is satisfied that an Indian tribe does not have sufficient funds available to meet the non-Federal share of the cost of such program, he may increase the Federal share of the cost thereof payable under this Act to the extent necessary. In applying such provisions of chapter 1 in carrying out this section the term "State transportation department" as used in such provisions shall mean the Governor of a State for the purposes of this section.

(e) Uniform guidelines promulgated by the Secretary to carry out this section shall be developed in cooperation with the States, their political subdivisions, appropriate Federal departments and agencies, and such other public and

private organizations as the Secretary deems appropriate.

(f) The Secretary may make arrangements with other Federal departments and agencies for assistance in the preparation of uniform guidelines for the highway safety programs contemplated by subsection (a) and in the administration of such programs. Such departments and agencies are directed to cooperate in such preparation and administration, on a reimbursable basis.

(g) Nothing in this section authorizes the appropriation or expenditure of funds for (1) highway construction, maintenance, or design (other than design of safety features of highways to be incorporated into guidelines) or (2) any purpose for which funds are authorized by section 403 of this title.

[~~(h) Repealed. Pub. L. 97-35, title XI, §1107(c), Aug. 13, 1981, 95 Stat. 626.~~]

(i) APPLICATION IN INDIAN COUNTRY.—

(1) USE OF TERMS.—For the purpose of application of this section in Indian country, the terms "State" and "Governor of a State" include the Secretary of the Interior and the term "political subdivision of a State" includes an Indian tribe.

(2) EXPENDITURES FOR LOCAL HIGHWAY PROGRAMS.—Notwithstanding subsection (b)(1)(C), 95 percent of the funds apportioned to the Secretary of the Interior under this section shall be expended by Indian tribes to carry out highway safety programs within their jurisdictions.

(3) ACCESS FOR INDIVIDUALS WITH DISABILITIES.—The requirements of subsection (b)(1)(D) shall be applicable to Indian tribes, except to those tribes with respect to which the Secretary determines that application of such provisions would not be practicable.

(4) INDIAN COUNTRY DEFINED.—In this subsection, the term "Indian country" means—

(A) all land within the limits of any Indian reservation under the jurisdiction of the United States, notwithstanding the issuance of any patent and including rights-of-way running through the reservation;

(B) all dependent Indian communities within the borders of the United States, whether within the original or subsequently acquired territory thereof and whether within or without the limits of a State; and

(C) all Indian allotments, the Indian titles to which have not been extinguished, including rights-of-way running through such allotments.

(j) RULEMAKING PROCEEDING.—The Secretary may periodically conduct a rulemaking process to identify highway safety programs that are highly effective in reducing motor vehicle crashes, injuries, and deaths. Any such rulemaking shall take into account the major role of the States in implementing such programs. When a rule promulgated in accordance with this section takes effect, States shall consider these highly effective programs when developing their highway safety programs.

(k)(1) Subject to the provisions of this subsection, the Secretary shall make a grant to any State which includes, as part of its highway safety program under section 402 of this title,

the use of a comprehensive computerized safety recordkeeping system designed to correlate data regarding traffic accidents, drivers, motor vehicles, and roadways. Any such grant may only be used by such State to establish and maintain a comprehensive computerized traffic safety recordkeeping system or to obtain and operate components to support highway safety priority programs identified by the Secretary under this section. Notwithstanding any other provision of law, if a report, list, schedule, or survey is prepared by or for a State or political subdivision thereof under this subsection, such report, list, schedule, or survey shall not be admitted as evidence or used in any suit or action for damages arising out of any matter mentioned in such report, list, schedule, or survey.

(2) No State may receive a grant under this subsection in more than two fiscal years.

(3) The amount of the grant to any State under this subsection for the first fiscal year such State is eligible for a grant under this subsection shall equal 10 per centum of the amount apportioned to such State for fiscal year 1985 under this section. The amount of a grant to any State under this subsection for the second fiscal year such State is eligible for a grant under this subsection shall equal 10 per centum of the amount apportioned to such State for fiscal year 1986 under this section.

(4) A State is eligible for a grant under this subsection if—

(A) it certifies to the Secretary that it has in operation a computerized traffic safety recordkeeping system and identifies proposed means of upgrading the system acceptable to the Secretary; or

(B) it provides to the Secretary a plan acceptable to the Secretary for establishing and maintaining a computerized traffic safety recordkeeping system.

(5) The Secretary, after making the deduction authorized by the second sentence of subsection (c) of this section for fiscal years 1985 and 1986, shall set aside 10 per centum of the remaining funds authorized to be appropriated to carry out this section for the purpose of making grants under this subsection. Funds set aside under this subsection shall remain available for the fiscal year authorized and for the succeeding fiscal year and any amounts remaining unexpended at the end of such period shall be apportioned in accordance with the provisions of subsection (c) of this section.

“(4) INFORMATION.—Upon request of the National Academy of Sciences, the Secretary shall furnish to the Academy any information which the Academy deems necessary for the purpose of conducting the study and investigation under this subsection.

“(b) SCHOOLBUS SAFETY GRANT PROGRAM.—

“(1) SET-ASIDE.—Before apportioning any funds made available to carry out section 402 of title 23, United States Code, for each of fiscal years 1989, 1990, and 1991, the Secretary may set aside an amount not to exceed \$5,000,000 for making grants to States to implement those schoolbus safety measures published by the Secretary under subsection (a).

“(2) APPLICATION.—Any State interested in receiving under this subsection a grant to implement schoolbus safety measures in fiscal year 1989, 1990, or 1991 shall submit to the Secretary an application for such grant. SPECIAL PARKING PRIVILEGES FOR HANDICAPPED PERSONS

Pub. L. 98-78, title III, §321, Aug. 15, 1983, 97 Stat. 473, provided that:

“(a) The Congress finds that—

“(1) in this Nation there exist millions of handicapped people with severe physical impairments including partial paralysis, limb amputation, chronic heart condition, emphysema, arthritis, rheumatism, and other debilitating conditions which greatly limit their personal mobility;

“(2) these people reside in each of the several States and have need and reason to travel from one State to another for business and recreational purposes;

“(3) each State maintains the right to establish and enforce its own code of regulations regarding the appropriate use of motor vehicles operating within its jurisdiction;

“(4) within a given State handicapped individuals are oftentimes granted special parking privileges to help offset the limitations imposed by their physical impairment;

“(5) these special parking privileges vary from State to State as do the methods and means of identifying vehicles used by disabled individuals, all of which serve to impede both the enforcement of special parking privileges and the handicapped individual's freedom to properly utilize such privileges;

“(6) there are many efforts currently underway to help alleviate these problems through public awareness and administrative change as encouraged by concerned individuals and national associations directly involved in matters relating to the issue of special parking privileges for disabled individuals; and

“(7) despite these efforts the fact remains that many States may need to give the matter legislative consideration to ensure a proper resolution of this issue, especially as it relates to law enforcement and placard responsibility.

“(b) The Congress encourages each of the several States working through the National Governors Conference to—

“(1) adopt the International Symbol of Access as the only recognized and adopted symbol to be used to identify vehicles carrying those citizens with acknowledged physical impairments;

“(2) grant to vehicles displaying this symbol the special parking privileges which a State may provide; and

“(3) permit the International Symbol of Access to appear either on a specialized license plate, or on a specialized placard placed in the vehicles so as to be clearly visible through the front windshield, or on both such places.

“(c) It is the sense of the Congress that agreements of reciprocity relating to the special parking privileges granted handicapped individuals should be developed and entered into by and between the several States so as to—

“(1) facilitate the free and unencumbered use between the several States, of the special parking privileges afforded those people with acknowledged handicapped conditions, without regard to the State of residence of the handicapped person utilizing such privilege;

“(2) improve the ease of law enforcement in each State of its special parking privileges and to facilitate the handling of violators; and

“(3) ensure that motor vehicles carrying individuals with acknowledged handicapped conditions be given fair and predictable treatment throughout the Nation.

“(d) As used in this section the term ‘State’ means the several States and the District of Columbia.

“(e) The Secretary of Transportation shall provide a copy of this section to the Governor of each State and the Mayor of the District of Columbia.”

Until such report is submitted, the Secretary shall not, pursuant to subsection (c) of section 402 of title 23, United States Code, withhold any apportionment or any funds apportioned to any State because such State is failing to implement a highway safety program approved by the Secretary in accordance with such section 402.”

REPORT TO CONGRESS BY JULY 1, 1967, ON INITIAL STANDARDS

Section 203 of Pub. L. 89-564 required the Secretary of Commerce to report to Congress by July 1, 1967, all standards to be initially applied in carrying out section 402 of this title.

(a) GENERAL AUTHORITY.—

(1) AUTHORITY TO MAKE GRANTS.—Subject to the requirements of this section, the Secretary shall make grants to States that adopt and implement effective programs to reduce traffic safety problems resulting from individuals driving while under the influence of alcohol. Such grants may only be used by recipient States to implement and enforce such programs.

(2) MAINTENANCE OF EFFORT.—No grant may be made to a State under this section in any fiscal year unless the State enters into such agreements with the Secretary as the Secretary may require to ensure that the State will maintain its aggregate expenditures from all other sources for alcohol traffic safety programs at or above the average level of such expenditures in its 2 fiscal years preceding the date of enactment of the Transportation Equity Act for the 21st Century.

(3) MAXIMUM PERIOD OF ELIGIBILITY.—No State may receive grants under this section in more than 8 fiscal years beginning after September 30, 1997.

(4) FEDERAL SHARE.—The Federal share of the cost of implementing and enforcing in a fiscal year a program adopted by a State pursuant to paragraph (1) shall not exceed—

(A) in each of the first and second fiscal years in which the State receives a grant under this section, 75 percent;

(B) in each of the third and fourth fiscal years in which the State receives a grant under this section, 50 percent; and

(C) in each of the fifth, sixth,¹ seventh, and eighth fiscal years in which the State receives a grant under this section, 25 percent.

(b) BASIC GRANT ELIGIBILITY.—

(1) BASIC GRANT A.—A State shall become eligible for a grant under this paragraph by adopting or demonstrating to the satisfaction of the Secretary at least 5 of the following:

(A) ADMINISTRATIVE LICENSE REVOCATION.—An administrative driver's license suspension or revocation system for individuals who operate motor vehicles while under the influence of alcohol that requires that—

(i) in the case of an individual who, in any 5-year period beginning after the date of enactment of the Transportation Equity Act for the 21st Century, is determined on the basis of a chemical test to have been operating a motor vehicle while under the influence of alcohol or is determined to have refused to submit to such a test as proposed by a law enforcement officer, the State agency responsible for administering

drivers' licenses, upon receipt of the report of the law enforcement officer—

(I) shall suspend the driver's license of such individual for a period of not less than 90 days if such individual is a first offender in such 5-year period; and

(II) shall suspend the driver's license of such individual for a period of not less than 1 year, or revoke such license, if such individual is a repeat offender in such 5-year period; and

(ii) the suspension and revocation referred to under clause (i) shall take effect not later than 30 days after the day on which the individual refused to submit to a chemical test or received notice of having been determined to be driving under the influence of alcohol, in accordance with the procedures of the State.

(B) UNDERAGE DRINKING PROGRAM.—An effective system, as determined by the Secretary, for preventing operators of motor vehicles under age 21 from obtaining alcoholic beverages and for preventing persons from making alcoholic beverages available to individuals under age 21. Such system may include the issuance of drivers' licenses to individuals under age 21 that are easily distinguishable in appearance from drivers' licenses issued to individuals age 21 or older and the issuance of drivers' licenses that are tamper resistant.

(C) ENFORCEMENT PROGRAM.—Either—

(i) a statewide program for stopping motor vehicles on a nondiscriminatory, lawful basis for the purpose of determining whether the operators of such motor vehicles are driving while under the influence of alcohol; or

(ii) a statewide special traffic enforcement program for impaired driving that emphasizes publicity for the program.

(D) GRADUATED LICENSING SYSTEM.—A 3-stage graduated licensing system for young drivers that includes nighttime driving restrictions during the first 2 stages, requires all vehicle occupants to be properly restrained, and makes it unlawful for a person under age 21 to operate a motor vehicle with a blood alcohol concentration of .02 percent or greater.

(E) DRIVERS WITH HIGH BAC.—Programs to target individuals with high blood alcohol concentrations who operate a motor vehicle. Such programs may include implementation of a system of graduated penalties and assessment of individuals convicted of driving under the influence of alcohol.

(F) YOUNG ADULT DRINKING PROGRAMS.—Programs to reduce driving while under the influence of alcohol by individuals age 21 through 34. Such programs may include awareness campaigns; traffic safety partnerships with employers, colleges, and the hospitality industry; assessments of first-time offenders; and incorporation of treatment into judicial sentencing.

(G) TESTING FOR BAC.—An effective system for increasing the rate of testing of the blood alcohol concentrations of motor vehi-

cle drivers involved in fatal accidents and, in fiscal year 2001 and each fiscal year thereafter, a rate of such testing that is equal to or greater than the national average.

(c) SUPPLEMENTAL GRANTS.—

(1) IN GENERAL.—Upon receiving an application from a State, the Secretary may make supplemental grants to the State for meeting 1 or more of the following criteria:

(A) VIDEO EQUIPMENT FOR DETECTION OF DRUNK DRIVERS.—The State provides for a program to acquire video equipment to be used in detecting persons who operate motor vehicles while under the influence of alcohol and in prosecuting those persons, and to train personnel in the use of that equipment.

(B) SELF-SUSTAINING DRUNK DRIVING PREVENTION PROGRAM.—The State provides for a self-sustaining drunk driving prevention program under which a significant portion of the fines or surcharges collected from individuals apprehended and fined for operating a motor vehicle while under the influence of alcohol are returned to those communities which have comprehensive programs for the prevention of such operations of motor vehicles.

(C) REDUCING DRIVING WITH A SUSPENDED LICENSE.—The State enacts and enforces a law to reduce driving with a suspended license. Such law, as determined by the Secretary, may require a “zebra” stripe that is clearly visible on the license plate of any motor vehicle owned and operated by a driver with a suspended license.

(D) USE OF PASSIVE ALCOHOL SENSORS.—The State provides for a program to acquire passive alcohol sensors to be used by police officers in detecting persons who operate motor vehicles while under the influence of alcohol, and to train police officers in the use of that equipment.

(E) EFFECTIVE DWI TRACKING SYSTEM.—The State demonstrates an effective driving while intoxicated (DWI) tracking system. Such a system, as determined by the Secretary, may include data covering arrests,

case prosecutions, court dispositions and sanctions, and provide for the linkage of such data and traffic records systems to appropriate jurisdictions and offices within the State.

(F) OTHER PROGRAMS.—The State provides for other innovative programs to reduce traffic safety problems resulting from individuals driving while under the influence of alcohol or controlled substances, including programs that seek to achieve such a reduction through legal, judicial, enforcement, educational, technological, or other approaches.

(2) ELIGIBILITY.—A State shall be eligible to receive a grant under this subsection in a fiscal year only if the State is eligible to receive a grant under subsection (b) in such fiscal year.

(3) FUNDING.—Of the amounts made available to carry out this section in a fiscal year, not to exceed 10 percent shall be available for making grants under this subsection.

(d) ADMINISTRATIVE EXPENSES.—Funds authorized to be appropriated to carry out this section in a fiscal year shall be subject to a deduction not to exceed 5 percent for the necessary costs of administering the provisions of this section.

SURFACE TRANSPORTATION RESEARCH AND DEVELOPMENT PLANNING

Pub. L. 102-240, title VI, §6009, Dec. 18, 1991, 105 Stat. 2175, as amended by Pub. L. 104-59, title III, §338(c)(1), Nov. 28, 1995, 109 Stat. 604, provided that:

“(a) FINDINGS.—Congress finds that—

“(1) despite an annual expenditure in excess of \$10,000,000,000 on surface transportation and its infrastructure, the Federal Government has not developed a clear vision of—

“(A) how the surface transportation systems of the 21st century will differ from the present;

“(B) how they will interface with each other and with other forms of transportation;

“(C) how such systems will adjust to changing American population patterns and lifestyles; and

“(D) the role of federally funded research and development in ensuring that appropriate transportation systems are developed and implemented;

“(2) the population of the United States is projected to increase by over 30,000,000 people within the next 20 years, mostly in existing major metropolitan areas, which will result in increased traffic congestion within and between urban areas, more accidents, loss of productive time, and increased cost of transportation unless new technologies are developed to improve public transportation within cities and to move people and goods between cities;

“(3) 18,000,000 crashes, 4,000,000 injuries, and 45,000 fatalities each year on the Nation’s highways are in-

tolerable and substantial research is required in order to develop safer technologies in their most useful and economic forms;

“(4) current research and development funding for surface transportation is insufficient to provide the United States with the technologies essential to providing its own advanced transportation systems in the future and, as a result, the United States is becoming increasingly dependent on foreign surface transportation technologies and equipment to meet its expanding surface transportation needs;

“(5) a more active, focused surface transportation research and development program involving cooperation among the Federal Government, United States based industry, and United States universities should be organized on a priority basis;

“(6) intelligent transportation systems represent the best near-term technology for improving surface transportation for public benefit by providing equipment which can improve traffic flow and provide for enhanced safety;

“(7) research and development programs related to surface transportation are fragmented and dispersed throughout government and need to be strengthened and incorporated in an integrated framework within which a consensus on the goals of a national surface transportation research and development program must be developed;

“(8) the inability of government agencies to cooperate effectively, the difficulty of obtaining public support for new systems and rights-of-way, and the high cost of capital financing discourage private firms from investing in the development of new transportation equipment and systems; therefore, the Federal Government should sponsor and coordinate research and development of new technologies to provide safer, more convenient, and affordable transportation systems for use in the future; and

“(9) an effective high technology applied research and development program should be implemented quickly by strengthening the Department of Transportation research and development staff and by contracting with private industry for specific development projects.

“(b) SURFACE TRANSPORTATION RESEARCH AND DEVELOPMENT PLAN.—

“(1) DEVELOPMENT.—The Secretary shall develop an integrated national surface transportation research and development plan (hereinafter in this subsection referred to as the ‘plan’).

“(2) FOCUS.—The plan shall focus on surface transportation systems needed for urban, suburban, and rural areas in the next decade.

“(3) CONTENTS.—The plan shall include the following:

“(A) Details of the Department’s surface transportation research and development programs, including appropriate funding levels and a schedule with milestones, preliminary cost estimates, appropriate work scopes, personnel requirements, and estimated costs and goals for the next 3 years for each area of research and development.

“(B) A 10-year projection of long-term programs in surface transportation research and development and recommendations for the appropriate source or mechanism for surface transportation research and development funding, taking into account recommendations of the Research and Development Coordinating Council of the Department of Transportation and the plan of the National Council on Surface Transportation Research.

“(C) Recommendations on changes needed to assure that Federal, State, and local contracting procedures encourage the adoption of advanced technologies developed as a consequence of the research programs in this Act [Pub. L. 102-240, see Tables for classification].

“(4) OBJECTIVES.—The plan shall provide for the following:

“(A) The development, within the shortest period of time possible, of a range of technologies needed

to produce convenient, safe, and affordable modes of surface transportation to be available for public use beginning in the mid-1990's.

“(B) Maintenance of a long-term advanced research and development program to provide for next generation surface transportation systems.

“(5) COOPERATION WITH INDUSTRY.—A primary component of the plan shall be cooperation with industry in carrying out this part [part A (§§ 6001–6024) of title VI of Pub. L. 102–240, enacting sections 325 and 326 of this title, sections 3711b and 3711c of Title 15, Commerce and Trade, section 111 of Title 49, Transportation, and section 1625 of former Title 49, Transportation, amending sections 204, 307, and 321 of this title, section 5316 of Title 5, Government Organization and Employees, sections 3708 and 3712 to 3715 of Title 15, sections 101 and 301 of Title 49, and sections 1607c and 1608 of former Title 49, enacting provisions set out as notes under sections 101, 112, and 307 of this title and sections 111 and 301 of Title 49, and amending provisions set out as notes under section 1608 of former Title 49] and strengthening the manufacturing capabilities of United States firms in order to produce products for surface transportation systems.

“(6) CONFORMANCE WITH PLAN.—All surface transportation research and development within the Department of Transportation shall be included in the plan and shall be evaluated in accordance with the plan.

“(7) COORDINATION.—In developing the plan and carrying out this part, the Secretary shall consult with and, where appropriate, use the expertise of other Federal agencies and their laboratories.

“(8) TRANSMITTAL.—On or before January 15, 1993, and annually thereafter, the Secretary shall transmit the plan to Congress, together with the Secretary's comments and recommendations. The Secretary shall review and update the plan before each transmittal under this paragraph.

“(9) RECOMMENDATIONS FOR ALTERNATIVES.—In the event a different technology or alternative program can be identified that would accomplish the same or better results than those described in this part, the Secretary may make recommendations for an alternative, and shall promptly report such alternative recommendations to Congress.”
